6. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICAL

(U) Since this procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202 (a) (1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would [redacted]

7. DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation. b3 b7E

8. A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF REASONS A MARKET SURVEY WAS NOT CONDUCTED

(U) [redacted] WITT continuously conducts market surveys to determine state-of-the-art technologies. The engineers, technicians, and technical personnel are in constant contact with equipment vendors, other technical members of the intelligence community, as well as visiting trade shows, reviewing trade journals, and browsing the Internet. [redacted] WITT routinely conducts and attends working group (WG) meetings with vendors to assess the capabilities, performance, and quality of equipment that meets the needs of the FBI. [redacted] WITT [redacted] Harris Corporation can provide.

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN

CELLSITE-15612

COMPETITION

(U) [redacted] See paragraph (5) above for facts supporting the use of other than full and open competition. b3 b7E

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED, IN WRITING, AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurements to determine whether full and open competition is appropriate and in the best interests of the government.

12. CERTIFICATIONS

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

Justification for Other Than Full and Open Competition In Accordance With 41 U.S.C. 253 (c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI), [redacted] Operational Technology Division (OTD). The contracting activity is the Engineering Contracts Unit (ECU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(U) The proposed acquisition strategy is to award a non-competitive contract effort for highly-specialized [redacted]

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

b3
b7E

[redacted] The FBI's Wireless Intercept and Tracking Team (WITT) [redacted]

(S) [redacted]

b1
b3
b7E

(U) [redacted] is requesting this sole source procurement with [redacted] The proposed procurement is [redacted] Requisition [redacted] in the amount of [redacted] has been submitted to fund the requirement.

b3
b4
b7E

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. **DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED**

(S)

(S)

b1
b3
b7E

6. **DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE**

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

7. **DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE**

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. **A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED**

(U continuously conducts market surveys to determine state-of-the-art technologies. The engineers, technicians, and technical personnel are in constant contact with equipment vendors, other technical members of the intelligence community, as well as visiting trade shows, reviewing trade journals, and browsing the Internet. routinely conducts and attends working group (WG) meetings with vendors to assess the capabilities, performance, and quality of equipment that meets the needs of the FBI.

b3
b7E

9. **ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN**

COMPETITION

(U) [redacted] See paragraph (5) above for facts supporting the use of other then full and open competition.

b3
b7E

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

JUSTIFICATION FOR OTHER THAN FULL AND OPEN COMPETITION IN ACCORDANCE WITH TITLE 41, UNITED STATES CODE 253(c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U. S. Department of Justice, Federal Bureau of Investigation (FBI), [redacted] Operational Technology Division (OTD). The contracting activity is the Property Procurement and Management Section (PPMS), Telecommunications Contracts and Audit Unit (TCAU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(U) The proposed acquisition strategy is to award a non-competitive contract effort for highly-specialized [redacted]

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

b3
b7E

[redacted] The FBI's Wireless Intercept and Tracking Team (WITT) [redacted]

(U) (S) [redacted] WITT has historically maintains engineering services contracts (ESC) with various commercial entities for the advancement of [redacted] These engineering services efforts have led to the development of the products that meet the FBI's mission for conducting lawful [redacted] WITT has identified the need to [redacted] and in order to provide and maintain capabilities for [redacted]

b3
b4
b7E

(U) [redacted] WITT is requesting this procurement with [redacted] This proposed FY06 procurement is [redacted] Requisition [redacted] in the amount of

~~SECRET~~

CELL/OTD 018397

CELLSITE-15671

[redacted] has been submitted to fund this requirement. b3 b4 b7E

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The Statutory Authority is 41 U.S.C. 253 (c) (6). The Regulatory Authority is FAR 6.302-6 (a) (2), Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

(S) [redacted] b1 b3 b7E

(S) [redacted]

6. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICAL

(U) Since this procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202 (a) (1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would [redacted] b3 b7E

CELL/OTD 018398

CELLSITE-15672

7. DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF REASONS A MARKET SURVEY WAS NOT CONDUCTED

(U) [redacted]WITT continuously conducts market surveys to determine state-of-the-art technologies. The engineers, technicians, and technical personnel are in constant contact with equipment vendors, other technical members of the intelligence community, as well as visiting trade shows, reviewing trade journals, and browsing the Internet. [redacted]WITT routinely conducts and attends working group (WG) meetings with vendors to assess the capabilities, performance, and quality of equipment that meets the needs of the FBI. b3 b7E

[redacted]WITT [redacted]

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U) [redacted]See paragraph (5) above for facts supporting the use of other than full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED, IN WRITING, AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurements to determine whether full and open competition is appropriate and in the best interests of the government.

12. CERTIFICATIONS

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

b7E

<< File [redacted] Overview.pdf >>

SUBMISSION PROCESS

We strive to make the application process as painless as possible. Project submissions can be initiated by completing the [redacted] Submission Template (attached). Do not hesitate to call if you require help with your submission.

<< File [redacted] Submission Template.dotx >>

ASSISTANCE AVAILABLE

~~SECRET~~

CELLSITE-15712

CELL/OTD 08851

Any OTD unit may request a briefing from the [redacted] to gain a thorough understanding of the initiative; goals, core principles, capability bundles, submission process, reporting requirements and the assistance available through the OTD [redacted] Further details may also be found on the [redacted] web page: http://otd.fbinet.fbi/[redacted]

This is your final opportunity to seek FY12 funds. The deadline for new project submissions is July 29, 2011.

Justification for Other Than Full and Open Competition In Accordance With 41 U.S.C. 253 (c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI) Operational Technology Division (OTD). The contracting activity is the FBI Finance Division (FD) and Engineering Contracts Unit (ECU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(U) The proposed acquisition strategy is to award a non-competitive contract effort for

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

(U) is responsible for providing the FBI with

(S)

b1
b3
b7E

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the

~~SECRET~~

number of sources from which it solicits bids or proposals.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

(S)

6. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

b1
b3
b7E

7. DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED

(U)

[redacted]

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U) [redacted] See paragraph (5) above for facts supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

b3
b7E

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

(U) As the Contracting Officer Technical Representative (COTR) of record, I hereby certify to the best of my knowledge that all information contained herein is complete and accurate to the best of my knowledge.

Requirements Analysis

WITT initiative.

WITT

WITT

WITT has

as specified on requisition

Analysis of Alternatives

WITT continuously searches

WITT

Section 508 Statement

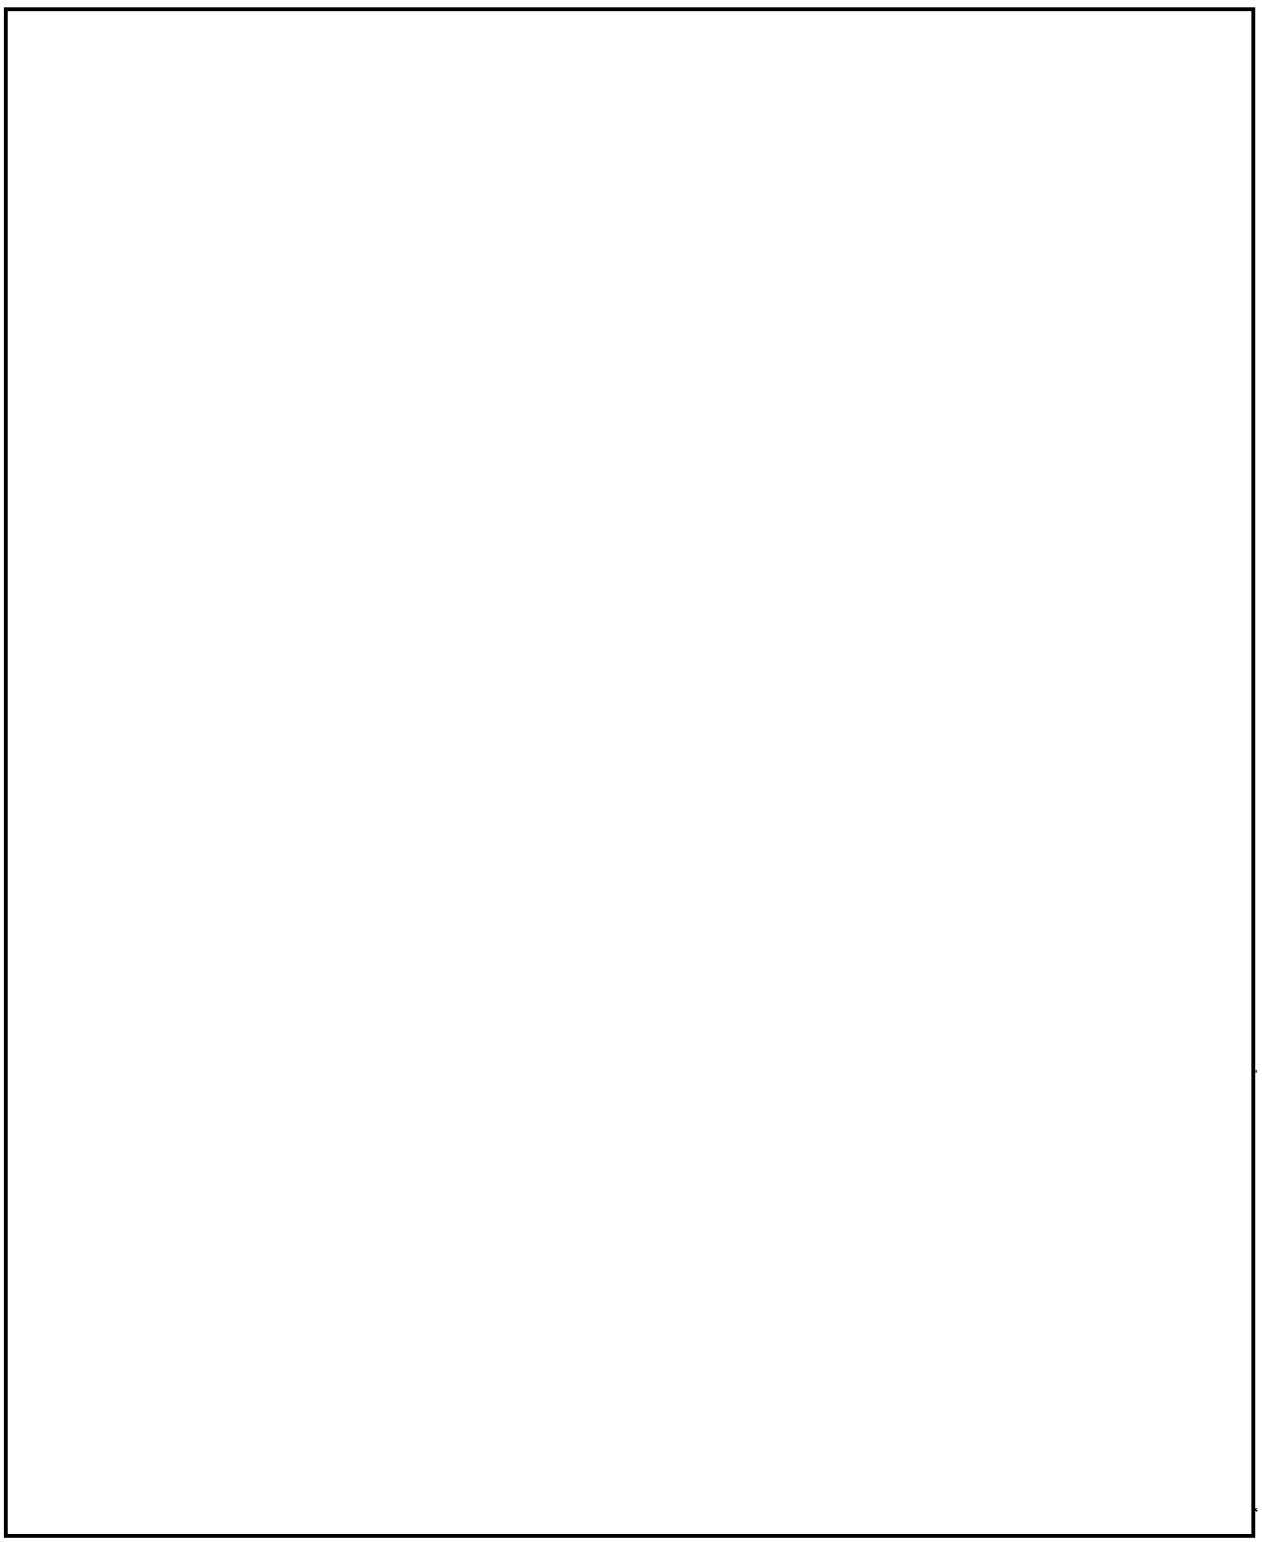
Wireless Intercept and Tracking Team conducted an evaluation of the systems and have submitted the following comments regarding compliance of Section 508 requirements.

b3
b7E

1194.3 General Exceptions

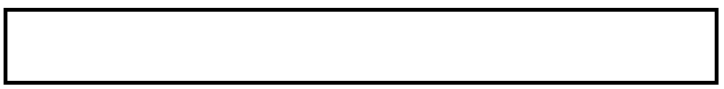
Systems are critical to the direct fulfillment of missions and are not used for routine administrative and business applications.

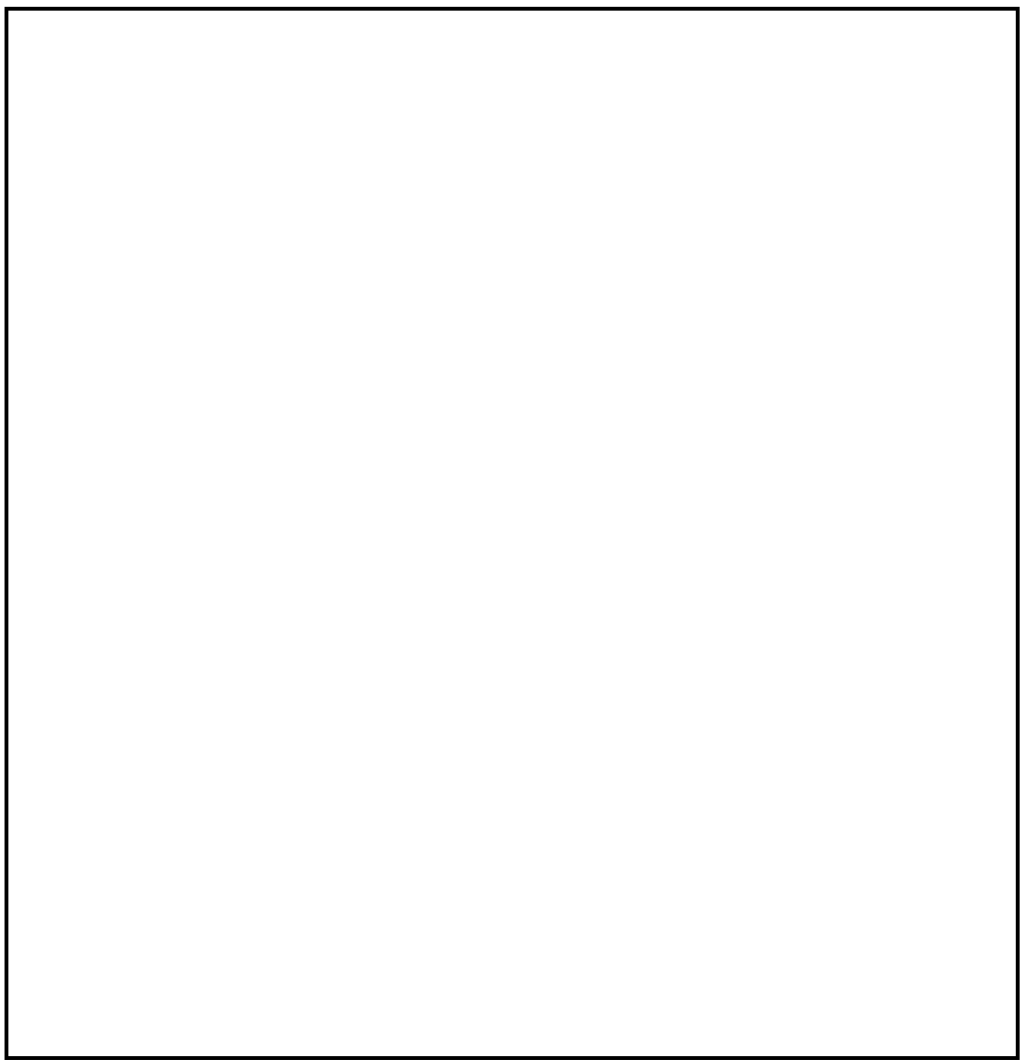
Subpart B -- Technical Standards



b3
b7E

Subpart C – Functional Performance Criteria





b3
b7E

Subpart D – Information, Documentation, and Support

(a) Documentation is offered in hardcopy (paper) as well as softcopy (CD) at no additional charge.
(b) End users are instructed in the product features, visually or through instruction verbally at request, at no additional charge.
(c) Support services accommodate the communication needs of end-users with disabilities.

System Security Plan

A System Security Plan has been completed and in place for use of the [redacted] EC dated 06/30/2004 from Security Division has been attached to requisition package [redacted]

Sole Source Justification

[redacted]

Independent Government Cost Estimate

WITT has submitted a quotation from the vendor, [redacted] which details the cost of this procurement. Pricing is according to GSA price listings.

Life Cycle Cost Estimate

[redacted] WITT estimates [redacted]
[redacted] WITT [redacted]
[redacted]
[redacted] WITT [redacted]
[redacted]

Earned Value Management Plan

[redacted] WITT continuously ensures planning, scheduling, and budget monitoring through its program management efforts. [redacted] WITT has an extensive inventory monitoring systems which is capable of identifying [redacted] which is updated daily for planning purposes. Detailed reports can be generated providing management the proper information to plan [redacted]
[redacted]

b3
b7E

Privacy Impact Assessment

The Office of General Council has been contacted and has reviewed the request for a Privacy Impact Assessment (PIA). [redacted]
[redacted] WITT has
[redacted]

Risk Assessment

[redacted] WITT has identified through research and development efforts that the risk [redacted]
[redacted] WITT has a proven and successful history with the vendor of these systems. The vendor has the technical knowledge and maturity in their products, and the ability to deliver on time. Sufficient funding is also in place for this procurement, and as well as plans for the maintenance over the full lifecycle of these products. Refer to acquisition planning form [redacted] for specific estimates and distribution of costs.

IT ACQUISITION FORM

See next page for instructions, or http://ocio.fbinet.fbi/resources/acquisition.htm	Please attach to front of FD-369. Mail to IMU Acquisition Staff, Room 9991, JEH

1. **Date: Requestor: Phone:**
   Office ID: Cost Code: SP#: FD-369#:

2. IT Product Type(s) Requested and Associated:
   Total Costs: (as funded on the FD-369)

3. Proposed Acquisition Characteristics: ☐ COTS (CR#:) ☐ Existing (Contract #:) ☑ New

4. CIO Category Supported (Select ONE):

5. Director Priorities Supported (Select ONE):

6. Estimated life cycle: years

   a. Will this be attached to a network? No If Yes, which network? Select...

   b. If a request for contractor services, will the contractor also provide h/w or s/w products? Select...
   If Yes, have you notified your ITS? Select... (Ticket #:)

   c. Have you included this system or project as part of your base funding for the next 2 fiscal years? Yes

   d. What IT **system** or **project** does this acquisition support? (Click on system or project to view master lists)

*******Please confirm that the following documents are part of your acquisition package, where applicable.**

7.	Requirements Analysis? Yes	e. Independent Gov't Cost Estimate? Yes	
a.	Analysis of Alternative(s)? Yes	f. Life Cycle Cost Estimate? Yes	
b.	Section 508 statement? Yes	g. Earned Value Management Plan? Yes	
c.	System Security Plan? Yes	h. Privacy Impact Assessment? Yes	
d.	Justification for Limited Competition? Yes	i. Risk Assessment? Yes	

8. If your total acquisition request **exceeds $1million, or is for services only**, please include a one page synopsis of your requirement.

~~SECRET~~

Justification for Other Than Full and Open Competition
In Accordance With 41 U.S.C. 253 (c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI), [redacted] Operational Technology Division (OTD). The contracting activity is the Engineering Contracts Unit (ECU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(U) The proposed acquisition strategy is to award a non-competitive contract effort for [redacted]

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

(U) [redacted] is responsible for providing the FBI with [redacted] The FBI's Wireless Intercept and Tracking Team (WITT) [redacted]

(S) [redacted]

b1
b3
b7E

(U) [redacted] is requesting this sole source procurement with [redacted] The proposed procurement is [redacted] in the amount of [redacted] has been submitted to fund the requirement.

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. **DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED**

(S)

6. **DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE**

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

b1
b3
b7E

7. **DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE**

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. **A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED**

(U)

9. **ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION**

(U [redacted] See paragraph (5) above for facts supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

b3
b7E

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

JUSTIFICATION FOR OTHER THAN FULL AND OPEN COMPETITION IN ACCORDANCE WITH TITLE 41, UNITED STATES CODE 253(c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U. S. Department of Justice, Federal Bureau of Investigation (FBI), [redacted], Operational Technology Division (OTD). The contracting activity is the Property Procurement and Management Section (PPMS), Telecommunications Contracts and Audit Unit (TCAU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(U) The proposed acquisition strategy is to award a non-competitive contract effort for [redacted]

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

(U) [redacted] is responsible for providing the FBI with [redacted] The FBI's Wireless Intercept and Tracking Team (WITT) [redacted]

b1
b3
b7E

(S) [redacted]

(U) [redacted] WITT is requesting this procurement with [redacted] The proposed FY07 procurement is [redacted] Requisition [redacted] in the amount of [redacted] has been submitted to fund this requirement.

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The Statutory Authority is 41 U.S.C. 253 (c) (6). The Regulatory Authority is FAR 6.302-6 (a) (2), Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

provide.

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U) [redacted] See paragraph (5) above for facts supporting the use of other than full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED, IN WRITING, AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurements to determine whether full and open competition is appropriate and in the best interests of the government.

12. CERTIFICATIONS

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

ADDENDUM TO FBI REQUISITION

Requisition originated by the Operational Technology Division, was initially conceived as a "single purchase" contracting action. After additional consideration, it has been deemed to be far more cost effective (In dollars, and man hours) to compete this as an contract action.

b3
b7E

Competing as an action will allow for faster delivery of Additionally, it will reduce the burden that placed on the finance division from processing contracting actions.

The POC for this addendum is ET WITT.

This Statement of Work is for the provision of services to the U.S. Department of Justice, Federal Bureau of Investigation (FBI), Operational Technology Division (OTD)

1.1.1 Identification and Address

United State Department of Justice
Federal Bureau of Investigation
Engineering Research Facility, Building 27958A
Quantico, VA 22135

1.2 Scope

The scope of this requirement includes support for the [redacted] WITT Program. Functional support areas will include [redacted] This support will enable [redacted]

b3
b7E

1.3 Background

[redacted]

2.0 Task

2.1 This is a Firm Fixed Price (FFP) contract anticipated to be awarded under a GSA [redacted] contract.

2.2 System Software Support

Contractor will provide engineering and technical support, as required, to the various [redacted] Contractor will provide technical expertise to support system architecture and design studies and analyses, including engineering tradeoffs across Unit Programs, and related projects. Contractor will undertake special studies and other inquiries as may be assigned and deliver special reports.

2.3 Program Management

Contractor will provide management of FFP efforts to include assignment and management of required staff, timekeeping and invoicing for labor hours, travel costs,

and their direct costs and progress reports. Required documentation will include oral weekly and written monthly progress reports.

3.0 Labor Mix

The FFP effort for this task is one (1) Senior System Engineer/Managing Associate full time equivalent (FTE), one (1) part time Program Manger, and up to 8 staff weeks of similar labor for surge capacity, as required. This effort includes authorized subcontract labor, if any.

4.0 Deliverables

4.1 Contractor will deliver oral weekly and written monthly status reports to the client. The monthly status reports will be delivered no later than the fifteenth (15^{th}) calendar day of the month and will include the status of the work accomplished to date, future plans, financial status to date, and issues/ concerns affecting this Task.

4.2 Contractor will deliver reports and analyses as directed by the COTR in the format specified by the COTR. These will include software code, diagrams, and other documents as required.

5.0 Qualifications

5.2 Senior Systems Engineer

The Senior Systems Engineer will have five (5) or more years of technical experience performing requirements analysis for, and software system design of enterprise-wide or large scale computer systems. The Senior Systems Engineer will have in-depth understanding of structured software analysis and complex architecture design concepts/methods. The Senior Systems Engineer will possess knowledge of commercial operating system software, database management software, diverse application software, and software engineering best practices.

5.3 Program Manager

The Program Manager will have 12 or more years of experience in relevant fields and three years of experience managing technical projects and programs as the single authorized interface with Government management personnel. Requires competence in complete program development from inception to deployment and has a demonstrated ability to provide guidance and direction at the program level. Possess knowledge of best practices in the management and control of personnel, funds, and resources for directing information system programs.

6.0 Administrative Considerations

6.1 Contact Persons

The FBI's Contracting Officer (CO), Contract Specialist (CS), and the Contracting Officer's Technical Representative (COTR) will perform the administration and monitoring of this Work. The COTR will provide all the technical assistance and clarification required, through completion of this Work. FBI contact persons for this Work are as follows:

6.1.1 FBI Contracting Officer (CO)

To be determined

6.1.2 FBI Contract Specialist (CS)

To be determined

6.1.3 Contracting Officer's Technical Representative (COTR)

(*To be determined*)
Contracting Officer's Technical Representative
Federal Bureau of Investigation (FBI)
Engineering Research Facility
Building # 27958A
Quantico, VA 22135

6.2 Place of Performance

Contractor will perform work at FBI-provided facilities. The work identified as Time and Materials will be performed in FBI space. Contractor will attend meetings and make routine visits to the FBI Headquarters and [redacted] at the Engineering Research Facility, Quantico, Virginia, at metro Washington, D.C. locations, as designated by the COTR. The core working hours for FBI provided facilities are 7:30 a.m. to 6:00 p.m., Monday through Friday.

b3
b7E

6.3 Period of Performance

The period of performance will commence from the date of task award to 12 months with one (1) 12-month option.

6.4 Security

6.4.1 Contractor will be required to handle classified and unclassified information during the work. Additional details will be covered in the contract's DD-254.

6.4.2 Contractor personnel involved in this Work may be required to possess security clearances up to the Top Secret level. Contractor personnel involved in this work are required to possess U.S. citizenship.

7.0 Government-Furnished Resources

7.1 Information Sources

The FBI will supply all required information resources needed to undertake and complete this Work. Such resources include agency information resources and documentation. The COTR will provide information relating to the performance of the Work. The COTR will coordinate preparations with Contractor in arranging interface meetings with functional and technical personnel as needed.

7.2 Documentation

The COTR will provide access to available documentation that will be required by Contractor in the performance of this Task Order.

8.0 Contractor-Furnished Resources

Contractor will provide all general and administrative supplies when performing tasks outside Government-provided facilities.

9.0 Other Direct Costs

The only Other Direct Costs (ODC) anticipated are minor costs, such as reproduction costs, local travel, and office automation and data processing equipment for Contractor personnel.

10.0 Evaluation Factors for Award

Award will be made to the offeror whose proposal, conforming to this solicitation, is determined to be the best overall value to the Government. Technical factors are more important than price. Past performance shall be used as a major part of evaluating an offeror's past performance.

10.1 Technical Factors

10.2 Approach

10.1.1 Overall Understanding/Approach

The Offeror shall provide a concise summary of its understanding of the requirement, and describe its general approach to complete tasks specified in paragraphs 3.1 through 3.4 of Section C. This summary shall be evaluated to determine the offeror's grasp of requirements and the comprehensiveness and viability of its approach.

10.2.1 Key Personnel

The Government shall evaluate the quality of the offeror's Key Personnel in terms of their qualifications, experience, and training, especially with regard to the nature of work described in this solicitation.

10.3.1 Past Performance

The Offeror shall describe its past performance on no more than three (3) similar contracts and subcontracts (no more than 2 pages each) held within the last three (3) years. Past performance evaluation questionnaires will be submitted to previous/current clients (Contracting Officer Technical Representative and/or Contracting Officer) and forwarded the Government Contracting Officer for this solicitation.

The Government shall evaluate the quality of the offeror's past performance. Examples of technically relevant performance in support of Law Enforcement activities will receive relatively more credit than non-Law Enforcement performance. The assessment of past performance will be used in two ways.

First, the assessment of the offeror's past performance will be used as one means of evaluating the credibility of the offeror's technical and management proposal volumes. A record of marginal or unacceptable past performance may be considered an indication that the promises made by the offeror are less than reliable. Such an indication may be reflected in the Government's overall assessment of the offeror's proposal. However, a

record of acceptable--or even excellent--past performance will not result in a favorable assessment of an otherwise unacceptable technical or management proposal.

Second, the assessment of the offeror's past performance will be used as one means of evaluating the relative capability of the offeror and the other competitors. Thus, an offeror with an exceptional record of past performance may receive a more favorable evaluation than another whose record is acceptable, even though both may have acceptable technical and business proposals.

In investigating an offeror's past performance, the Government will consider information in the offeror's proposal and information obtained from other sources, including past and present customers and their employees; other Government agencies, including state and local agencies; consumer protection organizations and better business bureaus; former subcontractors; and others.

Evaluation of past performance will be a subjective assessment based on a consideration of all relevant facts and circumstances. It will not be based on absolute standards of acceptable performance. The Government is seeking to determine whether the offeror has consistently demonstrated a commitment to customer satisfaction and timely delivery of quality goods and services at fair and reasonable prices. This is a matter of judgment. Offerors in the competitive range will be given an opportunity to address especially unfavorable reports of past performance, and the offeror's response--or lack thereof-will be taken into consideration.

The Government's conclusions about the overall quality of the offeror's past performance will be highly influential in determining the relative merits of the offeror's proposal and in selecting the offeror whose proposal is considered most advantageous to the Government.

By past performance, the Government means the offeror's adherence to contract schedules, including the administrative aspects of performance; the offeror's control of costs, including costs incurred for changed work, the offeror's reputation for reasonable and cooperative behavior and commitment to customer satisfaction; and, generally, the offeror's business- like concern for the interests of the customer.

10.4.1 Management Approach

The Government shall evaluate the quality of the offeror's Management Approach. The Management Approach will be evaluated in terms of the offeror's ability to direct and control all aspects of performance described in the Statement of Work.

10.5.1 Price

The evaluation of price will be based on fair and adequate price competition. The Government reserves the right to award to other than the lowest proposed price after consideration of all evaluation factors.

The Government will not include proposed prompt payment discounts in its consideration.

11.0 Evaluation of Options

Except when it is determined in accordance with FAR 17.206(b) not to be in the Government's best interests, the Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirements. Evaluation of options will not obligate the Government to exercise the options(s).

12.0 Evaluation Criteria

Proposals will be evaluated to determine the offer(s) most advantageous to the Government. The responses from project/contract references, as well as any other information contained in their proposal and/or available from outside sources, will be utilized in the source selection decision to determine the most advantageous offer (best value) to the Government.

13. 0 Evaluation Factors For Award

Selection of an offeror for award will be based on an evaluation of proposals in the following areas: Technical Factors and Price. The Technical Factors, taken together, are more important than Price.

Among the Technical Factors, Key Personnel and Past Performance are the most important factors and have equal weight.

The remaining Technical Factors, Technical Approach and Management Approach are of equal importance.

For each Technical Factor, except Past Performance, the evaluation will consist of an assessment of the degree to which the services offered in the proposal provide added value, added capability, and/or reduced risk. In addition, the evaluation will identify the strengths, weaknesses, and risks in each offeror's proposal based on the evaluation factors identified herein.

Offerors that, because of a lack of relevant past performance, are unable to provide the project/contract references requested will receive a Neutral rating for that item.

Although price is considered secondary to technical capabilities, it will be a significant criterion for award as part of an integrated assessment with the Technical Factors, which are intended to identify those Offerors with the knowledge, expertise, experience, and the resources to fulfill the requirements of the contract.

Requirements Analysis

The Wireless Intercept and Tracking Team (WITT)

WITT have determined

WITT has identified

as specified on requisition

Analysis of Alternatives

WITT continuously

b3
b7E

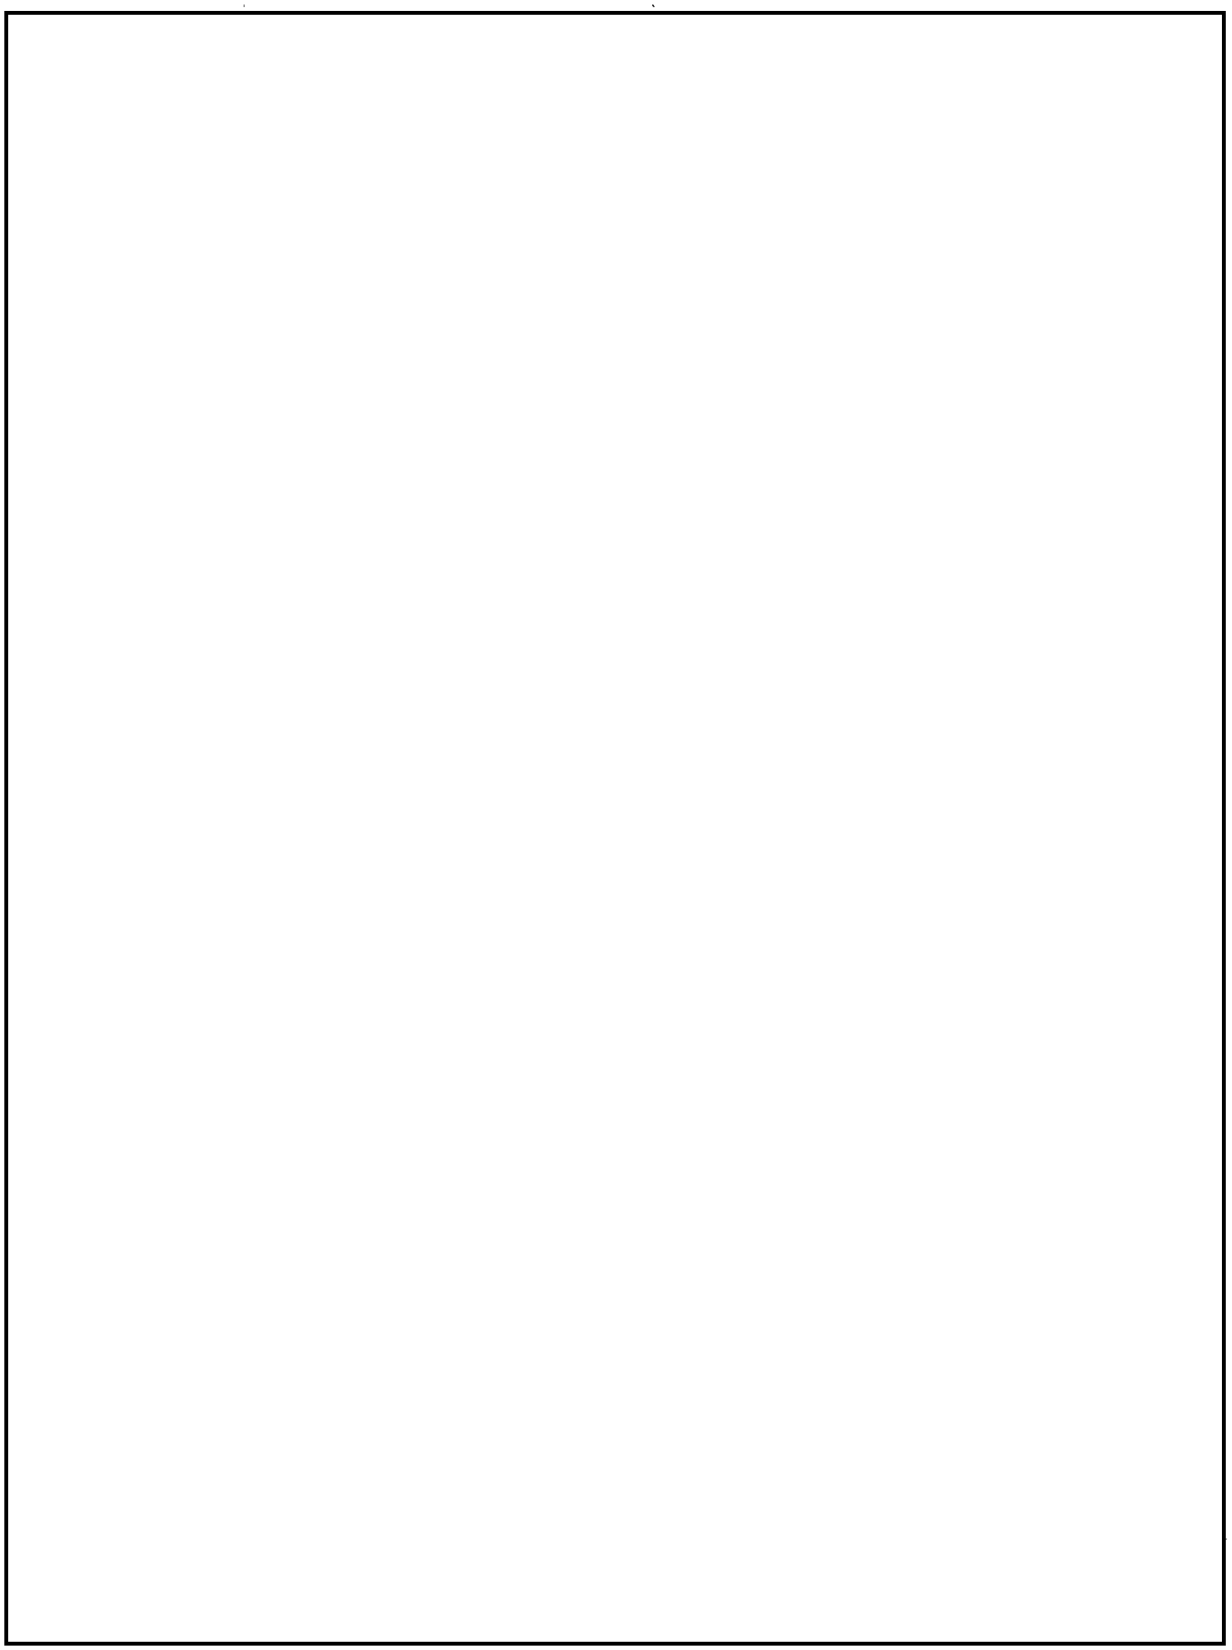
Section 508 Statement

Wireless Intercept and Tracking Team conducted an evaluation of the systems and have submitted the following comments regarding compliance of Section 508 requirements.

1194.3 General Exceptions

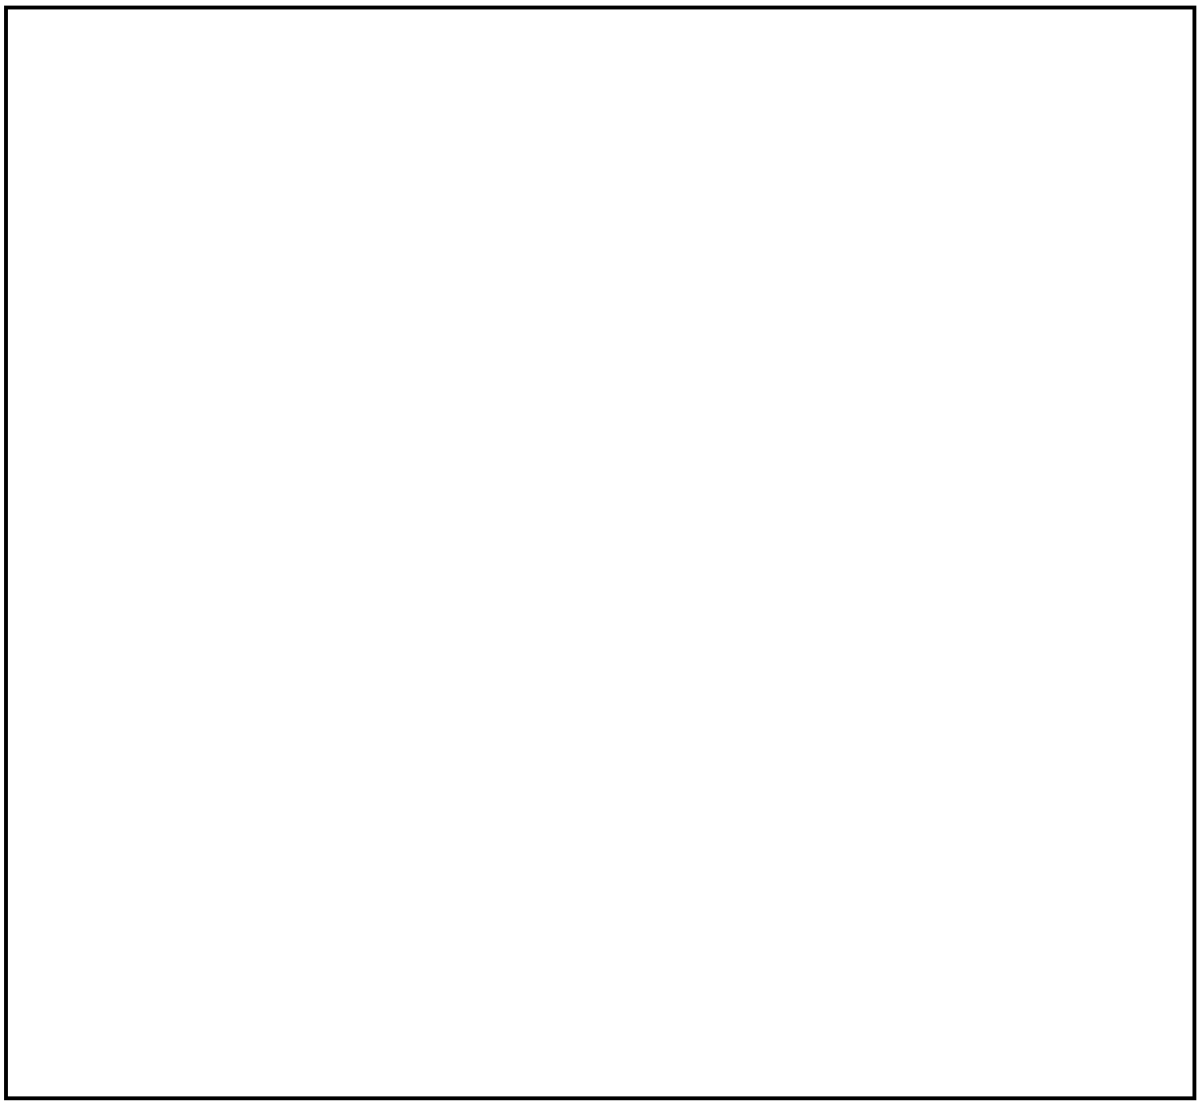
Systems are critical to the direct fulfillment of missions and are not used for routine administrative and business applications.

Subpart B -- Technical Standards



b3
b7E

Subpart C – Functional Performance Criteria



b3
b7E

Subpart D – Information, Documentation, and Support

(a) Documentation is offered in hardcopy (paper) as well as softcopy (CD) at no additional charge.
(b) End users are instructed in the product features, visually or through instruction verbally at request, at no additional charge.
(c) Support services accommodate the communication needs of end-users with disabilities.

System Security Plan

A System Security Plan has been completed and in place for use of the laptop controllers used to control the systems. EC dated 06/30/2004 from Security Division has been attached to requisition package

Sole Source Justification

Independent Government Cost Estimate

WITT has submitted a quotation from the vendor, which details the cost of this procurement. Pricing is according to GSA price listings.

Life Cycle Cost Estimate

WITT

WITT currently

Earned Value Management Plan

WITT continuously ensures planning, scheduling, and budget monitoring through its program management efforts. WITT has an extensive inventory monitoring systems which is capable of identifying regions that require more/less equipment, which is updated daily for planning purposes. Detailed reports can be generated providing management the proper information to plan future procurements and deployments as the need arises.

b3
b7E

Privacy Impact Assessment

The Office of General Council has been contacted and has reviewed the request for a Privacy Impact Assessment (PIA).

WITT has

Risk Assessment

WITT has identified through research and development efforts that the risk of these systems not satisfying missions undertaken to be low. WITT has a proven and successful history with the vendor of these systems. The vendor has the technical knowledge and maturity in their products, and the ability to deliver on time. Sufficient funding is also in place for this procurement, and as well as plans for the maintenance over the full lifecycle of these products. Refer to acquisition planning form for specific estimates and distribution of costs.

IT ACQUISITION FORM
INSTRUCTIONS FOR USE

Step 1	Please fill out your name, telephone number, office ID (i.e., NY, IP, ITOD, etc.), Spending Plan number (SP#) if known, and the FD-369 number (in case this form is separated from the FD-369).
Step 2	
Step 3	The intent of this section is to assist Finance Division (FD) in planning for resource allocation based on the proposed acquisition method for purchasing the IT Product(s). Reminder, as of May 1, 2004, **all** acquisition requests for non-standard, non-baseline IT Product(s) must be entered into the ITATS/**COTS** application via the Service Center (Field, check with your senior ITS, or HQ, your administrative office, to confirm who has access to the Service Center) and receive a Change Request number (**CR#**) before FD will process the acquisition. If this is an amendment or increase to an existing contract, please provide the current contract number (**Contract#**). **New** is self-explanatory.
Step 4	This section is intended to highlight which of the Chief Information Officer's (CIO) IT system or project categories are supported by this acquisition: Investigative, Intelligence & Analytical (**IIA**), Electronic Surveillance Collection (**ESC**), Law Enforcement Support (**LES**), Administrative/Managerial Support (**AMS**), Core Infrastructure (**CORE**), or Information Assurance & Security Related (**IAS**). Select only ONE. See EC, Case ID# 66F-HQ-A1188261-B Serial 172.
Step 5	This section is intended to highlight which of the Director Priorities are supported by this acquisition: **1.** Protect the United States from terrorist attack; **2.** Protect the United States against foreign intelligence operations and espionage; **3.** Protect the United States against cyber-based attacks and high-technology crimes; **4.** Combat public corruption at all levels; **5.** Protect civil rights; **6.** Combat transnational and national criminal organizations and enterprises; **7.** Combat major white-collar crime; **8.** Support significant violent crime; **9.** Support federal, state, local and international partners; **10.** Upgrade technology to successfully perform the FBI's mission. Select only ONE.
Step 6	This section is intended to ensure that you have properly planned for all the enterprise architecture (EA), budget and life cycle management costs regarding your acquisition. In other words, have you planned: **a.** How the product will work within, or the impact on, the FBI's EA; **b.** When acquiring services, will the Contractor provide the hardware or software product(s) and how those products will impact the FBI's EA; **c.** How will the acquired product(s) be maintained over the next two years; **d.** If the product(s) will be integrated into an IT system or project as listed under the six (6) IT categories from Step 4, and the name of the system or project.
Step 7	This section is intended to ensure that you have completed all the necessary contractual documents for the method of acquisition you are pursuing. If you are unsure or unaware of whether any of these documents are required, please contact either for assistance.
Step 8	Self-explanatory.
Step 9	This section is mandatory and is intended to ensure that the proper level of authority has been obtained in order to process this acquisition. You are only responsible to obtain the **Customer Signature** and **Division Signature.** The Customer Signature should reflect the actual recipient of the IT product(s), in case the Requestor filling out this form is different. The Division Signature should reflect that the fiscally responsible person within the Customer's division has acknowledged the stated costs and funds are available for commitment and obligation. The fiscally responsible person is the person recognized by FD as having the authority to approve acquisitions at certain funding levels, and FD keeps this list. Contact you are unsure who has proper funding authority.

~~SECRET~~

JUSTIFICATION FOR OTHER THAN FULL AND OPEN COMPETITION IN ACCORDANCE WITH TITLE 41, UNITED STATES CODE 253(c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U. S. Department of Justice, Federal Bureau of Investigation (FBI), [redacted] Operational Technology Division (OTD). The contracting activity is the Property Procurement and Management Section (PPMS), Telecommunications Contracts and Audit Unit (TCAU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(U) The proposed acquisition strategy is to award a non-competitive contract effort for [redacted] Harris Corporation [redacted]

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

(U) [redacted] is responsible for providing the FBI with [redacted] The FBI's Wireless Intercept and Tracking Team (WITT) [redacted] b3 b7E

(U) [redacted] WITT [redacted] Harris Corporation [redacted] Harris Corporation [redacted] WITT has [redacted] of Harris [redacted]

(U) [redacted] WITT [redacted] Harris Corporation. This proposed FY06 procurement is [redacted] Requisition [redacted] in the amount of

~~SECRET~~

6. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICAL

(U) Since this procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202 (a) (1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

7. DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE

b1
b3
b7E

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF REASONS A MARKET SURVEY WAS NOT CONDUCTED

(U) WITT

COMPETITION

(U) [redacted] See paragraph (5) above for facts supporting the use of other than full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED, IN WRITING, AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurements to determine whether full and open competition is appropriate and in the best interests of the government.

12. CERTIFICATIONS

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

Introduction

Scope of Document

This document describes the activity to be executed and the deliverables required by the Federal Bureau of Investigation in relation to [redacted]

This document will be part of the contract and shall serve as an applicable document throughout the execution of the work, with amendments as agreed to at Contract Review (CR) meetings, if appropriate.

Contract Type Contemplated

Cost Reimbursement

Period of Performance

The length of this activity shall be from date of award 8 months. This activity may be incrementally funded, which may result in extensions to the end date of this activity.

Security

This activity shall be at the security level, ~~SECRET (S).~~

Scope of Authority

The offeror is advised that the Contracting Officer is the only person who can legally obligate the Government for the expenditure of public funds in connection with this procurement, and that only the Contracting Officer or the COTR is authorized to accept or reject deliverables.

Presentation and Demonstration

- The contractor shall provide presentations/and or demonstrations which shall reflect the results of these methodologies.

Proposal Submission

The FBI will request proposals for this task, Request for Proposal (RFP). The contractor shall submit a written cost and technical proposal for consideration before the due date and time for this RFP. This proposal shall be for a Cost Reimbursement Type of Task Order, and as a result, the contractor shall submit a payment schedule as part of the cost proposal

Travel

As part of the Cost Proposal, the contractor shall provide all anticipated travel costs, if known, to include: origination; destination; number of trips; number of persons; and a breakdown of lodging, meals, transportation and related costs. Actual expenses are limited by the Government Travel Regulations and must be pre-approved by the FBI.

Other Direct Costs (ODCs)

The contractor shall provide a breakdown of any ODCs in the Cost Proposal. The breakdown shall include an identification of any "open market items" or the contracting vehicle used for the ODCs.

Deliverables and Reports

The contractor shall provide the following deliverables and reports:

- DRAFT RESEARCH REPORT: The Contractor shall deliver to the Government a draft research report describing its research and evaluation performed in accordance with sub section titled, Task Description. If the research indicates that methods described above are not reflective of a realizable solution, the reports shall contain contractor's recommendations and/or modifications for improvement. The report shall cite, reference or describe all data, data sources, methodologies, findings, and determinations used or discovered during the research and evaluation.
- FINAL RESEARCH REPORT: The Contractor shall deliver a final research report that embodies the draft research report and also addresses or incorporates, as appropriate, all comments or questions from FBI that were submitted to the Contractor in response to the draft research report.

The draft and final research reports shall be submitted in both hard copy and electronic copy, with electronic versions in MS Word format (or MS Excel if applicable). Delivery by email is not acceptable.

Other Reporting Requirements

The contractor shall provide a status briefing and report to the FBI every 3 months from the start date of the activity. This briefing should contain at a minimum the following:

Reporting Period Information

1. A narrative review of work accomplished during the reporting period and significant events.
2. Problem areas
3. Anticipated activity for the next reporting period
4. Description of any travel or unique services provided
5. Other relative information as necessary

In addition the contractor shall provide the following:

- The contractor shall inform the COR in writing of the actual task starting date on or before the starting date.
- The contractor shall bring problems or potential problems affecting performance to the attention of the COR as soon as possible. Verbal reports will be followed up with written reports when directed by the COR.
- The contractor shall notify the COR when 75 % of the task has been expended.
- Additional written reports may be required and negotiated.

(U) (S) **2.0 REQUIREMENTS AND DELIVERABLES**

(U) 2.1 TASKING

(U) Work under this SOW shall be task-oriented. Each task shall be coordinated with the Contractor by the Contracting Officer's Technical Representative (COTR) and awarded on a task by task basis through the Contracting Officer (CO). As indicated in each Task Order (TO) SOW, the Contractor shall provide services to include the following:

- Engineering Services for
- Providing and enhancing systems
- Systems
- Systems quality assurance;
- Systems
- Reporting, tracking, documentation development, and presenting;
- Project management to include scheduling, cost management, process analysis and evaluation, project control, and risk management.

(U) The CO shall specify the intended pricing type, firm fixed-price or cost-plus fixed fee, during request for TO proposals. Reference the solicitation documentation for additional information regarding "Ordering Procedures."

(U) For key personnel, the COTR shall require the Contractor to provide a resume demonstrating experience, skills, and education. Once key personnel are approved by the FBI, replacement of those personnel on by the Contractor is subject to review and approval by the COTR. All Contractor personnel shall possess the knowledge and skills necessary to complete the work identified by the FBI.

CELL/OTD 022735

(U) The Contractor shall be expected to apply a broad base of engineers and support personnel with varying backgrounds in order to maintain the efforts under this contract. At a minimum, the Contractor shall include a copy of the job descriptions to include experience levels and formal education required for each labor category presented in the proposal.

(U) Services provided under each TO shall be performed in accordance with this SOW for the contract as well as contractual terms and conditions. All services and enhancements under this contract shall be conducted with all appropriate legal authority.

(U) (S) 2.2 REQUIREMENTS

The Contractor shall meet the system level criteria for performance as stated below:

(S)

(S)

(S)

(S)

(S)

(S)

b1
b3
b7E

(U) 2.2.7 The Contractor system shall require [redacted] and any [redacted] features under this contract to ensure such use are limited to personnel with the required authority.

(U) 2.3 DELIVERABLES

(U) The Contractor shall provide any of the following as required in specific Task Order requirements documentation:

CELL/OTD 022736

- Project Deliverables
  - [redacted]
  - [redacted]
  - Production Run Equipment
- Documentation
  - White Paper Study Reports
  - Baseline Design Documentation
  - Monthly Project Status Reports
- Meetings or Briefings
  - Kick-Off, Program Management, Status or Technical Integration Meetings
  - Review or Technical Briefings to include any required materials

b3
b7E

(U) 3.0 REPORTING AND STATUS REVIEW REQUIREMENTS

(U) 3.1 Project Progress Reports: Project progress shall be reported to the COTR on a monthly basis. At a minimum, the report shall include the following information per Task Order: technical accomplishments and status, upcoming milestones, issues/concerns/risks, action items, and projected cost or schedule overruns.

(U) 3.2 Other Reports: Other reports that may be required by the contractor on a per-task order basis shall include:

- Test Procedures Report
- Installation Report
- [redacted]
- System [redacted]
- Training Plans and Manuals
- Task Order Closeout Report
- Contract Closeout Report

(U) 3.3 Phase Review Meetings: Formal phase review meetings shall be conducted at a minimum at the conclusion of each Task Order Phase and include reports for project plans, status, and results.

(U) 3.4 Other Review Meetings: Other meetings that may be required by the contractor on a per-task order basis shall include:

- Monthly or Periodic Technical Integration Meetings - To review technical progress, address any technical challenges and barriers, and communicate with project team
- System Requirements Review - To review and baseline the requirements to be satisfied by the proposed system (product)
- Preliminary Design Review - To review and concur on initial system design concepts including exploitation techniques and implementation methodology
- Critical Design Review - To review and approve final system design
- Test Readiness Review - To review test readiness and authorize initiation of testing

CELL/OTD 022737

- Operational Readiness Review - To review operational readiness and officially accept system (product)

(U) (S) **4.0 SPECIAL CONSIDERATIONS**

(U) 4.1 Health and Safety

(U) In certain configurations if the Contractor systems [redacted] the Contractor shall provide information regarding these topics in writing and make recommendation to reduce such risk.

b1
b3

4.1 Security Standards and Regulations

(U) SECURITY STATEMENT: This program, all documentation, all associations, all stated and implied requirements and all personnel must adhere to and meet security requirements. Any breech of security will result in immediate termination of the program and possible repercussions, both contractual and criminal. All dissemination of the program and contract information outside those parties designated by the COTR must be approved in writing by the COTR, to include, but not limited to, partners, technical and contract information and personnel. This program in its entirety is restricted from any and all disclosure to any entity considered foreign to the United States. The contractor shall set up procedures to insulate the program procurement or parts and protection of program information as agreed upon by the COTR.

5.0 Customer Representative

The Contracting Officer (CO) is the only person from the FBI with the authority to negotiate contractual issues or changes and obligate funding. The Contractor is responsible for any changes made without authorization of the CO.

UNCLASSIFIED
NON-RECORD

H [redacted]

I reviewed the Action Items in red that were sent out to OTD from [redacted] regarding a request for acquisition plans (AP). This requirement is for FY12 APs only. I verified with [redacted] and because the [redacted] contract is an FY11 requirement, she will not need a copy of the AP. [redacted] will provide her with a copy once they have finalized the document and assigned an AP #.

CELL/OTD 022987

I will review the AP[redacted] sent out for [redacted] and provide any recommendations by the end of the week (worst case early next week). I will also verify the process for acquiring the remaining signatures and get back to you with an answer.

Have a good day,

[redacted]

Hello [redacted]

[redacted] s on her way to [redacted] with classified docs to fax your way. You should be hearing from her about 11:45am. She will be faxing the following:

- [redacted] Technical Proposal
- [redacted] Technical Proposal

We will also be mailing/FedExing the following:

- [redacted] Technical Proposal on CD (classified)
- [redacted] Cost Proposal on CD (unclassified)
- [redacted] Technical Proposal on CD (classified)
- [redacted] Cost/Technical Proposal on CD (unclassified)

b3
b6
b7C
b7E

The [redacted] Cost Proposal will be transmitted next week per our discussion earlier this morning.

Also attached to this email are the [redacted] Cost/Technical proposal and the [redacted] Cost Proposal and associated cover letters. Sorry the cover letters were addressed only to [redacted] is out this week and [redacted] was used to addressing to [redacted]

Let's keep our fingers crossed for the FAX working☺

RECORD 268-HQ-1068430

Hi [redacted]

This is the write up for the [redacted] review. Please forward to [redacted] if there are no more additional issues.

[redacted]

Evaluation:

Technical:

The technical portion of the proposal is complete and sufficient, which also meets our desired objectives.

Finance:

The financial portion of the proposal provided sufficient information to allow us to manage costing and accounting during the task execution.

CODE FACILITY CODE

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

☐ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offers ☐ is extended, ☐ is not extended.

Offers must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended, by one of the following methods:

(a)By completing items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment your desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPIRATION DATA (If required)

13. THIS ITEM ONLY APPLIES TO MODIFICATION OF CONTRACTS/ORDERS. IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

CHECK ONE	
	A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.
	B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(b).
	C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:
X	D. OTHER (Specify type of modification and authority) FAR 32.7 Funding

E. IMPORTANT: Contractor ☐ is not, ☒ is required to sign this document and return 1 copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)

The purpose of this modification is to provide incremental funding for ongoing engineering services under the [redacted] effort in the amount of [redacted] The period of performance is 6/4/10-6/4/11. All work shall be performed in accordance with the Statement of Work and the terms and conditions of the Contract. All technical guidance will be provided by [redacted] for this effort. Contractor exceeds funding at own risk.

[redacted]

Subject: [redacted]

Dear [redacted]

Please find enclosed a copy of the Statements of Work (SOW) for engineering services developed by the Federal Bureau of Investigation (FBI).

The FBI is interested in obtaining a proposal for this task to be performed in accordance with the subject Contract. Contractor shall provide technical and cost proposals to support tasking as set forth in the Statement of Work.

If there are any question regarding this SOW please submit them to my office within the next five (5) business days.

b3
b6
b7C
b7E

It is therefore requested that your company review the enclosed SOW and if the proposed contract vehicle is appropriate, Cost-Plus Fixed Fee (CPFF), a cost and technical proposal should be submitted in accordance with the terms and conditions of the FBI's Contract prior to but no later than August 3, 2010 1:00 PM EST. Unclassified proposals maybe email to [redacted]

Should you have any questions concerning this matter, please contact me a[redacted] response may be faxed t[redacted] secure fa[redacted]

Sincerely,

[redacted]
Contracting Officer

Good Afternoon,

Thank you for taking the time to discuss [redacted] and other action items today on conference call. Please find the attached response to the list of action items from our 6/23/10 program meeting and other referenced topics from our conversation earlier today. I wrote the letter prior to our discussion, as a result, please be advised, some information may be redundant.

If you would like a signed copy of the letter please let me know to which # you would like me to fax it.

Have a good day.

Good Afternoon [redacted]

We have reviewed our records and it appears we processed the Invoice #6 we originally received (Attachment 1). I expedited the payment process for the difference and was able to submit the Invoice for the remaining balance to our payment office today. It should be rectified in a few days.

Could you please give a short summary of the work that was completed under th[redacted]illing for Invoice #8? I thought we had completed this project; or are these the hours you estimated would be required for clean up and mailing back [redacted] Should we anticipate any other invoices under [redacted]

b3

I've finished running through the figures for th[redacted] Estimate at Completion figures. Attached is my summary of remaining funds which differ slightly to your February EAC since I added actuals from the last few months and other residual funding on the PO. Please review and let me know when you would like to discuss the differences. I've included a quick explanation to assist in your review. Please let me know if you have any questions.

Thank you again for all your assistance,

Hi [redacted]

To summarize our meeting today:

- A summary of the FBI's intention for the remaining funds on [redacted] is coming via e-fax
- I have reached out again for direction and decision regarding the [redacted] ECP – hope to provide an answer by end of week if possible
- The FBI was notified of [redacted] rate changes and will anticipate a 9th Voucher fo [redacted] to cover these changes
- [redacted] Invoicing of Lines out of order – the FBI will handle any administration internally, please disregard any prior inquires on this topic
- I will also reached out regarding the anticipated testing and hope to discuss with [redacted] on Monday when returns to the office.

Thanks,
[redacted]

H [redacted]

I just faxed you the following documents: [redacted] Clarification Letter + Questions for Clarification (3 pages); 2) Mod 1 to [redacted] + SF-30 providing Mod 2 to the service agreement for the PO.

Below is also a proposed brief list of the topics for discussion on Tuesday 8/31/10. We are not bound to these topics – I'd like to allow for flexibility for discussion day of.

- Contract Administration of Task Order Letter Proposals
- Consolidated Updated [redacted] Contract Pricing
- [redacted]
- [redacted]
- Intellectual property rights clarification
- [redacted] Official Letter from [redacted] providing current status:
  - What documentation or requests were submitted and for what [redacted]
  - What is the current status of documentation, etc.?

Please let me know if you have any questions or additions to the list above. Please let me know you received the fax.

Thanks again for all your help,

[redacted]

DECLASSIFY ON: 04-15-2038

Justification for Other Than Full and Open Competition
In Accordance With 41 U.S.C. 253 (c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI), Tracking Technology Unit (TTU), Operational Technology Division (OTD). The contracting activity is the Finance Division, Engineering Contracts Unit (ECU).

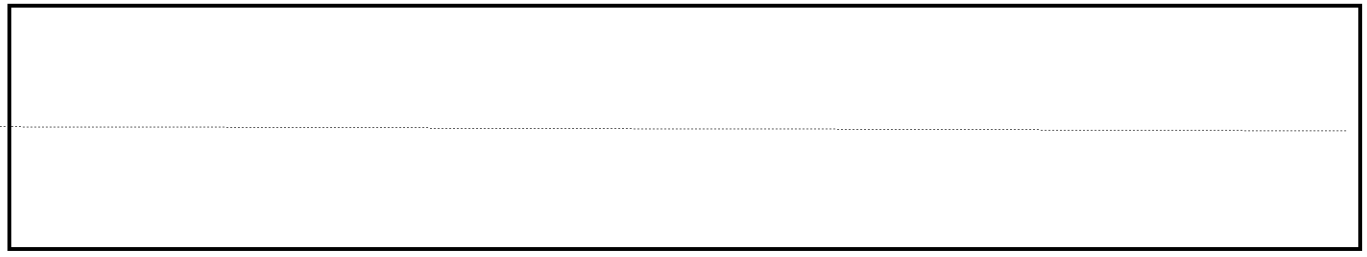
2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

b1
b3
b7E

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

(S)

(S)



4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

b1
b3
b7E

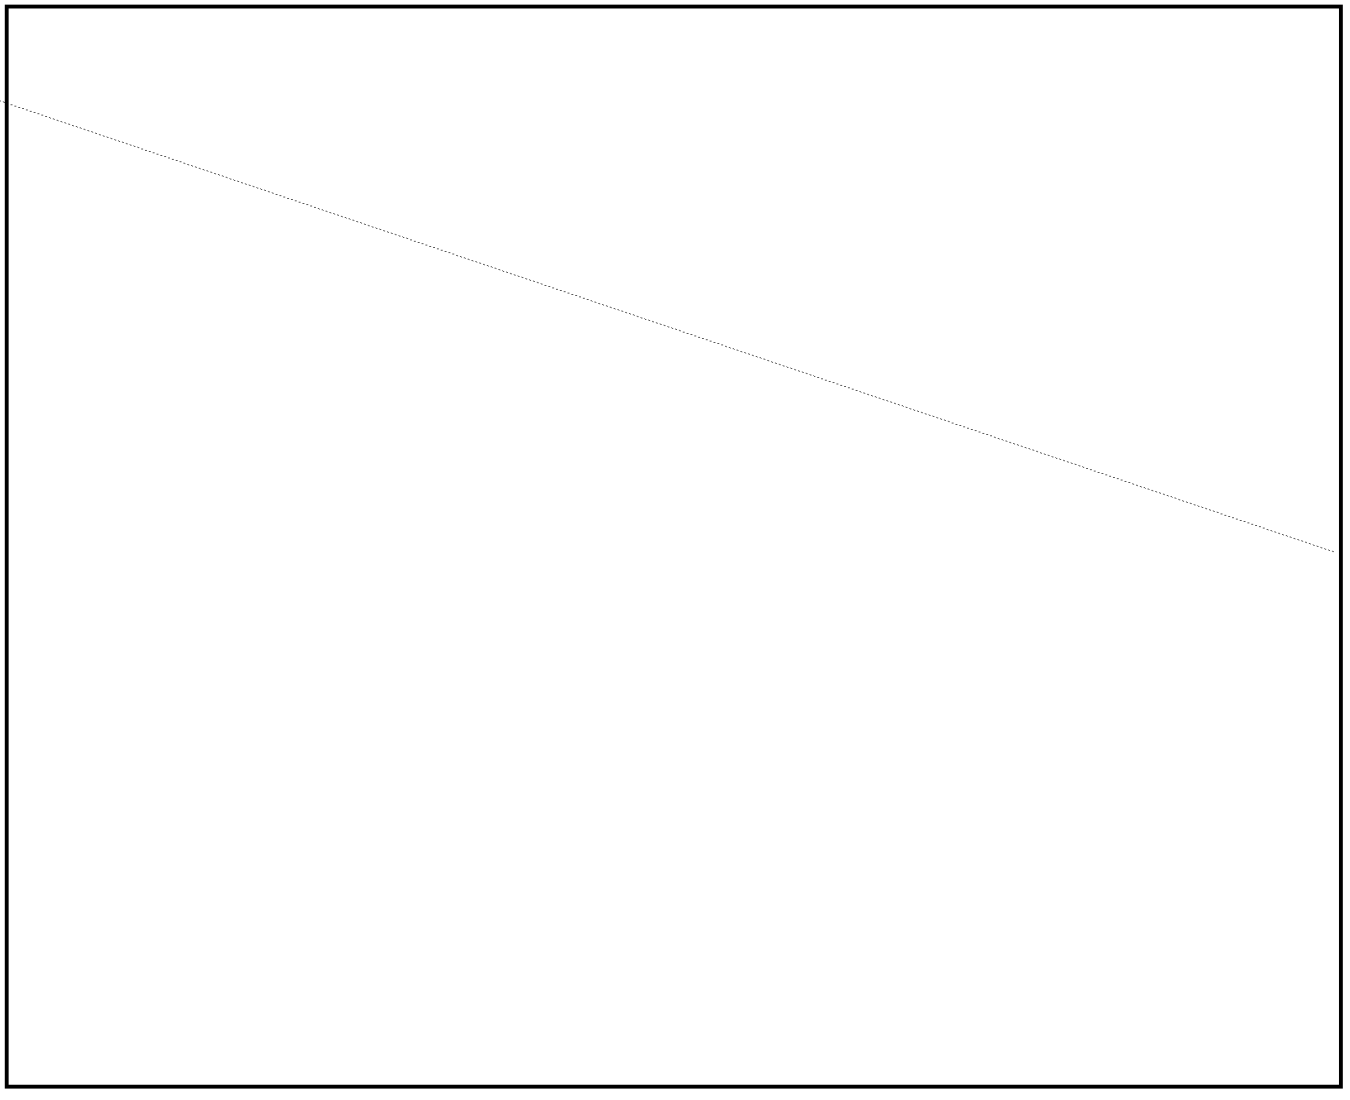
5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

(S)



(S)

6. **DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE**

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

b1
b3
b7E

7. **DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE**

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. **A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED**

WITT, continuously conducts

WITT routinely conducts

WITT assessed

ITTU/WITT intends to

in areas

9. **ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION**

(U) See paragraph (5) above for facts supporting the use of other then full and open competition.

CELL/OTD 024925 CELLSITE-18447

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

b6
b7C

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

(U) As the Contracting Officer Technical Representative (COTR) of record, I hereby certify to the best of my knowledge that all information contained herein is complete and accurate to the best of my knowledge.

SPECIAL CONSIDERATIONS/CONSTRAINTS

(U) Program technical risks are mitigated by securing an alternative solution provider, fostering competition among qualified vendors to provide the optimal solution, use of commercial and government controlled interface standards, implementation of commercially available sub-components and utilization of pre-existing FBI technology. The [redacted] contract will define, integrate and extend Commercial Off the Shelf (COTS) and Government Off the Shelf (GOTS) [redacted] By basing the program on previously developed and tested [redacted] significant risk has been removed.

Justification for Other than Full and Open Competition
In Accordance With 41 U.S.C. 253 (c)(1)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The Federal Bureau of Investigation's (FBI) Quantico Contracts Unit (QCU) has prepared this Justification for Other Than Full and Open Competition in response to a requirement from the Operational Technology Division (OTD), [redacted] Tracking Technology Unit (TTU), for the establishment of a delivery order for [redacted] [redacted]

b1
b3
b7E

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(U) The proposed Firm-Fixed Price delivery order has a total estimated value of [redacted]

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

(S) [redacted]

(U) The purchase order will be Firm-Fixed Priced with an estimated value of [redacted] Requisition [redacted] in the amount of [redacted] is being used to fund this acquisition.

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) This contract action is authorized by 41 U.S.C. 253(c)(1), as set forth in the Federal Acquisition Regulation (FAR) 6.302-1, "Only one responsible source and no other supplies or services will satisfy agency requirements.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

(S) [redacted]

(S)

6. **DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE**

b1
b3
b7E

(U) This requirement will be posted on Federal Business Opportunities, therefore any company that is an authorized reseller of the requested items will have an opportunity to submit a quote.

7. **DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE**

(U) The Contracting Officer will ensure that the anticipated cost to the Government will be fair and reasonable. Techniques may include an analysis of propose direct costs, audit or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, comparison of proposed rates to published rates, and rigorous negotiation.

8. **A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED**

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the

~~SECRET~~

number of sources from which it solicits bids or proposals.

5. **DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED**

b1
b3
b7E

(S)

6. **DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE**

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

7. **DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE**

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. **A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED**

CELL/OTD 025032
CELLSITE-18548

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

b7E

(U) [redacted] See paragraph (5) above for facts supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

Justification for Other Than Full and Open Competition
In Accordance With 41 U.S.C. 253 (c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI), Tracking Technology Unit Unit (TTU), Operational Technology Division (OTD). The contracting activity is the Engineering Contracts Unit (ECU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(S)

b1
b3
b7E

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

(S)

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE

CELL/OTD · 025078

CELLSITE-18590

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U) See paragraph (5) above for facts supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

b6
b7C
b7E

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

JUSTIFICATION FOR OTHER THAN FULL AND OPEN COMPETITION IN ACCORDANCE WITH 41 U.S.C. 253(c)(6)

1. **Identification of the agency and the contracting activity:**

(S)

b1
b3
b7E

2. **Nature and/or description of the action being approved:**

(S)

3. **Description of the supplies or services (including estimated value):**

(S)

~~Derived From: G3~~
~~Declassify On: 6/12/2033~~

4. **Statutory Authority:**

(U) This procurement action is authorized by 41 U.S.C. 253(c)(6), as set forth in Federal Acquisition Regulation (FAR) Part 6.302-6.

~~SECRET~~//20330612

CELL/OTD 025112
CELLSITE-18622

5. **Demonstration that the nature of the acquisition justifies the use of the above authority:**

b1
b3
b7E

(S)

6. **Efforts made to ensure offers are solicited from as many potential sources as practicable, including compliance with subpart 5.2 and, if not, which exception under FAR 5.202 applies:**

(S)

(U) Full and open competition of this procurement could provide adversaries of the FBI with insight into areas of interest to the FBI.

no advertisement will be made.

7. **Determination that the anticipated cost to the Government will be fair and reasonable:**

(U) A price analysis will be conducted by the Contracting Officer prior to award to determine that all prices are fair and reasonable.

8. **Market Survey:**

9. **Any other facts supporting the use of other than ful and open**

CELL-OTD 025113

CELLSITE-18623

competition:

(U) See paragraph (5) above for the facts supporting the use of other than full and open competition.

10. **A listing of the sources, if any, that expressed in writing an interest in the acquisition:**

(U) Since the procurement was not publicized pursuant to FAR 5.202(a)(1), no other commercial sources were given the opportunity to express written interest in this procurement.

11. **A statement of the actions, if any, the agency may take to remove or overcome any barriers to competition before any subsequent acquisition for the supplies or services are required:**

(U) The FBI will continue to do market surveys to identify potential sources on subsequent acquisitions. TTU has a successful record of finding and developing new contractors.

Conclusion:

Justification for Other Than Full and Open Competition
In Accordance With 41 U.S.C. 253 (c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI), Tracking Technology Unit (TTU), Operational Technology Division (OTD). The contracting activity is the Engineering Contracts Unit (ECU).

b1
b3
b5
b7E

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(U) ~~(X)~~

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

(S)

~~SECRET~~

~~Derived From: FBI NSISCG 20090615~~
~~Declassify On: 20350228~~

(S)

b1
b3
b5
b7E

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

(S)

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

(U) X

(S)

6. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE

~~Derived From: FBI NSISCG - 20090615~~
Declassify On: 20350228

CELL-OTD 025137 CELLSITE-18646

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would [redacted]

[redacted]

7. DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED

[redacted]

b3
b7E

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U) [redacted] See paragraph (5) above for facts supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate and in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

Justification for Other Than Full and Open Competition In Accordance With 41 U.S.C. 253 (c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI), Tracking Technology Unit (TTU), Operational Technology Division (OTD). The contracting activity is the Finance Division, Engineering Contracts Unit (ECU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

[redacted] b1 b3 b7E

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

(U) [redacted]

(S) [redacted]

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

(S)

b1
b3
b7E

6. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information).

CELL-OTD 025167 CELLSITE-18669

[redacted]

b3
b7E

7. DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED

[redacted]

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U) [redacted] See paragraph (5) above for facts supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is

CELL/OTD 025168

Justification for Other Than Full and Open Competition In Accordance With 41 U.S.C. 253 (c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI), Tracking Technology Unit Unit (TTU), Operational Technology Division (OTD). The contracting activity is the Engineering Contracts Unit (ECU).

b1
b3
b7E

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(S)

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

(S)

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

b1
b3
b7E

(S)

6. **DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE**

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

7. **DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE**

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. **A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED**

(S) [redacted] b1 b3 b7E

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U) [redacted] See paragraph (5) above for facts supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

Subpart C – Functional Performance Criteria

[redacted]

Subpart D – Information, Documentation, and Support

(a) Documentation is offered in hardcopy (paper) as well as softcopy (CD) at no additional charge.
(b) End users are instructed in the product features, visually or through instruction verbally at request, at no additional charge.
(c) Support services accommodate the communication needs of end-users with disabilities.

System Security Plan

A System Security Plan has been completed and in place for use of [redacted] EC dated 06/30/2004 from Security Division has been attached to requisition package [redacted] An update to this EC has already been submitted and approved and can be obtained from the security division.

b3
b7E

Sole Source Justification

[redacted]

Independent Government Cost Estimate

TTU has submitted a quotation from the vendor, which details the cost of this procurement. Pricing has been negotiated and has been deemed fair and reasonable, and comparable with other procurements of this nature.

Life Cycle Cost Estimate

[redacted]

Earned Value Management Plan

TTU continuously ensures planning, scheduling, and budget monitoring through its program management efforts. [redacted]

Privacy Impact Assessment

The Office of General Council has been contacted and has reviewed the request for a Privacy Impact Assessment (PIA). [redacted]

Risk Assessment

TTU has identified through research and development efforts that [redacted] Sufficient funding is also in place for this procurement, and as well as plans for the maintenance over the full lifecycle of this product.

Justification for Other Than Full and Open Competition In Accordance With 41 U.S.C. 253 (c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI), Tracking Technology Unit Unit (TTU), Operational Technology Division (OTD). The contracting activity is the Engineering Contracts Unit (ECU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(S)

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

b1
b3
b7E

(S)

(U) X

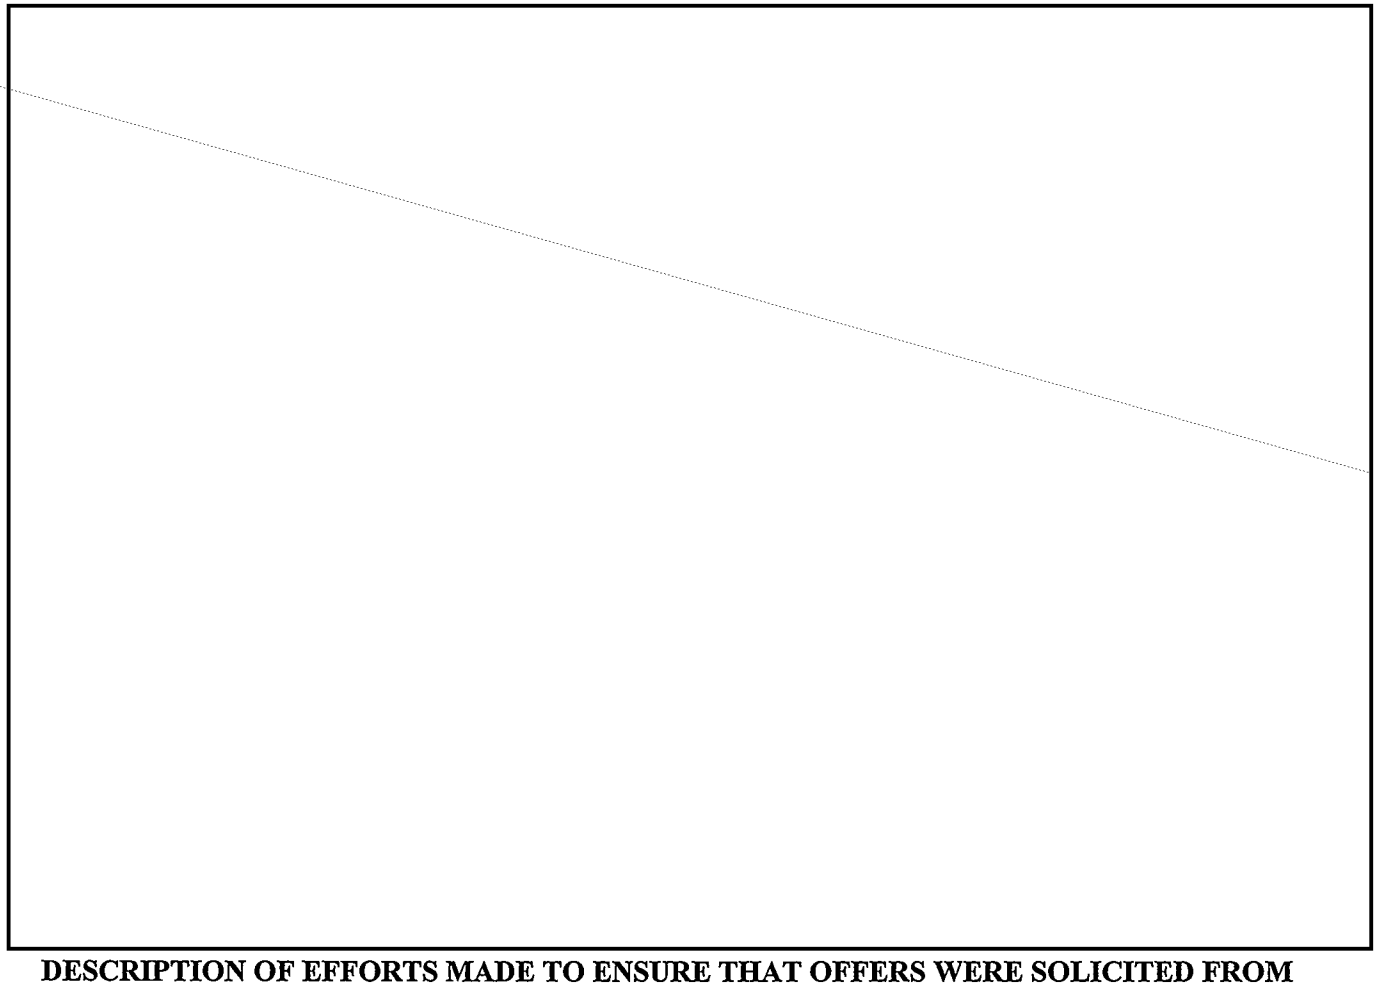
4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

b1
b3
b7E

(S)



6. **DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE**

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

7. **DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE**

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. **A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A**

b1
b3
b7E

STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED

(S)

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U) See paragraph (5) above for facts supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

(U) As the Contracting Officer Technical Representative (COTR) of record, I hereby certify to the best of my knowledge that all information contained herein is complete and accurate to the best of my knowledge.

CELLSITE-18784

(S)

6. **Efforts made to ensure offers are solicited from as many potential sources as practicable, including compliance with subpart 5.2 and, if not, which exception under FAR 5.202 applies:**

(S)

7. **Determination that the anticipated cost to the Government will be fair and reasonable:**

(U) A price analysis will be conducted by the Contracting Officer prior to award to determine that all prices are fair and reasonable.

8. **Market Survey:**

(S)

9. **Any other facts supporting the use of other than full and open competition:**

(U) See paragraph (5) above for the facts supporting the use of other than full and open competition.

10. **A listing of the sources, if any, that expressed in writing an interest in the acquisition:**

(U) Since the procurement was not publicized pursuant to FAR 5.202(a)(1), no other commercial sources were given the opportunity to express written interest in this procurement.

11. **A statement of the actions, if any, the agency may take to remove or overcome any barriers to competition before any subsequent acquisition for the supplies or services are required:**

(U) The FBI will continue to do market surveys to identify potential sources on subsequent acquisitions. TTU has a successful record of finding and developing new contractors.

Conclusion:

Subject: Contract [redacted]

Dear [redacted]

Please find enclosed a copy of the Statements of Work (SOW) for engineering services developed by the Federal Bureau of Investigation (FBI)..

The FBI is interested in obtaining a proposal for this task to be performed in accordance with the subject Contract. Contractor shall provide technical and cost proposals to support tasking as set forth in the Statement of Work.

If there are any question regarding this SOW please submit them to my office within the next five (5) business days.

It is therefore requested that your company review the enclosed SOW and if the proposed contract vehicle is appropriate, Cost-Plus Fixed Fee (CPFF), a cost and technical proposal should be submitted in accordance with the terms and conditions of the FBI's Contract no later than August 2, 2010 1:00 PM EST or sooner. Unclassified proposals maybe email to [redacted]

Should you have any questions concerning this matter, please contact me at [redacted] response may be faxed to [redacted] secure fax [redacted]

[redacted] Task Order 1

1 SCOPE

1.1 *Task Overview*

This Task Order requires that the Contractor provide engineering services and operational support to the Operational Technology Division's [redacted] and [redacted] through studies, enhancements, and operational support to the [redacted]

b3
b7E

The FBI is the principal investigative arm of the United States Department of Justice. It is charged with gathering and reporting facts, locating witnesses, and obtaining evidence in cases involving Federal jurisdiction. The mission of the FBI's Operational Technology Division is to provide forensic services to the FBI and other law enforcement agencies and to support their ability to conduct lawfully authorized electronic surveillance. To that end, the Operational Technology Division is engaged in a number of development projects and activities that focus on developing the forensic, collection, surveillance, and tactical communications capabilities required for law enforcement to accomplish its objectives. [redacted]

b3
b7E

The focus of this overall effort is to provide the engineering services required to enhance the functionality of the [redacted] necessary to support specific case requirements for [redacted] The systems shall be designed, installed, and tested to assure that the configured system is operationally correct. The contractor shall support the system installation and remote troubleshooting as required. [redacted] expertise may be required.

The purpose of this SOW is to describe the tasking necessary to support the FBI's ability to [redacted] under specific legal guidelines. The task shall be achieved through engineering support to the current [redacted] platform for processing and presentation of [redacted] and the development of capabilities that are designed to meet specific case requirements.

b3
b7E

CELLSITE-19772

1.2 Deliverables

- Project Management Plan (See Section 2.2)
- Weekly Status Report (See Section 2.3)
- Monthly Program Review (See Section 2.3)
- System Testing Plan (See Section 2.2)
- System Demonstration at contractor facility
- Final Summary Report (See Section 2.2)

1.3 Category of Efforts

The FBI currently owns [redacted] that have been used by [redacted] in support of FBI investigations. OTD's [redacted] is also a user of the [redacted] for similar usage but different operational goals than [redacted] The FBI's goal is to field all [redacted] with the minimum capabilities provided by [redacted] as described below. [redacted] studies are intended to provide the FBI with approaches to resolving future issues through reports, prototypes, or demonstrations. This scope of work defines these three categories of effort: [redacted]

b3
b7E

1.3.1 Key Areas

a) [redacted] – It has been determined that the existing [redacted] systems require [redacted] The contractor shall perform the following [redacted]

b3
b7E

- [redacted]

b) [redacted]

[redacted] The contractor shall perform the following [redacted]

- [redacted]

b3
b7E

CELLSITE-19773

- [redacted]

c) [redacted] sees a number of longer term issues that require attention [redacted] In order to be mitigating the risks associated with [redacted] would require the vendor to perform studies that will help guide future efforts. The contractor shall perform the following studies: b3 b7E

- [redacted]

d) [redacted] **Requirements** – [redacted] has requirements specific to their operational use of [redacted] This would perhaps make a [redacted] or a [redacted] The contractor shall perform the following: b3 b7E

- [redacted]

2 Requirements

2.1 Security Standards and Regulations

Refer to [redacted] Statement of Work section 2.3 for guidance.

SECURITY STATEMENT: This program, all documentation, all associations, all stated and implied requirements and all personnel must adhere to and meet security requirements. Any breech of security will result in immediate termination of the program and possible repercussions, both contractual and criminal. All dissemination of the program and contract information must be approved in writing by the COTR, to include, but not limited to, partners, technical and contract information and personnel. The contractor shall set up procedures to insulate the program procurement or parts and protection of program information as agreed upon by the COTR. b3 b7E

2.2 Contractor Furnished Documentation

Refer to [redacted] Statement of Work sections 2.6 and 3.2 for guidance.

Project management plan shall consist of the Contractor's proposed solution to include the composition of required project team, complete task schedule, and total labor and non-labor costs for fully implementing the proposed solution.

CELLSITE-19774

2.3 Status Reporting

Refer to [redacted] Statement of Work Section 3.3 for guidance.

2.4 Formal Meetings

Technical and Cost Proposal for the [redacted]

Proposals Dated August 6, 2010

b3
b7E

Paragraph	Comment
General	Throughout the proposa[redacted] refers to a number of IR&D projects that relate to the scope of work being bid. It is not clear how much of the IR&D work[redacted] is proposing as part of this effort or if they are putting it in the proposal to show experience in the area. Also, if they are going to claim ownership to the entire product being procured by the Government due to inclusion of all or part of a previous IR&D effort, it needs to be clearly defined what percentage of the full product is from their IR&D. See comment for paragraph 9.0 below.
Page 1 - 3.1.1	[redacted]
Page 3 - 3.1.5	[redacted] should disregard the column of information labeled [redacted] There is no Government requirement to [redacted]
Page 4 - 3.1.7	The requirement to interface [redacted] with [redacted] is no longer valid. This item shall be removed from the SOW. Item is hereby deleted in full.
Page 5 - 3.1.8.2	This item directly relates to and may become a duplication of effort for of items 3.1.3 and 3.1.4. Please clarify, explain, and provide full disclosure as to how these tasks are/are not a duplication of effort.
Page 7 - 3.2.2	The requirement to [redacted] is no longer valid. This item can be removed from the SOW. Item is hereby deleted in full.
Pages 11 & 12 -9.0	Items 7 & 18. [redacted] wants full rights of the result of this effort to sell as a commercial product, and therefore will potentially be provided an unfair advantage in this [redacted] Please advise if you understand and comply.
Page 13 - 9.0	Item 30. An NDA shall be required of [redacted] for this effort as previously agreed. All personnel supporting efforts under [redacted] shall be required to sign the NDA (FD-868).
Page 23 - 12.0 Subtask #4	Based on the fact that this is an unclassified requirement, hours are excessive and shall be reduced. Hours shall be substantially reduced to [redacted] for the duration of this tasking.
Page 24 – table	Product testing shall not be done [redacted] See also page 34. Contractor shall adjust cost and technical proposal accordingly. Technical guidance shall be provided by COTR for this portion of the tasking.
Page 29 – Subtask #1	Subtask #1 on page 29 shall be revised and all requirements stated in the Proposal shall be removed except for the following requirements from Section 1.3.1 from the [redacted] SOW: [redacted] from page 2. The Contractor shall revise and reduce the technical and cost proposals accordingly.

b3
b7E

b3
b7E

b3
b7E

b3
b7E

Pages 30 & 31 – Subtasks #4, 5, 7	These tasks are related and may potentially impact each other. From task #7 it is unclear if these hours are paying for the IR&D effort or in addition. Please clarify.	
Page 31 – Subtask #9	The requirement for [redacted] support has been removed. Item is hereby deleted in full.	
Page 32 – Subtask #11	It is unclear what this task is doing. Should it be part of the I&T as identified on page 34 in the paragraph titled System Integration and Test Effort? Please clarify.	b3 b7E
Page 34 – Subtask #1	1) Page 29, Subtask 11 [redacted] and Page 24, Subtask #1 "Systems I&T" appear to be duplicative efforts. Please revise cost and technical proposals to remove the duplicative portions or explain how both testing scenarios are required. 2) The hours for this subtask appear to be excessive. [redacted] Development task. Proposed hours for [redacted]	
Page 37	The Government shall provide a current [redacted] as GFE. [redacted] may require additional components and will most likely charge for handling of the GFE. Hours proposed by the Contractor are excessive and shall be reduced. [redacted] Please advise if you understand and comply. Adjust cost proposal accordingly.	b3 b7E
Page 42	[redacted] shall identify which portion of subtask #1, page 42, is to be funded by [redacted] IRAD funding and which portions are intended to be funded by the FBI. Also please clarify and describe how [redacted] intends to incorporate [redacted]	
Page 44	The Government is unclear what is meant by the sentence [redacted] Please clarify.	b3 b4 b7E
Page 46	[redacted] is bidding [redacted] to purchase [redacted] The Government shall provide these items as GFE from make and model information provided by [redacted] Please adjust cost proposal to reflect the deletion of this item.	
Page 49	[redacted] is no longer a requirement. See comments to paragraph 3.2.2 above. Item is hereby deleted in full.

Contract: [redacted]
Subject: Request for Clarification on [redacted] Task Order Proposals

Enclosed please find the FBI's responses to [redacted] "Conditions and Assumptions" for the [redacted] Task Order to be performed under the above Contract. Please review and respond to any questions or requests for clarifications regarding the Cost and Technical Proposals. This proposed tasking is intended as a Cost-Plus Fixed Fee requirement and as such, in accordance with the previously agreed upon terms and conditions of this contract, revise the Cost documentation to reflect a [redacted] fee structure. All Terms and Conditions under the Contract [redacted] are unchanged and binding for all subsequent actions, including this intended Tasking.

b3
b7E

Please provide a response to these questions and any modifications to the originally submitted cost and technical proposals no later than noon EST on Friday August 27, 2010. To reduce administrative burdens, please make necessary changes to those affected pages and provide them for replacement in original documentation.

If I can be of further assistance with this effort you may contact me at [redacted]

Sincerely,

[redacted]

Contracting Officer

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 10-20-2012 BY 65179 DMH/STW

[redacted] Task Order:

Responses to Conditions and Assumptions pages 11-13.

b3
b7E

Please note that all terms and conditions for the [redacted] Contract are in affect and negotiated and agreed upon per signatures on 9/15/09. The following conditions and assumptions were provided in the [redacted] proposal:

1. The basis for this proposal is the Base IDIQ Contract No. [redacted] and associated documents; the Sponsor's RFP dated 12 July 2010 and accompanying documents.

- The FBI concurs.

2. Proposed pricing and schedule assume full funding at award. Should incremental funding be required, the Contractor will provide a funding profile at negotiations and provide funding limitations notices per FAR 52.232-22 Limitation of funds, to ensure funding is provided in a timely fashion to support the proposed schedule.

- The FBI intends to incrementally fund this tasking. See original RFP clause included in Section I.

3. Proposed pricing assumes effort will be awarded on a single Task Order/Delivery Order under which only one CLIN per task order. If multiple CLINs are to be awarded, Contractor reserves the right to update its proposal to include additional administrative costs associated with managing multiple CLINs.

- Number of CLINs will be determined at time of award and at no additional cost to the FBI.

4. Proposed prices are exclusive of international, federal, state, local, excise, sales, gross receipts, use, business and occupation tax, and similar taxes arising from or in connection with the proposal, and such taxes, if assessed will be invoiced by the Contractor and paid by the Sponsor.

- See original contract. The federal government is tax exempt.

5. Period of Performance is 8 months which includes 7 months for program execution and 1 month to perform final task order closeout activities.

- The FBI accepts this assumption.

6. [redacted] is asserting its right to protect intellectual property (IP) in accordance with F.A.R. Clause 52.227-14 Rights in Data – General. Any IP claim will be submitted under separate cover.

- The FBI will review all claims submitted by vendor and determine IP rights on an individual basis.

b3
b7E

7. [redacted] requests the Sponsor incorporate into the IDIQ Terms and Conditions, Alternate II (Dec 2007) of Clause F.A.R. 52.227-14, Rights in Data- General. This clause will be applicable to this and subsequent efforts.

- The FBI concurs. This clause is incorporated via Mod 6 to [redacted] fully executed 8/23/10.

8. [redacted] will not provide documentation, specifications, drawings, source code, or prototypes, associated with our intellectual property (IRAD). As such [redacted] requires Clause H-10 and Paragraph 2.6(i) be revised or deleted with respect to [redacted] IP.

b3
b7E

- See original contract terms and conditions agreed upon under contract. H-10 remains as stated. Negotiations regarding IRAD funding will be addressed on a case by case basis.

9. No estimates have been included for providing Contractor team member working notes called out in Paragraph 2.6(f). Note; this is not a standard practice [redacted] will assess the cost and schedule impact if this review is required.

- The FBI concurs. If required, vendor will be advised.

10. Weekly status reports will be submitted via e-mail and shall address technical problems, risks, issues, production, technical assessments, and security items, and concerns (SOW 3.3 and 3.4.1).

- The FBI concurs.

11. This proposal assumes all customer meetings are held at the contractor's facility.

- The FBI concurs.

12. Formal meeting Agendas will be sent via email or secure fax..

- The FBI concurs.

13. At customer direction, Monthly Program Reviews may be held by telephone.

- The FBI concurs.

14. Invoices will be billed by element of cost, consistent with the contractors current invoice format. No hourly information will be on the invoices; however, this data can be incorporated into the monthly customer report.

- Hourly information shall be required and can be incorporated into the monthly customer report.

15. Production, Technical Assessments, and Security Reviews (SOW 3.4.1), when needed; will be incorporated into Weekly or Monthly Status Review.

- The FBI concurs.

16. All deliverable data submissions are considered approved if no comments are received by 10 business days after submission to the Customer. Multiple iterations for report revisions are not considered in this proposal estimate.

- See Section E.1 of the [redacted] of awarded contract [redacted], incorporated into the Contract, the FBI retains the right to 30 days for inspection and acceptance of submitted deliverables.

b3
b7E

17. The proposed price for the study option assumes that the option will be exercised at the same time as the base award in order for it to be completed, with the base program period of performance.

- The FBI intends to exercise Option Year 1 for the [redacted] Contract in September 2010 with same terms and conditions as agreed upon in the contract, for the 60 month period. If this statement does not address #17. Please advise.

b3
b7E

18. This proposal assumes [redacted] will have the right to incorporate any results of this program into its commercial products as applicable.

- [redacted] shall notify the FBI of any results, capabilities, or functionalities related to this tasking that are intended to be incorporated into commercial products.

19. This proposal assumes Pictorial System Diagrams (SOW 2.6) will be included in PDR and CDR packages and not separate deliverable.

- The FBI concurs.

20. As authorized by F.A.R. 52.232-28, [redacted] requests electronic funds transfer of payments to:

[redacted]

b3
b7E

- The FBI concurs. See contract awarded [redacted]

21. [redacted] has not included in its estimate of cost incurred or to be incurred any amount for termination liability costs to which [redacted] may be entitled in the event of a termination for convenience by the Government.

- See Contrac[redacted] for all terms and conditions that are applicable to this agreement.

22. [redacted] currently has a website available for government customers; this proposal assumes this existing [redacted] Web Site satisfies the Sponsor's requirement (SOW 3.10). If additional capabilities above this are required, [redacted] reserves its right to assess the impact.

b3
b7E

- The FBI concurs.

23. Invoicing will be monthly after [redacted] period end, the terms of which would be 100% due Net 30 subject to the FAR 52.232-25, Prompt Payment Clause.

- The FBI concurs. See contract awarded [redacted]

24. FOB Point is destination.

- The FBI concurs.

25. No warranty terms are offered.

- Warranty terms, if applicable, will be in accordance with the terms of the contract [redacted] signed 9/15/09.

26. If [redacted] products are required for this effort they are priced at the [redacted] price list value with no additional burdens.

b3
b7E

- The FBI concurs. However, please see Cost Proposal page 37 and 38 and adjust pricing accordingly.

27. The Consolidated Materials Listing (CML) is not auditable at proposal submission. [redacted] is continuing to firm material pricing to provide for negotiations.

- Please clarify assumption.

b3
b7E

28. [redacted] will monitor and assess this during performance and will notify the customer as necessary.

- The FBI concurs.

29. In support of the effort, [redacted] will be developed and provided to [redacted] who is the [redacted] developer. Actual modifications to [redacted] must be performed by [redacted] and are not priced in this proposal.

b3
b7E

- The [redacted] portion of this tasking has been deleted from the SOW and no services shall be required under this Tasking.

30. This task is unclassified and will be worked in a suitable environment commensurate with the security classification [redacted] assumes that no security clearances or NDA will be required.

b3
b7E

- The FBI agrees that work to be performed under this tasking are unclassified.
- At th[redacted] FBI meeting on 6/24/10, both parties agreed that al[redacted] employees involved with the [redacted] contract shall sign the FD-868. The classification level of this tasking does not exempt it from the need for and requirements of the NDA.

Hi [redacted]

I'm attaching the revised responses to Conditions & Assumptions for [redacted] – incorporating the updates we made together on 8/31/10. The handful of updates are in Blue colored text. I should have the award documentation to you for [redacted] in the next few hours.

Regarding your response to my [redacted] e-mail yesterday – I don't understand your response. Should I anticipate a revised quote for pricing for these units so I can incorporate into the contract?

DATE 10-20-2012 BY 65179 DMH/STW

[redacted] Task Order: REVISION

Responses to Conditions and Assumptions pages 11-13.

b3
b7E

Please note that all terms and conditions for the [redacted] Contract are in affect and negotiated and agreed upon per signatures on 9/15/09. The following conditions and assumptions were provided in the [redacted] proposal:

1. The basis for this proposal is the Base IDIQ Contract No. [redacted] and associated documents; the Sponsor's RFP dated 12 July 2010 and accompanying documents.

- The FBI concurs.

2. Proposed pricing and schedule assume full funding at award. Should incremental funding be required, the Contractor will provide a funding profile at negotiations and provide funding limitations notices per FAR 52.232-22 Limitation of funds, to ensure funding is provided in a timely fashion to support the proposed schedule.

- The FBI intends to incrementally fund this tasking. See original RFP clause included in Section I.

3. Proposed pricing assumes effort will be awarded on a single Task Order/Delivery Order under which only one CLIN per task order. If multiple CLINs are to be awarded, Contractor reserves the right to update its proposal to include additional administrative costs associated with managing multiple CLINs.

- Number of CLINs will be determined at time of award and at no additional cost to the FBI.
- REVISION PER 8/31/10: The FBI will work with [redacted] contracts office to format funding on one PO line, if possible, for administrative and funding ease within [redacted] The FBI will also use "M" PO #s when possible for ease of tracking purposes.

4. Proposed prices are exclusive of international, federal, state, local, excise, sales, gross receipts, use, business and occupation tax, and similar taxes arising from or in connection with the proposal, and such taxes, if assessed will be invoiced by the Contractor and paid by the Sponsor.

b3
b7E

- See original contract. The federal government is tax exempt.
- REVISION PER 8/31/10: The FBI concurs.

5. Period of Performance is 8 months which includes 7 months for program execution and 1 month to perform final task order closeout activities.

- The FBI accepts this assumption.

6. [redacted] is asserting its right to protect intellectual property (IP) in accordance with F.A.R. Clause 52.227-14 Rights in Data – General. Any IP claim will be submitted under separate cover.

- The FBI will review all claims submitted by vendor and determine IP rights on an individual basis.
- REVISION PER 8/31/10: Please refer to final documentation under separate cover letter.

7. [redacted] requests the Sponsor incorporate into the IDIQ Terms and Conditions, Alternate II (Dec 2007) of Clause F.A.R. 52.227-14, Rights in Data- General. This clause will be applicable to this and subsequent efforts.

- The FBI concurs. This clause is incorporated via Mod 6 to [redacted] fully executed 8/23/10.
- REVISION PER 8/31/10: Please refer to final documentation under separate cover letter.

b3
b7E

8 [redacted] will not provide documentation, specifications, drawings, source code, or prototypes, associated with our intellectual property (IRAD). As such [redacted] requires Clause H-10 and Paragraph 2.6(i) be revised or deleted with respect to [redacted]

- See original contract terms and conditions agreed upon under contract. H-10 remains as stated. Negotiations regarding IRAD funding will be addressed on a case by case basis.

9. No estimates have been included for providing Contractor team member working notes called out in Paragraph 2.6(f). Note; this is not a standard practice [redacted] will assess the cost and schedule impact if this review is required.

- The FBI concurs. If required, vendor will be advised.

10. Weekly status reports will be submitted via e-mail and shall address technical problems, risks, issues, production, technical assessments, and security items, and concerns (SOW 3.3 and 3.4.1).

- The FBI concurs.

11. This proposal assumes all customer meetings are held at the contractor's facility.

- The FBI concurs.

12. Formal meeting Agendas will be sent via email or secure fax..

- The FBI concurs.

13. At customer direction, Monthly Program Reviews may be held by telephone.

- The FBI concurs.

14. Invoices will be billed by element of cost, consistent with the contractors current invoice format. No hourly information will be on the invoices; however, this data can be incorporated into the monthly customer report.

- Hourly information shall be required and can be incorporated into the monthly customer report.

15. Production, Technical Assessments, and Security Reviews (SOW 3.4.1), when needed; will be incorporated into Weekly or Monthly Status Review.

- The FBI concurs.

16. All deliverable data submissions are considered approved if no comments are received by 10 business days after submission to the Customer. Multiple iterations for report revisions are not considered in this proposal estimate.

- See Section E.1 of the [redacted] of awarded contract [redacted] incorporated into the Contract, the FBI retains the right to 30 days for inspection and acceptance of submitted deliverables.

17. The proposed price for the study option assumes that the option will be exercised at the same time as the base award in order for it to be completed, with the base program period of performance.

- The FBI intends to exercise Option Year 1 for the [redacted] Contract in September 2010 with same terms and conditions as agreed upon in the contract, for the 60 month period. If this statement does not address #17. Please advise.
- REVISION PER 8/31/10: Please refer to guidance from Technical Read and any revisions to SOW agreed upon under other documentation.

b3
b7E

18. This proposal assumes [redacted] will have the right to incorporate any results of this program into its commercial products as applicable.

- [redacted] shall notify the FBI of any results, capabilities, or functionalities related to this tasking that are intended to be incorporated into commercial products.

19. This proposal assumes Pictorial System Diagrams (SOW 2.6) will be included in PDR and CDR packages and not separate deliverable.

- The FBI concurs.

20. As authorized by F.A.R. 52.232-28 [redacted] requests electronic funds transfer of payments to:

[redacted]

b3
b7E

- The FBI concurs. See contract awarded [redacted]

21 [redacted] has not included in its estimate of cost incurred or to be incurred any amount for termination liability costs to which [redacted] may be entitled in the event of a termination for convenience by the Government.

- See Contract [redacted] for all terms and conditions that are applicable to this agreement.

22. [redacted] currently has a website available for government customers; this proposal assumes this existing [redacted] Web Site satisfies the Sponsor's requirement (SOW 3.10). If additional capabilities above this are required, [redacted] reserves its right to assess the impact.

b3
b7E

- The FBI concurs.

23. Invoicing will be monthly after [redacted] period end, the terms of which would be 100% due Net 30 subject to the FAR 52.232-25, Prompt Payment Clause.

- The FBI concurs. See contract awarded [redacted]

24. FOB Point is destination.

- The FBI concurs.

25. No warranty terms are offered.

- Warranty terms, if applicable, will be in accordance with the terms of the contract [redacted] signed 9/15/09.

26. If WPG products are required for this effort they are priced at the [redacted] price list value with no additional burdens.

- The FBI concurs. However, please see Cost Proposal page 37 and 38 and adjust pricing accordingly. b3 b7E

27. The Consolidated Materials Listing (CML) is not auditable at proposal submission. Harris is continuing to firm material pricing to provide for negotiations.

- Please clarify assumption.
- REVISION PER 8/31/10: See revised cost proposal for final documentation.

28. [redacted] Harris will monitor and assess this during performance and will notify the customer as necessary.

- The FBI concurs.

29. In support of the effort, [redacted] will be developed and provided to [redacted] who is the [redacted] developer. Actual modifications to [redacted] must be performed by [redacted] and are not priced in this proposal. b3 b7E

- The [redacted] portion of this tasking has been deleted from the SOW and no services shall be required under this Tasking.

30. This task is unclassified and will be worked in a suitable environment commensurate with the security classification. Harris assumes that no security clearances or NDA will be required.

- The FBI agrees that work to be performed under this tasking are unclassified.
- At the Harris-FBI meeting on 6/24/10, both parties agreed that all Harris employees involved with the [redacted] contract shall sign the FD-868. The classification level of this tasking does not exempt it from the need for and requirements of the NDA.

[redacted] Task Order 1 Questions

Regarding Section "1.3.1 Key Areas" of the [redacted] SOW, the items are listed as "examples" of what should be done on the Task. In order to properly bid these activities, we are making the following assumptions. The contractor requests that you review these assumptions, verify their accuracy and provide more clarification where necessary. b3 b7E

1) We assume that the items listed in Sections 1.3.1a and 1.3.1b are the complete list of the activities that need to be completed before fielding the [redacted] system to the [redacted] Please confirm.
   a. If not, what are the additional requirements?
2) In 1.3.1b, we assume that the [redacted] bullet refers to the [redacted] would be improved to reduce the occurrences of this. Please confirm.
   a. If not, please clarify. b3 b7E
3) In 1.3.1b, please include in the SOW the complete list of the [redacted] types and their definitions. For reference, the table below is the list of the types from earlier discussions with the sponsor, along with specific assumptions that need to be verified. For each row, the Current Restriction column indicates what the legal guidelines were at the time, and the Sponsor Proposed Restrictions column indicates what the proposed new legal guidelines were moving toward. [redacted] Task Order 1 would implement the Sponsor Proposed Restrictions column given clarification of our Assumptions.

	Current Restriction	Sponsor Proposed Restrictions	Assumptions

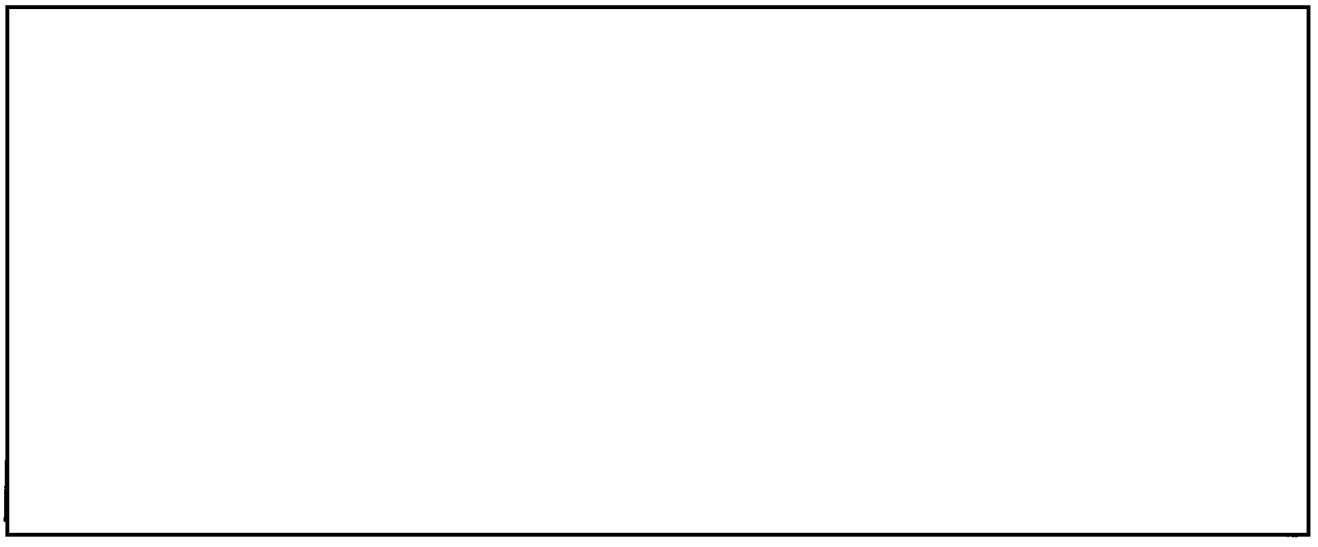
SITE-19834



b3
b7E

4) We assume that the investigation efforts listed in Section 1.3.1c are not required to be completed, developed, and implemented as part of the [redacted] release that will be sent to the [redacted] Please confirm.
5) What are the priorities of the investigation efforts in Section 1.3.1c?
6) We assume that the expected output of the investigation efforts in Section 1.3.1c will be a report, prototype, or demonstration. Please confirm.
7) We assume that the [redacted] Requirements" listed in Section 1.3.1d are not required to be completed, developed, and implemented as part of the [redacted] release that will be sent to the [redacted] Please confirm.
8) What is the priority of the [redacted] Requirements" in Section 1.3.1d, and what are their priorities in relation to the investigation efforts listed in Section 1.3.1c?

1 SCOPE

b3
b7E

1.1 *Task Overview*

This Task Order requires that the Contractor provide engineering services and operational support to the [redacted] through studies, enhancements, and operational support to the [redacted]

The FBI is the principal investigative arm of the United States Department of Justice. It is charged with gathering and reporting facts, locating witnesses, and obtaining evidence in cases involving Federal jurisdiction. The mission of the FBI's Operational Technology Division is to provide forensic services to the FBI and other law enforcement agencies and to support their ability to conduct lawfully authorized electronic surveillance. To that end, the Operational Technology Division is engaged in a number of development projects and activities that focus on developing the forensic, collection, surveillance, and tactical communications capabilities required for law enforcement to accomplish its objectives. - System Demonstration at contractor facility
- Final Summary Report (See Section 2.2)

1.3 Category of Efforts

The FBI currently owns [redacted] that have been used by [redacted] for [redacted] in support of FBI investigations. [redacted] is also a user of the [redacted] for similar usage but different operational goals than [redacted] This scope of work defines three categories of effort: [redacted]

b3
b7E

1.3.1 Key Areas

a) [redacted] – It has been determined that the existing [redacted] systems require [redacted] Examples of such [redacted] are listed below, however this list is not fully inclusive of items [redacted]

b3
b7E

- [redacted]
- [redacted]
- [redacted]

b) [redacted] Examples of the [redacted] that will be identified are provided below:

b3
b7E

- [redacted]
- [redacted]
- [redacted]
- [redacted]
- [redacted]

CELLSITE-19857

c) [redacted] sees a number of longer term issues that require attention. [redacted] In order to be mitigating the risks associated with [redacted] would require the vendor to perform studies that will help guide future efforts. Examples of such studies are listed below, however this list is not fully inclusive of items that may become necessary during the course of this task: b3 b7E

- [redacted]

d) [redacted] **Requirements** – [redacted] has requirements specific to their operational use of [redacted] This would perhaps make a [redacted] or a [redacted] Examples of these requirements include, but are not limited to: b3 b7E

- [redacted]

2 Requirements

2.1 Security Standards and Regulations

Refer to [redacted] Statement of Work section 2.3 for guidance.

SECURITY STATEMENT: This program, all documentation, all associations, all stated and implied requirements and all personnel must adhere to and meet security requirements. Any breech of security will result in immediate termination of the program and possible repercussions, both contractual and criminal. All dissemination of the program and contract information must be approved in writing by the COTR, to include, but not limited to, partners, technical and contract information and personnel. The contractor shall set up procedures to insulate the program procurement or parts and protection of program information as agreed upon by the COTR.

2.2 Contractor Furnished Documentation

CELLSITE-19858

Refer to [redacted] Statement of Work sections 2.6 and 3.2 for guidance.

Project management plan shall consist of the Contractor's proposed solution to include the composition of required project team, complete task schedule, and total labor and non-labor costs for fully implementing the proposed solution.

b3
b7E

2.3 Status Reporting

Refer to [redacted] Statement of Work Section 3.3 for guidance

2.4 Formal Meetings

Refer to [redacted] Statement of Work Section 3.4 for guidance

2.5 Government Points of Contact

Hi Folks:

Please find attached the promised white paper regarding potential [redacted] Task. We have included non-budgetary ROMs for these [redacted] and have estimated them as standalone tasks (i.e. no assumption that any will be awarded in parallel with each other or with the existing baseline). Should there be parallel efforts we will likely have economies of scale from overlaps in common elements (PM, QA, CM, etc.). We would like to arrange a telecon next week at your convenience to discuss these [redacted] and how you would like to proceed from here.

Have a great weekend,

b7E

Unfortunately I cannot read the text on the attached PO. Please send a revised copy along with the SF30 as soon as possible.
Also, from what I can tell, it looks like there are two POP end dates (8/15 and 8/31/11).

Thank you!

Hi [redacted]

Any update on the test. How are things looking? If we can finalize the evaluations in the next day or two I should be able to make the award. I received the funding document.

Thanks,

4.1 Security Standards and Regulations

(U) SECURITY STATEMENT: This program, all documentation, all associations, all stated and implied requirements and all personnel must adhere to and meet security requirements. Any breech of security will result in immediate termination of the program and possible repercussions, both contractual and criminal. All dissemination of the program and contract information must be approved in writing by the COTR, to include, but not limited to, partners, technical and contract information and personnel. The contractor shall set up procedures to insulate the program procurement or parts and protection of program information as agreed upon by the COTR.

(U) The Contractor shall be expected to apply a broad base of engineers and support personnel with varying backgrounds in order to maintain the efforts under this contract. At a minimum, the Contractor shall include a copy of the job descriptions to include experience levels and formal education required for each labor category presented in the proposal.

(U) The Contractor shall appoint and designate qualified technical personnel as the primary point of contact to be responsible and accessible during normal business hours to address technical questions and inquiries from the customer relating to system configuration and equipment operations, system design capability, [redacted] and system diagnosis and troubleshooting. The qualified technical personnel shall have a broad knowledge of [redacted] of products, a strong fundamental understanding of cellular technology [redacted] and be able to provide technical resolution and recommendation to technical questions and issues raised by the customer. There may be exigent circumstance that necessitates an immediate action and response due to mission criticality at which time the customer will provide ample notification to the Contractor for availability request of the qualified technical personnel to be in the standby support position.

b3
b7E

(U) Services provided under each TO shall be performed in accordance with this SOW for the contract as well as contractual terms and conditions. All services and enhancements under this contract shall be conducted with all appropriate legal authority.

(U) **(S) 2.2 REQUIREMENTS**

The Contractor shall meet the system level criteria for performance as stated below:

(S) [redacted]

(S) [redacted]

(S) [redacted]

(S) [redacted]

(S) [redacted]

b1
b3
b7E

(S) [redacted]

(U) 2.2.7 The Contractor system shall requir[redacted]nd any advanced enhanced features under this contract to ensure such use are limited to personnel with the required authority.

(U) 2.2.8 The Contractor shall provide replacement parts and modules t[redacted] under warranty that have been identified to have failed components within a period of 3 to 5 business days. This requirement shall not predicate on the customer having spare parts or modules.

b1
b3
b7E

(U) 2.2.9 The contract shall provide to the customer a system checkout test procedure documenting the various steps the contractor has performed in checking and verifying system functionality of all relevant mode of operations described in the statement of work to ensure that [redacted] functioning properly prior to release. This requirement shall be applicable to all [redacted] at each monthly progress status interval. The test procedure shall also incorporate functionality test on [redacted]

(U) 2.3 DELIVERABLES

(U) The Contractor shall provide any of the following as required in specific Task Order requirements documentation:

- Project Deliverables
  - [redacted]
  - Production Run Equipment
- Documentation
  - White Paper Study Reports
  - Baseline Design Documentation
  - Monthly Project Status Reports
- Meetings or Briefings
  - Kick-Off, Program Management, Status or Technical Integration Meetings
  - Review or Technical Briefings to include any required materials

b7E

[redacted]

CELL/OTD 022143

(U) 3.0 REPORTING AND STATUS REVIEW REQUIREMENTS

(U) 3.1 Project Progress Reports: Project progress shall be reported to the COTR on a monthly basis. At a minimum, the report shall include the following information per Task Order: technical accomplishments and status, upcoming milestones, issues/concerns/risks, action items, and projected cost or schedule overruns.

(U) 3.2 Other Reports: Other reports that may be required by the contractor on a per-task order basis shall include:

- [redacted]

b3
b7E

(U) 3.3. Delivery Schedule: The Contract shall provide a period of performance or timeline of the expected completion date of each sub-task. In the event the identified sub-task is not completed by the expected date, the Contract shall document and notify the customer in the monthly status report and provide a revised schedule of delivery.

(U) 3.4. Delivery Schedule: The Contract shall provide a period of performance or timeline of the expected completion date of each sub-task. In the event the identified sub-task is not completed by the expected date, the Contract shall document and notify the customer in the monthly status report and provide a revised schedule of delivery.

(U) 3.5 Phase Review Meetings: Formal phase review meetings shall be conducted at a minimum at the conclusion of each Task Order Phase and include reports for project plans, status, and results.

(U) 3.6 Other Review Meetings: Other meetings that may be required by the contractor on a per-task order basis shall include:

- Monthly or Periodic Technical Integration Meetings - To review technical progress, address any technical challenges and barriers, and communicate with project team
- System Requirements Review - To review and baseline the requirements to be satisfied by the proposed system (product)
- Preliminary Design Review - To review and concur on initial system design concepts including exploitation techniques and implementation methodology
- Critical Design Review - To review and approve final system design
- Test Readiness Review - To review test readiness and authorize initiation of testing
- Operational Readiness Review - To review operational readiness and officially accept system (product)

(U) ~~(S)~~ **4.0 SPECIAL CONSIDERATIONS**

(U) 4.1 Health and Safety

(U) In certain configurations if the Contractor systems [redacted] and any aspects of the systems pose a health and safety hazard for the user, the Contractor shall provide information regarding these topics in writing and make recommendation to reduce such risk.

(U) ~~(S)~~ **4.2 Security and Restrictions Considerations**

JUSTIFICATION FOR OTHER THAN FULL AND OPEN COMPETITION IN ACCORDANCE WITH 41 U.S.C. 253(c)1 & 41 U.S.C. 253(c)6

All information contained herein is classified as "~~SECRET~~" unless otherwise noted (U).

1. Agency and Contracting Activity and Identification of Document:

(U) The Science and Technology Contracts Unit (STCU) of the Federal Bureau of Investigation (FBI) has prepared this Justification for Other Than Full and Open Competition in response to requirements from the Tracking Technology Unit (TTU) of the Operational Technology Division (OTD). This document provides justification to establish an Indefinite Delivery-Indefinite Quantity (IDIQ) contract with [redacted] This contract vehicle will procure highly specialized [redacted] related engineering services to modify and enhance these products. The intended duration of this contract is a base year and four (4) one-year options with provisions for Firm Fixed-Price (FFP) and Cost-Plus Fixed Fee (CPFF) pricing. b3 b7E

2. Nature and/or Description of the Action Being Approved:

10. A listing of the sources, if any, that expressed, in writing an interest in the acquisition:

(U) Pursuant to FAR 5.202(a) (1), National Security, this procurement will not be publicized and as such, no other commercial sources will be provided with the opportunity to express written interest in this procurement. Knowledge of sensitive information would be required for a vendor to provide a response. Public knowledge of the capabilities of these techniques would [redacted] b3

(U) [redacted] is aware of the FBI's need for this capability through technical discussion regarding the capabilities and further development of their current product line. See Section 9 for additional information. b7E

11. A statement of the actions, if any, the agency may take to remove or overcome any barriers to competition before any subsequent acquisition for the supplies or services required:

(U) TTU continues to evaluate potential sources for future requirements. The FBI will continue to monitor the market and hold discussion with other members of the intelligence community to identify additional sources with capabilities to address the goals of these programs and FBI mission requirements. If additional resources are identified in the future, these will be included for future competitions.

12. Signatures:

Technical Representative Certification:

As Technical Representative of the requiring office, I have reviewed the data provided in support of the Justification and Approval to Procure Using Other Than Full and Open Competition. I certify that the data is accurate and complete to the best of my knowledge and belief.

Subject: Summary of Action Items from 8/9 Meeting --- UNCLASSIFIED

b6
b7C

Classification: UNCLASSIFIED
==========

Hi [redacted]

Here's a summary of the action items/things to document that I wrote down from the 8/9-8/10 meeting at Harris. Please share with [redacted] as well if you think appropriate.

Items to note:

- [redacted] was notified 7/11/11 orally and 7/12/11 in writing of the FBI [redacted]
  - 8/9/11 meeting provided an update and [redacted] was present for this portion
  - Meeting with [redacted] noted that he's not interested in [redacted] agreed
- [redacted] provided back up documentation to [redacted] demonstrating the [redacted]
- [redacted]
- [redacted] will follow up with [redacted] to get copies of [redacted] noted to [redacted] that items 1-7 on his notes were [redacted]
  - These reports will be used to communicate [redacted]

b3
b7E
b6
b7C

- [redacted] made very clear to [redacted] that they are continued [redacted]
  - [redacted] please clarify my above statement since I was not there at this portion of the meeting
  - [redacted] provided
- [redacted] PO copies mailed to [redacted] internally
- [redacted]
- [redacted]
- [redacted] however, the [redacted] warranty as put in place by [redacted] includes [redacted] definitely for FBI [redacted]
- [redacted]

Action Items for [redacted]

- Letter providing FBI position [redacted]
  - [redacted]
  - [redacted] will only be available on [redacted]

b3
b7E
b6
b7C

E-mail [redacted] and verify that the FBI is receiving [redacted]

- [redacted] – can I have a copy of the requirements documents that we approved for each of the Task Orders

CELLSITE-14944

- Letter summarizing the [redacted]
- Provide [redacted] official answers to [redacted] – completed 8/15
  - [redacted]
- [redacted] – review file/documentation to see what [redacted] memory recalls the FBI deciding to wait for
- [redacted] informed [redacted] that only [redacted]
- [redacted] will review the [redacted] capabilities with [redacted]
- [redacted] will send a [redacted] back to FBI and send copy of [redacted] report
- [redacted] will provide a revised version of the [redacted] schedule since the FBI has been working off the original proposed schedule.
- [redacted] will provide [redacted] with a copy of the [redacted] for testing

Hi [redacted]

Thank you for the message below and the follow-up phone call. The invoice was successfully processed through our financial system by our payment unit on Thursday 11/18/10. My financial system shows "Paid in Full" as of 11/18/10. The next step is for the funds to be transferred from the [redacted] bank account. A few days delay while the accounts rectify each other is standard. However, please let me know if you do not see the payment within 1-2 weeks.

Please let me know if you have any other questions and have a Happy Thanksgiving,

Subject: [redacted]

Hi [redacted]

Welcome again to the project and I hope you had a good Halloween weekend. In an effort to better administer the contract and TOs and to better track the expenses under [redacted] the FBI requests [redacted] adjust actions accordingly, per the following changes:

1) Please e-mail status reports (weekly, monthly, etc.) on Task Orders for services under [redacted] to: [redacted] will ensure these status reports are provided to the proper Technical POC.
2) Please e-mail copies of Invoices for services and equipment under [redacted] will ensure the invoices are sent to the proper Technical POC for review and verification before processing for payment.
3) For the months of October, November, and December 2010, please provide the hourly work breakdown for [redacted] TOs with these monthly invoices.

b6
b7C
b3
b7E

Reducing the number of POCs on the e-mail CC will reduce confusion internally and ensure only those with a need to know are updated on project statuses or expenses.

Please confirm receipt of this e-mail and let me know if you have any questions on the above changes. Thank you for all your assistance.

Have a good day,

[redacted]

Hi [redacted]

It was so good to meet with you last week, transition the contract, and work out a few of the programmatic kinks. I just wanted to review the Action Items we have on our plate to make sure we weren't missing anything and could track our tasks. Below is a general list of what I have. Please let me know if you have any additional ones.

1) Transfer of [redacted]
   a. Incorporate in a [redacted] has released the equipment from the previous Contract.
2) Invoices:
   a. Please submit invoices to [redacted] for processing
      i. Just as a reminder, [redacted] is not an FBI employee and as such does not have approval authority, especially for anything regarding funding. Please let me know if you have any questions.
   b. Please include the monthly hours-breakdown with the invoices
   c. Could you please double check the dates listed on [redacted]
      i. I already verified that the dates are on point for [redacted]
3) Consolidated Price List
   a. I'll review that document next week and discuss the new products with [redacted] Once we've complete our reviews I'll either discuss any findings with you or send you a [redacted] to the Contract incorporating the revised price list.
   b. This affects a number of Action Items so I'll try to complete this process ASAP.
4) [redacted] for equipment delivery to ensure [redacted]
   a. Coming via fax this afternoon – I mailed the original to [redacted] in Sept of 2010 so the quality of the fax may not be the best. Let me know if you need me to try a different method of getting the copy to you.
   b. I understand from the consolidated price list that the pricing has changed. I'll discuss the quantities with [redacted] to see how they would like to proceed. I will most likely have to send a [redacted] for the PO with the adjustment. This will be done once I incorporate the new price list into the contract.
5) Summary of TO information: POP, Options, Funds, SOWs etc.
   a. I'm going to put it on my radar for completion next week.
6) [redacted] – Letter requiring signature for purchase
   a. I need to review this purchase with [redacted] to verify how they would like to handle this equipment [redacted] also need to verify property procedures to prevent needing to ship the equipment to [redacted]
7) [redacted]
   a. I will review the decision with the Team and confirm the flexibilities or limitations of our financial system regarding reallocating the [redacted] for equipment or requesting reimbursement checks.
8) 11/16/10 Letter Responding to [redacted] Letters
   a. I will revise the letter next week as well and incorporate the updates from last weeks meeting and incorporate these decisions into the contract in a [redacted]

b6

CELLSITE-15042

Hi [redacted]

Please verify that the invoice that you received matches the attached. There was a change made on the invoice that should have been done before the invoices were submitted to you. We are concerned that you may be going off of the incorrect version (I might have accidentally sent out the incorrect/wrong version of the invoice).

Regarding the [redacted] The incurred costs minus the negotiated value was the [redacted] (I attached the [redacted] for your convenience). The additional negotiated fee is just the total negotiated fee (including what has already been paid) and an estimate at completion, to equal the total amount.

b6
b7C

Please call me to discuss this when you have a moment. I know that this invoice situation can be frustrating.

Thanks,

[redacted]

Hi [redacted]

Thanks for the schedule below I'll these dates in mind when asking for documentation and scheduling meetings.

In terms of scheduling for next week here's a *tentative outline*:

- **Monday – 8/30/10**
  - FBI meetings @ VA/DC in the AM.
  - Travel to Melbourne for Harris meetings in the afternoon
- **Tuesday – 8/31/10 – 8:30AM start time**
  - Contract Administration:
    - Review/definition of processes/expectations for future TO proposals
    - Review/confirm product code names, define process for changing names
    - Contract Pricing – one consolidated, updated price list
  - [redacted]
  - IP discussions
    - Harris to provide letter of IP assertions – review/discuss
    - FBI [redacted] review of IP/Classification [redacted] for products
    - Review of any IP concerns
  - [redacted] – discussion of timeline for product receipt
- **Wednesday – 9/1/10**
  - Possible spill over for contractual matters
  - Review of [redacted] goals/vision
  - [redacted] – Technical discussions
    - Review of requests for clarifications & questions
    - Review of conditions and assumptions clarifications
  - [redacted] – Technical discussions
    - Review of requests for clarifications & questions
    - Review of conditions and assumptions clarifications
- **Thursday – 9/2/10**
  - [redacted] Technical discussions
    - Review of requests for clarifications & questions
    - Review of conditions and assumptions clarifications
  - [redacted] – Technical discussions
    - Review of requests for clarifications & questions
    - Review of conditions and assumptions clarifications
- **Friday – 9/3/10**
  - Possible spill over for technical reviews
  - FBI travel back to DC/VA
- Should any order of the technical discussions change, the FBI will notify [redacted] ASAP.
  - To best prepare for the meeting I would recommend at a minimum:
    - Revised Equipment Pricing List
    - Be prepared to discuss responses to the questions/clarifications/conditions & assumptions

b6
b7C
b3
b7E
b5

Addition to Attendee List – [redacted] is a possible attendee for the meetings on Wednesday 9/1/10.

Have a good weekend,

Subject: Proposals and Summaries for October 29 [redacted]

~~SECRET~~
~~RECORD 319O9-HQ-A1487622-OTD~~

The first [redacted] meeting for FY09 is scheduled for Wednesday, October 29 at 1:00 in the ERF Main Conference Room. [redacted] Board members include the Assistant Section Chiefs or designated representatives, [redacted] Proposals reviewed at this meeting will be competing for the funding provided by the [redacted] and come from only two units, [redacted]

I am sending you the draft agenda showing the [redacted] proposals to be reviewed. I am also including summaries of the 6 proposals and the entire proposal text for 5. One proposa [redacted] was partially funded in FY08 from the [redacted] and was required to provide only a quad-chart summary with its request for FY09 second-increment funding.

I will also be providing the summaries to subject matter experts listed on the agenda. Feel free to have me add names to the list if there are others whom you wish to have participate in the October 29 meeting.

Thank you!

[redacted] As per our meeting yesterday attached is the latest MUST HAVE/SUPPORT bare bones request. As discussed my budget is a running target tied to cost module funding and I cannot specifically identify what base funds [redacted] I have to support the [redacted] identified requirements. Additionally even if a requisition is submitted and approved Finance Division is only authorizing [redacted] funding due to the continuing resolution. I will say that [redacted] will use base funds to support, however, at this time I simply cannot provide a specific number.. Hope this assists in your presentation to the Executive Board.

Thanks for the comments, better we talk in person, seems that things could get confused really quickly on email...

I guess I'll rely on the priorities on what is funded or not. I'm putting the paperwork in to get a line item on the spreadsheet, as stated in the last meeting that the was

Section 7 Attachment

Requirements Analysis

The Wireless Intercept and Tracking Team (WITT), in support of

development efforts undertaken by WITT have determined that

WITT

as specified in requisition

b3
b7E

Analysis of Alternatives

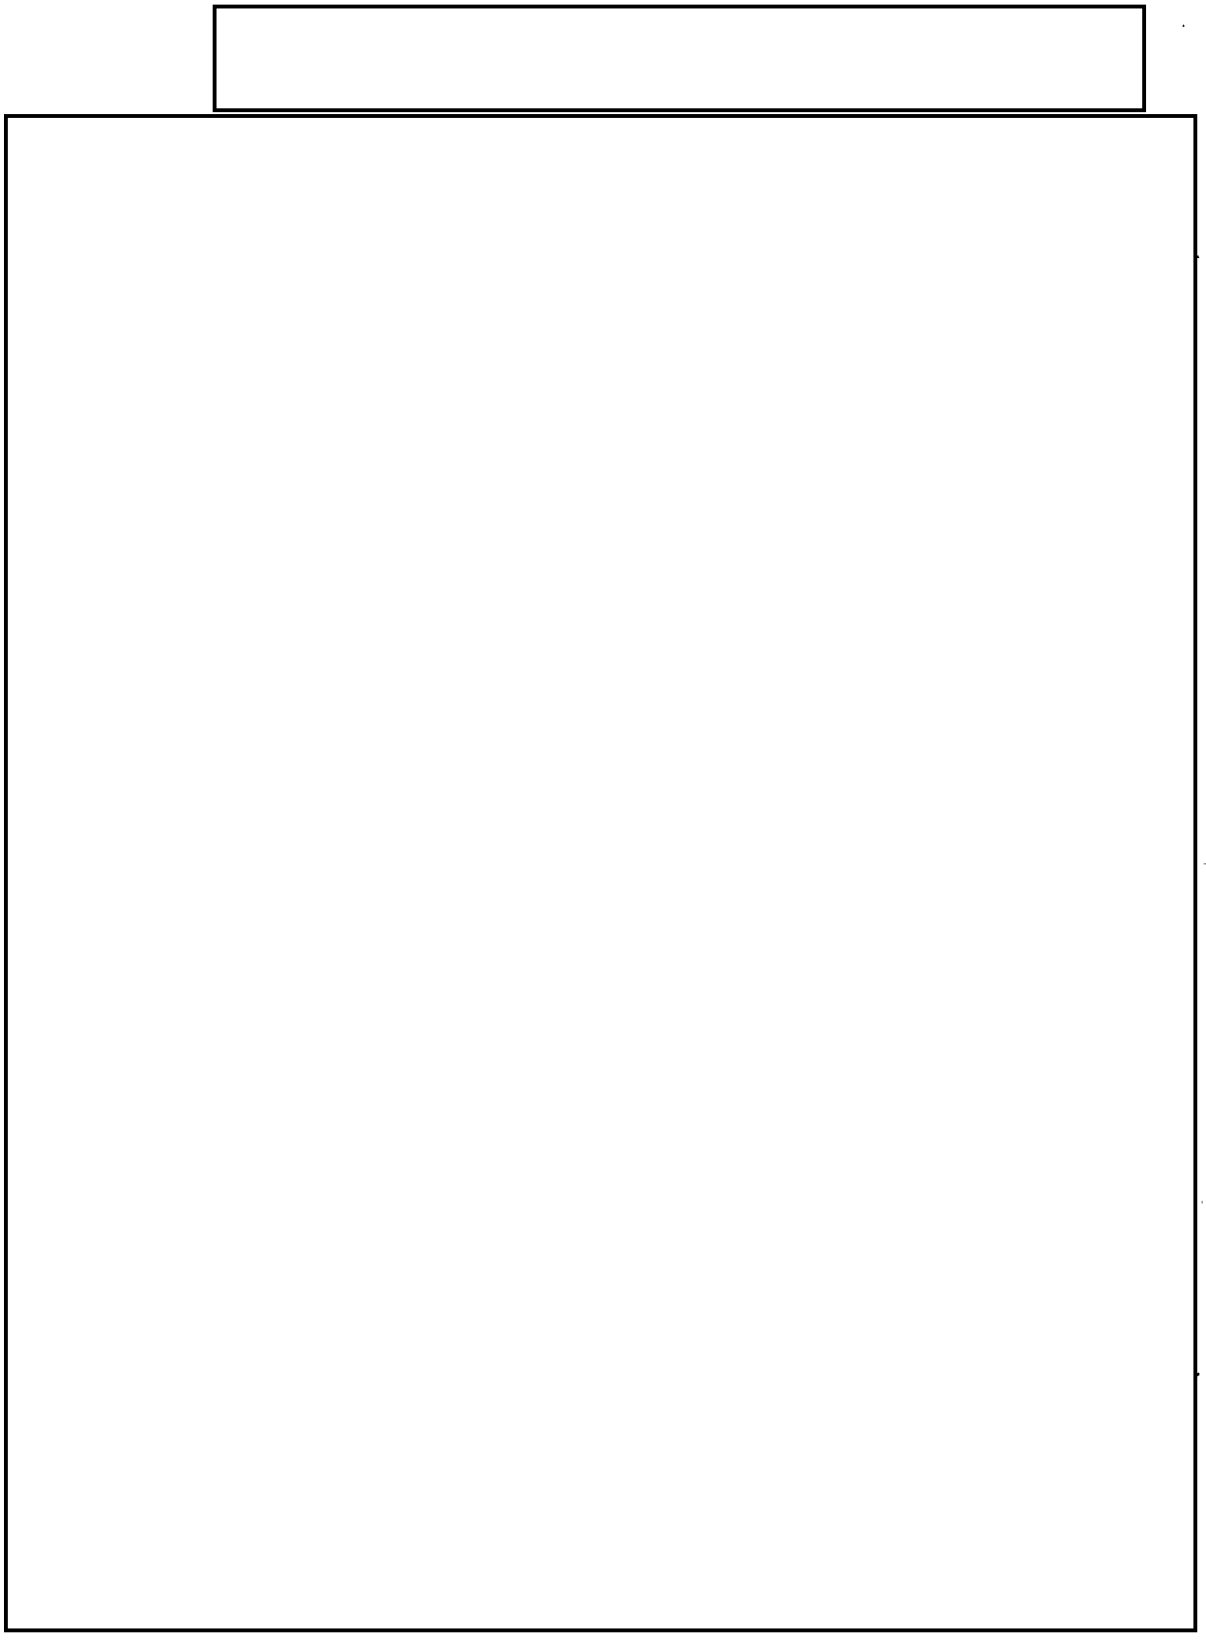
Section 508 Statement

Wireless Intercept and Tracking Team conducted an evaluation of the systems and have submitted the following comments regarding compliance of Section 508 requirements.

1194.3 General Exceptions

Systems are critical to the direct fulfillment of missions and are not used for routine administrative and business applications.

Subpart B -- Technical Standards

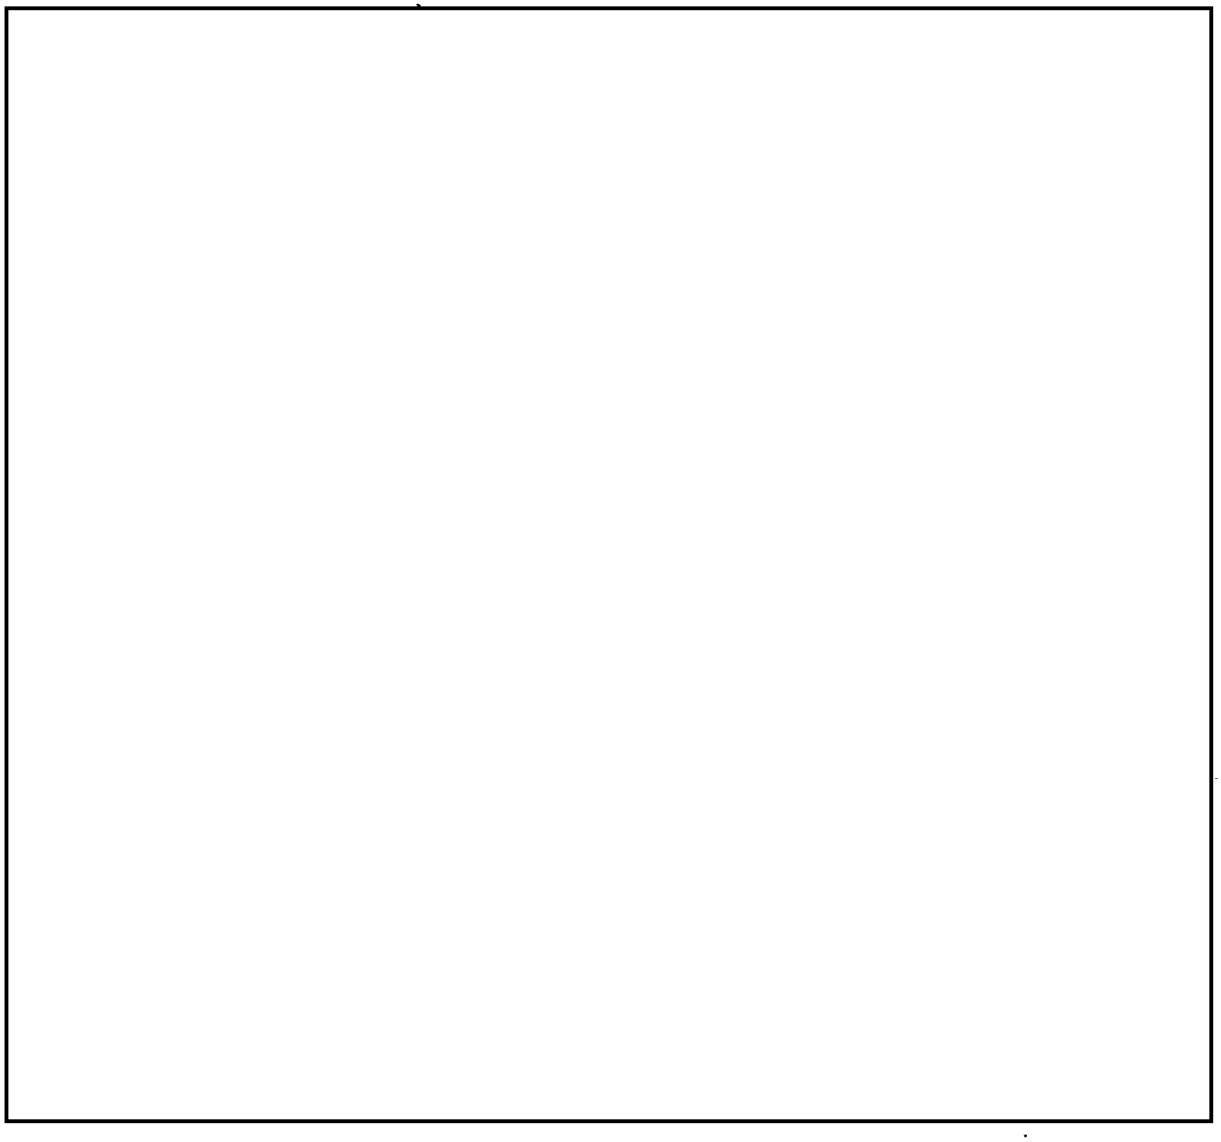


b3
b7E

Subpart C – Functional Performance Criteria

CELL/OTD 026794

CELLSITE-7812



Subpart D – Information, Documentation, and Support

(a) Documentation is offered in hardcopy (paper) as well as softcopy (CD) at no additional charge.
(b) End users are instructed in the product features, visually or through instruction verbally at request, at no additional charge.
(c) Support services accommodate the communication needs of end-users with disabilities.

System Security Plan

A System Security Plan has been completed and in place for use of the [redacted] [redacted] EC dated 06/30/2004 from Security Division has been attached to requisition package [redacted]

b3
b7E

Sole Source Justification

Independent Government Cost Estimate

WITT has submitted a quotation from the vendor, which details the cost of this procurement. Pricing is according to GSA price listings.

Life Cycle Cost Estimate

WITT /WITT WITT currently

Earned Value Management Plan

WITT continuously ensures planning, scheduling, and budget monitoring through its program management efforts. /WITT Detailed reports can be generated providing management the proper information to plan future procurements and deployments as the need arises.

b3
b7E

Privacy Impact Assessment

The Office of General Council has been contacted and has reviewed the request for a Privacy Impact Assessment (PIA). WITT has

Risk Assessment

WITT has identified through research and development efforts that WITT has a proven and successful history with the vendor of these systems. Sufficient funding is also in place for this procurement, and as well as plans for the maintenance over the full lifecycle of these products. Refer to acquisition planning form for specific estimates and distribution of costs.

Hi [redacted]

It was a pleasure to speak with you. As we discussed, I am attaching the table of supporting features and remarks per Functional Performance Criteria for our products. As we also discussed some equipment may fall in the exemption guidelines but either way you have documentation for the Boards request. Please do not hesitate to contact us is you need any additional information.

[redacted]

Section 1194.41 Information, Documentation and Support - Detail

Voluntary Product Accessibility Template

Criteria **Supporting Features** **Remarks and explanations**

(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge Documentation is offered in hardcopy (paper) as well as softcopy (CD) at no additional charge.

(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge. End users are instructed in the product features , visually or through instruction verbally at there request.

(c) Support services for products shall accommodate the communication needs of end-users with disabilities. Support services can accomadate end users with disabilities.

DECLASSIFY ON: 10-31-2037

~~SECRET~~

Justification for Other Than Full and Open Competition
In Accordance With 41 U.S.C. 253 (c)(6)

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED EXCEPT
WHERE SHOWN OTHERWISE

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI), [redacted] Operational Technology Division (OTD). The contracting activity is the Engineering Contracts Unit (ECU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(U) The proposed acquisition strategy is to award a non-competitive contract effort for highly-specialized [redacted]

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

(U) [redacted] is responsible for providing the FBI with [redacted] Wireless Intercept and Tracking Team (WITT) [redacted]

(S) [redacted]

b1
b3
b7E

(U) [redacted] is requesting this sole source procurement with [redacted] Requisition #E00XXXX, in the amount of $XXXXXX.00 has been submitted to begin funding the requirement.

CELL/OTD 013063

~~SECRET~~

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

(S)

(S)

b1
b3
b7E

6. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

7. DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the

Government, and rigorous negotiation.

8. A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED

(U) [ ] continuously conducts market surveys to determine state-of-the-art technologies. The engineers, technicians, and technical personnel are in constant contact with equipment vendors, other technical members of the intelligence community, as well as visiting trade shows, reviewing trade journals, and browsing the Internet. [ ] routinely conducts and attends working group (WG) meetings with vendors to assess the capabilities, performance, and quality of equipment that meets the needs of the FBI. [ ] assessed available capabilities and have determined that other vendor technologies have not yet achieved the advanced capabilities that [ ]

b3
b7E

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U) [ ] See paragraph (5) above for facts supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

[redacted]

I am working with some other groups here at [redacted] (working group level) to come up with a information for planning purposes. It is actually really important with a deadline of this week (sorry i just found out about this). [redacted] Not much more to say on the background, but is a really important thing that needs to be filled out.

Could you fill out the following for me for [redacted]

[redacted]

p.s. if this can't be done in the timeframe, please let me know.

much appreciated for the support.

Hi

How are things coming on the various documents you were planning on sending down? We are closed tomorrow so I was hoping you could send them today. I am closing in on arrangements to work the

we need during the actual execution of task work.

Please let me know when to expect the documents so I can arrange to have the fax manned.

Any further thoughts regarding th
We'd really like to get that restarted.

Thanks,

CELL/OTD 026967

(U) The proposed acquisition strategy is to award a non-competitive contract effort for

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

(U) s responsible for providing the FBI with to conduct lawfully authorized The FBI's Wireless Intercept and Tracking Team (WITT) plays a critical role in the

(S)

b1
b3
b7E

(U) is requesting this The proposed procurement is in the amount o has been submitted to fund the requirement.

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

~~SECRET~~

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

(S) [redacted] b1 b3 b7E

(S) [redacted]

6. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would [redacted] b3 b7E

7. DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED

[redacted] b3 b7E

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U [redacted] See paragraph (5) above for facts supporting the use of other then full and open competition. b3 b7E

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

Justification for Other Than Full and Open Competition
In Accordance With 41 U.S.C. 253 (c)(6)

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED EXCEPT
WHERE SHOWN OTHERWISE

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI), Operational Technology Division (OTD). The contracting activity is the Engineering Contracts Unit (ECU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(U) The proposed acquisition strategy is to award

b3
b7E

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

is responsible for providing the FBI with

The FBI's Wireless Intercept and Tracking Team (WITT) plays a critical role in the

(S)

b1
b3
b7E

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

(S) [redacted]

(S) [redacted]

b1
b3
b7E

6. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would [redacted]

7. DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED

(U [redacted]

b3
b7E

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U [redacted] See paragraph (5) above for facts

supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

(U) As the Contracting Officer Technical Representative (COTR) of record, I hereby certify to the best of my knowledge that all information contained herein is complete and accurate to the best of my knowledge.

RE: Review o[redacted]

Priority: Priority

I've reviewe[redacted] evaluating it on the basis price and value. The pricing is acceptable and is comparable to previous contracting efforts. As to contract value, this type of contract [redacted] will be in the Government's interest as it will significantly reduce the number of man-hours spent in generating multiple contracts over the next fiscal years.

I recommend approval and subsequent contract award.

Project Submission Instructions

Overview

(S)

b1
b3
b7E

(S)

The FBI's team will assist bureau units with their initial high-level project plans prior to the multi-agency review. To increase the likelihood of approval, it will be helpful to keep several elements in mind as you craft your submission documents.

1. *Describe how your project relates to the current and future challenges presented by one (or more) of the specific technologies noted.*

2. *Think in terms of "gaps!"*
   Describe current/future operational shortcomings and how the project will overcome them.

3. *Identify the specific benefits that will accrue to the FBI's*

b3
b7E

4. *Is the project sustainable beyond the funding period identified?*
   Preference is more likely to be given to projects that will be maintained by once the initiative concludes.

5. Collaboration, in development and/or procurement phases, is looked upon favorably and demonstrates that duplication of effort is being avoided.

6. *Identify the base funds your unit will contribute to the effort.*
   Doing so demonstrates your unit's commitment to the program. (Be aware that unit funding is not offset by any enhancement funds you receive, nor should a unit reallocate funds to other projects if monies are provided.)

CELL-OTD 012562

Process

Please review the [redacted] document "Understanding the Core Principles" to ensure that you understand the ground rules and that your intended submission falls within the scope of the program.

Initial submissions can be crafted using a Word template designed for that purpose. (Filename: [redacted] Submission Form-Rev06-11.dot). Save the completed template as a Word document with a filename that begins with your unit's acronym (for example: [redacted] FY2012.doc)

b3
b7E

Supplement your completed worksheet with any information that will help explain the nature of the project (the challenge [redacted] anticipated benefits, etc.).

Create a brief (6 slide) Powerpoint© briefing that can be used to introduce your submission to the [redacted] For a particularly complex project a member of your unit may be asked to present a technical overview to one or both of the review groups.

E-mail completed submission documents via [redacted] to the following members of the FBI's [redacted] team:

SSA [redacted], Lead
SSA [redacted]
[redacted] (contractor)
[redacted] (contractor)

b3
b6
b7C
b7E

You will be contacted by a member of the [redacted] team to discuss and fine-tune your submission before it is reviewed by (a) th[redacted] and (b) the [redacted]

FEDERAL BUREAU OF INVESTIGATION

STATEMENT OF WORK

(U) INTRODUCTION

(U) This purpose of this paper is to provide the vendor with a statement of work that describes requirements for conducting research and development of products. The following shall provide an overall description and scope of the task set forth in this STATEMENT OF WORK.

(U) (S) BACKGROUND and SCOPE

(S)

b1
b3
b7E

(S)

b1
b3
b7E

(S)

(U) DESCRIPTION AND REQUIREMENTS

(U) (S) The following headings shall provide specific tasks that are required for the fulfillment of

developing a SYSTEM as described above.

(U) ~~(S)~~ **TASK DESCRIPTIONS**

(U) DELIVERABLES

(U) (S) The following section provides for a delivery schedule as listed in Table 2 below, as well as details concerning each delivery requirement.

(U) DELIVERY SCHEDULE

ITEM	Time Frame
Monthly Project Status Reports	NLT Five (5) Business Days of each new month upon project inception, to include the following: • Schedules • Financial Status • Overall description of Issues/Concerns
BETA System	Reoccurring - BETA updates delivered as development and productization of functions permit.
Testing, Verification, and Demonstration	Testing and Verification shall be performed throughout the development lifecycle as required. A government Acceptance test shall be performed prior to final product delivery.
FINAL SYSTEM Delivery	NLT than 548 days (1.5 Years) after project inception
SYSTEM Training	Ongoing – Provided during delivery of initial BETA System and following updates Final – Provided to FBI personnel on FINAL SYSTEM Delivery NLT 548 days (1.5 Years) after project inception
SYSTEM Documentation	NLT 30 days after FINAL SYSTEM Delivery

(U) (S) **Table 3: Delivery Schedule**

(U) DELIVERY ITEM DESCRIPTIONS

(U) (S) The following provides **further** descriptions of items described above in Table 3.

(U) OTHER REQUIREMENTS

The following sections shall describe other requirements related to the development and delivery of the SYSTEM described in this STATEMENT OF WORK.

(U) SPACE REQUIREMENTS

(S)

b1
b3
b7E

OTHER DIRECT COSTS

(U) ~~(S)~~ Vendor shall provide the FBI with costs for equipment, to include all hardware and software, required for the development and delivery of the SYSTEM.

(U) GOVERNMENT FURNISHED EQUIPMENT

(U) ~~(S)~~ Vendor shall provide the FBI with listing of required GFE in response to this SOW.

Case ID #: 268-HQ-1068430 Sub C

Title: Wireless Intercept and Tracking Team

Synopsis: The purpose of this communication is to request the launch of course titled Legal Issues for WITT and provide the necessary launch details to insure a successful implementation.

Details: The Operational Technology Division and the Training Division (TD) have worked together on the Legal Issues for WITT project which has resulted in the development of the Legal Issues for WITT The Operational Technology Division has worked with TD to complete the formal content and functionality reviews of the course. The Operational Technology Division is satisfied that the meets all of its content and functional requirements and requests launch of the

b3
b7E

The purpose of the is to review important concepts regarding legal and policy issues for the WITT program and is intended for use by . This course will be optional training.

UNCLASSIFIED

WIT wpd

CELL/OTD 018627

CELLSITE-12896

To: Training From: Requesting Division
Re: EC NUMBER ON PROJECT REQUEST EC, MM/DD/YYYY

The Operational Technology Division is aware that the TD is required to submit certain course information and training records to other government agencies which requires the course classification markings to be correct. The content of the course is unclassified, but is intended for Official Use Only and is portion marked appropriately. The catalog information for the course, specifically the title and the description supplied to TD, are classified as unclassified and are portion marked appropriately.

The Marketing and Communication Plan will include reference to the course on the [redacted] WITT training section of our web site and announcements made at [redacted] meetings etc. Operational Technology Division agrees to allow the [redacted] to vett any marketing and communication materials prior to release if they contain any [redacted] specific information.

Students completing this course will receive 0.5 hours hours of credit on their [redacted] transcript.

Operational Technology Division has designated [redacted] U/C [redacted] as the executive sponsor of the Legal Issues for WITT [redacted] and [redacted] as the courseware point of contact. If discrepancies arise regarding the scope or accuracy of the content, users will be directed to the courseware point of contact for resolution.

The Operational Technology Division acknowledges its responsibility for formally reviewing the course content when there are upgrades or changes in functionality, policy, or procedures and providing to the [redacted] appropriate updates via a change request EC. The Operational Technology Division understands that courseware must be kept current else it will be subject to removal from the system after appropriate notification. The Operational Technology Division plans to review this [redacted] on a yearly basis.

CELL/OTD 02439

Antennas and Antenna Sectors

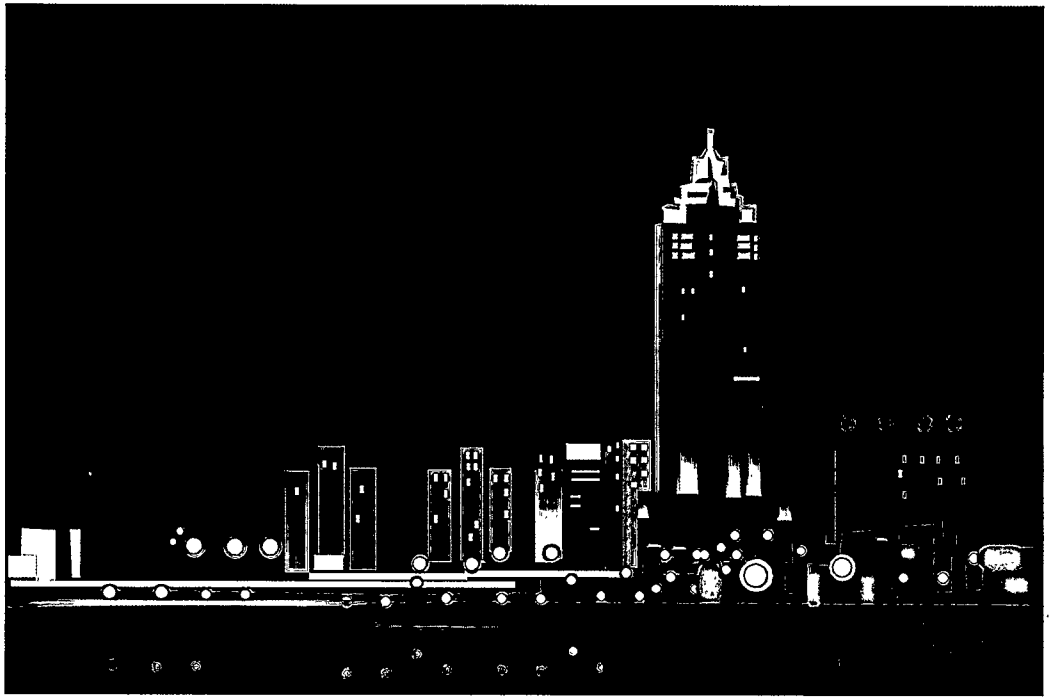
CELL/OTD 024393

WITT
Wireless Intercept and Tracking Team

Why do they call it Cellular?

CELL/OTD 024395

During the early days of mobile communications, systems used high powered transmitters and very tall antenna sites. Equipment was expensive and bulky. One tower might service an entire city. This proved to be very inefficient use of the radio frequencies available. For instance, during the 1970s the entire mobile phone system in New York City could handle only twelve simultaneous calls.

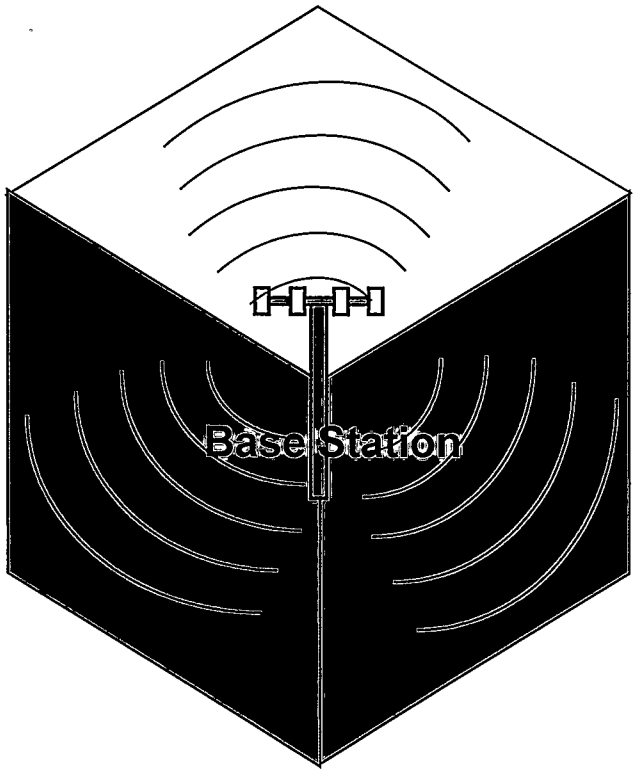


CELL/OTD 024396

During the early 80's, the FCC made additional frequencies available for use in mobile communications. It was after this addition that the cellular systems began to come into being. A cellular system uses shorter towers spaced closer together and lower powered equipment.

WITT
Wireless Intercept and Tracking Team

Makeup of a Cell Site

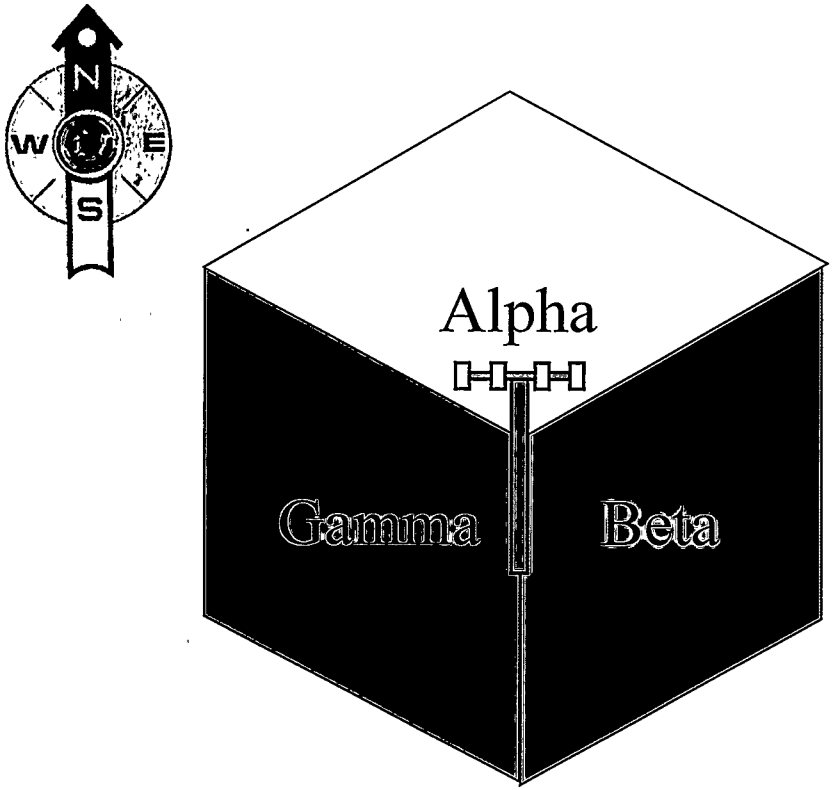


Most Cell Sites transmit in three equal sectors from the tower. Each sector can send different information to the users. A Cell site is also known as a Base Transceiver Station, or BTS.

CELL/OTD 024397

WITT
Wireless Intercept and Tracking Team

Cell Sector ID's

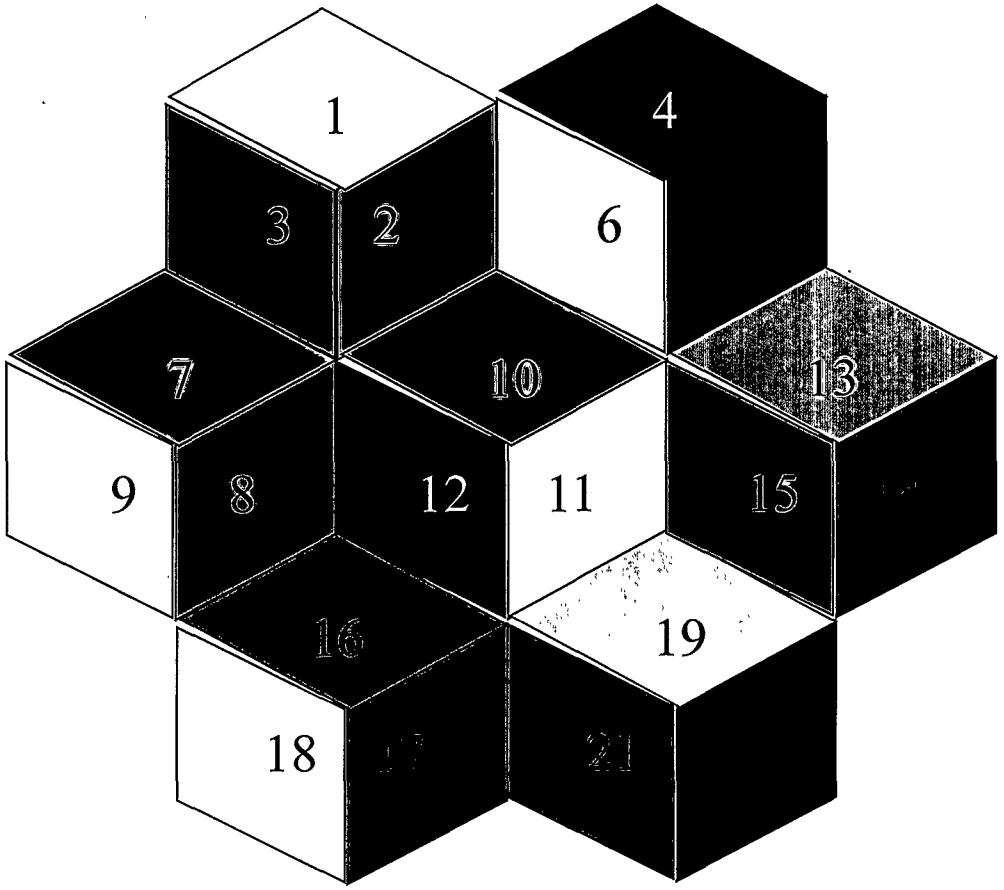


The cell sectors of a tower are numbered sequentially, usually with the designators: Alpha, Beta, and Gamma. The Alpha sector usually faces North. Sometimes, the service provider uses other means, such as 1,2,3, or a,b,c. to identify sectors. Each Tower site will have a unique number identifier in the system.

CELL/OTD 024398

WITT
Wireless Intercept and Tracking Team

Pattern Reuse



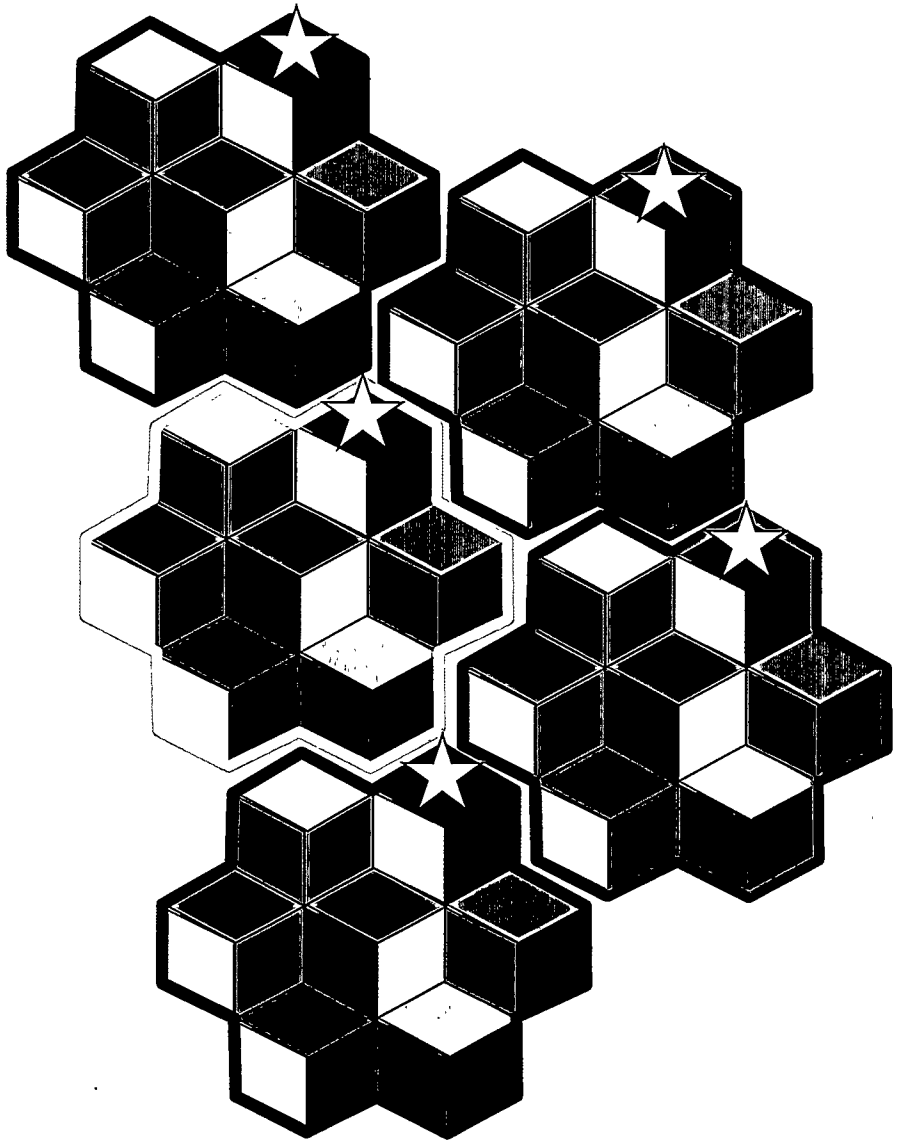
- This seven tower layout uses twenty one different sectors.

CELL/OTD 024399

CELLSITE-8087

WITT
Wireless Intercept and Tracking Team

Cell Sites and Sectors



The benefit of having multiple low powered towers allows for the same RF channel to be reused over a relatively short distance. This increases the number of users that the system can process.

☆ - Same RF channel

CELL/OTD 024400

CELLSITE-8088

WITT
Wireless Intercept and Tracking Team

Metropolitan Coverage

b3
b7E

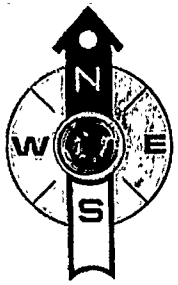
Cell sites are not always evenly distributed. Service providers have to account for the topography of the area, as well as high usage areas, such as urban areas or along expressways.

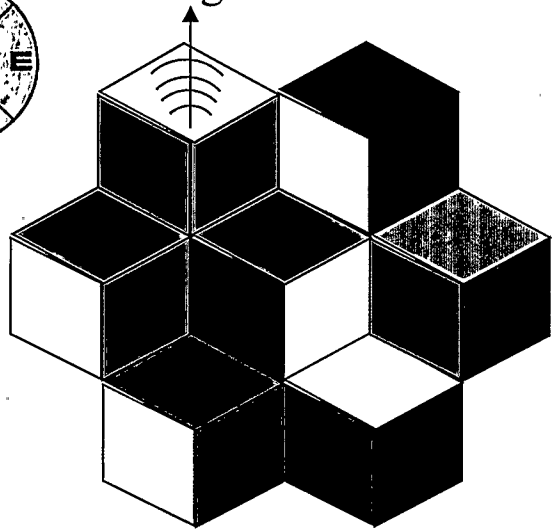
CELL/OTD 0244401

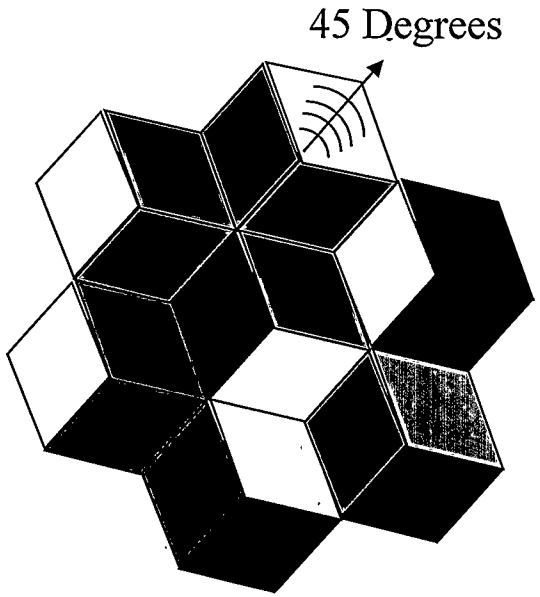
CELLSITE-8089

WITT
Wireless Intercept and Tracking Team

Cell Tower Orientation







Service providers can arrange their systems any way they choose. Some systems have the Alpha tower face pointing Northward, while others may rotate their antennas away from true North.

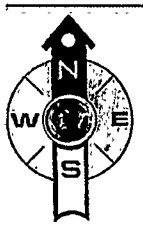
CELL/OTD 024402

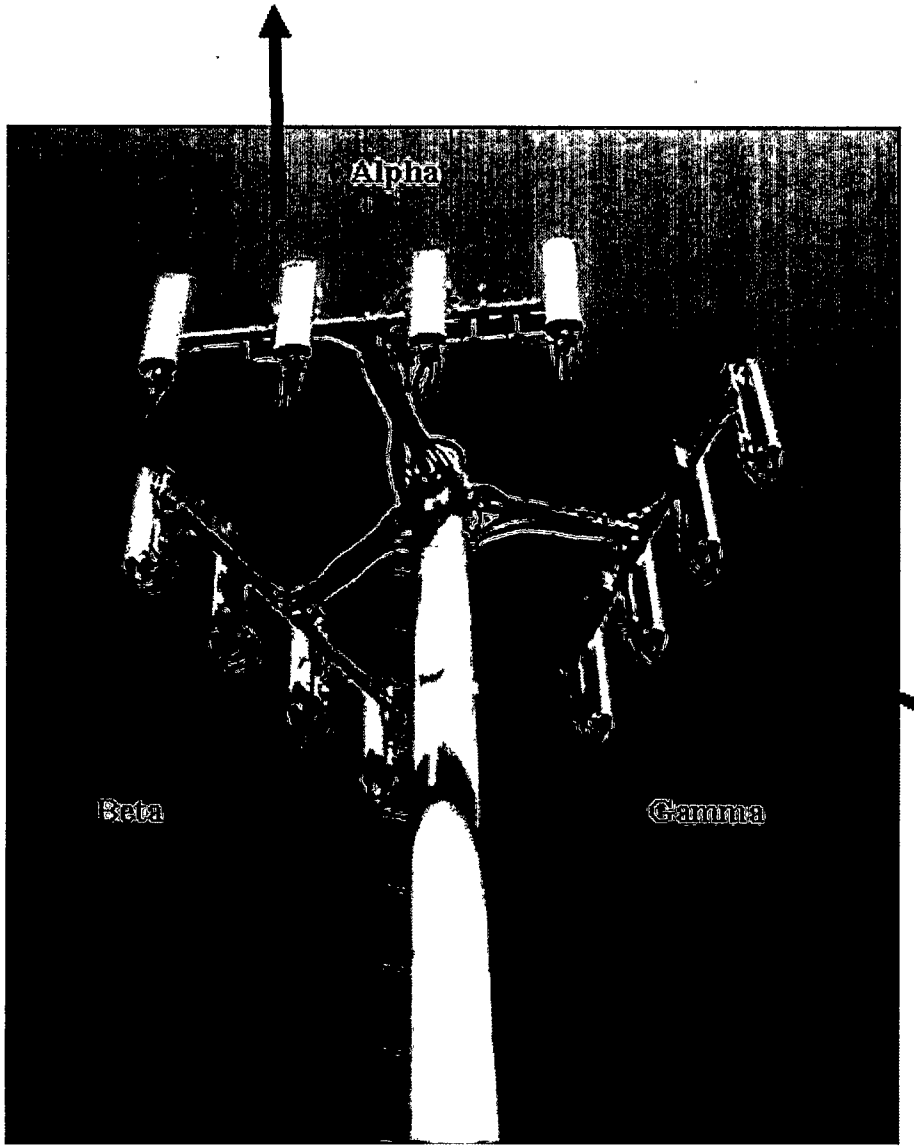
CELLSITE-8090

WITT

Wireless Intercept and Tracking Team

Cell Towers





A typical three sector tower antenna arrangement

If the Beta and Gamma sectors seem reversed in the photo, remember that you are looking up at the tower from below. Cell maps are drawn as if you are looking at the towers from above

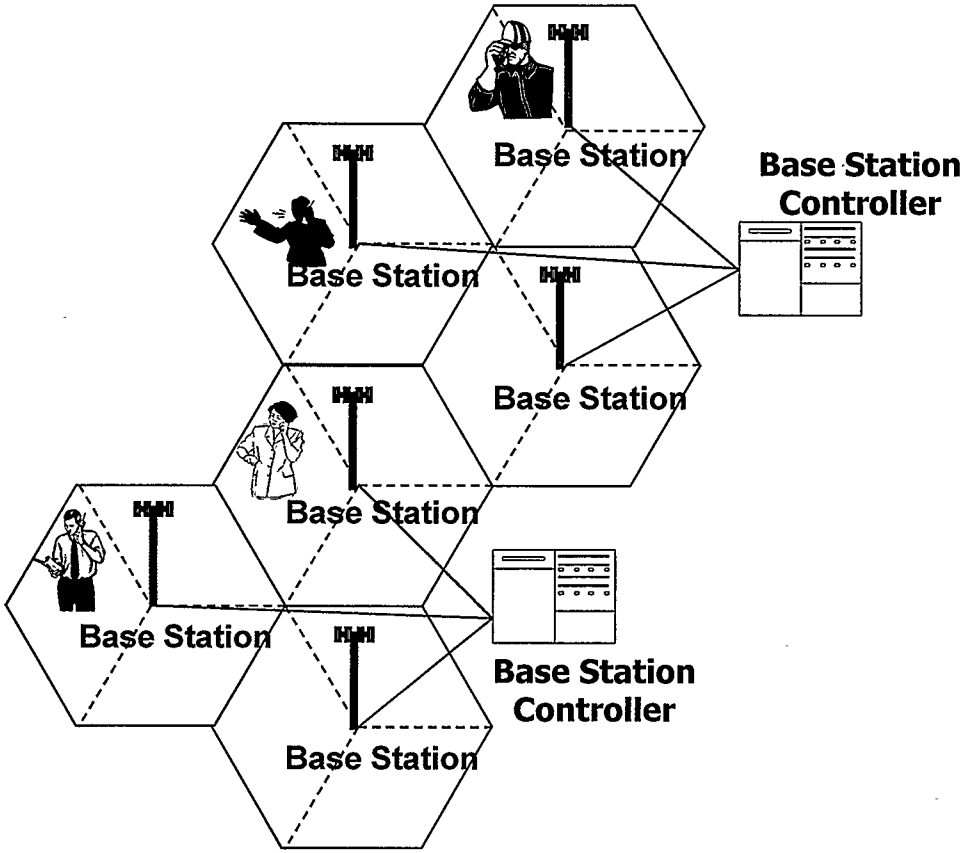
Cellular Network Architecture

CELL/OTD 024411

WITT
Wireless Intercept and Tracking Team

Cellular Network Architecture

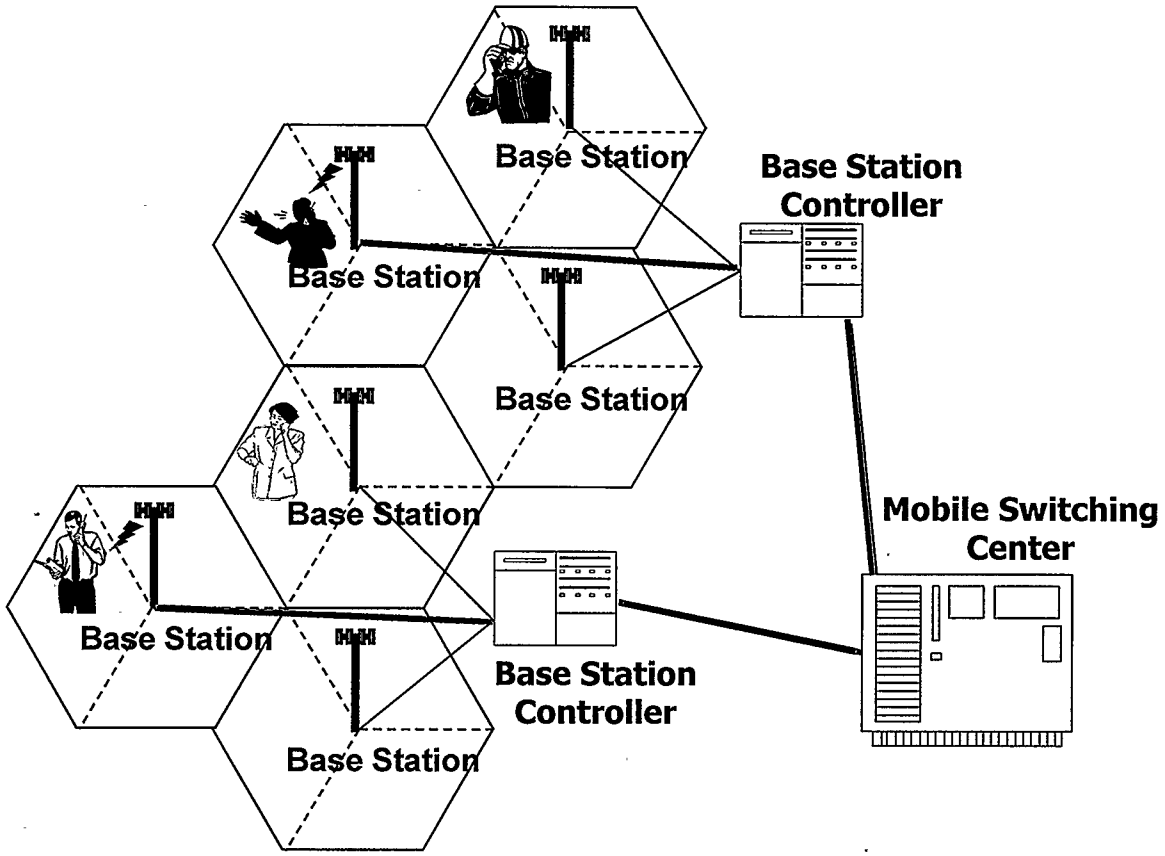


Cell towers blanket an area of coverage. Each tower is equipped with a base station transceiver. Multiple towers connect to a Base Station Controller. This link may consists of a hardwire connection or by microwave.

CELL/OTD 024412

WITT
Wireless Intercept and Tracking Team

Cellular Network Architecture



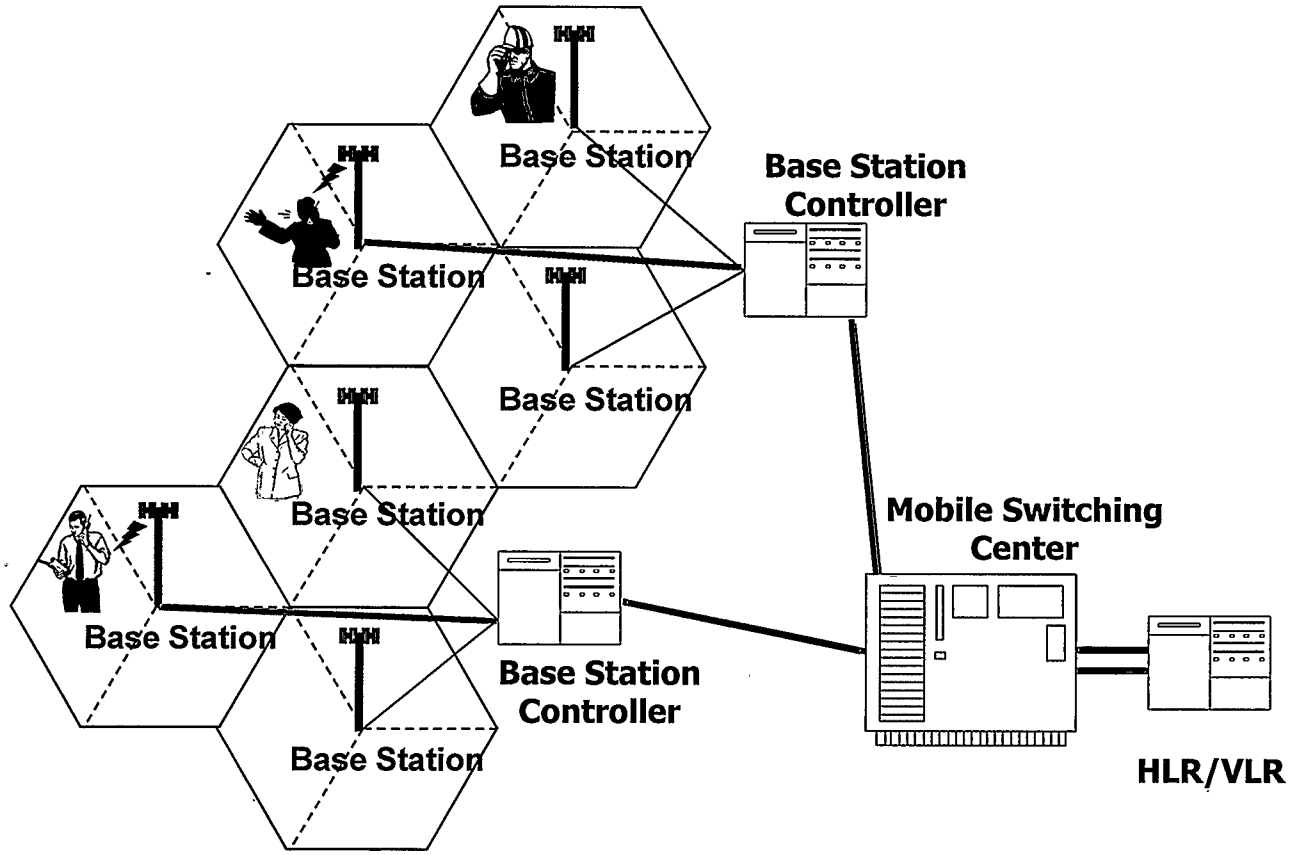
Multiple Base Station controllers connect to the Mobile Switching Center (MSC) (also referred to as a Mobile Telephone Switching Office, MTSO). The MSC controls the call traffic in the system.

CELL/OTD 024413

CELLSITE-8101

WITT
Wireless Intercept and Tracking Team

Cellular Network Architecture



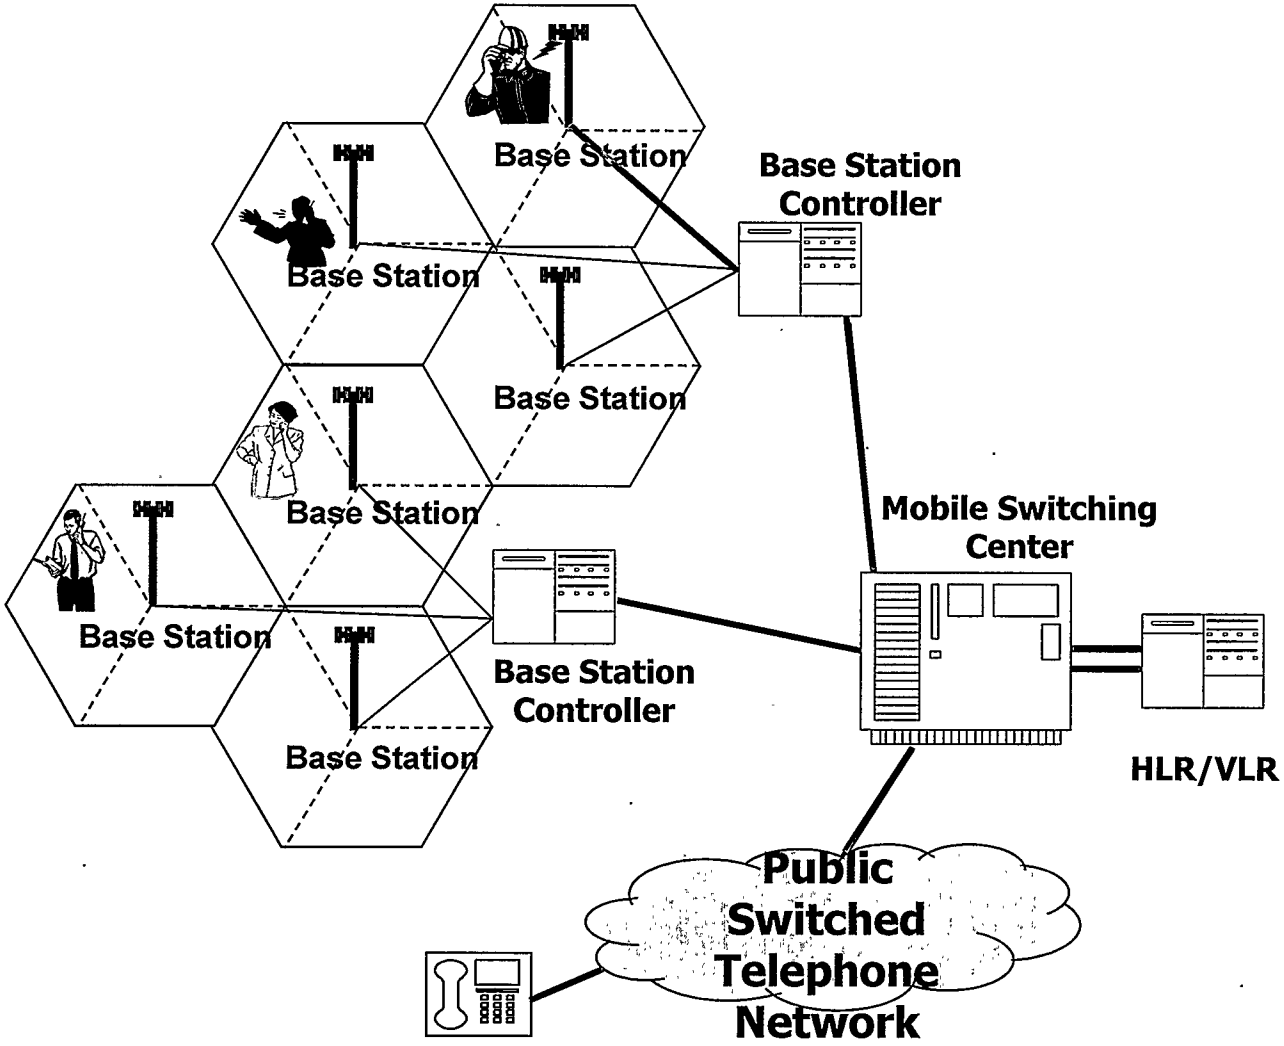
When a Mobile Station (cell phone) powers on and off, it sends a message to the system with it's identity and parameters. This is called a registration. The information is recorded in the HLR. The handset repeats sending a registration message periodically as determined by the network.

Within the MSC resides the Home Location Register, (HLR) and the Visitor Location Register (VLR). (HLR is a separate entity and is not part of the MSC however the VLR is often integrated into the MSC.) Each time a call is placed, the subscriber record is checked to see that the subscriber requesting service has a valid account and the prescribed service features are made available to them.

CELL/OTD 024414

CELLSITE-8102

Cellular Network Architecture



The MSC provides connectivity to the Public Switched Telephone Network (Landline phones), as well as connectivity to data services such as web, email, and multimedia for people with high speed data capable phones or cellular data cards.

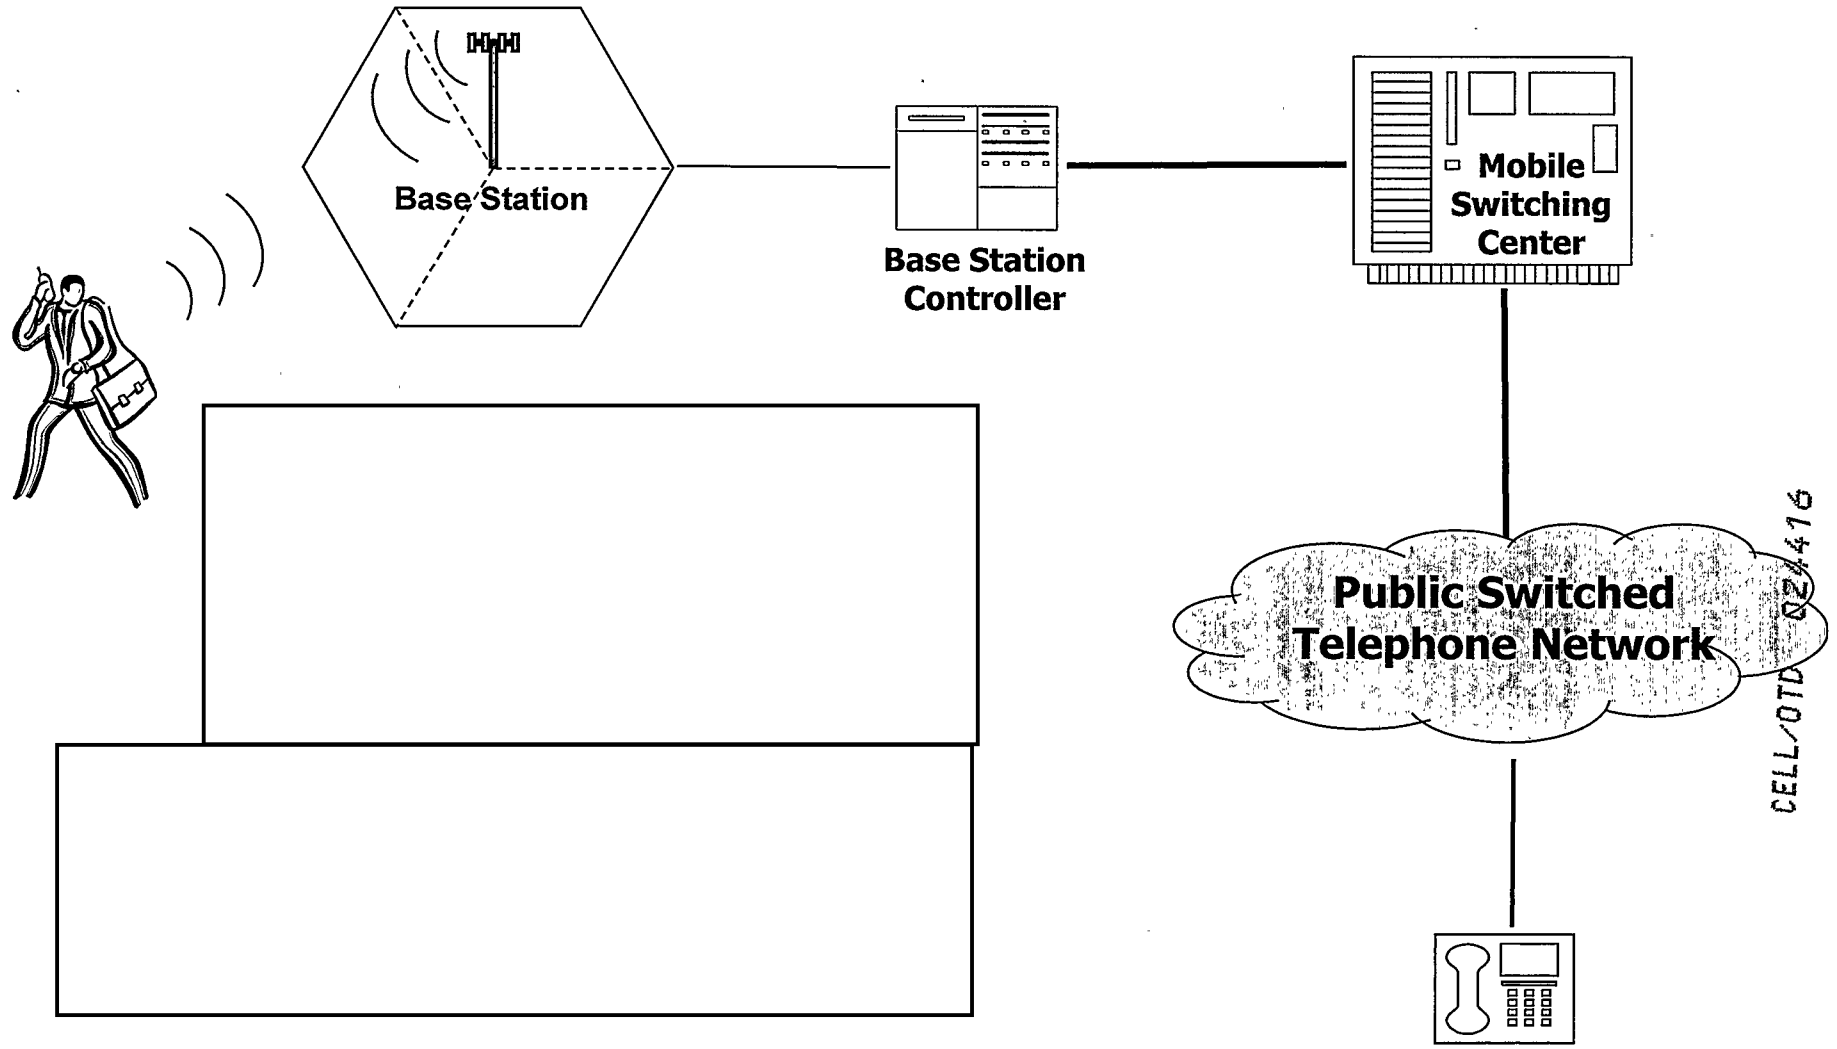
Cellular Network Architecture

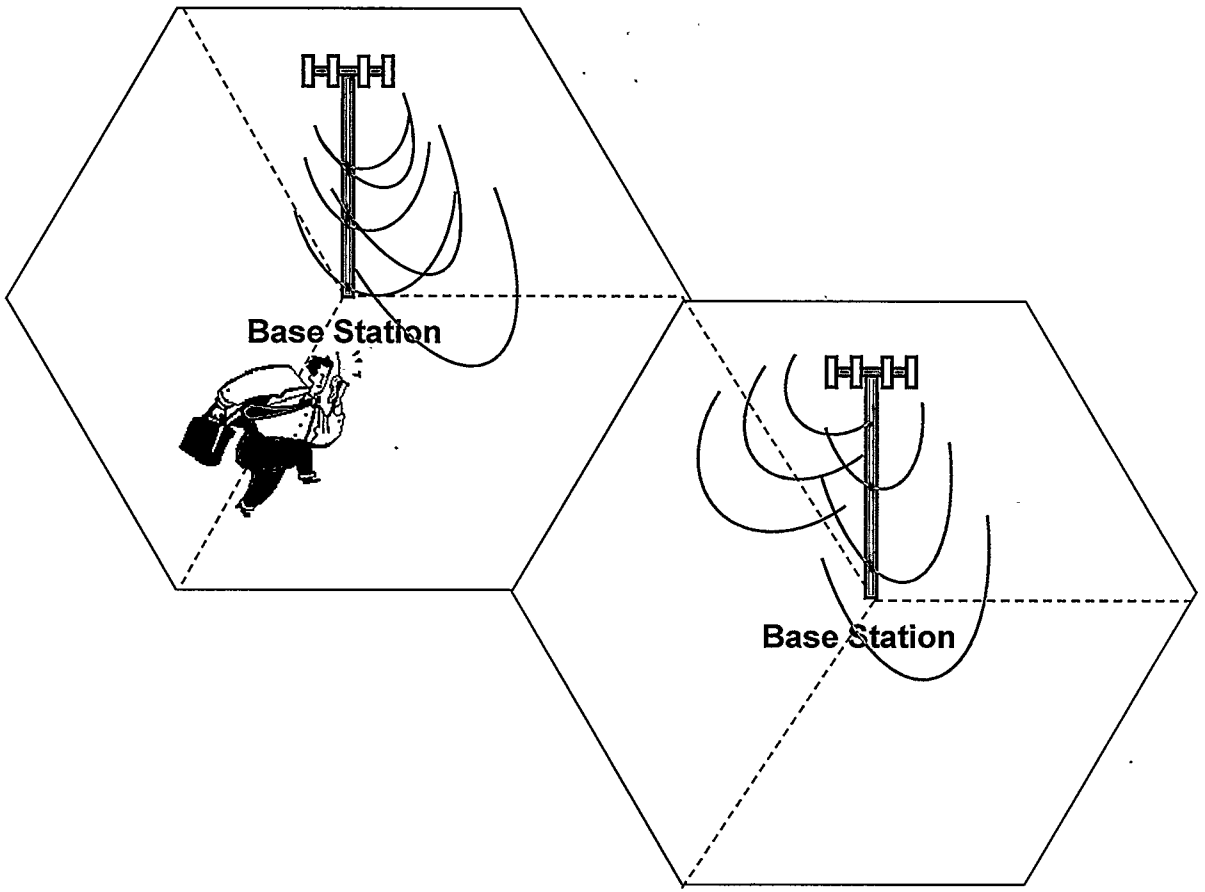


b3
b7E

CELLSITE-8104

WITT
Wireless Intercept and Tracking Team

Cell handoffs



- Once a call is placed or received, the cellular user communicates with their service provider's closest cell tower
- As the user moves geographically, "handoffs" will occur between cell towers

CELL/OTD 024417

Frequency Bands and the Cellular Air Interface

CELL/OTD 024418

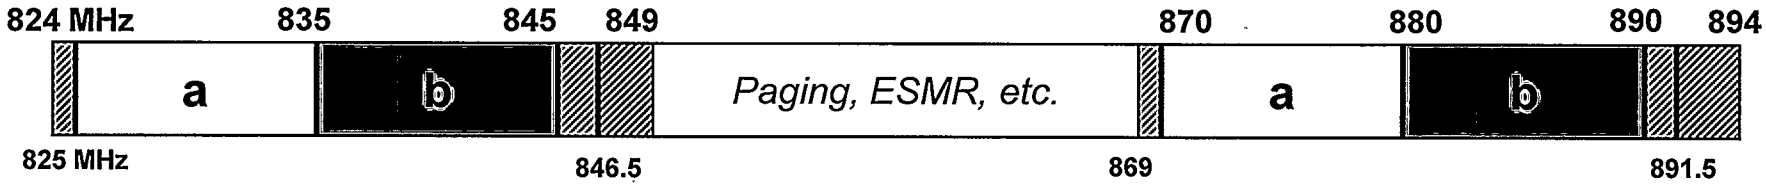
WITT
Wireless Intercept and Tracking Team

Frequency Bands

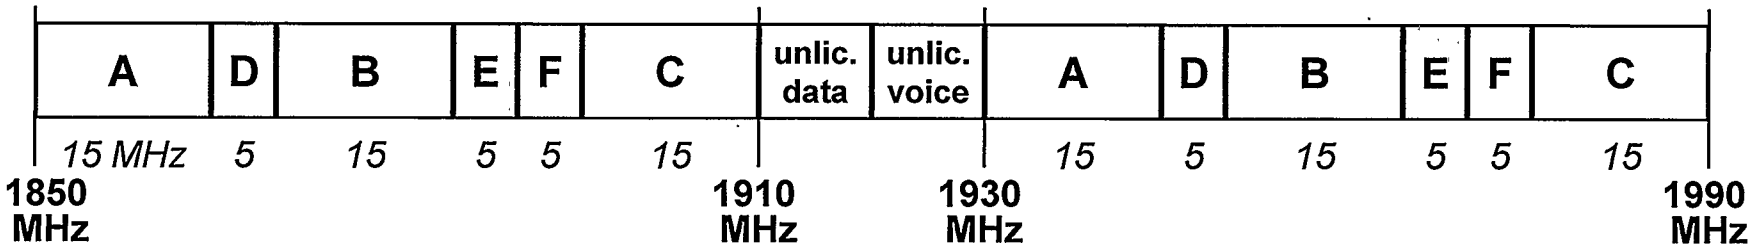
b3
b7E

Communication between the mobiles and the network occur in two frequency bands in the United States, (800 & 1900MHz).* Overseas networks operate in the 900 & 1800MHz bands.

Cellular Spectrum Allocations in North America



Personal Communications System (PCS) Spectrum Allocations in North America



*

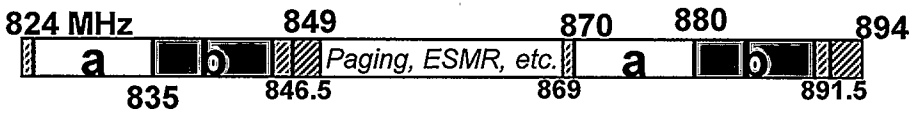
CELL/OTD 024419

CELLSITE-8107

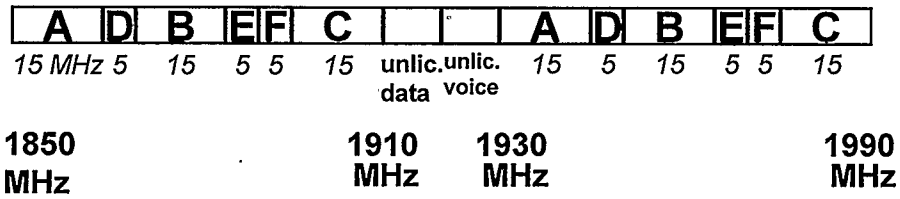
WITT
Wireless Intercept and Tracking Team

Frequency Bands

Cellular Spectrum



PCS Spectrum



- The 800 MHz Cellular band has two sections, small "a" and small "b". These were the original cellular frequencies.
- The PCS band is divided into six bands, large A-F. Bands A-C are 15 MHz wide, D-F are 5 MHz wide.
- Ownership of these blocks are not uniform. A service provider might operate in "b" in one market and "C" in another.

CELL/OTD 024420

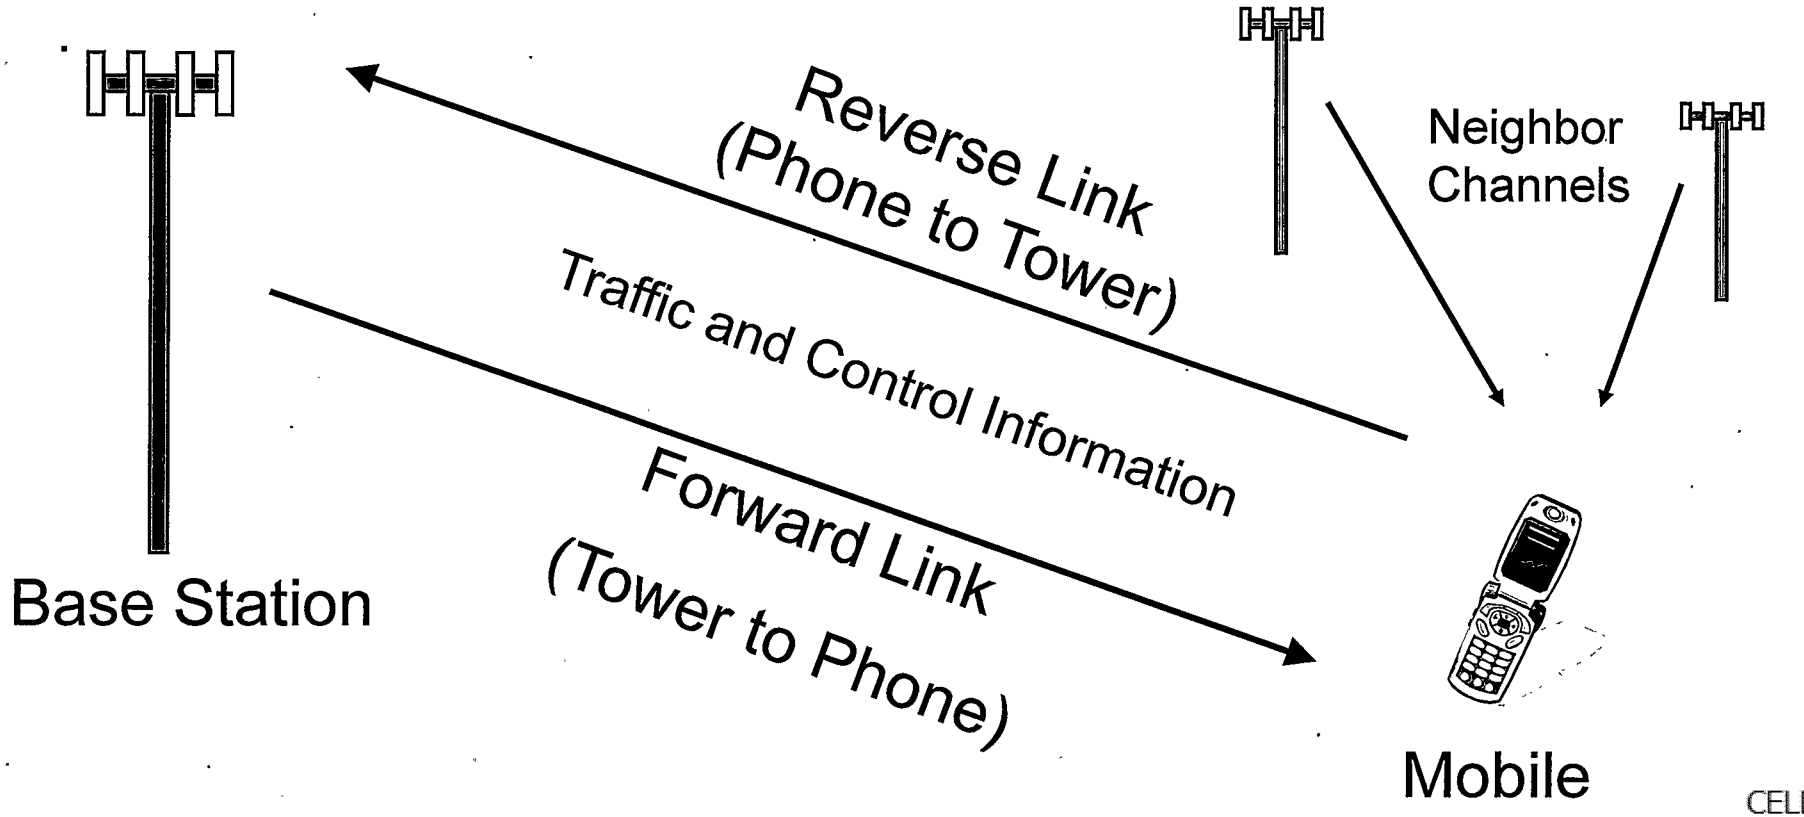
CELLSITE-8108

WITT
Wireless Intercept and Tracking Team

RF Channels

Cellular and PCS frequency bands are subdivided into Radio Frequency (RF) channels for communication between base stations and mobiles. Mobiles transmit on one frequency and listen on another.

b3
b7E

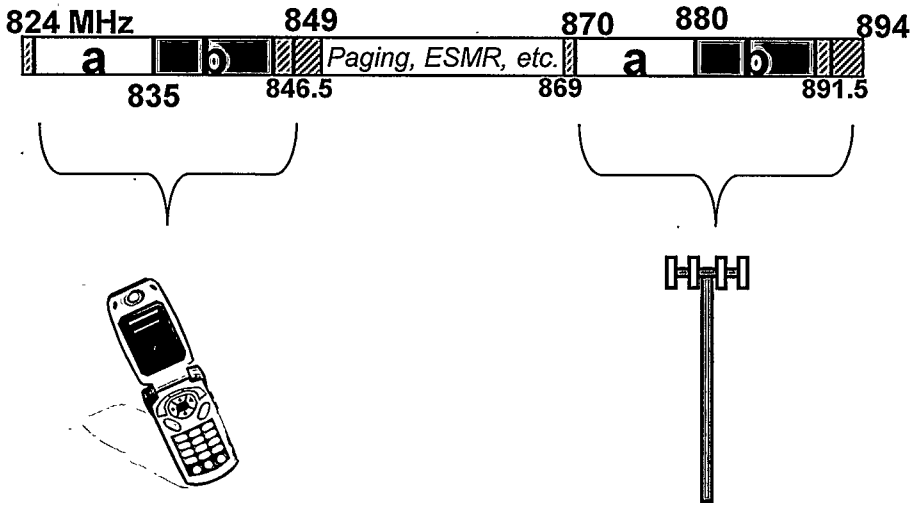


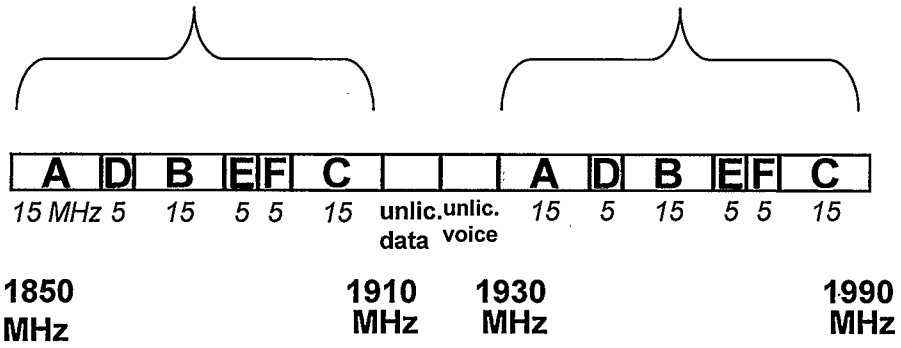
CELL/OTD 024421

WITT
Wireless Intercept and Tracking Team

Frequency Bands

Cellular Spectrum





PCS Spectrum

The lower set of spectrum in both the cellular and PCS bands correspond to the reverse channels transmitted by the cell phone to the tower. The upper regions correspond to the frequencies transmitted by the towers to the phones

CELL/OTD 020596

The Federal Bureau of Investigation (FBI) requires that contractors shall not divulge, publish, or disclose information or produce material acquired as or derived from the performance of their duties. For purposes of this clause, "Information" shall include but not limited to: In any media or all media including on the Web or Websites; publications, studies, books, thesis, photographs, press releases describing any part of the subject matter of this contract or any phrase of any program hereunder, except to the extent such is:

(i) Already known to the contractor prior to the commencement of the contract

(ii) Required by law, regulation, subpoena or government or judicial order to be disclosed, including the Freedom of Information Act.

No release of information shall be made without the prior written consent of the Office of Public Affairs and the Contracting Officer. The contractor and the author are warned that disclosure is not without potential consequences. The FBI will make every effort to review proposed publication in a timely manner to accommodate theses and other publications. Where appropriate, in accordance with established academic publishing practices, the FBI reserves the right to author/coauthor any publication derived from this contract. These obligations do not ease upon the completion of the contract.

RE: [redacted] Enhancement Task Order

[redacted]

Sent: Wednesday, August 24, 2011 10:37 AM
To:
Cc: [redacted]

Here's an addendum to the email I sent yesterday which includes a [redacted] task (Sub Task 3) that may be of interest. We can fit this into the prop by the Sept 6 delivery date.

Sub Task 1, [redacted]

- Scope: Build the [redacted] to support [redacted]
- No formal reviews; monthly review to provide status.
- No formal acceptance testing. Analysis / demonstration at the end of the program to prove the [redacted]
- Final report documenting the results of the results and analysis and demonstration

Sub Task 2, [redacted]

- Scope: Demonstrate [redacted] with the next generation [redacted]
- We will provide a technical write up of the proposed effort but not a price. We will provide a ROM at a later date. Give me an additional week or so to get that to you.

Sub Task 3, [redacted]

- Scope: Provide a proof of concept implementation of [redacted] This is the first step in implementing [redacted] We already have a concept that we've researched [redacted] but have not been able to try.
- Will require [redacted] to demonstrate the concept.
- No formal reviews; monthly review to provide status.
- No formal acceptance testing. Demonstration at the end of the effort.
- Final report documenting the results of the research and demonstration.

Subject: RE: [redacted] Enhancement Task Order

[redacted]

To do what you're asking is going to take much more time than we have to reply to the RFP and I know you're on a tight schedule with year end funds. What we had originally ROM'd for [redacted] at [redacted] was to [redacted] and then demonstrate it would work in the [redacted] [redacted] There was no PDR/CDR or any kind of test program. There was no [redacted]

CELL/OTD 030280 CELLSITE-16444

[redacted]

For this RFP, we would like to propose the following:

- We provide you with a prop to do essentially what we told [redacted] we were going to do when we gave him the ROM. Essentially we propose doing subtask 1 with a small [redacted] effort to [redacted] is a small adder to the original ROM but would be useful for providing a demo of the [redacted] capabilities. [redacted] would meet all the requirements you call out for Sub Task 1 in the RFP. The only difference is we would not have formal design reviews and no acceptance test. We would have monthly reviews to provide progress and details of the design as it matures. The end product of this subtask would be analysis / demonstration that the [redacted] meets all the requirements necessary to support [redacted] for all specified [redacted]
- For Sub Task 2 we propose to provide you a ROM on the cost to implement [redacted] for all [redacted] listed in the RFP. We're probably going to need more time to get this ROM together as there is a good bit of [redacted] tasking to be considered.

b3 b6 b7C b7E

Hopefully this provides you what you need to award work within the range of the original ROM while also providing bogies for the [redacted] work should you wish to fund [redacted]

[redacted]

Hi [redacted]

Just to follow up - we have a confirmation from all parties concerned. We would like to review a proposal with work packages or the requirements broken down into smaller portions for our review and evaluation.

Thank you for your assistance,

[redacted]
Contracting Officer
Quantico Contracts Unit

Subject: RE: [redacted] Enhancement Task Order

b3 b6 b7C b7E

Hi [redacted]

Per our conversation a moment ago: Please divide the proposal into work packages for our review and evaluation. Should funding become an issue this will enable us to prioritize work. As I said, we're trying to get you a more detailed answer; however in light of your upcoming meeting in 30 minutes I wanted to provide some guidance.

CELL/OTD 030291 CELLSITE-16445

Thanks.

Subject: [redacted] Enhancement Task Order

[redacted]

We've received the RFP for the new task order. After the first read, this looks like more than [redacted] worth of work. We knew that [redacted] was anticipating funding something like this task order and thought he had way less than [redacted]

I need to know if we're totally off base in our initial assessment of the scope of work for this task order. I would hate to go through all the work to propose something that is way beyond your expectations.

Subject: [redacted] Website Changes

Classification: UNCLASSIFIED//FOUO
==========

[redacted]—per our discussion here is the list of areas that need to be addressed and who is responsible for completing. Please meet with your team and set a deadline of when items are due since you are familiar with each person's workload. Just let me know the deadline set so I can set a tickler and send reminders periodically. I briefed [redacted] on our discussions and with [redacted] upstairs yesterday, so he can provide more guidance to the areas with his/your names. If I missed anything, let me know. :0)

CELL-OTD 015892

~~SECRET~~
~~RECORD~~

Here is the estimated 2011 cost/funding info we received from back in July or August. It appears that has sufficient funding to cover expenses for all approved projects for FY2011, so we won't have to make any tough choices.

I will arrange a meeting in the next few weeks to discuss funding activity with each unit. Since I am obligated to report

Thanks.

Sept 20-24, 2010 (both) Philadelphia, PA [redacted]
funded by [redacted]

Hopefully you read all of that. [redacted] Please get back to me soon if you can make it to Potomac. If you can make it to one of the others - please let me know and I will put you on the list. If we get too many people - we will go with first come.

Thanks for the support. The way I see it - we should be able to get at least [redacted] of you through the actual live class this year and all of you can take the [redacted] as soon as [redacted] is done.

As for we have been training approximately I'd like to have ten to twelve (10-12) of those slots go to being useful to those who may utilize it is even more important to the street agent who will use the survey process in his/her everyday investigative capacity. With that said, we hope to get between this year. The date is not cemented but we're targeting the third week in January. We hope to have the dates nailed down by weeks end.

Subject: Stingray training guide

HI to All,

asked that I forward this to you. It's a step by step guide for If you have comments or suggestions, please let me know and we can try to incorporate them.

I don't believe that I have met any of you.

I'm back supporting mostly in the training area. If there is anything that I can do to help you out, just give me a call. Take Care

b7E

[redacted]

I may have misspoken a bit when we talked earlier today about the tasking for drafting the [redacted] NDA for [redacted] .I was right that [redacted] asked both of us to work on this, but what he wanted was for you to work on a draft of the agreement and for me to review/finalize that with you before it went to him. Sorry if I caused any confusion about who was doing what, but it looks like you are supposed have the lead and then work with me (OGC) to finalize it.

I had mentioned to [redacted] a while back that I previously drafted an MOU for the [redacted] folks concerning their [redacted] program and that we might be able to use that as a kind of pony here, since it's a similar (but not identical) situation of FBI wanting to [redacted] [redacted] I've attached a copy of it here in case you want to take a look. It dates back to summer of 2006, and [redacted] may have since modified it, but it should give you a basic idea of what they pushed out to [redacted] [redacted] WITT [redacted] but I thought I'd pass it on so you would not have to start from scratch. [redacted] [redacted]

b3
b5
b6
b7C
b7E

Let me know whenever you have a draft and we can discuss/finalize it for [redacted]

Thanks and sorry for any confusion,

I'm assisting with the 09/10 Executive report. One of the takeaways from the meeting yesterday was developing some success stories to include in the report. I want to include a couple (2 or 3) of success stories from both and TTU. The stories only need to be a few sentences describing the situation, action, and results. They should be The following projects were mentioned as having success stories: FBI-001 FBI-014 FBI-025 FBI-020

Would you mind passing this on to to have them provide a couple of success stories? If there are success stories in other projects that would fit better have them include that instead. I need to have everything together by COB tomorrow. If you have any questions give me a call.

Thanks,

SSA

Attached please find two Powerpoint files related to the upcoming FBI [redacted] briefings. The first file contains an overview of the briefing process, general presentation instructions and specific guidance for completing the slides for which you are the designated Project Lead. To reduce the burden, I have already entered much of the required information from the [redacted] database maintained for all [redacted] projects. The second file contains the partially completed slides for each of the briefings you are scheduled to present on November 5th.

b7E

Should you encounter any difficulties with the template, or if you have any questions I can assist you with, please give me a call.

Once you have completed your slides according to the instructions please return the file to me.
DEADLINE: October 19

Note: I will be out of the office much of today and all day tomorrow, but expect to be available all day on Thursday. That same day I hope to have time to forward you the slides for your two remaining projects (#025[redacted] and #013-[redacted] which you are scheduled to brief on Monday afternoon, November 8th.

Regards,

[redacted]

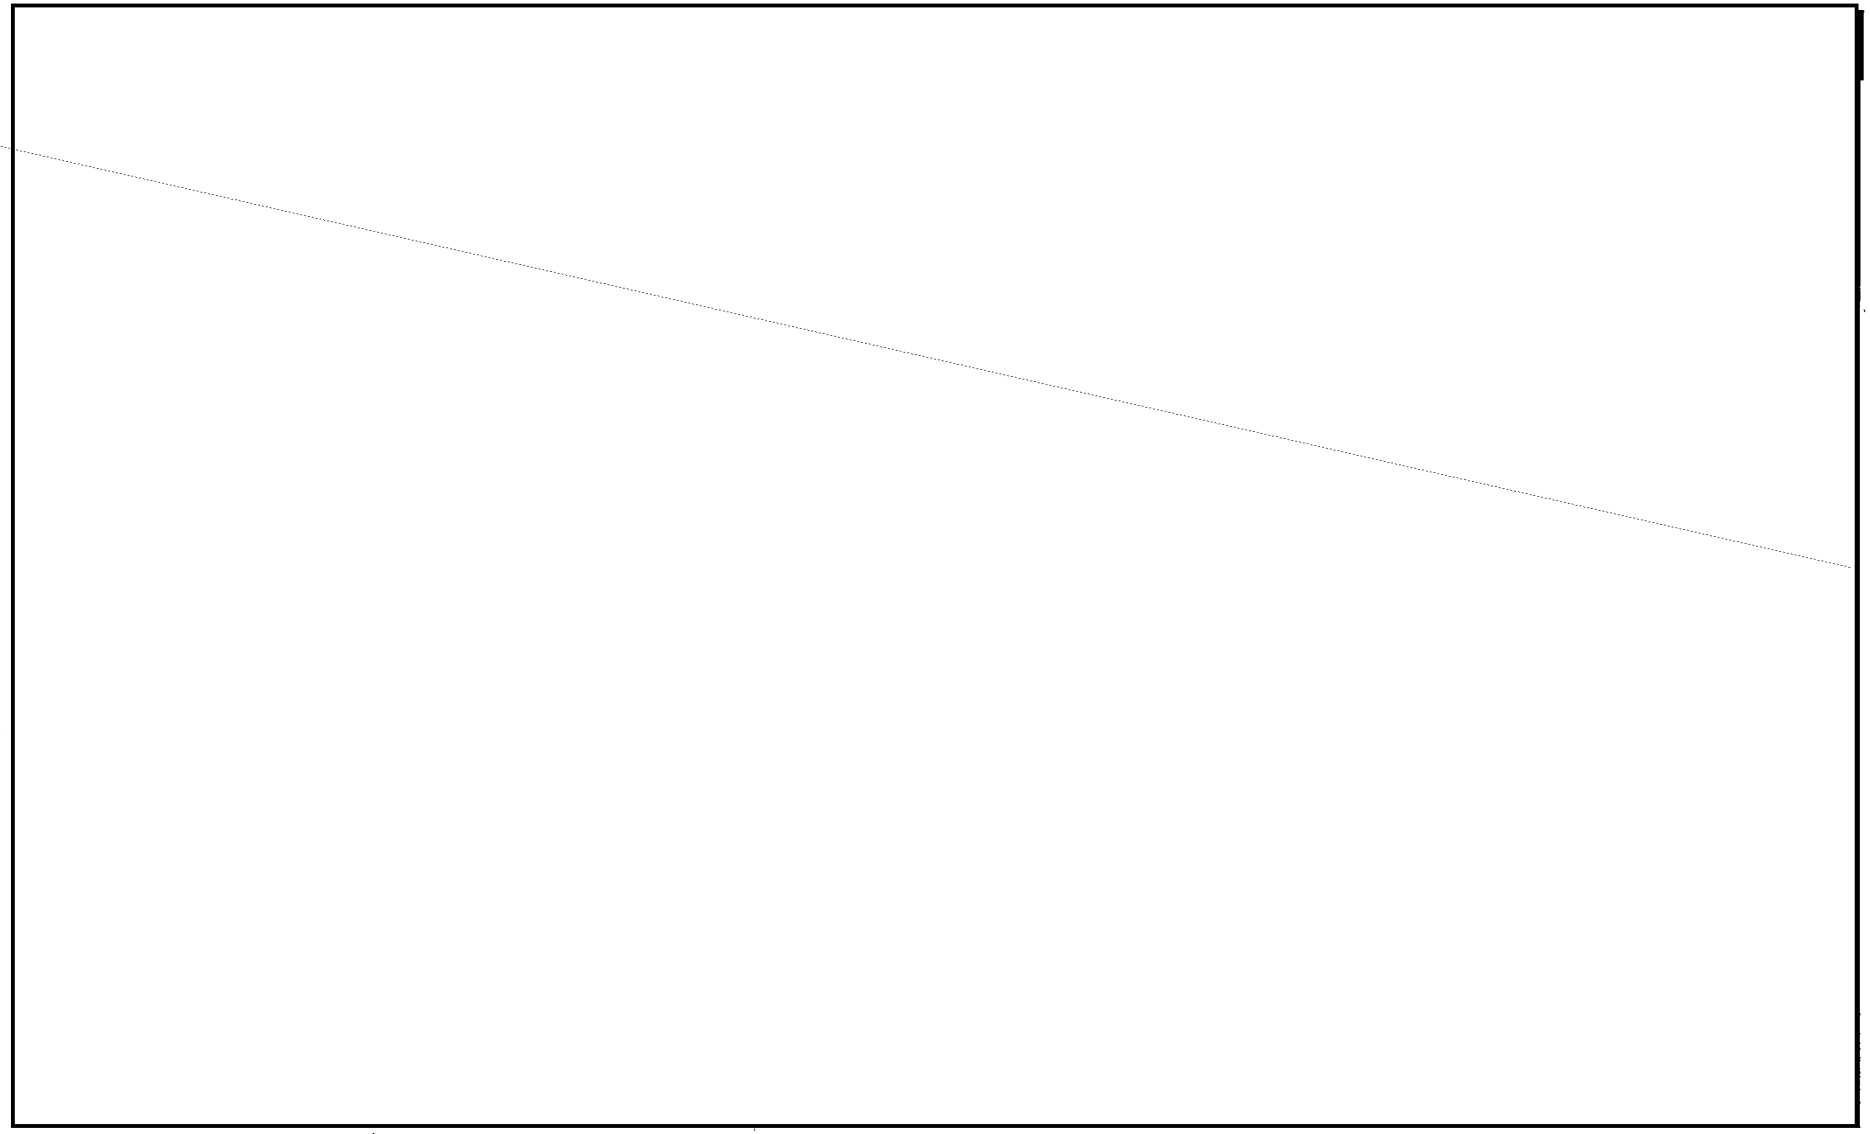
General Presentation Instructions



Instructions: Slide #A

(U)	INSTRUCTIONS

Introductory Slide - Overview

For Existing Projects (previously briefed):
Add text and graphics as necessary to provide a high level overview of the project.
You will open your presentation with this single slide, providing an introduction into what the challenge is and how you are addressing it.
Edit as required

or

For New Projects (never briefed before):
Add text and graphics as necessary to provide a comprehensive overview of the project, identify the challenge and how you are addressing it, and elaborate on the Concept of Operations (CONOP) and technical performance information. Include a maximum of five (5) slides.
Edit as required

CELL/OTD 007766

CELLSITE-16427

The Federal Bureau of Investigation (FBI) requires that contractors shall not divulge, publish, or disclose information or produce material acquired as or derived from the performance of their duties. For purposes of this clause, "Information" shall include but not limited to: In any media or all media including on the Web or Websites; publications, studies, books, thesis, photographs, press releases describing any part of the subject matter of this contract or any phrase of any program hereunder, except to the extent such is:

(i) Already known to the contractor prior to the commencement of the contract

(ii) Required by law, regulation, subpoena or government or judicial order to be disclosed, including the Freedom of Information Act.

No release of information shall be made without the prior written consent of the Office of Public Affairs and the Contracting Officer. The contractor and the author are warned that disclosure is not without potential consequences. The FBI will make every effort to review proposed publication in a timely manner to accommodate theses and other publications. Where appropriate, in accordance with established academic publishing practices, the FBI reserves the right to author/coauthor any publication derived from this contract. These obligations do not ease upon the completion of the contract.

NOTES FOR PROJECT LEAD

(U)

(S//NF) OVERVIEW

[redacted]

I think you will find it helpful to print out the separate "instructions" file and have it handy as you complete this briefing.

Please check to ensure that listed technologies properly match deliverables (Slide 'D').
Duplicate slide 'D' as necessary when multiple deliverables are involved.

I know that you've recently been designated as the project lead, so please confer with [redacted] for specifics that you might be unsure of.

b6
b7C

If I can help, please feel free to call.

We feel your pain. In the land of common sense, our rationale has no place [redacted] and I will take this issue up with our management and try to get it resolved. If it makes you feel any better, this has happened to others recently – although in not as egregious situation as this.

I am the former CDC in [redacted] and I am currently assigned [redacted] One of our agents just returned from some training where you gave some guidance re: use of WITT/Triggerfish, etc. and our agent's notes weren't completely clear on what your guidance had been so I am reaching out to you since I have been advised that you are the subject matter expert. Our new CDC is not really up on this matter from the [redacted]

Basically...the question in a nutshell is what legal authority is currently required to [redacted]

[redacted]

I have seen some things on the [redacted] that suggest we always get [redacted] but it seems to me that [redacted] The other thing this type of order usually covers [redacted]

I know we've talked about this before but not in a formal setting. I wanted to pass this onto you because I hear you understand the fights we go through as case agents and are willing to help us out when we need it. I don't even know if you can help directly but at least you can look at this and get a feeling of how important this is to all case agents who work with which is almost all cases these days, was our representative from your unit and now I hear he has left. I'm hoping that you could work with me on this issue because it is bigger than I can handle on my own.

These three attachments (in order) are the our posted comments and then the If you look at them in order I think you'll get the idea of what a routine case. They'll just say use the (like they already do). This segways into our equally enormous task of and the fact that the offices b3 b5 b6 b7C b7E

I'll be in San Diego all next week but my UC is cc'd and I'll have my Blackberry. I think you should maybe come to our next class May 13-15, and see what we're doing. It's good stuff and we could use someone to talk about legality. They're supposed to let me know when and then we'll have 14 days to make comments. I'd like to meet with you or at least have spoken with you by the 23rd when I get back, so I can start making our second response to the posting.

Thanks,

b7C
b7E

If you are also seeking to [redacted]

Please let me know if you need further information or if I have failed to adequately answer your question.

Thanks,

[redacted]

Asst. General Counsel

No problem...let me know what I can do to help. The U.S. Attorney's Office can also reach out to OEO (Office of Enforcement Operations) at main DOJ if they want other go-by's. I have found OEO to be very helpful and your USA's office can reach out to them if they want DOJ, instead of FBI, guidance.

Actually we finalized them last week and burnt a new CD, but in light of the new decision we have modified the presentation once again. We are teaching a class tonight and I will get with my partner and get you are newest version. Also, I did speak with our local Magistrate Judge regarding training in October. She recommended that we set the date(s) and they will try and get everyone there. So look at your calendar and come up with some dates that work for you in Oct/Nov.

just wanted to send you a quick email ref our conversation last night. I will send you via bumail a copy of our WITT presentation. I will try to include the teaching points that we use when talking about the slides (some of the slides are self explanatory, but others need explanation). As soon as we fiqure out how to marry those two up, I will send it out. I am looking into conducting training for the US Dist Ct and the US Attys office sometime in October. I will let you know if we get some possible dates. I would like to have you or someone from OCG give a short presentation regarding legal issues involving

Hi [redacted]

[redacted] reviewed the draft brief and form and had some additional questions about the technique. So here they are:

1) [redacted]

2) [redacted]

3) [redacted]

4) [redacted]

5 [redacted] would think not, but please confirm.)

6) [redacted]

7) [redacted]

So, please pass these questions on to whomever on your side is most familiar with [redacted] We can't move forward on getting approval of [redacted] without more information about exactly [redacted]

Thanks!

Attached is a write-up of the WITT [redacted] that I prepared -- using information from a variety of sources. Would you please distribute it to the appropriate people within the FBI to (a) make sure the facts are accurate; and (b) get answers to my questions? I've also got [redacted] to the court that will need to be reviewed at our end. But getting the [redacted] down will be more than half the battle.

Thanks very much.

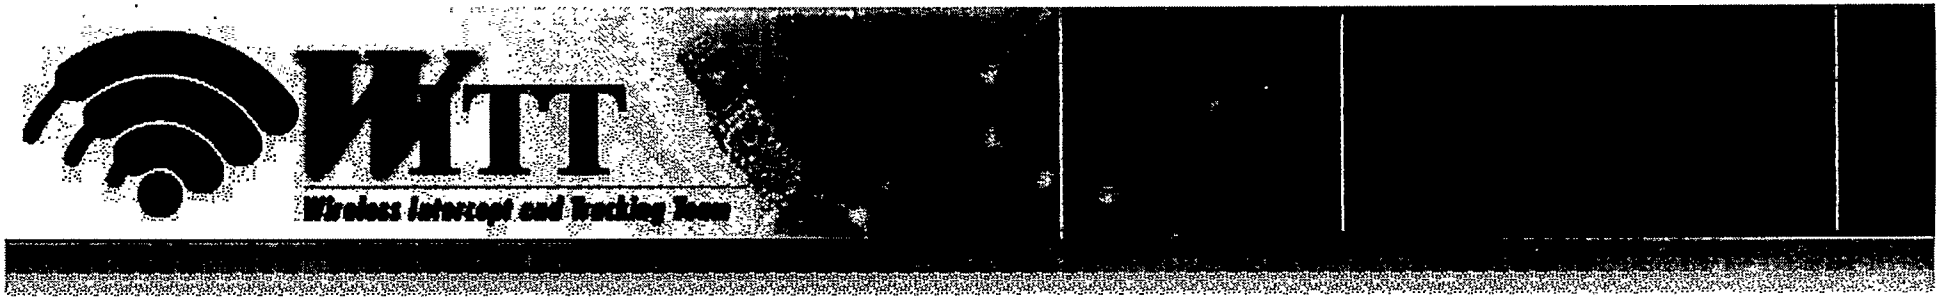
Wireless Intercept and Tracking Team

CELLSITE-10432



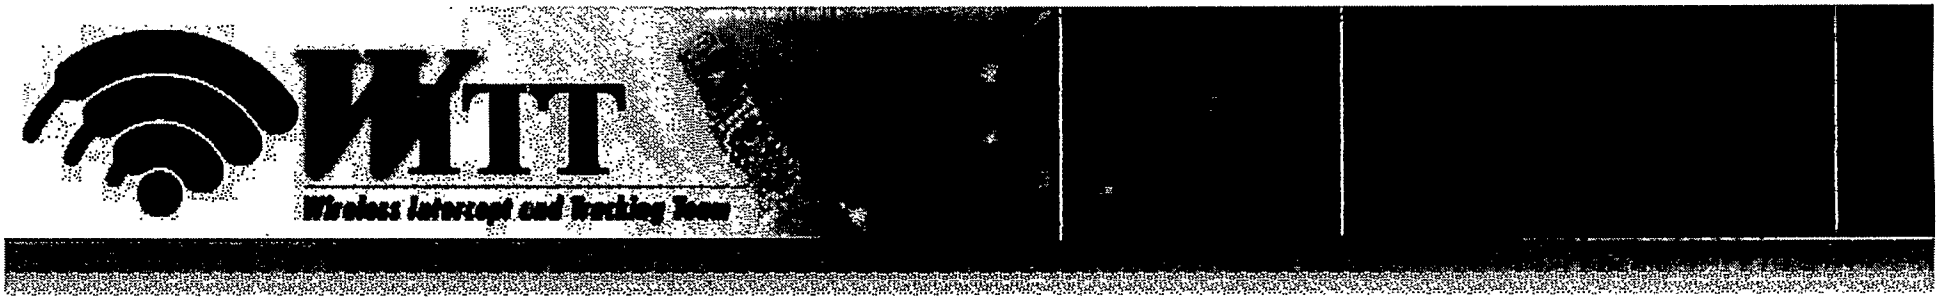
Old Definition

- "pen register" means a device which records or decodes electronic or other impulses which **identify the numbers dialed or otherwise transmitted on the telephone line to which such device is attached….**

New Definition

- "pen register" means a device ***or process*** which records or decodes ***dialing, routing, addressing, or*** **signaling** ***information*** **transmitted by an instrument or facility from which a wire or electronic communication is transmitted,** ***provided, however, that such information shall not include the contents of any communication….***

CELLSITE-10434



- **§ 3127 Pen Register device or process:**
  - "records or decodes dialing, routing, addressing, or signaling information
  - transmitted by an instrument or facility from which a wire or electronic communication is transmitted"

DOJ:

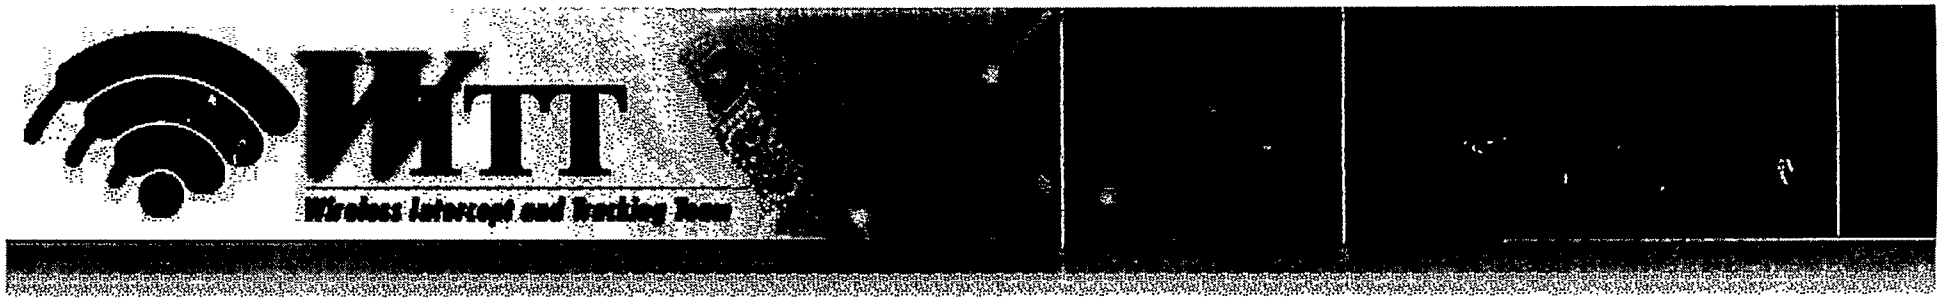
b7E

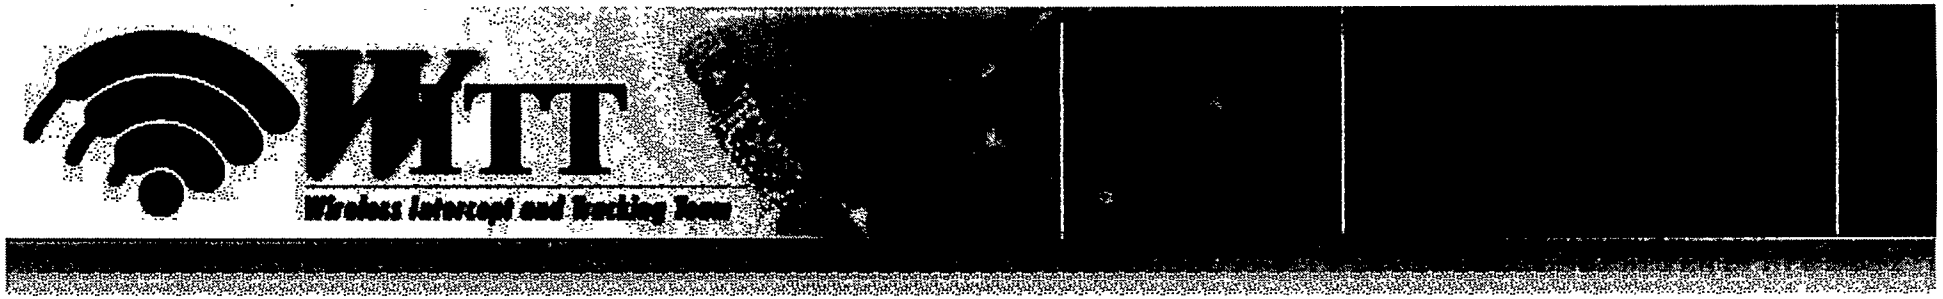
- WITT equipment
- WITT equipment

CELLSITE-10437



- is generated by the network for network purposes regardless of a LE order.
- is necessary to the successful processing of a call by the provider; a call cannot be processed without it.
- exists in the network as a record prior to its being obtained by LE.
- has no relationship to the content of a communication.
- is delivered to LE under CALEA only at the beginning and end of a call.

CELLSITE-10438



- **Origination** (of an outgoing call from target phone)
- **Answer** (at answer of a call terminating to the target phone)
- **Release** (at the end of the call for both incoming and outgoing calls)

- (http://www.tiaonline.org/standards/search_results2.cfm?document_no=J-STD-025-A www.tiaonline.org)

b5

The Law

- Title III & Electronic Communications Protection Act
  - Title III, 18 USC sec. 2510, Omnibus Crime Control and Safe Streets Act, Commonly referred to as the Wire Tap Act
  - As amended by the ECPA, Title III prohibits the interception of wire and oral communications, and electronic communications.
  - Provides for criminal penalties and civil damages against anyone who "intentionally intercepts, endeavors to intercept" any covered communication.

Title III Order

- Under Title III, the government may apply for a court order authorizing an interception. 18 U.S.C. §2516(1)
- Application must specify the offense being investigated, the nature and location of the facilities where the communications are to be intercepted, and a particular description of the communications sought to be intercepted. 18 U.S.C. § 2518(1)
- Standard: Probable cause to believe that a particular offense is being committed and that targeting the specified facility will yield communications concerning the offense.18 U.S.C. § 2518(3)

Title III Order (cont.)

- Good for up to thirty days. Extensions allowed, but same standard applies to extension. 18 U.S.C. § 2518(5)
- Required to "minimize" the interception unrelated to criminal activity. 18 U.S.C. § 2518(5)
- Requires a finding that normal investigative procedures are unlikely to be successful or are too dangerous. 18 U.S.C. § 2518(3)(c)
- Requires notice to the target within 90 days. 18 U.S.C. § 2518(8)(d)

Pen Register/ Trap and Trace

- Court ordered surveillance
- Government must certify that information likely to be obtained by use of device "is relevant to an ongoing criminal investigation." 18 U.S.C. § 3122(b)(2)

What is the Pen/Trap "addressing information"?

- Dialing, Routing, Addressing, Signaling Information
- Transmitted by Instrument or Facility from which a Communication is Transmitted (outgoing call) (pen)
- Identifies Originating Number or Other D/R/A/S or is Reasonably Likely to Identify the Source (incoming call) (trap)
- Utilized in Processing or Transmission of Communications
- Is not "Contents of any...Communications"

Limitation:

- Thou shall NOT collect the Contents of any communication
  - 18 USC sec. 3121 (c) – "use technology reasonably available to restrict . . . so as not to include the contents of any wire or electronic communications"
  - 18 USC sec. 3127 pen/trap definition: "shall not include the contents of any communication"

Basic Subscriber Information

Can be obtained w/ Subpoena, 2703(d) order, or Search warrant, consent

Provider must give government:

- Name, Address
- Local and long distance telephone connection records, or records of session times and durations;
- Length of service (including start date) and types of service utilized;
- Telephone or instrument number or other subscriber number or identity, including any temporarily assigned network address; and
- Means and source of payment for such service (including any credit card or bank account number)

Transactional Data

- **"A record or other information pertaining to a subscriber to or customer of such service (not including the contents of communications)." § 2703(c)(1) (Everything that's not content & not subscriber information)**

- **Example:**
  - Cell-site data;
  - Addresses / Identities of past e-mail correspondents
  - Incoming e-mail traffic information;
  - Account logs that record usage e.g., URLs (web surfing activity)

- Title III real time interception of electronic communications, e.g. [redacted] b7E
- Collection of stored data – a search of memory

Pen Register/ Trap and Trace

- Court ordered surveillance
- Government must certify that information is likely to be obtained by use or device "is relevant to an ongoing criminal investigation." 18 U.S.C. § 3122(b)(2)

What is the Pen/Trap "addressing information"?

- Dialing, Routing, Addressing, Signaling Information
- Transmitted by Instrument or Facility from which a Communication is Transmitted (pen)
- Identifies Originating Number or Other D/R/A/S or is Reasonably Likely to Identify the Source (trap)
- Utilized in Processing or Transmission of Communications
- Is not "Contents of any...Communications"

Limitation:

- Thou shall NOT collect the Contents of any communication
  - 18 USC sec. 3121 (c) – "use technology reasonably available to restrict . . . so as not to include the contents of any wire or electronic communications"
  - 18 USC sec. 3127 pen/trap definition: "shall not include the contents of any communication"

Stored Communications & Records ECPA 18 USC SEC. 2701

- Content of communication in "storage"
- Subscriber Records
- Transactional Records

Unauthorized Access to Stored Communications

- **18 USC § 2701 (Electronic Communications Protection Act)**
  - **Unauthorized access to communications in "electronic storage" (*e.g.*, one user snooping in another's inbox)**
    - intentionally access without authorization a facility through which an electronic communication service is provided and thereby obtain a wire or electronic communication while it is in electronic storage."
  - **Inapplicable when authorized by the Service Provider, §2701(c)(1)**
  - **Excepts conduct authorized by a "user" of that service with respect to a communication of or intended for that user. §2701(c)(2)**

Disclosure of Stored Content & Records

- **General rule**: a public provider (*e.g.*, an ISP) may not freely disclose the content or records of its customer's communications to others [18 U.S.C. § 2702]

- **Non-Public Providers may voluntarily disclose for any reason**

Law Enforcement Exception

- 18 USC sec. 2703
- Required disclosure of customer communications (in electronic storage) or records
- Requires search warrant (FRCP 41), Federal subpoena, or Federal court order
- 180 day rule
- Notice to subscriber or customer

What's a § 2703(d) Court Order?

- **"Articulable facts" order**
  - "Specific and articulable facts showing that there are reasonable grounds to believe that [the specified records] are relevant and material to an ongoing criminal investigation"
- **A lower standard than probable cause but higher than pen/trap**
- **Notice may be delayed: up to 90 days (may extend) to avoid flight, destruction of or tampering with evidence, witness intimidation, seriously jeopardizing an investigation**

Nationwide Search Warrants for E-Mail:

- Investigators may use section 2703(a) warrants to compel disclosure of stored communications from providers anywhere in the country
- Issued "by a court with jurisdiction over the offense under investigation"
- Consistent with use of federal grand jury subpoenas and orders under section 2703(d).

Basic Subscriber Information

Can be obtained w/ Subpoena, 2703(d) order, or Search warrant

Provider must give government:

- Name, Address
- Local and long distance telephone connection records, or records of session times and durations;
- Length of service (including start date) and types of service utilized;
- Telephone or instrument number or other subscriber number or identity, including any temporarily assigned network address; and
- Means and source of payment for such service (including any credit card or bank account number)

Transactional Data

- **"A record or other information pertaining to a subscriber to or customer of such service (not including the contents of communications)."**
  § 2703(c)(1) Everything that's not content & not subscriber information

- **Example:**
  - Cell-site data;
  - Addresses / Identities of past e-mail correspondents
  - Incoming e-mail traffic information;
  - Account logs that record usage e.g., ULRs (web surfing activity)

- **Use § 2703(d) order to collect prospectively**

The Law

- Title III & Electronic Communications Protection Act
  - Title III, 18 USC sec. 2510, Omnibus Crime Control and Safe Streets Act, Commonly referred to as the Wire Tap Act
  - As amended by the ECPA, Title III prohibits the interception of wire and oral communications, and electronic communications.
  - Provides for criminal penalties and civil damages against anyone who "intentionally intercepts, endeavors to intercept" any covered communication.

CRIMSON-14380

Title III Order

- Under Title III, the government may apply for a court order authorizing an interception. 18 U.S.C. §2516(1)
- Application must specify the offense being investigated, the nature and location of the facilities where the communications are to be intercepted, and a particular description of the communications sought to be intercepted. 18 U.S.C. § 2518(1)
- Standard: Probable cause to believe that a particular offense is being committed and that targeting the specified facility will yield communications concerning the offense.18 U.S.C. § 2518(3)

14381

Title III Order (cont.)

- Good for up to thirty days. Extensions allowed, but same standard applies to extension. 18 U.S.C. § 2518(5)
- Required to "minimize" the interception unrelated to criminal activity. 18 U.S.C. § 2518(5)
- Requires a finding that normal investigative procedures are unlikely to be successful or are too dangerous. 18 U.S.C. § 2518(3)(c)
- Requires notice to the target within 90 days. 18 U.S.C. § 2518(8)(d)

14382

- *Qualified* Government Privilege in Non-disclosure based on ***Roviaro v. United States*, 353 U.S. 53 (1957):** disclosure of identity (and testimony) of informant.
  - Generally technique, type of device, location of install, etc. is protected
    - unless Defense can establish disclosure is necessary to defense, I.e., no other/adequate means to cross-examine/test evidence; if so:
    - then Balancing of interests
  - [redacted] b5 b7E
  - see also Jayme S. Walker "The qualified privilege to protect sensitive investigative techniques from disclosure," LEB Vol 69 NO.5 at 26 (May 2000).

CELLSITE-10121

- **Compare, United States v. Van Horn**, 789 F.2d 1492 (11th Cir.), cert. denied, 479 U.S. 854 (1986) (concealed microphone in office, defendant sought information about location of device claiming necessary to demonstrate that voices on tape could have been distorted by way mic was hidden and the distortion led to misidentification of the voice), recognized a qualified government privilege not to disclose sensitive investigative techniques.
  - [redacted] b5
  - [redacted]
- **With United States v. Foster**, 986 F.2d 541, 543 (D.C. Cir. 1993) (defendant sought location of observation post: officer's observation of drug transaction was key evidence implicating defendant; surveillance not taped or photographed, so no alternative evidence for jury to examine to determine whether surveillance post provided clear view from which officer could make accurate identification of defendant).

- U.S. v. Garey, 2004 WL 2663023 (M.D.Ga. Nov. 15, 2004)
  - Defendant sought nature & details of pen register used to determine the geographical location of a cellular phone
  - Court found the information protected by qualified investigative techniques privilege & national security privilege
  - Balanced government's interest in maintaining privilege with Defendant's need for the information
- Defendant had the Product of the Surveillance: the cellphone used in making threatening calls was found in defendant's house during search of residence;
  - Defendant did not need to know how the technology traced the geographic location of the phone.
  - locating the phone in the residence confirmed the accuracy of the geographic surveillance;
  - Moreover,Defendant could challenge the technology used to establish that phone found in residence was the one that actually made the criminal calls.

Cellular Tracking and Other Legal Issues

June 2008

Overview

- DOJ's Policy on Cellsite Simulators: **Pen Register Device** (18 U.S.C. 3127(3))
  - **BEST PRACTICES**
- Emergency Pen Register Authority
  - Federal v. State Orders
  - Voluntary Disclosures
- Prospective Cell Site Location data
  - Distinguished from WITT
- GPS/Triangulation from provider
- Protecting Sensitive Techniques
  - Use as evidence
- Loan of ELSUR Policy
  - **Using State Orders**
  - **Liability-scope of authority**
- [redacted] b7E

CELLSITE-4841

Pen Register Device: 18 USC 3127(3)

Old Definition

- "pen register" means a device which records or decodes electronic or other impulses which **identify the numbers dialed or otherwise transmitted on the telephone line to which such device is attached....**

New Definition

- "pen register" means a device ***or process*** which records or decodes ***dialing, routing, addressing, or*** **signaling** ***information*** **transmitted by an instrument or facility from which a wire or electronic communication is transmitted,** ***provided, however, that such information shall not include the contents of any communication....***

CELLSITE-4842

New Law: USA Patriot Act

DOJ/CCIPS & OEO:

- ✓ [redacted]
- ✓ [redacted]

b5

- ✓ **"signaling information":** any non-content information "transmitted by" a telephone instrument

http://30.100.99.18/ogc/usabook/usabook/esis/13esis.htm

DOJ Opinion:

DOJ: Pen/Trap **order** [redacted] b7E

to use a Pen Register Device to obtain "signaling information" transmitted from a cellular telephone to:

1) Identify a target phone **or**
2) Locate a phone

CELLSITE-4844

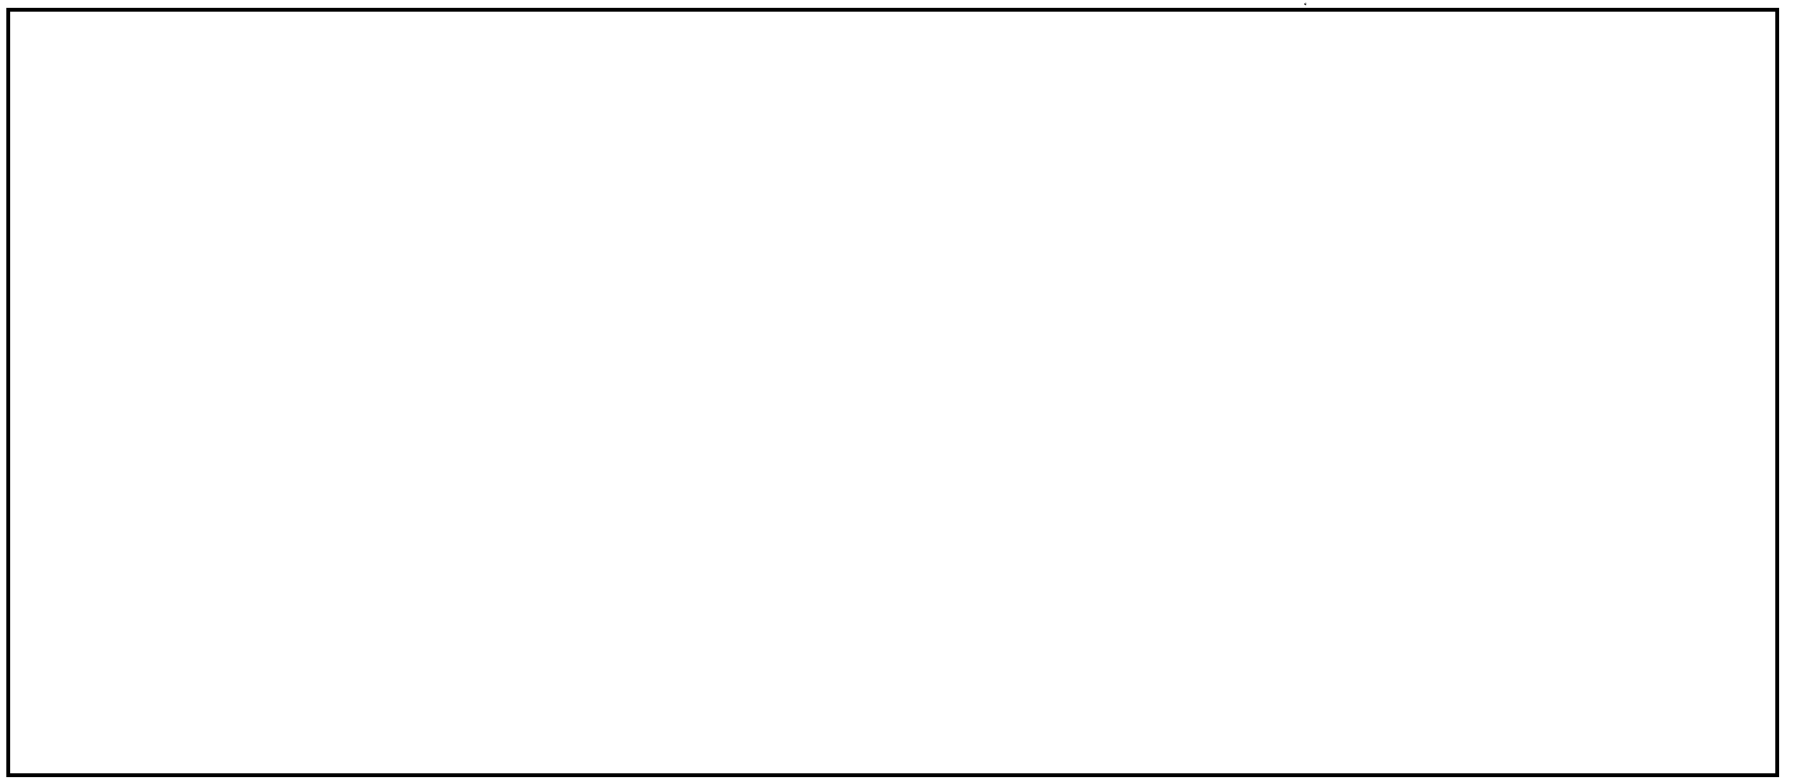
CELLSITE-4852

WITT Function vs. Location (Tower/Sector) data from Provider

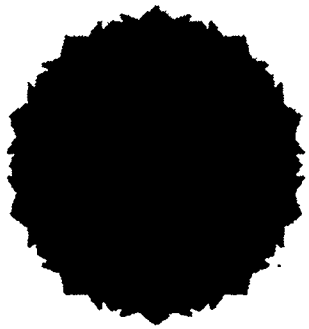
WITT doesn't collect Cell site data

WITT equipment:



b7E

CELLSITE-4854



What is Cell site location data

- Tower/Sector data:
  1. is generated by the network for network purposes regardless of a LE order.
  2. is necessary to Provision of Service & a call cannot be processed without it.
  3. exists in the network as a **RECORD or Other Information** prior to its being obtained by LE.
  4. NON-Content data; not substance of a communication.
  5. is delivered only at the beginning and end of calls per CALEA J-Std

CELLSITE-4855

Obtaining Cell Site Data

1. CALEA prohibits collecting location information "solely pursuant" to a PR/TT- 47 USC 10029(a)(2)(B)
2. 18 USC 2703(d) (Stored Communications Act)
3. b5

CELLSITE-4856

CALEA Delivery of location data

- **Near Real-Time**: CALEA (47 USC 1002) requires carriers to "expeditiously isolates"
  - "call-identifying information": includes cell site information utilized in processing calls
  - for government access "before, during, or immediately after the transmission of a [ ] communication" (i.e., in real-time or near real-time)
- CALEA J-Standard: location information is delivered after generation of data by the carrier's network and use in the provision of service (e.g., call origination, Answer, call release)

CELLSITE-4857

CALEA amended SCA 18 USC 2703(d) ("Transactional Data")

I currently have OGC scheduled to speak at the [redacted] conference on Monday October 17 from 3:30pm-4:30pm. Attached is the draft schedule.

As far as talking points, I think it is important to discuss some of most significant matters that have been brought to you attention over the past 18 months from [redacted] I know you are constantly asked for technical legal assistance. I know I have received questions from the field mostly about [redacted] WITT [redacted] [redacted]

b6
b7C
b7E

[redacted] You may be able to piggyback on those sessions with [redacted] Unit to provide additional guidance.

Please give me a call if you have any questions.

Subject: OGC Guidance Concerning Requests for Historical Cellular Telephone Location Information, GPS Triangulation and WITT

UNCLASSIFIED
NON-RECORD

This e-mail is being sent to all CDCs and ADCs,

A recent decision in the District Court for W.D. Pa. regarding the legal authority required to obtain historical cellular telephone location information has received widespread press coverage. Several CDC's have contacted us with questions. Because of the possibility that magistrate judges in your divisions may rely on this opinion, OGC provides the following guidance.

Actually we finalized them last week and burnt a new CD, but in light of the new decision out of PA, we have modified the presentation once again. We are teaching a class tonight and I will get with my partner and get you are newest version. Also, I did speak with our local Magistrate Judge regarding training in October. She recommended that we set the date(s) and they will try and get everyone there. So look at your calendar and come up with some dates that work for you in Oct/Nov.

Actually we finalized them last week and burnt a new CD, but in light of the new decision out of PA, we have modified the presentation once again. We are teaching a class tonight and I will get with my partner and get you are newest version. Also, I did speak with our local Magistrate Judge regarding training in October. She recommended that we set the date(s) and they will try and get everyone there. So look at your calendar and come up with some dates that work for you in Oct/Nov.

[redacted] just wanted to send you a quick email ref our conversation last night. I will send you via bumail a copy of our WITT presentation. I will try to include the teaching points that we use when talking about the slides (some of the slides are self explanatory, but others need explanation). As soon as we fiqure out how to marry those two up, I will send it out. I am looking into conducting training for the US Dist Ct and the US Attys office sometime in October. I will let you know if we get some possible dates. I would like to have you or someone from OCG give a short presentation regarding legal issues involving [redacted]

ABC News

Cops Need Warrant for Cellphone Location Data, Judge Rules

Ruling Deals Blow to Investigators

By RYAN SINGEL
Sept. 12, 2008—

The government cannot force your cellphone provider to turn over stored records about your location without proving to a judge there is probable cause you have violated the law, a federal district court ruled Wednesday.

The ruling from Judge Terrence McVerry of the Western Pennsylvania U.S. District Court deals a blow to investigators who have been getting cellphone location data on in the past simply by proving to a judge that the information would be relevant to an investigation. That's the same standard used to force a telephone company to reveal the name and address of a subscriber.

McVerry upheld a February decision written by five magistrate judges, who found that the government's request for historic cellphone location data for a person required a stricter standard. Little is known about how often investigators ask for such data, since the hearings are one-sided and the decisions are almost never published so as not to tip off the targets.

However, the ruling does not hold force across the country, and as the government's objection to the ruling noted, other judges have disagreed with the logic of protecting this data as if it were very sensitive. The orginal decision(.pdf) found that "location information so broadly sought is extraordinarily personal and potentially sensitive; and that the ex parte nature of the proceedings, the comparatively low cost to the Government of the information requested, and the undetectable nature of a [cellular service provider]'s electronic transfer of such information, render these requests particularly vulnerable to abuse."

The government appealed, arguing the records only reveal a phone's location when it is actually used and that there's no constitutional right to have these stored records protected.

"Wireless carriers regularly generate and retain the records at issue, and because these records provide only a very general indication of a user's whereabouts at certain time in the past, the requested cell-site records do not implicate a Fourth Amendment privacy interest," the government wrote (.pdf).

But the friend-of-the-court brief (.pdf) from the Electronic Frontier Foundation and the Center for Democracy and Technology and others disagree -- arguing that law enforcement wants the data to pinpoint where a person was or is and that the data will only get more precise in the future.

"Law enforcement uses the fact that the suspect's phone contacted the cell tower nearest his home to infer he is home, nearest the narcotic's kingpin's house to infer that they are together, nearest the drop off point to argue that he was present when the contraband was delivered," the groups wrote. "One can also imagine that the government can ask for all the numbers that made calls through the tower nearest a political rally to infer that those callers attended the rally."

The distinction matters since generally speaking police officers don't need a warrant to plant a tracking device on a car, unless that vehicle goes onto private property. Tracking someone onto private property requires a warrant.
As for what the police need to prove to a judge in order to turn your cellphone into a tracking device -- that's a question that federal judges remain split on, despite the Justice Department's own recommendation that investigators get warrants based on probable cause.

This is SSA from the unit. Recently I visited down in your unit and we discussed various technologies that were of use to the field. I followed up with an EC that I believe you guys have seen. Im just wondering what steps I need to take now in order to get the equipment out the field etc. I spoke with earlier today and he said to contact you. Whatever you guys need from me please just let me know and ill get on it. I know the field is really looking forward to getting/using the equipment! Thanks a lot

IN THE UNITED STATES DISTRICT COURT
FOR THE WESTERN DISTRICT OF PENNSYLVANIA

IN THE MATTER OF THE APPLICATION OF THE UNITED STATES OF AMERICA FOR AN ORDER DIRECTING A PROVIDER OF ELECTRONIC COMMUNICATION SERVICE TO DISCLOSE RECORDS TO THE GOVERNMENT	)	Magistrate's No.: 07-524

GOVERNMENT'S MEMORANDUM OF LAW
IN SUPPORT OF REQUEST FOR REVIEW

AND NOW comes the United States of America by its attorneys, Mary Beth Buchanan, United States Attorney for the Western District of Pennsylvania, and Soo C. Song, Assistant United States Attorney for said district, and hereby seeks review of the Opinion and Memorandum Order entered on February 19, 2008, by United States Magistrate Judge Lisa Pupo Lenihan at Magistrate's No. 07-524M, denying an application by the United States seeking disclosure of historical cell-site information pursuant to Sections 2703(c) & (d) of the Stored Communications Act ("SCA"), 18 U.S.C. § 2703(c) & (d) (the "Opinion and Order").[1] Copies of the Application and the Opinion and Order are attached as Exhibits A (filed separately under seal) and B, respectively. For the reasons set forth below, the government respectfully submits that this Court should reverse the Magistrate Judge's order and grant the Application in the instant case.

I. FACTUAL AND PROCEDURAL HISTORY

A. Historical Cell-Site Information

Cellular telephone companies keep, in the regular course of their business, records of certain

[1] The Opinion and Order has since been published as *In re Application of the United States*, 534 F. Supp. 2d 585 (W.D. Pa. 2008). Although authored by Magistrate Judge Lenihan, the Opinion and Order was signed by all but one of the Magistrate Judges in this district.

information associated with their customers' calls. Exhibit C contains an exemplar of these records from a major carrier, Sprint-Nextel, the same carrier whose records are at issue in the present case.[2] As reflected in Exhibit C, the records include for each call a customer made or received: (1) the date and time of the call; (2) the telephone numbers involved; (3) the cell tower to which the customer connected at the beginning of the call; (4) the cell tower to which the customer was connected at the end of the call; and (5) the duration of the call. The records may also, but do not always, specify a particular sector of a cell tower used to transmit a call.[3] No such record is created when the phone is not in use.

Cell tower information is useful to law enforcement because of the limited information it provides about the location of a cell phone when a call is made. As one court has explained:

> The information does not provide a "virtual map" of the user's location. The information does not pinpoint a user's location within a building. Instead, it only identifies a nearby cell tower and, for some carriers, a 120-degree face of that tower. These towers can be up to 10 or more miles apart in rural areas and may be up to a half-mile or more apart even in urban areas.

In re Application of United States for an Order for Disclosure of Telecommunications Records, 405 F. Supp. 2d 435, 449 (S.D.N.Y. 2005) (citation omitted). No Global Positioning System ("GPS"), that is, satellite-derived data, or other precision location information is contained in the historical records provided pursuant to the requested orders. Indeed, cell-site records do not even indicate a phone's distance from the serving tower, let alone its specific location.

---

[2] Because these records contain sensitive information pertaining to a recent investigation, certain identifying information – the telephone numbers involved – has been redacted.

[3] Cell towers are often divided into three 120° sectors, with separate antennas for each of the three sectors. To the extent this information does exist in a particular instance, it does not provide precise information regarding the location of the cell phone at the time of the call, but instead shows only in which of the three 120°, pie-slice sectors the phone was probably located.

CELL/OTD 008363

CELLSITE-19639

B. The United States' Application Pursuant to 18 U.S.C. § 2703(d) in this Investigation

Pursuant to 18 U.S.C. § 2703(c)(1), the United States may require a provider of electronic communication service to disclose "a record or other information pertaining to a subscriber to or customer of such service (not including the contents of communications)" when it obtains a court order for such disclosure pursuant to 18 U.S.C. § 2703(d) (hereinafter, a "2703(d) order"). A 2703(d) order is issued by a court when the government provides "specific and articulable facts showing that there are reasonable grounds to believe that the contents of a wire or electronic communication, or the records or other information sought, are relevant and material to an ongoing criminal investigation." 18 U.S.C. § 2703(d).

On February 22, 2008, the United States filed an application with Magistrate Judge Lenihan seeking a 2703(d) order directing Sprint Spectrum to disclose certain historical connection and cell-site information associated with a specified cell phone. *See* Exhibit A. The cell phone records are relevant and material to an ongoing investigation into large-scale narcotics trafficking and various related violent crimes.

In June 2007, the Bureau of Alcohol, Tobacco, Firearms and Explosives ("ATF") learned from a confidential source that a particular subject and his associates use their wireless telephones to arrange meetings and transactions in furtherance of their drug trafficking activities. Additional investigation, along with information from the source, indicates that the subject's narcotics supplier lives in another state. Because the subject and his confederates use a variety of vehicles and properties to conduct their illegal activities, physical surveillance has proven difficult. In order to develop better information on the location and identity of the drug supplier, the instant Application seeks historical cell-site records concerning a phone known to be used by the subject. Section

CELL/OTD 008364

CELLSITE-19640

2703(d) orders are broadly used and widely accepted for these types of purposes in federal criminal investigations across the country.

On February 19, the Magistrate Judge denied the Application, ruling in a written opinion that the United States is barred as a matter of law from obtaining historical cell-site information pursuant to a 2703(d) order.

II. ISSUE PRESENTED

The issue before the Court is purely a question of law, namely whether the government may obtain historical cell-site usage records pursuant to an order under 18 U.S.C. § 2703(d).

III. SUMMARY OF ARGUMENT

Section 2703(d) permits the government to obtain a court order compelling historical cell-site usage information from a wireless carrier. The plain language of the statute unambiguously states that the government may require "a provider of electronic communication service" to disclose "a record or other information pertaining to a subscriber" pursuant to a 2703(d) order. As explained below, historical cell-site information satisfies each element of the statute, a position endorsed in recent months by several other courts.

In reaching the opposite conclusion, the Opinion and Order contains numerous errors, both as to the facts of the underlying technology and as to the interpretation of applicable law. Indeed, as discussed below, we believe the Opinion and Order materially relies on at least one statute (and several cases) wholly inapplicable to the government's request for stored records of past customer activity. In addition, because wireless carriers regularly generate and retain the records at issue, and because these records provide only a very general indication of a user's whereabouts at certain times

CELL/OTD 008365 CELLSITE-19641

in the past, the requested cell-site records do not implicate a Fourth Amendment privacy interest. Because the Opinion and Order misstates both the relevant facts and the applicable law, we respectfully urge the Court to reverse.

IV. ARGUMENT

A. Historical Cell-Site Information Falls Within the Scope of Sections 2703(c) and (d)

As the Third Circuit has often reiterated, "'[t]he plain language of the statute is the starting place in our inquiry.'" *United States v. Introcaso*, 506 F.3d 260, 264 (3d Cir. 2007) (*quoting Staples v. United States*, 511 U.S. 600, 605 (1994)). "'If the language of a statute is clear[,] the text of the statute is the end of the matter.'" *Id.* (*quoting United States v. Jones*, 471 F.3d 478, 480 (3d Cir. 2006)).

The Stored Communications Act (SCA), 18 U.S.C. §§ 2701 *et seq.*, establishes a comprehensive framework regulating government access to customer records in the possession of communication service providers. The statute's structure reflects a carefully crafted series of Congressional judgments; it distinguishes not only between communications contents (§ 2703(a), (b)) and non-content records (§ 2703(c)), but also between different classes of non-content records.

18 U.S.C. § 2703 unambiguously states that the government may require "a provider of electronic communication service" to disclose "a record or other information pertaining to a subscriber to or customer of such service (not including the contents of communications)" pursuant to a 2703(d) order.[4] *See* 18 U.S.C. § 2703(c)(1). As explained below, cell-site information quite

[4] As noted above, a 2703(d) order is issued by a court when the government provides "specific and articulable facts showing that there are reasonable grounds to believe that the contents of a wire or electronic communication, or the records or other information sought, are

CELL/OTD 008366

CELLSITE-19642

clearly satisfies each of the three elements necessary to fall within the scope of this provision.

First, a cell phone company is a provider of electronic communication service. "Electronic communication service" is defined to mean "any service which provides to users thereof the ability to send or receive wire or electronic communications." 18 U.S.C. §§ 2510(15) & 2711(1). Cell phone service providers provide their customers with the ability to send wire communications, and thus they are providers of electronic communication service. *See* 18 U.S.C. § 2510(1) (defining wire communications).

Second, cell-site information constitutes "a record or other information pertaining to a subscriber to or customer of such service (not including the contents of communications)." Historical cell-site information is a record stored by the provider concerning the particular cell tower used by a subscriber to make a particular cell phone call, and it is therefore "a record or other information pertaining to a subscriber or customer." *See In re Application of United States for an Order for Disclosure of Telecommunications Records*, 405 F. Supp.2d 435, 444 (S.D.N.Y. 2005) (noting that cell-site data is "information" and "'pertain[s]' to a subscriber...or customer of cellular telephone service").

Third, cell-site information is non-content information, as it does not provide the content of any phone conversation the user has over the cell phone. *See* 18 U.S.C. § 2510(8) (defining the "contents" of a communication to include information concerning its "substance, purport, or meaning"). Thus, because historical cell-site information satisfies each of the three elements of § 2703(c)(1), its disclosure may be compelled pursuant to 2703(d) order.

While the statute is unambiguous and thus resort to the legislative history is unnecessary, the

---

relevant and material to an ongoing criminal investigation." 18 U.S.C. § 2703(d).

CELL/OTD 008367

CELLSITE-19643

legislative history of § 2703(c)(1) nevertheless confirms that it encompasses cell-site information. When the SCA was first enacted as part of the Electronic Communications Privacy Act ("ECPA") in 1986, it permitted disclosure pursuant to a 2703(d) order (or subpoena) of the same catch-all category of "record[s] or other information pertaining to a subscriber or customer of such service (not including the contents of communications)" now codified at 18 U.S.C. § 2703(c)(1). *See* ECPA § 201, P.L. 99-508, 100 Stat. 1848, 1862 (1986). The accompanying 1986 Senate report emphasized the breadth of the "record or other information" category of information: "the information involved is information about the customer's use of the service[,] not the content of the customer's communications." S. Rep. No. 541, 99th Cong., 2d Sess. 38 (1986), *reprinted in* 1986 U.S. Code Cong. & Admin. News 3555, 3592 (1986). Moreover, cellular telephones were one of the new technologies of particular importance to Congress when it enacted ECPA, so there is no basis to exclude cellular telephone usage records from the scope of § 2703. *See* H.R. Rep. No. 647, 99th Cong., 2d Sess. 20-21 (1986).

Numerous recent decisions confirm the government's view that 2703(d) orders may be used to obtain historical cell-site records. For instance, in September 2007, United States District Court Judge Stearns in Boston reversed a magistrate judge's denial of a 2703(d) application for such records. *See In re Applications*, 509 F. Supp. 2d 76 (D. Mass. 2007) ("*Stearns D. Mass. Opinion*"). After conducting a careful analysis of the SCA's text, Judge Stearns held that "historical cell site information clearly satisfies" the statute's definitional requirements, rejecting the magistrate's analysis and granting the application. *Id.* at 80.

The following month, Judge Rosenthal in Houston confronted a similar situation: a magistrate judge had denied the government's application for, *inter alia*, historical cell-site data

CELL/OTD 008368

CELLSITE-19644

under the authority of § 2703(d). *See In re Application*, 2007 WL 3036849 (S.D. Tex. Oct. 17, 2007). Here, too, the district court found the magistrate's objections on this question wholly without merit, reversing and holding that "the Government's request for historical cell-site information is within the statutory authorization." *Id.* at *5.

And most recently, on March 26, 2008, a federal magistrate judge in Atlanta issued an opinion rejecting a defendant's motion to suppress historical cell-site records acquired by means of a 2703(d) order. *See United States v. Suarez-Blanca*, No. 1:07-CR-0023-MHS/AJB (N.D. Ga. Mar. 26, 2008) (copy attached as Exhibit D). In his opinion endorsing the government's approach, the magistrate noted – and disagreed with – the Magistrate Judge's Opinion and Order in the present case. *Id.* at 32-33.

B. No Other Authority Limits the Compelled Disclosure of Historical Cell-Site Information Pursuant to a 2703(d) Order

The Opinion and Order errs at the outset by proposing to answer a legal question that is simply not relevant to this case. Instead of addressing the question at hand – whether the government may obtain historical cell-site records via a 2703(d) order – the decision below places a great deal of emphasis on determining the proper authority for obtaining such information prospectively. Prospective cell-site information is not at issue in this case. The decision never fully recovers from this initial wrong turn, and as a result conflates the legal principles actually relevant to the government's Application.

In the course of the analysis, the Magistrate Judge cites several authorities as purported limits on the government's ability to compel disclosure of historical cell-site information pursuant to 2703(d) orders. In particular, the Opinion and Order concludes that 47 U.S.C. § 1002(a)(2); the

CELL/OTD 008369 CELLSITE-19645

mobile tracking device provision of 18 U.S.C. § 3117; the text of § 2703 itself; the Fourth Amendment; and the Wireless Communication and Public Safety Act of 1999 ("WCPSA") all bar the government from compelling disclosure of cell-site information via 2703(d) orders.

However, as explained below, the cited Title 47 provision applies only to prospective evidence-gathering, and not to the instant Application for an order compelling historical records. Section 3117 is likewise inapplicable because a user's own phone is not a "tracking device" within the narrow meaning of that statute. On the other hand, § 2703 not only applies, but on its face permits the government's current Application. Finally, the customer records at issue are not protected by the Fourth Amendment. As a result, none of these authorities prohibits or even limits compelled production of historical cell-site information pursuant to a 2703(d) order, and the Opinion and Order below should therefore be reversed.

1. 47 U.S.C. § 1002 Does Not Apply to Requests for Historical Records, and Therefore Does Not Prohibit Compelled Production of Historical Cell-Site Information Pursuant to a 2703(d) Order

The Opinion and Order below devotes enormous space to discussion of the 1994 Communications Assistance for Law Enforcement Act (CALEA). In particular, the decision below places great weight on the fact that CALEA, at 47 U.S.C. § 1002(a)(2), states that

> information acquired solely pursuant to the authority for pen registers and trap and trace devices (as defined in section 3127 of title 18, United States Code) ... shall not include any information that may disclose the physical location of the subscriber.

(Emphasis supplied.) However, the present Application neither invokes nor in any way relies on the pen register/trap and trace statute. On the contrary, the government's request – for historical, not future, cell-site records – relies on the entirely separate authority of 18 U.S.C. § 2703(d).

Because the CALEA provision quoted above mentions only the pen/trap statute, and not

CELL/OTD 008370 CELLSITE-19646

§ 2703(d), it would be wholly improper to read into it what Congress chose to omit. Under the longstanding canon of *expressio unius est exclusio alterius* ("the expression of one is the exclusion of the other"), a court should presume that if "Congress wanted to include such a requirement ... it knew exactly how to do so." *United States v. Thornton*, 306 F.3d 1355, 1359 (3d Cir. 2002). In the case of CALEA, this omission can hardly be called accidental. Congress was well aware of § 2703(d) in its deliberations over CALEA; in fact, a separate portion of the Act amended § 2703(d) to raise the showing required of the government. *See* Pub. L. 103-414, § 207(a) (1994).[5]

The decision below simply disregards the fact that 47 U.S.C. § 1002 imposes limits only on the pen/trap statute, and not on § 2703(d). Instead, it leans heavily in its analysis on numerous cases applying the CALEA restriction to government requests for prospective collection of future cell-site records.[6]

---

[5] Nor does *expressio unius* produce an absurd result in this instance. A pen register order may issue where the government has made a mere certification of relevance. *See* 18 U.S.C. § 3123(a)(1). In contrast, § 2703(d) imposes the higher "specific and articulable facts" criterion. *See* H. Rep. No. 827, 103d Cong., 2d Sess. 31 (1994) (noting that change in required 2703(d) showing from relevance to specific and articulable facts "rais[es] the standard"), *reprinted in* 1994 U.S. Code Cong. & Admin. News 3489, 3511.

[6] Magistrates and district courts have disagreed over whether § 2703 and the pen register statute can be used together to compel disclosure of cell-site information prospectively, an issue not raised in this case. *Compare In re Application of United States for an Order for Prospective Cell Site Location Information*, 460 F. Supp. 2d 448 (S.D.N.Y. 2006) (upholding "hybrid" use of 2703(d) orders and pen/trap statute to compel prospective disclosure of cell-site information) *with In re Application of United States for an Order Authorizing Use of a Pen Register and Trap and Trace Device*, 396 F. Supp. 2d 294 (E.D.N.Y. 2005) (rejecting such hybrid orders).

However, as the Magistrate Judge's Opinion and Order concedes, *see* 534 F. Supp. 2d at 600, even judges who have rejected prospective hybrid orders for cell-site information have agreed that compelled disclosure of historical cell-site information pursuant to 2703(d) orders is proper. *See, e.g.*, 396 F. Supp. 2d at 327 ("The applicable statutes allow the government to obtain historical cell site information on the basis of a showing less exacting than probable cause, but do not allow it to obtain such information prospectively on a real-time basis.").

CELL/OTD 008371 CELLSITE-19647

The Magistrate's opinion acknowledges the prior decisions holding (or implying) that historical cell-site records may be obtained by way of § 2703(d). In the same breath, however, the decision below dismisses that same precedent with the surprising claim that the legal distinction between prospective and historical cell-site records is "largely-unexplained." 534 F. Supp. 2d at 603. In fact, the government submits that the distinction is indeed clear, depending as it does on the explicit wording and structure of the pertinent statutes.

In crafting the federal statutes regulating governmental access to telecommunications records, Congress has unambiguously distinguished between historical (stored) and future records. Most prominently, Chapter 121 of Title 18 (the Stored Communications Act, §§ 2701 *et seq.*) stands in contrast to the Wiretap Act (Chapter 119) and the pen register statute (Chapter 206), both of which exclusively regulate prospective, ongoing surveillance (of content and non-content, respectively). Thus, the mechanism for obtaining historical telephone calling records – a subpoena, as provided for at § 2703(c)(2)(C) – differs from the authority under the pen/trap statute for monitoring the telephone numbers of future calls to or from a target telephone.

The decision below improperly disregards this key aspect of the statutes. Because it wrongly relies on the CALEA limitation (and cases applying it) to conclude that the statutes "do not distinguish between historic[al] and prospective [cell-site records]," 534 F. Supp. 2d at 586 n.4, its analysis should be rejected.

2. The Statutory Provisions Concerning "Tracking Devices" Do Not Limit Compelled Disclosure of Historical Cell-Site Information

The Opinion and Order also asserts that the United States may not use a 2703(d) order here because historical cell-site information is a communication from a "tracking device" as defined in

CELLSITE-008548

18 U.S.C. § 3117. *See* 534 F. Supp. 2d at 601-07. The analysis, however, is simply not supportable. As explained below, "tracking device" communications are excluded only from the definition of "electronic communication"; cellular telephone calls are instead "wire communications," a defined term with no comparable exclusion. Second, a user's own wireless phone is not a "tracking device" within the narrow meaning of the statute.

The decision below relies heavily on 18 U.S.C. § 2510(12)(C), which excludes "any communication from a tracking device" from the definition of "electronic communication." Under the reasoning of the Opinion and Order, this provision excludes cell-site records from the reach of ECPA. In reaching this conclusion, however, the opinion overlooks one crucial, plainly expressed statutory distinction: cellular telephone calls are not "electronic communications" under any circumstances. On the contrary, conventional cellular calls are instead "wire communications" as defined at section 2510(1).[7] Of equal importance, the "wire" and "electronic" categories are mutually exclusive: a "wire communication" cannot, under the express terms of the statute, also be an "electronic communication." *See* § 2510(12)(A) ("'electronic communication' ... does not include–(A) any wire or oral communication"). Thus, properly analyzed under the statute, historical cell-site information concerning a wireless telephone call is plainly "a record or other information pertaining to a subscriber" using a service provider's network to send and receive "wire communications." *See Stearns D. Mass. Opinion*, 509 F. Supp. 2d at 80 (reversing magistrate

[7] The essential distinction is that a "wire communication" necessarily involves the human voice. *See* § 2510(1) (defining "wire communication") and § 2510 (defining "aural transfer"); S. Rep. No. 541, 99th Cong., 2d Sess. 11 (1986), *reprinted in* 1986 U.S. Code Cong. & Admin. News 3555, 3565 ("cellular communications – whether they are between two cellular telephones or between a cellular telephone and a 'land line' telephone – are included in the definition of 'wire communications' and are covered by the statute").

CELL/0[illegible]-19649

judge's contrary conclusion).

The decision below overlooks these clearly articulated distinctions. Instead, the opinion dwells at length on the definition of an inapposite term ("electronic communication"). Having done so, the Opinion and Order further distorts the statute by construing the clear phrase "record or other information pertaining to a subscriber" to exclude

> information that is regarding or derived under a service (*e.g.*, a tracking capability/function) that may be used to facilitate the provision of an electronic communication service (*e.g.*, the transmission of voice/text material), but that is not *itself* an electronic communication service (as, *e.g.*, by definition).

534 F. Supp. at 604 (footnote omitted). Because this unduly complicated interpretation – unsupported by even a single citation to the legislative history of the statute – does violence to the plain meaning of "pertaining to," this Court must reject it. *See Malloy v. Eichler*, 860 F.2d 1179, 1183 (3d Cir. 1988) ("Where the language of the statute is clear, only 'the most extraordinary showing of contrary intentions' justify altering the plain meaning of a statute.") (*quoting Garcia v. United States*, 469 U.S. 70, 75 (1984)).

In addition, the decision below errs in finding that the target cell phone was a "tracking device" within the meaning of 18 U.S.C. § 3117. This overly expansive reading runs contrary to the language, structure, and legislative history of ECPA, and it would significantly undermine privacy protections for users of communication networks.

The structure of 18 U.S.C. § 3117 makes clear that a "tracking device" is a homing device installed by the government. Specifically, 18 U.S.C. § 3117(a) applies only when a court is authorized to issue an order "for the installation of a mobile tracking device." It then provides that "such order may authorize the use of that device within the jurisdiction of the court, and outside that

CELL/OTD 008374 CELLSITE-19650

jurisdiction if the device is installed in that jurisdiction." *Id.* Thus, the purpose of the tracking device statute is to provide a court with extra-territorial jurisdiction over use of tracking devices installed within its jurisdiction. Given the limited purpose of the tracking device statute, there is no basis for interpreting "tracking device" broadly to encompass devices which the government would never have any reason to apply to a court to install or use. *See Stearns D. Mass. Opinion*, 509 F. Supp. 2d at 81 n.11 (§ 3117 "governs the 'installation' of tracking devices. The 'tracking' of a cell phone does not require the installation of any sort of device."); *In re Application*, 405 F. Supp. 2d 435, 449 n.8 (S.D.N.Y. 2005) (same).

The legislative history of § 3117 is equally clear that "tracking devices" are homing devices, not cell phones or other communications technologies. Most obviously, the 1986 House Report on ECPA cites the two landmark Supreme Court decisions concerning "beeper" homing devices, *United States v. Knotts*, 460 U.S. 276 (1983) (beeper installed in can of chloroform and used to track movements of car) and *United States v. Karo*, 468 U.S. 705 (1984) (beeper installed in can of ether expected to be used in production of cocaine). No mention is made of cellular telephones.

Likewise, the Senate Report on ECPA includes a glossary of technological terms. The glossary, which defines electronic tracking devices separately from cell phones and pagers, defines "electronic tracking devices" as follows:

> These are one-way radio communication devices that emit a signal on a specific radio frequency. This signal can be received by special tracking equipment, and allows the user to trace the geographical location of the transponder. Such "homing" devices are used by law enforcement personnel to keep track of the physical whereabouts of the sending unit, which might be placed in an automobile, on a person, or in some other item.

S. Rep. No. 541, 99th Cong., 2d Sess. 10 (1986), *reprinted in* 1986 U.S. Code Cong. & Admin.

CELL/OTD 008375

CELLSITE-19651

News 3555, 3564 (1986).

Even more revealing is the fact that the very same 1986 legislation[8] addresses cellular telephone technology extensively in numerous other provisions unrelated to "tracking devices." Congress enacted ECPA because the Wiretap Act "had not kept pace with the development of communications and computer technology." S. Rep. No. 541, 99th Cong., 2d Sess. 2 (1986), *reprinted in* 1986 U.S. Code Cong. & Admin. News 3555, 3556 (1986). Cellular phones were one of the new technologies of particular importance to Congress, *see id.* at 2 & 9, and cellular technology is central to much of ECPA's legislative history. *See id.* at 2, 4, 6-9, 11-12, 21, & 29-30.

Congress made clear that cellular communications were to be protected as wire communications by the Wiretap Act and the SCA. In particular, Congress amended the definition of "wire communication" to ensure that it encompassed cellular communications by inserting the phrase "including the use of such connection in a switching station" into 18 U.S.C. § 2510(1). *See* ECPA § 101, Pub. L. No. 99-508, 100 Stat. 1848 (1986). As noted by the Senate Report on ECPA, "[t]his subparagraph makes clear that cellular communications--whether they are between two cellular telephones or between a cellular telephone and a 'land line' telephone--are included in the definition of 'wire communications' and are covered by the statute." S. Rep. No. 541, 99th Cong., 2d Sess. 11 (1986), *reprinted in* 1986 U.S. Code Cong. & Admin. News 3555, 3565 (1986).

Despite this extensive discussion of cell phones throughout ECPA's legislative history, there is not a scintilla of evidence in the legislative history that Congress intended cell phones to be classified as tracking devices. Instead, all discussion of tracking devices suggests that Congress

---

[8] The tracking device statute was enacted as part of ECPA. *See* Pub. L. No. 99-508, 100 Stat. 1848, § 108 (1986).

CELL/OTD 008376

CELLSITE-19652

understood tracking devices to be homing devices installed by the government.

There is no reason to supply "tracking device" with a meaning much broader than that intended by Congress, especially because doing so would deny many communications the privacy protection Congress intended them to have. If cell phones were classified as "tracking devices," text messages or e-mail transmitted from them would not be "electronic communications" under 18 U.S.C. § 2510(12)(C). As a result, such communications would fall outside the scope of the Wiretap Act, and it would no longer be a federal crime for an eavesdropper to intercept them. *See* 18 U.S.C. § 2511(1)(a) (criminalizing interception of wire, oral, and electronic communications). This result is plainly contrary to Congress's purposes in passing ECPA, and the Opinion and Order's expansive interpretation of "tracking device" should therefore be rejected.

Moreover, if "tracking device" were given the broad interpretation adopted below, nearly all communications devices would be tracking devices. Certainly any device relying on the cellular communication system (including many pagers, text messaging devices such as Blackberries, and cellular Internet systems) would be a "tracking device." The same is also true of banking ATMs, retail credit-card terminals, or even landline telephones (since it is possible to determine information about a person's location from his use of each). But the Magistrate Judge's reasoning extends much further. It is generally possible to determine the physical location of a user connected to the Internet, and the whereabouts of fugitives and other suspects are frequently discovered based on their use of Internet-connected computers. Treating all such devices as "tracking devices" grossly distorts § 3117's scope and purpose, and this Court should reject the Magistrate Judge's overly broad reading of the statute. *See United States v. Schneider*, 14 F.3d 876, 880 (3d Cir. 1994) (a court has an obligation to construe statutes to avoid absurd results).

CELL/OTD 008377 CELLSITE-19653

A recent opinion from the Eastern District of California underscores all of these points:

> No use of cell phones and cell towers for tracking was expressly contemplated, and perhaps was not even possible in 1986. Certainly the legislative history gives no such indication.
>
> In addition, it would prove far too much to find that Congress contemplated legislating about cell phones as tracking devices. For example, if an agent presently used a cell phone to communicate the whereabouts of a suspect by using the phone's video feature while he was surveilling the suspect, one could fit this situation into the words of the statute-one was using an electronic device which "permitted" the tracking of the suspect. Or, take the example of the ubiquitous monitoring cameras, such as the "red light," parking lot or freeway cameras. These cameras track the location of many persons, albeit in a confined location, and could also fit in with the words of the statute. It is best to take the cue from Congress in this respect of electronic tracking devices, and confine § 3117(b) to the transponder type devices placed upon the object or person to be tracked.

In re Application for an Order Authorizing the Extension and Use of a Pen Register Device, 2007 WL 397129 (E.D. Cal. Feb. 1, 2007).

Thus, even if it were the case that cellular telephone calls were "electronic communications" – as set forth above, they unquestionably are not – the "tracking device" exclusion from the definition of that term is irrelevant because a user's own phone falls outside the narrow scope of that defined term.[9] For this reason as well, the decision below should be reversed.

---

[9] The Opinion and Order asserts that the use of tracking devices pursuant to 18 U.S.C. § 3117 requires probable cause. 534 F. Supp. 2d at 595. Even if a subscriber's own cell phone were a "tracking device," it would not follow that a Rule 41 warrant founded on a showing of probable cause would be required to obtain historical cell-site records. First, as the Advisory Committee Notes to the 2006 amendments to Rule 41 explain, if "officers intend to install and use the [tracking] device without implicating any Fourth Amendment rights, there is no need to obtain the warrant." Fed. R. Crim. P. 41, Advisory Comm. Notes to 2006 Amendments, Subdivision (b). The Committee Notes further explain that "[t]he tracking device statute, 18 U.S.C. § 3117, does not specify the standard an applicant must meet to install a tracking device." *Id.* at subdivision (d).

Indeed, the statute does not even prohibit the use of a tracking device in the absence of conformity with § 3117. *See United States v. Gbemisola*, 225 F.3d 753, 758 (D.C. Cir. 2000) ("But by contrast to statutes governing other kinds of electronic surveillance devices, section 3117 does not prohibit the use of a tracking device in the absence of conformity with the

CELL/OTD 008378

CELLSITE-19654

3. Section 2703(d) Does Not Permit a Court to Demand a Showing of Probable Cause

The Opinion and Order also asserts that § 2703 permits a court to demand a showing of probable cause as a precondition to issuance of a 2703(d) order. This conclusion allegedly flows from the express language and structure of § 2703. Instead, the text of the statute points to the opposite reading.

As before, "every exercise of statutory interpretation begins with an examination of the plain language of the statute." *Rosenberg v. XM Ventures*, 274 F.3d 137, 141 (3d Cir. 2001). Where statutory language is "plain and unambiguous," no further inquiry is necessary. *Id.* On its face, § 2703(d) demands a showing of "specific and articulable facts." Nowhere does that subsection state, or even imply, that probable cause is or may be demanded.

Section 2703(c) permits the government to use any of various methods to obtain stored, non-content customer records. As the House Judiciary Committee noted in its report accompanying ECPA in 1986,

> the government must use one of three sets of authorized procedures. The government can rely on administrative subpoenas or grand jury subpoenas to the extent that such processes are legally authorized. Alternatively, the government can use a search warrant. Finally, the government can seek a court order directing the disclosure of such records. If a court order is sought then the government must meet the procedural requirements of subsection (d).

H. Rep. No. 647, 99th Cong, 2d Sess. 69 (1986) (emphasis added). Current § 2703(c)(1) preserves this structure, explicitly making 2703(d) orders a means of compelling records separate from and alternative to a warrant based on probable cause. *Compare* § 2703(c)(1)(A) (authorizing use of search warrant under Rule 41) *with* § 2703(c)(1)(B) (authorizing use of 2703(d) court order).

---

section.") (emphasis in original); *In re Application*, 405 F. Supp. 2d at 449 n.8 (same).

CELL/OTD 008379

CELLSITE-19655

To do as the Magistrate Judge did below, and insist that a § 2703(d) application set forth probable cause, is in effect to demand a warrant, and thus to render part of the statute superfluous. This contravenes the longstanding canon that a court should, whenever possible, give effect to every provision of a statute. *See, e.g., Tavarez v. Klingensmith*, 372 F.3d 188, 190 (3d Cir. 2004).

Even if the text of the statute were not clear on its face, an examination of the legislative history confirms Congress's intent that a 2703(d) court order be granted on less than probable cause. As originally enacted in 1986, § 2703(d) required only a showing that "there is reason to believe ... the records or other information sought, are relevant to a legitimate law enforcement inquiry." Pub. L. 99-508, § 201 (1986). Eight years later, Congress affirmatively chose to raise the test to the current "specific and articulable facts" standard. *See* Pub. L. 103-414, § 207(a) (1994). As the accompanying House Judiciary Committee report makes clear, this is "an intermediate standard ... higher than a subpoena, but not a probable cause warrant." H. Rep. No. 827, 103d Cong., 2d Sess. 31 (1994) (emphasis added), *reprinted in* 1994 U.S. Code Cong. & Admin. News 3489, 3511.

4. The Fourth Amendment Does Not Bar Compelled Disclosure of Historical Cell-Site Information Pursuant to a 2703(d) Order

Finally, the Opinion and Order suggests that a user has a reasonable expectation of privacy in historical cell-site information. 534 F. Supp. 2d at 610-11. This conclusion is incorrect for two distinct reasons. First, under the established principles of *United States v. Miller*, 425 U.S. 435 (1976), and *Smith v. Maryland*, 442 U.S. 735 (1979), there is no reasonable expectation of privacy in such information, and, accordingly, no Fourth Amendment-protected privacy interest. Second, historical cell-site information is far too imprecise by any measure to intrude upon a reasonable expectation of privacy. Thus, the Fourth Amendment does not limit disclosure of historical cell-site

CELL/OTD 008380

CELLSITE-19656

information pursuant to 2703(d) orders.

The cell-site data that the government is seeking is not in the hands of the cell phone user at all, but rather is in the business records of a third party – the cell phone company. The Supreme Court has held that a customer has no privacy interest in business records of this kind. Addressing a Fourth Amendment challenge to a third party subpoena for bank records, the Court held in *United States v. Miller*, 425 U.S. 435 (1976), that the bank's records "are not respondent's 'private papers'" but are "the business records of the banks" in which a customer "can assert neither ownership nor possession." *Miller*, 425 U.S. at 440; *see also SEC v. Jerry T. O'Brien, Inc.*, 467 U.S. 735, 743 (1984) ("when a person communicates information to a third party ... he cannot object if the third party conveys that information or records thereof to law enforcement authorities"). Thus, an individual has no Fourth Amendment-protected privacy interest in business records such as cell-site connection information, to the extent the records are kept, maintained and used by a cell phone company in the normal course of business. If anything, the privacy interest in cell-site information is even less than the privacy interest in a dialed phone number or bank records. The location of the cell phone tower handling a customer's call is generated internally by the phone company and is not typically known by the customer. A customer's Fourth Amendment rights are not violated when the phone company reveals to the government its own records that were never in the possession of the customer.

The Court's reasoning in *Smith v. Maryland* leads to the same result. In *Smith*, the Court held both that telephone users had no subjective expectation of privacy in dialed telephone numbers and also that any such expectation is not one that society is prepared to recognize as reasonable. *See Smith*, 442 U.S. at 742-44. The Court's reasoning applies equally to cell-site information. First, the

CELL/OTD 008381

CELLSITE-19657

Court stated: "we doubt that people in general entertain any actual expectation of privacy in the numbers they dial. All telephone users realize that they must 'convey' phone numbers to the telephone company, since it is through telephone company switching equipment that their calls are completed." *Id.* at 742. Similarly, cell phone users understand that they must send a radio signal which is received by a cell phone company's antenna in order to route their call to its intended recipient. (Indeed, cell phone users are intimately familiar with the relationship between call quality and radio signal strength, as typically indicated by a series of bars on their phones' displays.)

Second, under the reasoning of *Smith*, any subjective expectation of privacy in cell-site information is unreasonable. In *Smith*, the Court explicitly held that "even if petitioner did harbor some subjective expectation that the phone numbers he dialed would remain private, this expectation is not one that society is prepared to recognize as reasonable." *Id.* at 743 (internal quotation omitted). It noted that "[t]his Court consistently has held that a person has no legitimate expectation of privacy in information he voluntarily turns over to third parties." *Id.* at 743-44. In *Smith*, the user "voluntarily conveyed numerical information to the telephone company" and thereby "assumed the risk that the company would reveal to the police the numbers he dialed." *Id.* at 744. Here, a cell phone user transmits a signal to a cell tower for his call to be connected and thereby assumes the risk that the cell phone provider will reveal the cell-site information to law enforcement. Thus, it makes no difference if some users have never thought about how their cell phones work; a cell phone user can have no expectation of privacy in cell-site information.

As a business record in the possession of a third party, cell-site information should not be judged under Fourth Amendment standards for transponders and similar tracking devices surreptitiously installed by the government. However, even measured against the constitutional

CELL/OTD 008382

CELLSITE-19658

standards articulated by the Supreme Court in this area, there is no reasonable expectation of privacy in cell-site information. The mere use of a tracking device, even when surreptitiously placed by the government, does not implicate Fourth Amendment privacy concerns. *See United States v. Knotts*, 460 U.S. 276, 282 (1983) (police monitoring of beeper signals along public roads did not invade any legitimate expectation of privacy). To be of constitutional concern, a surreptitiously installed tracking device must reveal facts about the interior of a constitutionally protected space. *See United States v. Karo*, 468 U.S. 705, 713 (1984) (distinguishing *Knotts* and holding that police monitoring of a beeper that disclosed information about the interior of a private residence, not open to visual surveillance, required a warrant).

The Opinion and Order's "Technological Development Overview" makes certain claims about wireless telephone location information: 1) that wireless phone companies "store cell tower registration histories" reflecting a phone's location at seven-second intervals; 2) that "the location of just the nearest tower itself can place the phone within approximately 200 feet"; and 3) that triangulation techniques or GPS capabilities make a user's location "precisely determinable" to within as little as 50 feet. 534 F. Supp. 2d at 589-90. The first two claims are demonstrably false, and the third claim (also incorrect) is irrelevant to the separate type of records sought in the instant Application.

On the first issue, the Opinion and Order is correct that a wireless phone, when first powered on, "registers" with a nearby tower, and that the phone thereafter periodically re-registers with the network over time. (Network awareness of a phone's approximate recent whereabouts makes delivery of incoming calls more efficient.) However, no "history" of these events is maintained: once a phone moves into the coverage area of a new tower and registers with it, the prior information

CELL/OTD 008383

CELLSITE-19659

is no longer useful, and the network management software simply deletes the prior registration data. Put differently, the only "registration" data in a carrier's possession at any given moment is the current information. No tower registration history is kept.

As Exhibit C makes clear, historical cell-site data retained by the carriers – that is, the category of information called for by the government's Application in this case – reflects only the identity of the serving tower (and sector, if applicable) when the phone is in active use. The carrier recorded and preserved the cell-site information only at the start and end of actual telephone calls occurring over a few days. Plainly, a typical record such as Exhibit C does not even reveal the location of a nearby cell tower – let alone the phone user's own location – at 7-second intervals.

In making the second claim, the Opinion and Order cites only to a single law student note, which says

> [a] very general sense of a phone's is [*sic*] can be gathered by tracking the location of the tower being used during a call. In urban areas, where there are many towers, this may give a picture location [*sic*] within a couple hundred feet. In rural areas, towers may be miles apart. A slightly more accurate location picture can be generated by tracking which 120 degree "face" of the tower is receiving a cell phone's signal.

Kevin McLaughlin, *The Fourth Amendment and Cell Phone Location Tracking: Where Are We?*, 29 Hastings Comm. & Ent. L.J. 421, 426-27 (Spring 2007). The author's sole source for these claims is a recent decision, *In re Application of United States for an Order for Disclosure of Telecommunications Records*, 405 F. Supp. 2d 435 (S.D.N.Y. 2005), which in fact contradicts the key assertion about precision in urban settings:

> In suburban or rural areas, towers can be many miles apart. The Court has examined a map of cellular towers of a provider in lower Manhattan, which is one of the areas more densely populated by towers. In this area, the towers may be anywhere from several hundred feet to as many as 2000 feet or more apart.
>
> [...]

CELL/OTD 008384 CELLSITE-19660

> The information does not pinpoint a user's location within a building. Instead, it only identifies a nearby cell tower and, for some carriers, a 120-degree face of that tower. These towers can be up to 10 or more miles apart in rural areas and may be up to a half-mile or more apart even in urban areas.

Id. at 437 & 449 (expressly rejecting claim that Fourth Amendment protects such general location information) (emphasis added).

The Opinion and Order's second claim also contradicts repeated findings of the Federal Communications Commission, which relies on the advice of skilled telecommunications engineers (both on FCC staff and those employed by carriers filing public comments). In one proceeding, for instance, the FCC found that a certain location-finding technique accurate to within 500-1000 meters (roughly 1640-3280 ft.) "would be significantly more precise" than "the location of the cell site or sector receiving the call." *In re Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems*, 15 FCC Rcd. 17442, 17462 (Sept. 8, 2000).[10] The Commission went on to note that simple cell-site information "can in some instances be misleading, as wireless calls are not always handled by the nearest cell." *Id.*

Given a stark choice between crediting a lone law student (in this case, one misstating the factual findings of a federal court) and the FCC, the government respectfully suggests to this Court that the FCC is more credible. For the same reasons, the Opinion and Order's claim that historical cell-site records "place the phone within approximately 200 feet" should also be rejected.

---

[10] *See also In re Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems*, 16 FCC Rcd. 18305, 18311 n.49 (Oct. 12, 2001) (similar technique to locate phone within a 1000-meter radius held to be "a notable improvement in accuracy and reliability over ... the location of the cell site or sector receiving the call."); *In re Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems*, 14 FCC Rcd. 17388, 17414 (Oct. 6, 1999) (accuracy of 285 meters – 311 feet – "would be far more accurate than ... cell site location information.") (emphasis added).

CELLSITE-19661

The Opinion and Order's third claim – that triangulation techniques or GPS capabilities currently make a user's location "precisely determinable" to within as little as 50 feet – is simply inapposite.[11] Those entirely distinct techniques relate to real-time (or prospective) location-finding capabilities, "Enhanced 9-1-1 Phase II" in FCC parlance. As noted explicitly in all of the FCC documents referenced above, these prospective location-finding capabilities have been imposed by the FCC for the very reason that cell-site data ("Phase I" information) is so imprecise.

Simply put, the government's present Application seeks only historical cell-site – that is, single-tower and sector – records. It does not seek GPS or "triangulation" information, which is in any event almost never available for past time periods.[12] Rather, the government has requested only the type of records shown in Exhibit C.

As an example, the first line of Exhibit C shows a May 1, 2007 call in the Boston area, Location Area Code 4361, from Cell ID 49874. A separate spreadsheet (supplied by the carrier) that contains only general information about tower attributes – that is, no information about specific customer activities or usage – reveals that Cell ID 49874 corresponds to face number 1 (of 3) on a

---

[11] As an aside, the government notes that this is also an exaggeration. Current FCC regulations for emergency (911) calls require that, by September 11, 2012 – more than four years hence – carriers be able to deliver location data at a level of 100 meters for 67 percent of calls and 300 meters for 95 percent of calls (for so-called "network-based" solutions), and 50 meters for 67 percent of calls and 150 meters for 95 percent of calls (for handset-based solutions). *See* 47 C.F.R. § 20.18(h)(1)(i), (ii). These requirements apply only to customer-initiated calls to a "public safety answering point" (911 operators). Moreover, the deadline for regulatory compliance has been delayed repeatedly in recent years, in large part because of carrier opposition or non-compliance.

[12] Carriers do not typically generate and retain more precise location records in the normal course. The exceptions to this general rule are so-called "kiddie tracker" phones, where – for a separate fee – some carriers offer a service for parents to monitor the movement of a child's phone. *See, e.g.,* http://www.alltel.com/familyfinder . These services are not included in standard feature packages, and are often restricted to certain handsets. *See, e.g., id.*

CELL/OTD 008386

CELLSITE-19662

tower at a particular location north of Boston. Here, this means that the target phone was likely, but not necessarily, roughly northeast of the specified tower coordinates. It does not give the coordinates of the target phone itself, nor even an approximate indication of its distance from the tower; instead it only suggests an area tens of thousands (or more) square yards large in which the target phone was used. As noted above by the FCC, the fact that wireless calls are not always handled by the nearest cell further contributes to the generality and imprecision of this information.

Thus, cellular phone companies' historical records of cell-site usage are much too imprecise to tell whether calls have been made or received from a constitutionally protected space, let alone to reveal facts about the interiors of private homes or other protected spaces. *See* 405 F. Supp. 2d at 449 (cell-site information "does not provide a 'virtual map' of the user's location.... The information does not pinpoint a user's location within a building.").

As a final basis to support the notion that customers enjoy Fourth Amendment rights in the routine business records of their wireless providers, the Opinion and Order cites a range of statutes purportedly conferring constitutional rights. For instance, the decision below invokes the Wireless Communication and Public Safety Act of 1999 (WCPSA), 47 U.S.C. § 222(f), asserting that it "expressly recognizes the importance of an individual's expectation of privacy in her physical location." 534 F. Supp. 2d at 610.

In fact, however, the WCPSA offers no such recognition. Instead, the WCPSA simply states that "[e]xcept as required by law or with the approval of the customer, a telecommunications carrier that receives or obtains customer proprietary network information by virtue of its provision of a telecommunications service shall only use, disclose, or permit access to individually identifiable customer proprietary network information" in certain specified situations. 47 U.S.C. § 222(c)(1)

CELL/OTD 008387

CELLSITE-19663

(emphasis added). The phrase "except as required by law" encompasses appropriate criminal legal process. *See Parastino v. Conestoga Tel & Tel. Co.*, No. Civ. A 99-679, 1999 WL 636664, at *1-2 (E.D.Pa, Aug. 18, 1999) (holding that a valid subpoena falls within the "except as required by law" exception of § 222(c)(1)). Thus, the WCSPA does not create or reinforce any constitutional expectation of privacy, and therefore imposes no bar to the disclosure of cell-site information pursuant to 2703(d) orders.

More importantly, a federal statute cannot in any event establish a constitutional norm. As the Fifth Circuit has observed in analyzing the Right to Financial Privacy Act,

> [w]hile it is evident that Congress has expanded individuals' right to privacy in bank records of their accounts, appellees are mistaken in their contention that the expansion is of constitutional dimensions. The rights created by Congress are statutory, not constitutional.

United States v. Kington, 801 F.2d 733, 737 (5th Cir. 1986) (emphasis supplied).

Thus, because there is no reasonable expectation of privacy in historical cell-site records, the Fourth Amendment does not limit compelled disclosure of such records pursuant to a 2703(d) order.

CELL/OTD 008388

CELLSITE-19664

V. CONCLUSION

For these reasons, the government respectfully submits that this Court should reverse the Opinion and Order below and grant the Application in the instant case.

Respectfully submitted

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 11-08-2012 BY 65179 DMH/rs

In the Matter of the Application of the UNITED STATES of America FOR AN ORDER DIRECTING A PROVIDER OF ELECTRONIC COMMUNICATION SERVICE TO DISCLOSE RECORDS TO THE GOVERNMENT.

Magistrate's No. 07-524M.

United States District Court,
W.D. Pennsylvania.

Feb. 19, 2008.

Background: United States applied for order directing provider of electronic communication services to disclose records to government.

Holding: The District Court, Lenihan, J., held that access to records could not be obtained on simple showing of articulable relevance to ongoing investigation rather than probable cause.

Application denied.

Telecommunications ⇐1475

Stored Communications Act, either alone or in tandem with Pen Registry Statute, does not authorize access to individual's cellular phone-derived location information, either past or prospective, on simple showing of articulable relevance to ongoing investigation rather than probable cause. U.S.C.A. Const.Amend. 4; 18 U.S.C.A. §§ 2703, 3117; Fed.Rules Cr. Proc.Rule 41, 18 U.S.C.A.

Soo C. Song, United States Attorney's Office, Pittsburgh, PA, for Plaintiff.

Before LISA PUPO LENIHAN, SUSAN PARADISE BAXTER, FRANCIS X. CAIAZZA, AMY REYNOLDS HAY and ROBERT C. MITCHELL, United States Magistrate Judges.

OPINION AND MEMORANDUM ORDER

LISA PUPO LENIHAN, United States Magistrate Judge.

I. SUMMATION OF OPINION

The Court writes to express its concerns regarding the Government's *ex parte* applications for cellular telephone ("cell phone") subscriber information from which it may identify an individual's past or present physical/geographic movements/locations not on a showing of probable cause to believe that the information will provide evidence in an investigation premised on a reasonable suspicion of criminal activity, as under the Fourth Amendment,[1] but rather on an articulable, reasonable belief that such information is "relevant to a ... criminal investigation" under the Stored Wire and Electronic Communications and Transactional Records Access statutes (the "Stored Communications Act" or "SCA") alone or in tandem with the Pen Registry Statute (the "PRS").[2] The Court also

1. As discussed *infra*, the Fourth Amendment protects us by providing that the "right of people to be secure in their persons, houses ... against unreasonable searches and seizures, shall not be violated, and no warrants shall issue, but upon probable cause." U.S. Const. Amend. IV. The test currently employed to determine whether a search is subject to these Constitutional constraints is taken from Justice Harlan's concurrence in *Katz v. United States*, 389 U.S. 347, 88 S.Ct. 507, 19 L.Ed.2d 576 (1967), and looks to whether the individual being searched harbors a reasonable expectation of privacy in the object of the search. Where there is a reasonable expectation of privacy, intrusion on that right by the Government for investigatory purposes requires that the Government obtain a warrant by demonstrating to the Court that it has probable cause, *i.e.*, that it make a showing of a fair probability of evidence of criminal activity.

2. The Government's application for cellular telephone information from which it can derive physical location information on the basis of the SCA and PRS read in tandem is re-

CELL/OTD 008391

CELLSITE-19667

writes to set forth its reasons for concluding that, while it recognizes the important and sometimes critical crime prevention and law enforcement value of tracking suspected criminals,[3] the Government's requests for Court Orders mandating a cell phone service provider's covert disclosure of individual subscribers' (and possibly others') physical location information must be accompanied by a showing of probable cause.[4]

The Court emphasizes that the issue is not *whether* the Government can obtain movement/location information, but *only the standard* it must meet to obtain a Court Order for such disclosure and the basis of authority. It emphasizes that the Fourth Amendment standard is not a difficult one, requiring only that the Government support its belief of criminal activity and the probable materiality of the information to be obtained.[5] The Court notes that it is entrusted with the protection of the individual civil liberties, including rights of privacy and rights of free association, so paramount to the maintenance of our democracy. The Court also observes that the location information so broadly sought is extraordinarily personal and potentially sensitive;[6] and that the *ex parte* nature of the proceedings, the comparatively low cost to the Government of the information requested, and the undetectable nature of a CSP's electronic transfer of such information, render these requests particularly vulnerable to abuse.[7] Finally, the Court concludes, from its exhaustive

ferred to as its "hybrid" or "dual authority" theory.

3. *See, e.g., Who Knows Where You've Been? Privacy Concerns Regarding the Use of Cellular Phones as Personal Locators,* 18 Harv. J. Law & Tech., 307, 310 (Fall, 2004) (hereafter *"Who Knows Where You've Been?"*) (discussing criminal cases in which law enforcement's access to cell phone location information may have been critical).

4. The Court recognizes and appreciates that the U.S. Attorney for this District has chosen not to pursue prospective cell tower information without a probable cause affidavit, and accordingly the current application requests only historic cell site location information ("CSLI"); however, the cases considering prospective applications are relevant to this discussion and must be addressed as well. In addition, because this Court concludes that the electronic communications statutes, correctly interpreted, do not distinguish between historic and prospective CSLI, its analysis applies equally to both.

5. The Supreme Court describes probable cause as a "practical, common-sense decision" turning on whether, under the "totality of the circumstances", there is a fair probability that evidence of a crime will be found. *See Illinois v. Gates,* 462 U.S. 213, 238, 103 S.Ct. 2317, 76 L.Ed.2d 527 (1983). *Cf. Karo,* 468 U.S. at 717, 104 S.Ct. 3296 (concluding that "Government's contention that warrantless [electronic monitoring] should be deemed reasonable [was] based upon its deprecation of the benefits and exaggeration of the difficulties associated with procurement of a warrant").

6. Location information may reveal, for example, an extra-marital liaison or other information regarding sexual orientation/activity; physical or mental health treatment/conditions (including, *e.g.,* drug or alcohol treatment and/or recovery programs/associations); political and religious affiliations; financial difficulties; domestic difficulties and other family matters (such as marital or family counseling, or the physical or mental health of one's children); and many other matters of a potentially sensitive and extremely personal nature. It is likely to reveal precisely the kind of information that an individual wants and reasonably expects to be private. *Cf. State v. Jackson,* 150 Wash.2d 251, 76 P.3d 217, 223–24 (2003) (noting that the "intrusion into private affairs" from a device producing a record of our travels is "quite extensive").

7. *Cf.* Susan Friwald, *First Principles of Communications Privacy,* 2007 Stan. Tech. L.Rev. 3, 11 (2007) (hereafter *"First Principles"*) (asserting that electronic communications surveillance implicates Fourth Amendment's core concerns because it is (a) hidden, thus requiring greater reliance on the Court's protection of the citizen's interests; (b) and (c)intrusive and continuous, thus requiring higher justification; and (d) indiscriminate, *i.e.,* often

CELL/OTD 008392

CELLSITE-19668

review of the statutes and cases as to both the rapidly-developing law of electronic communications and the Fourth Amendment, together with its extensive review of the legislative history and scholarly commentary, that Congress and the Supreme Court still concur in the principle underlying this Opinion: *i.e.*, that law enforcement's investigative intrusions on our private lives, in the interests of social order and safety, should not be unduly hindered, but must be balanced by appropriate degrees of accountability and judicial review.[8] For these reasons, and notwithstanding the legitimate and significant benefits in law enforcement's ability to obtain information efficiently and effectively, this Court best serves and preserves the fundamental principles underpinning our Constitutional democracy by (1) a careful and thorough parsing of the legislation and (2) a cautious and informed balancing of the competing interests.

Thus, absent express statutory authorization for *ex parte* access to personal movement/location information and/or a precedential/binding interpretative ruling, this Court cannot accede to the Government's request. To the contrary, it must adhere to the canons of statutory construction and read the provisions of the various statutes implicated in a manner that (1) applies the plain language of the legislation and gives effect to each and every provision, (2) is most warranted by the legislative history and other indicia of Congressional intent, and (3) avoids a Constitutional invalidation of portions of the legislation.[9]

Accordingly, this Court holds that the SCA, either alone or in tandem with the PRS pursuant to the CALEA,[10] does not authorize access to an individual's cell-phone-derived "location information", either past or prospective, on a simple showing of articulable relevance to an ongoing investigation (a "reasonable relevance" standard).

II. STATEMENT OF CASE AND STATUTORY PROVISION AT ISSUE

Currently pending is the application of an Assistant United States Attorney re-

obtaining more information than is justified, thus requiring judicial oversight regarding minimization).

8. *Cf. United States v. United States Dist. Ct.*, 407 U.S. 297, 317, 92 S.Ct. 2125, 32 L.Ed.2d 752 (1972) (Powell, J.) ("The Fourth Amendment does not contemplate the executive officers of Government as neutral and disinterested magistrates. Their duty and responsibility are to enforce the laws, to investigate, and to prosecute. But those charged with this investigatory and prosecutory duty should not be the sole judges of when to utilize constitutionally sensitive means in pursuing their tasks. The historical judgment, which the Fourth Amendment accepts, is that unreviewed executive discretion may yield too readily to pressures to obtain incriminating evidence and overlook potential invasions of privacy....").

9. *See, e.g., Edward J. DeBartolo Corp. v. Florida Gulf Coast Bldg. & Constr. Trades Council*, 485 U.S. 568, 575, 108 S.Ct. 1392, 99 L.Ed.2d 645 (1988) (holding that " 'every reasonable construction must be resorted to in order to save a statute from unconstitutionality' "). *Cf. Warshak v. United States*, 490 F.3d 455 (6th Cir.2007), *rehearing en banc granted and opinion vacated* (Oct. 9, 2007) (concluding that SCA did not comport with Fourth Amendment, and was constitutionally invalid, to the extent disputed portions allowed disclosure of e-mail content without a warrant and without prior notice); *In re Applications of the United States for Orders (1) Authorizing the Use of Pen Registers and Trap and Trace Devices and (2) Authorizing Release of Subscriber Information*, 2007 WL 2729668 (E.D.N.Y. Sept.18, 2007) (hereafter *"Azrack E.D.N.Y. 2007 Opinion"*) (concluding that Government's reading of the PRS violated Fourth Amendment).

10. The Communications Assistance for Law Enforcement Act of 1994, 47 U.S.C. §§ 1001 *et seq.*

CELL/OTD 008393

CELLSITE-19669

questing "that an Order be issued directing that (1) certain records of [a cell phone service provider] be disclosed to the Government, (2) this matter be sealed, and (3) [the cell phone service provider] and its agents be ordered not to disclose the existence of this application, order, and any disclosures pursuant thereto".

The Government has applied, under the Stored Communications Act (the "SCA"), 18 U.S.C. § 2703, for an Order requiring a cellular service provider to disclose the "transactional records"—including "historical cellular tower data", "cellular tower site information", and "sectors"—maintained with respect to a cellular telephone ("cell phone") number in the name of one individual (the "Subscriber") on the basis of its asserted relevance to an ongoing criminal investigation of another individual (the "Criminal Suspect").[11] The Government attests that the Criminal Suspect is a drug trafficker, that it is experiencing difficulty in visually surveilling that person, and that fuller knowledge of the Criminal Suspect's whereabouts is important to its counter-trafficking operations.[12] Owing to continuing technological advances, the information requested would enable the Government to identify where the Subscriber and any other individuals making use of the Subscriber's cell phone, including the Criminal Suspect, have been at any/many given times in the past and where they are likely to be now and/or in the future.

The SCA prohibits an electronic communications provider, including a cellular service provider (a "CSP"), from disclosing various stored, *i.e.* historic, subscriber telephone account information to the Government, *except on appropriate legal authority.*[13] The Government maintains that it may obtain historical cellular tower site location information (hereafter "CSLI")—and thus the location of the cell phone possessor(s)—under provisions of the SCA that authorize disclosure of "a record or other information pertaining to a subscriber to or customer of such service (not including the contents of communications)" under legal standards that include a Court Order issued upon "specific and articulable facts showing that there are reasonable grounds to believe that ... the records or other information sought, are relevant and

11. The Government asserts that the Subscriber's cell phone is "being used by" the Criminal Suspect. It provides no specific information connecting these two individuals, or connecting the Criminal Suspect to the cell phone. Because this Order more broadly denies the Government's request absent a showing of probable cause, it does not address the other infirmities that may arise when the Government seeks disclosure of a person's personal location information on a statement that her cell phone is being used by the target of an investigation.

12. The Government may reasonably expect that information as to the Criminal Suspect's historic whereabouts will provide valuable evidence of the locations of that person's sources of supply, "stash sites", and distribution networks. *See, e.g., In the Matter of the Application of the United States of America for an Order Authorizing the Release of Prospective Cell Site Information,* 407 F.Supp.2d 134, 135 (D.D.C.2006) (hereafter *"Facciola DDC 2006 Opinion"*) (noting Government agent's affidavit of same in requesting cellular location information). As citations to the formal captions of this genre of cases are cumbersome, we will (after the initial citation) refer to such cases by authoring Judge.

13. *See* 18 U.S.C. §§ 2702(a)(3), 2703; *see also In re the Application of the United States for an Order Authorizing the Installation and Use of a Pen Register Device, a Trap and Trace Device, and for Geographic Location Information,* 497 F.Supp.2d 301, 309 (D.P.R.2007) (hereafter *"McGiverin PR 2007 Opinion"*); Deirdre K. Mulligan, *Reasonable Expectations in Electronic Communications: A Critical Perspective on the ECPA,* 72 Geo. Wash. L.Rev. 1557, 1568 (Aug.2004) (noting that "[t]he SCA covers retrospective surveillance") (hereafter *"Reasonable Expectations"*).

CELL/OTD 008394

CELLSITE-19670

material to an ongoing criminal investigation." §§ 2703(c)(1)(B) and (d).

This Court finds that (1) the SCA expressly sets movement/location information outside its scope by defining "electronic communications" to exclude "any communication from a tracking device (as defined in § 3117)"; (2) the SCA does not establish an entitlement to information in abrogation of any other legal requirements that would otherwise apply due to the nature of that information; (3) the CALEA also expressly exempts information from a tracking device and, in legislating what information CSPs must compile/retain for disclosure to law enforcement on "Court Order or other lawful authorization", also retains the Fourth Amendment or other requirements implicated by the nature of the information sought; (4) the relevant legislative history further indicates that Congress did not intend its electronic communications legislation to be read to require disclosure of an individual's location information; to the contrary, in enacting the legislation it relied on express representations by law enforcement that it was not seeking to amend the background standards governing disclosure; [14] and (5) as reading the statutes as authorizing *ex parte* disclosure of movement/location information with no judicial review of the probable cause could violate citizens' reasonable expectations of privacy, such reading would be disfavored. This Court therefore concludes, as more fully set forth below, that it must deny the Government's requests for cellular-telephone-derived location information, historic or prospective, absent a showing of probable cause.

III. TECHNOLOGICAL DEVELOPMENT OVERVIEW

As of December, 2006, there were over 233 million cellular phone subscribers in the United States, almost ten times the number in 1994.[15] Our individual cell phones now come with us everywhere: not only on the streets, but in (a) business, financial, medical and other offices; (b) restaurants, theaters and other venues of leisure activity; (c) churches, synagogues and other places of religious affiliation; and (d) our homes and those of our family members, friends, and personal and professional associates. Indeed, many individuals no long subscribe to local wireline phones, but utilize their cell phone as their residential telephone.[16]

Cellular telephone networks divide geographic areas into many coverage areas containing towers through which the cell phones transmit and receive calls. Cell phones, whenever on, now automatically communicate with cell towers, constantly relaying their location information to the

14. *See, e.g., In re Application for Pen Register and Trap/Trace Device with Cell Site Location Authority,* 396 F.Supp.2d 747, 764 (S.D.Tex.2005)(hereafter *"Smith SD Tex.2005 Opinion"*) (contrasting express and extensive Congressional testimony of FBI Director Freeh, in advocating for its passage, that CALEA was "intended to preserve the status quo, that it was intended to provide law enforcement no more and no less access to information than it had in the past" and "did not relate to the SCA" with Government's subsequent assertion that it was intended to expand law enforcement's access to physical location information via the SCA).

15. *See* CTIA—The Wireless Association's Semi–Annual Wireless Industry Survey (2006), http://files.ctia.org. In 1985, when the CTIA survey was first taken, the number was 340,000. By 1994 the number of cell phone subscribers had increased to more than 24 million.

16. *See In the Matter of the CALEA,* 17 F.C.C.R. 6896, 6918 (April 11, 2002) (noting that in 1994, when the CALEA was enacted, "basic residential telephone service" was almost entirely wireline, but that households now substitute wireless telephone service).

CELL/OTD 008395
CELLSITE-19671

towers that serve their network and scanning for the one that provides the strongest signal/best reception. This process, called "registration", occurs approximately every seven seconds.[17]

As we change locations, our cell phones automatically switch cell towers. Cellular telephone companies "track the identity of the cell towers serving a phone".[18] When a call is received, a mobile telephone switching office ("MTSO") gets the call and locates the user based on the nearest tower; the call is then sent to the phone via that tower. This process works in reverse when the user places a call. *See id.* In urban areas, where towers have become increasingly concentrated, tracking the location of just the nearest tower itself can place the phone within approximately 200 feet. This location range can be narrowed by "tracking which 120 degree 'face' of the tower is receiving a cell phone's signal." *Id.* The individual's location is, however, most precisely determinable by triangulating the "TDOA" or "AOA" information of the three nearest cellular towers.[19] Alternatively, the phone can be tracked extremely accurately—within as little as 50 feet—via the built-in global positioning system ("GPS") capabilities of over 90% of cell phones currently in use. *Id. See also Who Knows Where You've Been?*, 18 Harv. J.L. & Tech. at 308 (noting that, as of 2004, synchronized signal triangulation produced a 3–D location accurate to 65 feet). CSPs store cell tower registration histories and other information.[20]

In sum, as a result of the proliferation of cellular tower sites, the uniform/routine inclusion of a GPS device in cell phones, and industry's implementation of additional technology required to meet Congressional mandates, including that more precise TDOA/AOA and other location information be available to emergency-assistance providers, CSPs now compile and retain extensive personal location

17. These location signals are generally set on one band (often referred to as a "control channel"); the other frequency bands that the phone uses are for sending and receiving voice and data. *See* Kevin McLaughlin, *The Fourth Amendment and Cell Phone Location Tracking: Where Are We?*, 29 Hastings Comm. & Ent. L.J. 421, 427 (Spring 2007) (hereafter *"Where Are We?"*); *See also Smith SD Tex. 2005 Opinion*, 396 F.Supp.2d at 750 (explaining that "control channels" are frequencies shared by the phone and base station to communicate information for setting up calls and channel changing, and that cell phone "registrations" occur "on a dedicated control channel that is clearly separate from that used for call content").

18. *In re Application of United States of American for an Order: (1) Authorizing Installation and Use of Pen Register and Trap and Trace Device; (2) Authorizing Release of Subscriber and Other Information, (3) Authorizing Disclosure of Location–Based Services*, 2006 WL 1876847, *1 n. 1 (N.D.Ind. July 5, 2006) (hereafter the *"Lee ND Ind.2006 Opinion"*).

19. The cell towers measure the strength of the phone's signals—and thus the phone's relative location—through a Time Difference of Arrival ("TDOA") or Angle of Arrival ("AOA") method. TDOA compares the amounts of travel time from phone to tower, while AOA measures the angles at which the phone's signals are received. The MTSO sends a signal to the cell phone's control channel when it is time to switch to the frequency of a nearer tower. *See id.*

20. Although historic call-specific registration information was at one time important for CSP billings, *e.g.*, roaming charges, with the advent of truly national networks and comprehensive cell phone "plans", it has become increasingly irrelevant to service fees, and its retention now appears related largely to cost-considerations (*i.e.*, inexpensive electronic storage of all data, without differentiation) and industry concerns that CSPs not risk under-compliance with complicated and sometimes ambiguous electronic communications regulations.

CELL/OTD 008396

CELLSITE-19672

information on their subscribers and the cell phones in use.

IV. RELEVANT CONSTITUTIONAL AMENDMENT, STATUTES AND LEGISLATIVE HISTORY

A. *Fourth Amendment, U.S. Const. Amend. IV*

The Fourth Amendment establishes a fundamental protection of our right to privacy.[21] By requiring that the Government's investigation of information in which we hold a reasonable expectation of privacy be conditioned on a showing of probable cause to a detached judicial official, our understanding and implementation of the Fourth Amendment seeks to balance degrees of intrusion on our civil liberties against degrees of promotion of legitimate governmental interests.

For the reasons discussed below, this Court believes that citizens continue to hold a reasonable expectation of privacy in the information the Government seeks regarding their physical movements/locations—even now that such information is routinely produced by their cell phones—and that, therefore, the Government's investigatory search of such information *continues* to be protected by the Fourth Amendment's warrant requirement; *i.e.*, the Government must meet a probable cause background standard.[22]

B. *Wiretap and Electronic Communications Interception and Interception of Oral Communications, 18 U.S.C. § 2510 et seq.*

Eighty (80) years ago, Justice Taft, writing for the majority over Justice Brandeis in dissent, concluded that a search or seizure of telephone conversations implicated no Fourth Amendment concerns because there could be no reasonable expectation of privacy in your voice projected over a wire outside of a building. *Olmstead v. United States,* 277 U.S. 438, 48 S.Ct. 564, 72 L.Ed. 944 (1928). Congress responded to this interpretation with passage of the Communications Act in 1934, 47 U.S.C. § 605, which made wiretapping illegal, and which the Supreme Court confirmed to preclude wiretapping by law enforcement in *Nardone v. United States,* 302 U.S. 379, 384, 58 S.Ct. 275, 82 L.Ed. 314 (1937).

In 1967 the Supreme Court delineated the procedural safeguards imposed by the Fourth Amendment on traditional wiretapping. *Expressly because of the particular dangers of abusing electronic surveillance,* the Court required that law enforcement agents had to surmount several requirements *beyond* those of the probable cause warrant needed to search a home. *See Katz v. United States,* 389 U.S. 347, 88 S.Ct. 507, 19 L.Ed.2d 576 (1967); *Berger v. New York,* 388 U.S. 41, 87 S.Ct. 1873, 18

21. The Fourth Amendment's protection of privacy rights also serves the important function of protecting associational rights recognized under the First Amendment. *See Katz v. United States,* 389 U.S. 347, 88 S.Ct. 507, 19 L.Ed.2d 576 (1967) (noting that Fourth Amendment concerns are heightened where associational interests are also at stake).

22. *See* discussion *infra* (noting that law enforcement agents have, until relatively recently, obtained Court authorization to obtain movement/location information by a showing of probable cause (or more), generally under Fed.R.Crim.P. 41 (for installation of a traditional tracking device) but sometimes under Title III (as part of a wiretapping application)). *See also Orenstein EDNY Oct. 2005 Opinion,* 396 F.Supp.2d at 322 ("I view the plain language of Rule 41 as providing a default mode of analysis that governs any matter in which the government seeks judicial authorization to engage in certain investigative activities. The Rule says as much." Concluding that "the statutes upon which the government relies to secure the requested relief do not suffice to negate the otherwise default requirement of probable cause imposed by Rule 41(d)(1)").

CELL/OTD 008397

CELLSITE-19673

L.Ed.2d 1040 (1967). Congress then incorporated those procedural hurdles into the Wiretap Act passed the following year. *See* Omnibus Crime Control and Safe Streets Act of 1968, Pub.L. No. 90–351, Title III (codified as amended at 18 U.S.C. §§ 2510–2522) (hereafter "Title III").

Currently, under 18 U.S.C. § 2518, the Government may obtain a wiretap, and listen in on calls to and from a target telephone, only by demonstrating to a District Judge that (a) there is probable cause for belief that an individual has committed/is committing/will commit a specified offense; (b) there is probable cause for belief that particular communications concerning the offense will be obtained; (c) normal investigative procedures have been tried and failed or are reasonably unlikely to succeed or be too dangerous; (d) there is probable cause for belief that the facilities from which, or place where, the communications to be intercepted are/will be used, in connection with commission of the offense, are leased/listed to/commonly used by such person.[23]

With this historical background in mind, other legislation implicated by the issue *sub judice* includes:

C. *Fed.R.Crim.P. 41—Warrant Issuing Upon Probable Cause*

Rule 41 of the Federal Rules of Criminal Procedure generally provides that the Government may secure a warrant upon a showing, consistent with the requirements of the Fourth Amendment, that there is probable cause. This is the standard which the Government has long been required to meet in order to obtain Court approval for the installation and use—by law enforcement agents—of a device enabling the Government to record, or "track", the movement of a person or thing.[24]

Rule 41, as amended by the Supreme Court in 2006, expressly provides Court authority to issue a warrant for the installation and use of a tracking device (as defined in 18 U.S.C. § 3117)[25] for a renewable period not to exceed 45 days. The Rule also contains express provisions requiring notice within ten (10) days from the end of the warrant period (although it may be delayed) and the suppression of information wrongfully obtained.

As reflected in the Judicial Conference Advisory Committee's Notes to the 2006 Amendments, those amendments were in-

23. Given the additional requirements beyond ordinary search warrants, this has been referred to as both a "Title III warrant" and/or a "super warrant". *See* Orin S. Kerr, *Internet Surveillance Law After the USA PATRIOT Act*, 97 NW. U.L.Rev. 607, 630 (Winter 2003).

The Courts appear to disagree as to whether the Government may request and receive CSLI when it meets the "probable cause plus" showing. *Compare, e.g., Adelman ED Wis.2006 Opinion*, 2006 WL 2871743, *4 *with Smith SD Tex.2005 Opinion*, 396 F.Supp.2d at 758.

24. *See, e.g., United States v. Karo*, 468 U.S. 705, 720, 104 S.Ct. 3296, 82 L.Ed.2d 530 (1984) (holding that use of a warrantless beeper to monitor location into private residence violates the Fourth Amendment). *Cf. also* Notes to the 1977 Amendments (noting that the trend of Supreme Court cases was to give greater priority to the use of warrants as the proper way of making a lawful search); *id.* (observing that "[i]t is a cardinal rule that ... law enforcement agents must secure and use a search warrant whenever practicable.... This rule rests upon the desirability of having magistrates rather than police officers determine when searches and seizures are permissible and what limits such be placed upon such activities.") (quoting *Trupiano v. United States*, 334 U.S. 699, 705, 68 S.Ct. 1229, 92 L.Ed. 1663 (1948), quoted with approval in *Chimel v. California*, 395 U.S. 752, 758, 89 S.Ct. 2034, 23 L.Ed.2d 685 (1969)).

25. The Committee was careful to note that it "did not intended by [the 2006] amendment to expand or contract the definition of what might constitute a tracking device." *See* Notes to the 2006 Amendment.

CELL/OTD 008398

CELLSITE-19674

tended to address the use of tracking devices, "which searches [had been] recognized by statute [*i.e.*, § 3117] and by case law [*i.e., United States v. Karo,* 468 U.S. 705, 104 S.Ct. 3296, 82 L.Ed.2d 530 (1984); *United States v. Knotts,* 460 U.S. 276, 103 S.Ct. 1081, 75 L.Ed.2d 55 (1983)]". The Committee further noted that the evidentiary standard applicable to the installation of a § 3117 tracking device was unspecified by "the tracking device statute" (*i.e.*, § 3117), and that the Supreme Court had "reserved ruling on the issue",[26] but that "[w]arrants may be required to monitor tracking devices when they are used to monitor persons or property in areas where there is a reasonable expectation of privacy." *See* discussion *infra* at Section V(C).

D. *Electronic Communications Privacy Act of 1986*

The ECPA, enacted in 1986, was a major overhaul of the Omnibus Crime Control and Safe Streets Act of 1968. Two of its subsections are relevant to consideration of the legal standard required for obtaining a Court Order for movement/location information:

1. *Pen Register Statute*

Historically, a "Pen Register" is a device which records or decodes electronic or other impulses which identify the *telephone numbers* dialed or otherwise transmitted on the telephone line to which such device is attached (*i.e.*, the numbers of *outgoing* calls). A trap and trace device captures the incoming electronic or other impulses which identify the originating number of an instrument or device from which a wire or electric communication was transmitted (*i.e.*, the numbers of *incoming* calls). These devices have been in long and frequent use and are collectively referred to as a "Pen Register" or "Trap and Trace".

Although they had been in use for some time, the standard applicable to the Government's installation of a Trap and Trace was not addressed until 1979, when the Supreme Court concluded that the Fourth Amendment's probable cause protections need not apply. *See Smith v. Maryland,* 442 U.S. 735, 99 S.Ct. 2577, 61 L.Ed.2d 220 (1979) (holding that telephone users have no reasonable expectation of privacy in the telephone numbers they dial to connect a phone call). Congress responded to *Smith* by including procedures and evidentiary standards governing the installation of a Trap and Trace in the provisions of the ECPA in 1986. *See* 18 U.S.C. § 3121 *et seq.*[27]

Although the statute requires that, absent emergency, the Government must obtain a Court Order prior to installing or using a Trap and Trace, it may do so merely upon certification "that the information likely to be obtained is relevant to an ongoing criminal investigation being conducted by that agency." 18 U.S.C. § 3122(b)(2).[28] Such Orders routinely au-

26. *Cf. In the Matter of the Application of the United States of America,* 441 F.Supp.2d 816, 836 n. 3 (S.D.Tex.2006) (hereafter *"Smith SD Tex.2006 Opinion"*) ("The court has not found any case holding that a standard lower than probable cause is acceptable.").

27. The statute as enacted defined a Trap and Trace as a device for capturing "electronic or other impulses which identify the numbers dialed or otherwise transmitted on the telephone line to which such device is attached." As amended by the USA PATRIOT Act of 2001, it now includes "a device or process which records or decodes dialing, routing, addressing, or signaling information." The Federal Communications Commission (the "FCC") has adopted the position, and the Court of Appeals has held, that the term "signaling information" encompasses CSLI. *See United States Telecom. Assoc. v. FCC,* 227 F.3d 450 (D.C.Cir.2000).

28. The Court's ministerial role does not include an independent review of whether the application meets the relevance standard;

CELLSITE-19675

thorize real-time electronic monitoring of telephone call information for a limited duration, typically sixty (60) days. *Id.* at § 3123(c).

2. *Stored Wire and Electronic Communications and Transactional Records Access*

As noted above, the SCA, a 20–year–old criminal-code statute enacted as Title II of the ECPA, *prohibits* electronic communication service providers from disclosing electronically stored, *i.e.*, historic, information to the Government, except as otherwise authorized and with appropriate legal authority.[29] More particularly, under §§ 2703(a) and (b), the disclosure of "content" information expressly requires either a Rule 41 warrant (if it has been in electronic storage with the provider for 180 days or less) or notice to the subscriber/customer together with an administrative subpoena or Court Order (if the content has been in electronic storage with the provider for more than 180 days). In contrast, the disclosure of basic account information[30] requires nothing more than an administrative, grand jury or trial subpoena. § 2703(c)(2).

The statute also provides, in § 2703(c)(1), *Records Concerning Electronic Communication Service or Remote Computing Service,* that the Government may require the release of "records or other information pertaining to a subscriber to or customer of such service (not including the contents of communications)[31] only when the governmental entity":

> (A) obtains a warrant issued [under] the Federal Rules of Criminal Procedure,
>
> (B) obtains a court order [under § 2703(d)],
>
> (C) obtains subscriber/customer consent to disclosure,
>
> (D) submits a written request for name, address, and place of business, relevant to investigation of telemarketing fraud, or
>
> (E) seeks [basic account information] under § 2703(c)(2).

Section 2703(d), in turn, sets forth the "requirements for court order", specifying that an order for disclosure of (1) content records held by the communications provider for more than 180 days or held by a remote computing service, and to be released with notice to the subscriber/customer under subsection (b) *or* (2) "a record or other information pertaining to a subscriber to or customer of such service" under subsection (c), issue "only if the governmental entity offers specific and articulable facts showing that there are reasonable grounds to believe that the contents of a wire or electronic communication, or the records or other information sought, are relevant and material to an ongoing criminal investigation."

Finally, and significantly, the SCA defines "electronic communications" to expressly exclude "any communication from a tracking device (as defined in § 3117)", *i.e.*, "an electronic or mechanical device which permits the tracking of the move-

rather, it is only to review the completeness of the certification submitted. *See Lee ND Ind. 2006 Opinion,* 2006 WL 1876847 at *2.

29. *See* 18 U.S.C. § 2702(a)(3) (prohibiting, except as otherwise provided, a CSP from disclosing any "record or other information pertaining to a subscriber to or customer of such service ... to any governmental entity").

30. This information is specified to include subscriber name; address, telephone connection records/records of session times/durations; length and types of services; telephone or other subscriber number; and means/source of service payment.

31. The statute does not further define "records or other information".

CELL/OTD 0026 01E-19676

ment of a person or object". *Id.* at § 2711, *Definitions* (incorporating 18 U.S.C. § 2510(12)).

E. *Mobile Tracking Device Statute, 18 U.S.C. § 3117 (1986)*

This statute, also enacted in 1986, simply provides that a Court "empowered to issue a warrant or other order for the installation of a mobile tracking device" may issue an Order authorizing its use outside the Court's jurisdiction. It broadly defines a "tracking device" as "an electronic or mechanical device which permits the tracking of the movement of a person or object." § 3117(b). The relevant Senate Report notes that "[t]his [jurisdictional] clarification [did] not effect [*sic*] current legal standards for the issuance of such an order." S. Rep. 99–541 at 10 (1986), *reprinted in* 1986 U.S.C.C.A.N. at pp. 3555, 3588. As noted, *supra* at Section IV(C), the Government has historically been required to meet the probable cause standard for warrants set forth in Fed.R.Crim.P. 41 for Court authorization prior to installing and utilizing a tracking device.

F. *Communications Assistance for Law Enforcement Act of 1994*

(1) *Statutory Provisions*

The Communications Assistance for Law Enforcement Act of 1994 (the "CALEA"), 47 U.S.C. § 1001 *et seq.*, was intended to mandate communications carriers' acquisition and implementation of technology/equipment capable of providing law enforcement with the "wire and electronic communication" information to which it was entitled under the statutes relating to electronic communication technology. The Act required telecommunications carriers to ensure, within four (4) years from enactment (*i.e.*, by October 25,1998), that they had the ability to provide—subject to "court order or other lawful authorization"—law enforcement agencies with:

> access to call-identifying information that is reasonably available to the carrier—(A) before, during, or immediately after the transmission of a wire or electronic communication (or at such later time as may be acceptable to the government); and (B) in a manner that allows it to be associated with the communication to which it pertains, except that, with regard to information acquired solely pursuant to the authority for pen registers and trap and trace devices (as defined in [§ 3127]), such call-identifying information shall not include any information that may disclose the physical location of the subscriber (except to the extent that the location may be determined from the telephone number).

Id. at 1002(a)(2).

The statute defines "call-identifying information" to include "dialing or signaling information that identifies the origin, direction, destination, or termination of each communication generated or received by a subscriber by means of any equipment, facility, or service of a telecommunications carrier." § 1001(2).

The CALEA, as does the SCA, expressly defines out of the "electronic communications" covered by the Act, information from a "tracking device" under § 3117. *See* § 1001(1) (adopting definitions of 18 U.S.C. § 2510).

(2) *Legislative History and Implementation*

The express purpose of the CALEA was to require communications service providers to acquire/implement technology to isolate and provide—on appropriate lawful authority—intercepted "content and call-identifying information" to law enforcement. *See* H.R.Rep. 103–827(I), *reprinted in* 1994 U.S.C.C.A.N. at pp. 3489, 3489–

CELLSITE-19677

90.[32] Passage and implementation of the CALEA entailed several years of extensive negotiations. The extent to which Government's investigatory access to movement/location information would be implicated/affected by a requirement that it be identified/retained/provided with appropriate authority was the subject of much testimony and debate. It was clear, however, that Congress was extremely concerned that the background requirements be preserved, and that its legislation not be later asserted to have affected the judicial review protections applicable to this constitutionally-sensitive information.

More particularly, the legislative history of the CALEA indicates that, during his lengthy and repeated testimony before the Senate and House, then-FBI-Director Louis Freeh addressed Congress' concern that with advances in cell phone technology, law enforcement could obtain—by CSLI—information of an individual's physical movement previously obtainable only through visual surveillance or the covert installation of a radio-wave transmitter. During the course of his testimony, Director Freeh reassured Congress that law enforcement was not attempting to obtain via the 1994 enactments, or to otherwise alter the standards applicable to, movement/location information. To the contrary, he asserted, the proposed legislation would "ensure[ ] the maintenance of the status quo", that it "[did] not enlarge or reduce the government's authority," and that it "*relate[d] solely to advanced technology, not legal authority or privacy*".[33]

Director Freeh's testimony included the following:

> The term "call setup information" is essentially the dialing information associated with any communication which identifies the origin and destination of a wire or electronic communication obtained through the use of a pen register or trap and trace device pursuant to court order. It does not include any information which might disclose the general location of a mobile facility or service, beyond that associated with the area code or exchange of the facility or service. There is no intent whatsoever, with reference to this term, to acquire anything that could properly be called 'tracking' information.

Id. at 23. Director Freeh also stated, in allaying Congressional concerns:

> Law enforcement's ... ability to acquire "call setup information" ... related to dialing type information—information generated by a caller which identifies the origin, duration, and destination of a

32. *See also McGiverin PR 2007 Opinion*, 497 F.Supp.2d 301 (explaining that CALEA was passed to "*preserve* the government's ability, pursuant to court order or other lawful authorization, to intercept communications [in the face of] advanced technologies such as digital or wireless transmission modes ... while protecting the privacy of communications and without impeding the introduction of new technologies, features, and services") (emphasis added); *United States Telecom Assoc. v. FCC*, 227 F.3d 450, 454 (D.C.Cir.2000) (citing FBI's 1994 Congressional testimony that it was "precluded ... from implementing authorized electronic surveillance" by "technological impediments" such as "the limited capacity of cellular systems to accommodate large numbers of simultaneous intercepts [and] growing use of custom calling features such as call forwarding, call waiting, and speed dialing").

33. Joint Hearing on Digital Telephony and Law Enforcement Access to Advanced Telecommunications Technologies and Services: Hearings Before the Subcomm. On Technology and Law of the Senate Judiciary Comm. And the Subcomm. On Civil and Constitutional Rights of the House Judiciary Comm., 103rd Cong., 2d Sess., at 2, 28 (Statement of Dir. Freeh) (hereafter "Digital Telephony Testimony") (emphasis added); *id.* at 22 (stating that the CALEA "provide[s] law enforcement no more and no less access to information than it had in the past").

CELL/OTD 00840
CELLSITE-19678

wire or electronic communication, the telephone number or similar communication address. Such information ... historically, has been acquired through use of pen register or trap and trace devices pursuant to court order.

Several privacy-based spokespersons have criticized the wording of the definition regarding this long-standing requirement, alleging that the government is seeking a new, pervasive, automated "tracking" capability. Such allegations are completely wrong.

Some cellular carriers do acquire information relating to the general location of a cellular telephone for call distribution analysis purposes. However, this information is not the specific type of information obtained from 'true' tracking devices, which can require a warrant or court order when used to track within a private location not open to public view. *See United States v. Karo*, 468 U.S. 705, 714, 104 S.Ct. 3296, 82 L.Ed.2d 530 (1984).[34] Even when such generalized location information, or any other type of 'transactional' information, is obtained from communications service providers, court orders or subpoenas are required and are obtained.

In order to make clear that the acquisition of such information is not being sought through the use of pen register or trap and trace devices, and is not included within the term 'call setup information', we are prepared to add a concluding phrase to this definition to explicitly clarify the point: *except that such information (call setup information) shall not include any information that may disclose the physical location of a mobile facility or service beyond that associated with the number's area code or exchange.*

Id. at 29 (emphasis added).[35]

Finally, Director Freeh represented, in response to a letter alleging that the Government was seeking to obtain surveillance of individuals through transactional data:

> This is a false issue for a number of reasons.
>
> First, as is clearly set forth in the 'purpose' section of the proposed legislation, the intent of the legislation is to maintain existing technical capabilities and to 'clarify and define' the responsibility of common carriers ... to provide the assistance required to ensure that government agencies can implement court orders and lawful authorizations to intercept the content of wire and electronic communications and acquire call setup information.... [It has] nothing to do with 'transactional information' under our federal electronic surveillance and privacy laws. All telecommunications 'transactional' information is already protected by federal law and is exclusively dealt with in [the SCA]. The proposed legislation does not relate to [the SCA].

Id. at 27 (quoted in *Smith SD Tex.2005 Opinion*, 396 F.Supp.2d at 763).

Following passage of the CALEA, and in accordance with Congressional direction, the Telecommunications Industry Association ("TIA") began the long process of the "development of the specific technological standards" by which industry could comply with its law-enforcement-assistance obligations. This entailed several years of negotiations and consultations amongst industry, law enforcement and consumer

34. *Cf. Facciola DDC 2006 Opinion*, 407 F.Supp.2d at 139 (explaining that a "true" tracking device was traditionally, and as in *Karo*, a radio-wave transmitter "affixed to a car that permitted its movements to be monitored").

35. *Cf. id.* at 137 (noting that "[t]he Director's offer and its acceptance by Congress led to the exception codified as 47 U.S.C. § 1002(a)(2)").

CELLSITE-19679

representatives "under the auspices of" the FCC. *Smith SD Tex.2006 Opinion*, 441 F.Supp.2d at 820; *see also* 47 U.S.C. § 1006.

In 1999, the FCC issued a ruling on the TIA's proposed technical specifications and protocols (which were published as the Interim Standard/Trial Use Standard J–STD–025 or the "J–Standard").[36] Six aspects of the FCC ruling were challenged and consolidated for judicial review. *See United States Telecom Assoc. v. FCC*, 227 F.3d 450 (D.C.Cir.2000). The Court of Appeals held that the agency had "acted arbitrarily and capriciously" and/or "failed to engage in reasoned decisionmaking" as to five of its interpretations of the CALEA, but that it could require CSPs to have available CSLI as "call-identifying information" under the Act. *Id.*

G. *Enhanced 911 Rules*

As individuals' use of cellular (rather than land-line) telephones rapidly expanded during the 1990s, it presented increasing difficulties for emergency service providers who had previously determined a caller's location from the account address of her stationary telephone. Beginning in 1996, and continuing over several years, the FCC issued a series of "Enhanced 911 Emergency Call Systems" rules requiring CSPs to acquire the ability to identify more precisely the locations of cell phones making emergency calls.[37]

H. *Wireless Communication and Public Safety Act of 1999*

In this legislation, amending the Telecommunications Act and authorizing a nationwide "911" emergency service for cell phone users, Congress recognized the importance of an individual's expectation of privacy in her physical location. *See* PL 106–81, 113 Stat. 1288 (Oct. 26, 1999) (amending 47 U.S.C. §§ 222, 251). More particularly, in authorizing the specifically-limited disclosure of location information to ensure the provision of emergency services, the Act directs that a customer otherwise not be deemed to have approved use/disclosure of, or access to, her CSLI absent express prior authorization. *See* 47 U.S.C. § 222(f).[38]

36. *See In the Matter of the CALEA*, 1999 WL 674884, 14 F.C.C.R. 16794 (1999). Although it modified industry's proposed technical standards in many respects, the FCC rejected some of the assistance capabilities which law enforcement sought to require. For example, the FCC rejected the New York Police Department's proposal that would have "required [CSPs to compile] triangulating signals from multiple cell antenna towers to pinpoint a wireless phone's precise location throughout a call's duration." The FCC acknowledged that providing law enforcement with triangulation capabilities would "pose difficulties that could undermine individual privacy", and concluded that "a more generalized capability that will identify only the location of a cell site, and only at the beginning and termination of the call, will give [law enforcement authorities] adequate information." *See Who Knows Where You've Been?*, 18 Harv. J. Law & Tech. at 313 (quoting 227 F.3d 450, 464 (D.C.Cir.2000)).

37. *See* 47 C.F.R. § 20.18 (2004) (requiring that licensees "achieve 95 percent penetration of location-capable handsets" among subscribers by end 2005); Laurie Thomas Lee, *Can Police Track Your Wireless Calls? Call Location Information and Privacy Law*, 21 Cardozo Arts & Ent. L.J. 381, 384–386 & nn. 23–24 (2003) (discussing CSPs' implementation of "network overlay" technology to attain the required precision).

38. *See Smith SD Tex.2005 Opinion*, 396 F.Supp.2d 747 (concluding, in discussing this legislation, that "location information is a special class of customer information, which can only be used or disclosed in an emergency situation, absent express prior consent by the customer"); *Orenstein EDNY Oct. 2005 Opinion*, 396 F.Supp.2d at 323 (similarly noting Congress' recognition of the "special nature" of location information and concluding that "a cell phone user may very well have an objectively reasonable expectation of privacy in his call location information").

CELLSITE-19686

V. ANALYSIS

Any contention that the Government might obtain cell tower site location information ("CSLI") solely under the auspices of the PRS appears to have been put to bed.[39] In a series of published Orders and Opinions over the past two years, a significant majority of Courts have also rejected the Government's contention that real-time, or prospective, movement/location information may be obtained under a hybrid theory which purports to combine the authorities of the PRS and the SCA by seizing upon the term "solely" in a provision of the CALEA.[40] In so holding, many of

39. *See* CALEA; *In re Application of the United States for an Order Authorizing Pen Register and Trap and Trace Device and Release of Subscriber Information and/or Cell Site Information,* 384 F.Supp.2d 562, 563 (E.D.N.Y. 2005) (hereafter "Orenstein EDNY Aug. 2005 Order") ("The government ... appears to want to put some daylight between a pen register and the instrumentality for seeking cell site location information—notwithstanding the fact that the law plainly authorizes a court to allow the installation of a pen register on the basis of a showing that is far less demanding than the probable cause standard. Its reticence in [seeking to obtain location information through use of a Pen/Trap device] ... is understandable ... [as] Congress appears to have prohibited it from doing so.").

40. *See generally Where Are We?,* 29 Hastings Comm. & Ent. L.J. at 422–24 (summarizing that 11 of the 15 decisions published on cell phone location tracking within prior two years concluded probable cause is required, while four authorized limited prospective information).

Among the decisions denying the Government's requests for CSLI under a hybrid theory are: *In re the Applications of the United States for Orders Authorizing the Disclosure of Cell Cite Information,* 2005 WL 3658531 (D.D.C. Oct.26, 2005) (hereafter *"Robinson Joint Magistrates' DDC 2005 Order"); Facciola DDC 2006 Opinion,* 407 F.Supp.2d 134; *Lee ND Ind.2006 Opinion,* 2006 WL 1876847 (affirming Magistrate Judge's denial of application); *Application of the United States for an Order Authorizing the Installation and Use of a Pen Register and a Caller Identification System on Telephone Numbers (Sealed) and Production of Real Time Cell Site Information,* 402 F.Supp.2d 597 (D.Md.2005); *In re Application of United States for Orders Authorizing Installation and Use of Pen Registers and Caller Identification Devices,* 416 F.Supp.2d 390 (D.Md.2006); *In re Application for an Order Authorizing the Installation and Use of a Pen Register and Directing the Disclosure of Telecomm. Records,* 439 F.Supp.2d 456 (D.Md. 2006); *Orenstein EDNY Aug. 2005 Order,* 384 F.Supp.2d 562, *on reconsideration, Orenstein EDNY Oct. 2005 Opinion,* 396 F.Supp.2d 294; *In re Application of the United States for an Order for Prospective Cell Site Location Information,* 2006 WL 468300 (S.D.N.Y. Feb.28, 2006); *In re United States Application for an Order Authorizing Installation and Use of a Pen Register,* 415 F.Supp.2d 211 (W.D.N.Y. 2006) (hereafter *"Feldman WDNY 2006 Opinion"*); *McGiverin PR 2007 Opinion,* 497 F.Supp.2d 301; *Smith SD Tex 2005 Opinion,* 396 F.Supp.2d 747; *Smith SD Tex.2006 Opinion,* 441 F.Supp.2d 816, 827–37; *Adelman ED Wis.2006 Opinion,* 2006 WL 2871743, *3–4 (affirming Magistrate Judge's denial of application); *In re Application of the United States for an Order Authorizing the Disclosure of Propsective Cell Site Information,* 412 F.Supp.2d 947, 950 (E.D.Wis.2006) (hereafter *"Callahan ED Wis.2006 Opinion"*).

But see In re Application for an Order Authorizing the Extension and Use of a Pen Register Device, 2007 WL 397129 (E.D.Cal. Feb.1, 2007) (granting request for limited prospective CSLI); *In re Application of United States for an Order,* 411 F.Supp.2d 678 (W.D.La. 2006); *In re Application of the United States of America for an Order for Disclosure of Telecommunications Records and Authorizing the Use of a Pen Register and Trap and Trace,* 405 F.Supp.2d 435 (S.D.N.Y.2005) (hereafter *"Gorenstein SDNY 2005 Opinion"*); *In re Application of United States for an Order for Prospective Cell Location Information,* 460 F.Supp.2d 448 (S.D.N.Y.2006); *In re Application of the United States,* 433 F.Supp.2d 804 (S.D.Tex.2006) (hereafter *"Rosenthal SD Tex. 2006 Opinion"*); *In re Application of the United States for an Order (1) Authorizing Installation of a Pen Register and Trap and Trace Device and (2) Authorizing Release of Subscriber and Other Information,* 2007 WL 3036849 (S.D.Tex. Oct.17, 2007) (hereafter *"Rosenthal SD Tex.2007 Opinion"*) (reversing Magistrate Judge Smith's denial of application for historic and prospective CSLI).

CELL/OTD 008405
CELLSITE-19681

these Courts have repeatedly opined that real-time cell-phone-derived movement/location information is "tracking" information within § 3117.[41] Few Courts have, however, addressed in published opinion whether the Government may nonetheless covertly obtain a cell phone subscriber's (or possessor's) past, or historic, movement/location information by the authority of the SCA. Some have suggested or credited (all but twice in *dicta*, and with little substantive discussion), that it may; a few have concluded or suggested that it may not.[42]

41. A District Court's published consideration of the appropriateness of *ex parte* Court Orders mandating a CSP's disclosure to the Government of an individual subscriber's location information on less than a showing of probable cause first appeared in a brief Order by Magistrate Judge Orenstein of the Eastern District of New York in late August, 2005. *See Orenstein EDNY Aug. 2005 Order,* 384 F.Supp.2d at 563 (rejecting out-of-hand the government's asserted reliance on provisions under § 2703(c) and concluding, as matter of apparent first impression, that under "only ... arguably" permissive subsection, § 2703(d), cell phone that produces CSLI revealing general geographic location is "tracking device" under § 3117 and therefore not "the *contents* of an electronic communication" obtainable under the ECPA without probable cause normally required for a warrant) (emphasis added).

Shortly thereafter, Magistrate Judge Smith of the Southern District of Texas issued a thorough Opinion providing an extensive review of the statutory history and concluding that prospective cell site data constitutes "tracking device information" under the ECPA requiring establishment of probable cause. *See Smith SD Tex.2005 Opinion,* 396 F.Supp.2d 747. At the same time, Judge Orenstein had been reviewing his earlier decision and issued a much fuller Opinion which corrected his preliminary misstep. *See Orenstein EDNY Oct. 2005 Opinion* (holding that request for prospective cell site information was effectively one for installation of tracking device, requiring at least probable cause).

Many other Courts adopted, and sometimes expanded upon, these analyses. *See, e.g., Lee ND Ind.2006 Opinion* at *4 (concluding, in affirming Magistrate Judge's denial of applications for historic and prospective CSLI, that "converging the [PRS] with the SCA in an attempt to circumvent the exception in the CALEA is contrary to Congress' intent to protect cell site location information from utilization as a tracking tool absent probable cause under the Fourth Amendment"); *Adelman ED Wis.2006 Opinion* at *5 (concluding that "[i]f the government is granted access to [CSLI], a customer's cell phone will most certainly permit tracking of his movements from place to place"); *McGiverin PR 2007 Opinion,* 497 F.Supp.2d at 310 (concluding that CSLI "does not pertain to an 'electronic communication service' within the ... SCA because it is information from a tracking device") (citing M. Wesley Clark, *Cell Phones as Tracking Devices,* 41 Val. U.L.Rev. 1413, 1473 (2007) ("It would appear clear that on [§ 3117]'s face, a cell phone easily fits within the term 'tracking device'....")). Indeed, Magistrate Judge Smith also expanded on his own analysis the following year in *Smith SD Tex.2006 Opinion,* 441 F.Supp.2d 816.

42. *See, e.g., Callahan ED Wis.2006 Opinion,* 412 F.Supp.2d at 949 (observing, in concluding that request for prospective CSI requires probable cause—in *dicta* and without analysis—that application was "problematic" because it requested prospective rather than "historical information"); *Smith SD Tex.2005 Opinion,* 396 F.Supp.2d at 759, n. 16 (opining in *dicta* that CSPs compilation of tracking communications would bring them "more comfortably" within the scope of the SCA); *Orenstein EDNY Oct. 2005 Opinion,* 396 F.Supp.2d at 303 n. 6 (opining, in *dicta* and without explanation, that § 2703(d) "plainly allows" the Government to seek historical CSLI); *id.* at 307, n. 10 (repeating that "the SCA authorizes a[CSP]'s disclosure to law enforcement of historical cell site information, to the extent it maintains such records", this time with express citation to Magistrate Judge Smith's footnote 16); *Feldman WDNY 2006 Opinion,* 415 F.Supp.2d at 214 (accepting, in *dicta,* Government's interpretation of "the SCA [as] authoriz[ing it] to obtain *historical* [CSLI]") (emphasis in original). *See also infra* (citing *Stearns Mass.2007 Opinion* and *Rosenthal SD Tex.2007 Opinion* as only ones to expressly address and grant pending request for covert disclosure of historic CSLI by authority of § 2703).

Compare Lee ND Ind.2006 Opinion, 2006 WL 1876847 (expressly concluding, in agree-

CELL/OTD 008406

CELLSITE-19682

This Court concurs with those majority opinions holding that real-time CSLI constitutes tracking information and further concludes, after extensive research and careful consideration, that a distinction between real-time ("prospective") and stored ("historic") cell-phone-derived movement/location information would be at odds with (a) the plain language and/or natural meaning of the language of § 3117 and § 2703, (b) the rule of statutory construction requiring that effect be given to each and every provision, and (c) unambiguous Congressional intent. It would also render the related provisions of the electronic communications legislation constitutionally suspect, at best. More particularly, this Court has reached the following understanding of the issues:

A. *The Government's Positions are Precluded by Textual Analysis*

1. *The Stored Wire and Electronic Communications and Transactional Records Access Statutes*

The SCA sets forth a prohibition against a CSP's release to the Government of "records or other information" pertaining to a communications service subscriber, except as otherwise authorized with, *e.g.*, warrant, consent, or court order. *See* 18 U.S.C. §§ 2702(a)(3), 2703(c), *Records Concerning Electronic Communication Service or Remote Computing Service.* In its application *sub judice,* the Government requests a § 2703(d) Order to obtain historic cellular tower site location information ("CSLI"). The Court sees two independently determinative flaws in the Government's election to predicate its request on the SCA, rather than on a probable cause warrant under Fed.R.Crim.P. 41:

(a) *An Electronic Device That Is Able and Used to Provide the Government With Movement/Location Information is a "Tracking Device", Communications From Which are (i) Expressly Excluded from the Definition of "Electronic Communications" Under the SCA and (ii) Not Pertaining to the Subscriber of an Electronic Communications Service Under the SCA*

The scope of the "Stored Wire and Electronic Communications and Transactional Records Access" Act, a subtitle of the "Electronic Communications Privacy Act", is limited to information pertaining to wire or "electronic communications", which are expressly defined to exclude communications from a device "which permits the tracking of the movement of a person or object". On its face, this definition appears to unambiguously place the information sought outside the SCA.[43]

ment with Magistrate Judge's Order, and on applications before it, that Government could acquire *neither* historic nor prospective CSLI by authority of § 2703 and absent probable cause showing under Rule 41); *Robinson Joint Magistrates' DDC 2005 Order,* 2005 WL 3658531 (directing without distinction that all applications for CSLI under either the SCA or the PRS, or both, be returned to the government). *Cf. McGiverin PR 2007 Opinion,* 497 F.Supp.2d at 303 (characterizing prospective nature of request for cell site information as "[i]mportant" without elucidation); *but see id.* at 310 ("The SCA's trail of definitions leads, inescapably in my judgment, to the conclusion that the discloseable information under the statute does not include location information."). *Cf. also In re Applications of the United. States for Orders Pursuant to § 2703(d) to Disclose Subscriber Information and Historic Cell Site Information,* 509 F.Supp.2d 64, 66 (D.Mass.2007) (Alexander, M.J.) (hereafter *"Alexander Mass.2007 Opinion"*) (holding that disclosure of historic CSLI is subject to probable cause standard of Rule 41), *rev'd,* 509 F.Supp.2d 76 (D.Mass. 2007) (hereafter *"Stearns Mass.2007 Opinion"*).

43. *Cf. Steve Jackson Games, Inc. v. United States Secret Service,* 36 F.3d 457, 461 (5th Cir.1994) ("Understanding the [ECPA] requires understanding and applying its many technical terms as defined by the Act, as well as engaging in painstaking, methodical analy-

CELLSITE-19683

As technology now stands (and it will no doubt continue to rapidly evolve), triangulation of CSLI enables a covert observer to know our physical movements/locations within 50 feet; and our cell phones, whenever on, broadcast this information virtually continuously as we go about from place to place. Even without triangulation, our cell phones transmit—and our CSPs record—information of our movements to a few hundred feet. It is, therefore, extremely difficult to see how a cell phone is not now *precisely* an "electronic ... device which permits the tracking of the movement of a person or object." § 3117(b).[44]

By virtue of cell phone technology, law enforcement may now electronically monitor our movements with as much—indeed, ofttimes more—scope and precision as by its traditional methods of visual surveillance and/or installation of a "beeper". As other Courts have observed, tracking device and cell phone technologies have *converged.* That is, our cell phones—when utilized to record our physical movements—operate in the same manner and to the same purpose as earlier radio-wave beepers.[45] This Court concurs, therefore, with the several thorough and thoughtful opinions to have reviewed the statutory language and reached this same conclusion.

With those Courts that have opined (or assumed) that the Government may none-

sis.") (quoted with approval in *Smith SD Tex. 2005 Opinion,* 396 F.Supp.2d at 753 (concluding that "rigorous attention must be paid to statutory definitions")).

44. The Court notes, moreover, as others have pointedly and repeatedly observed, that the sweeping definition of § 3117 does not rely on a particular degree of precision. *See, e.g., Smith SD Tex.2005 Opinion,* 396 F.Supp.2d at 753 (rejecting as "unpersuasive" argument that CSLI is not "information from a tracking device" because it does not provide "detailed" location information); *Smith SD Tex. 2006 Opinion,* 441 F.Supp.2d at 836–37 (concluding that limitations placed on subsequent request for CSLI did not alter prior conclusions); *id.* at 828 n. 28 (collecting cases rejecting narrowed requests); *McGiverin PR 2007 Opinion,* 497 F.Supp.2d at 310 (noting courts' acknowledgment that § 3117 is "striking in its breadth"); *Feldman WDNY 2006 Opinion,* 415 F.Supp.2d at 219 ("There is nothing in the legislative history of the CALEA to suggest that the exception clause [for location information] was intended by Congress to create some sort of sliding scale ..., with the evidentiary standard for disclosure hinging on the type or duration of ... signaling information sought."); *Orenstein EDNY Oct. 2005 Opinion,* 396 F.Supp.2d at 310–11 (concluding that application for limited CSLI did not affect applicability of § 3117, which "does not distinguish between general vicinity tracking and detailed location tracking"); *Callahan ED Wis.2006 Opinion,* 412 F.Supp.2d at 957 ("[E]ven such less precise location information was included in the 'tracking information' about which Congress was concerned"); *Adelman ED Wis.2006 Opinion,* 2006 WL 2871743 at *3 n. 2 (affirming Magistrate Judge's denial despite limitation of CSLI sought to J–Standard information).

Cf. Smith SD Tex.2006, 441 F.Supp.2d at 828, n. 27 (noting that "[one law enforcement agent had] candidly conceded that [the] strategy [of requesting more limited CSLI] is guided not so much by legal principle as by a desire to placate recalcitrant magistrate judges") (citing *Feldman WDNY 2006 Opinion*).

45. *See, e.g., Smith SD Tex.2005 Opinion,* 396 F.Supp.2d at 751 (summarizing that "a cell phone is (among other things) a radio transmitter that automatically announces its presence ... via a radio signal over a control channel" and by which "law enforcement is able to track the movements of the target phone"); *id.* at 754 (recounting law enforcement's "pinging" (calling without allowing to ring) suspect's cell phone and using location information to re-establish visual surveillance); *id.* at 755 (noting as only difference that cell phone is on person instead of attached to vehicle); *id.* (observing that by adopting broad language "Congress may simply have been anticipating future advances in tracking technology [which have] indeed come to pass").

CELL/OTD 008408
CELLSITE-19684

theless acquire historic cell-phone-derived movement/location information by a § 2703(d) Order, we must, however, respectfully disagree. The Court finds two possible explanations for this largely-unexplained distinction between prospective and historic CSLI: (i) that stored CSLI is somehow no longer information from a tracking device excluded by § 3117 (or perhaps that, unlike real-time CSLI, it should not be regarded as such because its disclosure is somehow less intrusive or otherwise less entitled to protection); or (ii) that stored CSLI remains outside the Act's definition of an "electronic communication" but is nonetheless within the scope of § 2703(c) because it is information that pertains to a subscriber of an electronic communication (*i.e.*, cell phone) service.

(i) Historic CSLI Properly Remains Information from a Tracking Device, Excluded from the Definition of an "Electronic Communication"

The first explanation is tantamount to an assertion that the *mere storage* of what appears indisputably to be information from a tracking device when garnered, alters its character. No such archival alchemy is possible. The frequent and specific information of our physical movements now transmitted by our cell phones is, necessarily, *and remains,* information from a device that permits the tracking of movement. The source of information does not change when it is stored. Communication from a "tracking device", whether released to law enforcement instantaneously or with some interval of delay, is communication from a "tracking device".[46]

Not only would acceptance of a contention that stored, or past, movement/location information is no longer "communication from a tracking device" fail to correspond to normal usage,[47] it would render the SCA's express exclusion of such information superfluous. More particularly, the SCA's scope is expressly limited to "stored" communications, *i.e. only* past data,[48] and yet it also defines the stored electronic communications within its scope to exclude communications from a tracking device. An interpretation of "information from a tracking device" as *not* encompassing such information once stored would effectively *read out* this express limitation on what may constitute an "electronic communication" for purposes of the Act.[49]

46. Some of the language of Magistrate Judge Smith's 2005 decision suggests that he attached significance to the real-time nature of the CSLI being sought in that case. *See, e.g., Smith SD Tex.2005 Opinion,* 396 F.Supp.2d at 759. As discussed *infra,* this Court believes that this interpretation fails to give appropriate scope to the language of the statutory exception.

47. In the normal contemplation of the language, evidence of past movement is precisely "tracking" information. Location is static; movement is change in location. There is, thus, a temporal element inherent in the term "movement"; one can *only* "track" location over time. *See Smith SD Tex.2005 Opinion,* 396 F.Supp.2d at 756 (explaining that CSLI "allows continuous tracking of actual movement, *i.e.*, change of location over time"). There is no reason to believe that this does not include *past* time. To the contrary, one can *only* "track" movement (*i.e.*, changes in location) that has happened *in the past.* Indeed, the apparent origin of the term "track" derives from looking at the physical manifestations of the prior presence of the subject being tracked to reconstruct or trace a course of movement. Conceptually, then, tracking means looking at evidence of past presence, *i.e.*, it is necessarily backward-looking.

48. *See, e.g., McGiverin PR 2007 Opinion,* 497 F.Supp.2d at 309 (noting that SCA contemplates orders for stored information and therefore lacks provisions typical of prospective surveillance statutes, such as time limits, provisions for renewal, or automatic sealing of records).

49. *See Cooper Inds., Inc. v. Aviall Servs., Inc.,* 543 U.S. 157, 158, 125 S.Ct. 577, 160 L.Ed.2d 548 (2004) (repeating settled rule that Court

CELL/OTD 008409 CELLSITE-19685

(ii) Information Expressly Excluded from the ECPA (including the SCA) as Outside the Scope of the Term "Electronic Communication" Cannot Reasonably Be Re-Included as "Pertaining to" a Subscriber or Her Electronic Communication Service

CSLI, as communication from an electronic device that permits the tracking of an individual's movements/locations, is information of a nature expressly set aside by definition. To then say that stored information from a tracking device nonetheless comes directly back—as a record pertaining to an electronic communication service—[50] into the scope of the SCA, a statute that carefully exempts tracking-device communications from its definition of "electronic communication", would abrogate that express limitation. As the principal subject of this legislation was to describe the information encompassed and delineate certain procedures regarding its disclosure to law enforcement, there could be no possible purpose to the "tracking device" exclusion other than to limit the disclosure of stored information derived such devices.

This Court sees, therefore, no way to reconcile the express exclusion of tracking device information with the remainder of the statutory language but to read the provision of § 2703(c) to authorize disclosure of records and other information *directly* pertaining to a subscriber/customer of an electronic communication service. That is, information that is regarding or derived under a service (*e.g.*, a tracking capability/function) that may be used to facilitate the provision of an electronic communication service (*e.g.*, the transmission of voice/text material),[51] but that is not *itself* an electronic communication service (as, *e.g.*, by definition), does not "pertain" to the subscriber of an electronic communications service within the meaning of the statute.[52]

must, if possible, "construe statute to give every word operative effect").

Because the SCA carefully sets apart tracking device information from its legislation of stored information, it appears to acknowledge that the passage of time does not alter the constitutionally-sensitive character of such information. *Cf. Alexander Mass.2007 Opinion, rev'd Stearns Mass.2007 Opinion,* 509 F.Supp.2d at 74 ("[T]he same Fourth Amendment concerns that drive the necessity for a probable cause showing before authorization of a prospective tracking device apply equally to a 'historical' tracking device."); *id.* (observing that the "central inquiry" turns on the reasonable expectation of privacy under *Katz*).

50. The SCA's coverage of records or other information under § 2703(c)—if not otherwise excluded—turns on whether the information "pertains to" the subscriber of a covered communications service *in her capacity as such.* This interpretation is consistent with the heading of § 2703(c) and Magistrate Judge Smith's conclusion that, based upon the legislative history, "[t]he records to be disclosed must pertain to the subscriber's *use* of the provider's electronic communication service". *Smith SD Tex.2005 Opinion,* 396 F.Supp.2d at 758 (emphasis added) (quoting S.Rep. No. 99-541 at 38, 1986 U.S.C.C.A.N. at pp. 3555, 3592).

51. *See* 18 U.S.C. § 2510(15) (defining an electronic communications service as one that "provides to users thereof the ability to send or receive wire or electronic communications").

52. Magistrate Judge McGivèrin of the District Court for the District of Puerto Rico has recently taken a similar path to a similar conclusion, to wit: Because CSLI derived from the control channel transmissions of a cell phone permits determination of the phone's location over time (i.e., tracking of its movement), the acquisition/collection of such information uses the cell phone (or its control channel subsystem) as a tracking device. Thus these (separate/separable) control channel communications do not constitute "electronic communications", and the systems for transmitting and receiving them do not constitute electronic communications service. *See McGiverin PR 2007 Opinion,* 497 F.Supp.2d at 310-11 (agreeing with cited au-

CELL/OTD 008410 CELLSITE-19686

To put this another way: Although some Courts have opined or suggested (again, almost always in *dicta*) that the registration, or subsequent storage, of CSLI pertains to a subscriber's electronic communications service because it is used to facilitate the provision of that service, or because the CSPs compile it,[53] this

thorities that "when a cell phone is used to determine a person's location it falls within the meaning of a tracking device under the plain language of" § 3117, thus "cell site information cannot constitute an 'electronic communication' " and such information therefore "does not pertain to an 'electronic communication service' within the meaning of the SCA"); *id.* at 310 (concluding that "the SCA's trail of definitions leads, inescapably in my judgment, to the conclusion that the discloseable information under the statute does not include location information").

Also similarly, Magistrate Judge Smith has syllogized that

> a communication from a tracking device, such as [CSLI], is neither an electronic nor a wire communication under the ECPA, and so it does not fall within the range of covered services provided by an 'electronic service provider'. And since a subscriber does not use the phone to track his own movements in real time, prospective [CSLI] appears to be unrelated to any *customer* (as opposed to law enforcement) use of the provider's services. Thus, painstaking and methodical analysis of the SCA's technical terms offers no support for treating prospective [CSLI] as a transactional record under § 2703(c)(1).

Smith SD Tex.2005 Opinion, 396 F.Supp.2d at 759. Magistrate Judge Smith went on to opine in a footnote, rather surprisingly, that "[b]y contrast, historical [CSLI] more comfortably fits within the category of transactional records ... [because CSPs] might legitimately compile such data for customized marketing and billing purposes." *Id.* at n. 16. It is unclear to this Court how compilation for the provider's purposes would bring otherwise excluded tracking communications within the *customer's use* standard so carefully delineated in Magistrate Judge Smith's thoughtful opinion. The Court also notes that, more recently, Magistrate Judge Smith—in granting portions of the Government's applications for various electronic communications information under the PRS and SCA—denied requests for historic and prospective CSLI. *Cf. Rosenthal SD Tex 2007 Opinion*, 2007 WL 3036849, *1 (reversing as to both).

53. *See Smith SD Tex.2005 Opinion, supra* n. 54. *See also Stearns Mass 2007 Opinion*, 509 F.Supp.2d 76 (concluding that historical cell site information is a record or other information pertaining to a customer, as it contains data specific to the handling of a customer's call). This succinct Opinion is, to this Court's knowledge, one of only two published Opinions to hold, in deciding a presented question, that covert disclosure of historic CSLI *may* be made to the Government under § 2703 on a showing of less than probable cause. *Id.* at 79, n. 5 ("Although no published opinion has directly addressed the issue, a number of courts have assumed or implied in *dicta* that the disclosure of historical date is proper under the SCA's specific and articulable facts standard."). *But see Lee ND Ind.2006 Opinion*, 2006 WL 1876847 at *1 (expressly concluding, in affirming Magistrate Judge, that Government's separate applications for historic and prospective CSLI each requested information "unobtainable absent a warrant").

In reversing Magistrate Judge Alexander's denial of the Government's applications for the release of historic CSLI under the SCA, Judge Stearns did not analyze whether a cell phone constitutes a tracking device when used to transmit location information, or whether such information pertains to a service covered under the SCA. Instead, he apparently considered this statutory analysis to be a mere "analogy", with which he disagreed because:

(1) He concluded that excluding CSLI from the "records and other information" obtainable under 2703(d) would leave nothing subject to that subsection's intermediate standard, as all other non-content information might be obtained under the less stringent requirements for a subpoena under 2703(c)(2). *See* 509 F.Supp.2d at 80 n. 8. This disregards that call-identifying information—*i.e.*, the incoming and outgoing phone numbers traditionally obtained through a Trap and Trace—constitutes information pertaining to a cell phone subscriber that is *not* obtainable by subpoena under § 2703(c)(2); and

(2) He observed that "nothing in the 18 U.S.C. § 3117(b) definition of a mobile tracking device places a limitation on the 'records

CELLSITE-19687

Court must strongly disagree. To the contrary, and even if a reading of § 2703(c) as re-including CSLI did not raise application-based concerns,[54] it is

or other information' obtainable pursuant to a section 2703(d) order." *Id.* This observation merely begs the question. If § 2703(c) limits disclosure to information pertaining to a service covered under the SCA (*e.g.*, electronic communication), and the Act's definitions place communications from a tracking device as defined in § 3117 outside the scope of "electronic communications", then the limitation against disclosure of tracking information follows (as set forth above) despite the absence of a reference to § 2703 in the text of § 3117. (Judge Stearns also noted that he was unpersuaded "of the relevance of" § 3117 to the issue, since that statute "governs the 'installation of tracking devices'." *Id.* at 81 n. 11. This overlooks the SCA's express definitional incorporation of § 3117.)

Finally, Judge Stearns held that disclosure of historic CSLI would implicate no Fourth Amendment concerns because:

(1) "historic information that ... reveal[s] where a subject of interest [was] in the past ... will not ... tell the government anything about the subject's [present or future locations]." *Id.* at 81. To the contrary, where we have been provides a *great deal of information* not only as to our previous movements/locations but as to our on-going activities and associations, *i.e.*, our current and prospective movements/locations. Indeed, the Government requests it for these reasons. Moreover, the privacy and associational interests implicated are the same. Some degree of delay in the secretive disclosure to law enforcement does not diminish—certainly not meaningfully—the degree of intrusion/infringement on our civil rights.

(2)"even if an order requiring the disclosure of prospective cell site information allowed the government to 'track' a suspect ... into a protected area like a home" no "reasonable Fourth Amendment expectation of privacy [would] be compromised" because "the most [it] might reveal is that [the possessor] might be found in the home" and "[t]here is nothing ... about that disclosure that is any more incriminating or revealing than what could be gleaned from activation of a pen register or from physical surveillance." *Compare* CALEA (expressly prohibiting disclosure of location information via Trap and Trace); *Karo*, 468 U.S. at 716, 104 S.Ct. 3296 (rejecting "Government's contention that it should be completely free from the constraints of the Fourth Amendment to determine by means of an electronic device, without a warrant and without probable cause or reasonable suspicion, whether ... a person ... is in an individual's home at a particular time"); *infra* at Section V(C) (addressing Fourth Amendment considerations). *Cf. Warshak, supra*, (noting that our privacy interests go beyond not wanting to be incriminated).

See also Rosenthal SD Tex.2007 Opinion, 2007 WL 3036849 (concluding, with citation to Judge Stearns, that the Government could require covert disclosure by the CSP of *both* historic and prospective CSLI by application under the SCA and under a hybrid theory, respectively). In this Opinion, the only other published Opinion to order disclosure of historic CSLI under the § 2703(d) standard, Judge Rosenthal recently reversed Magistrate Judge Smith's denial of applications for historic and prospective CSLI, holding that (i) both were "records" within § 2703(c)(1); and that (ii) essentially real-time information could be produced under the hybrid theory so long as it was communicated through the CSP and not directly to the Government. *Id.* at *4–6. This Opinion, which was contrary to the weight of authority in several respects, acknowledged, but did not analytically refute, other Court's "tracking device" concerns, except to suggest that its approval of applications for *limited* CSLI "minimiz[ed] the concern that a cell phone could be used as a kind of 'tracking device'." *Id.* at *3–5. *See also Rosenthal SD Tex.2007 Opinion* at *6 (noting, in closing, that any speculation about improper use would be premature). *Compare Where Are We?*, Hastings Comm. & Ent. L.J. at 433, n. 65 (noting that, "without judicial oversight, it becomes rather difficult to ascertain whether the reality of [electronic communications] surveillance suggests abuse").

54. If § 2703(c) were read to require, with appropriate legal authority, the disclosure of communication from a tracking device "pertaining" to a covered service, the inclusion of records of cell-phone-derived movement/location information would remain far from clear. The subscriber, for her part, is expending her monthly funds for the electronic communication of content (*e.g.*, voice or text), not to

CELL/OTD 008412

CELLSITE-19688

necessary—for reasons of statutory and Constitutional interpretation—to read § 2703(c)'s authorization for disclosure of records or information pertaining to a subscriber of an electronic communication service to exclude any movement/location information derived from her cell phone, even if incident thereto. If the excluded tracking information were brought back in, Congress' exclusion of tracking device communications from the definition of "electronic communication" would be a pointless gesture, with no actual effect. It is apparent to this Court that Congress intended by the exclusion of tracking devices in the statutory definition that the SCA not become a vehicle for diminishing the long-recognized protections against covert disclosure of movement/location information; and it behooves the Court to interpret the SCA in a manner that gives effect to that intent.

For these reasons, this Court concludes that CSLI is communication from an electronic device that permits the tracking of the movement of a person, is therefore expressly placed outside the scope of the electronic communications legislation of the SCA, and is not appropriately brought back into the scope of information which the Government may seek to obtain thereunder by any reasonable reading of § 2703(c).[55]

record her physical/geographic movements. The CSP, for its part, utilizes some portion of the automatically-registered CSLI to complete the subscriber's calls. Much of that seven-second information, however, becomes irrelevant; and the historic record showing her changes in location over time does *not* pertain, even indirectly, to her cell phone service. Questions might also remain regarding the extent to which even specific-call-facilitating CSLI is stored information pertaining to the subscriber's cell phone service when retention of that information is now principally—if not exclusively—to ensure the CSP's compliance with legislative mandates.

(b) ***Even if Cell–Phone–Derived Location Information Were Within Its Scope, The SCA Neither Establishes An Entitlement to Movement/Location Information Under a Reasonable Relevance Standard Nor Otherwise Abrogates Otherwise Applicable Standards***

Even if the movement/location information now derivable from our cell phones, *i.e.*, CSLI, were interpreted to be something other than information communicated from an electronic device "which permits the tracking of the movement of a person", and/or even if it were interpreted to be re-included in the scope of the SCA as information pertaining to a subscriber or her use of an electronic communication service, it *remains* information of a character which has traditionally required a showing of probable cause/warrant under Fed.R.Crim.P. 41. And *neither* of the provisions on which the Government has relied in asserting entitlement to such information under a "reasonable relevance" standard suggests any Congressional alteration of that background rule. More particularly:

(i) Section 2703(c) provides that the Government may require that the CSP disclose subscriber information (other than content) "only when", after which follows a line-item list of alternative standards un-

55. The Court emphasizes that the foregoing analysis rejects a distinction between historic and prospective CSLI for purposes of § 2703(c). This Court believes that its analysis is consistent with the fine statutory analyses of Magistrate Judge McGiverin, of Magistrate Judge Smith's pioneering and highly-influential opinion, and of Magistrate Judge Orenstein and others, whose holdings ultimately also did not depend on any such distinction. It observes that Judge Lee has reached the same express conclusion as to the requirement of a probable cause warrant for a CSP's disclosure to Government of historic or prospective CSLI.

CELL/OTD 008413
CELLSITE-19689

der which such subscriber information may be legally obtained, *i.e.:* by warrant; court order under § 2703(d); subscriber consent; or, for telemarketing fraud or basic account information, another; *de minimis,* standard. Although it specifically links these last two categories of information to compliance with a specific standard, as to the remaining category of unspecified "records and other information" it simply recites those standards potentially applicable to non-content information, including a warrant issued under the Federal Rules of Criminal Procedure. Congress' recitation of potentially-applicable standards, without more, cannot be read to replace the probable cause warrant requirement otherwise applicable to these tracking device communications with an entitlement to that same information under a reasonable relevance standard.

(ii) Similarly, nothing in the language of § 2703(d) indicates that information requested by the Government is obtainable as a matter of course upon a showing of reasonable relevance to a criminal investigation. To the contrary, § 2703(d) provides that an Order for disclosure shall issue "only if" the Government shows that the information sought is relevant. It does not provide that such an Order shall issue "if" or "whenever" such a showing is made. Thus, under the plain language of the SCA, a showing of reasonable relevance is a *necessary,* but not necessarily *sufficient,* condition for issuance of an Order. This statutory provision is linguistically and logically equivalent to a directive that an Order shall not issue if the Government does not make the required showing of relevance; the statute is simply silent on what other requirements might apply where the Government shows reasonable relevance.[56]

The Government has argued, and some Courts have uncritically assumed, that it is entitled to a § 2703(d) Order whenever it makes the required relevance showing (as if the SCA read "if" or "if and only if" rather than "only if"). In addition to being contrary to the plain meaning of the language used in the statute, the Government's interpretation would dramatically, and probably unconstitutionally, decrease the protections afforded not only to subscribers' location information, but also to the content of stored communications such as emails and voice mails. More particularly, if issuance of a § 2703(d) Order were mandatory whenever the government made the showing contemplated therein with respect to records or other information under § 2703(c), then the same statutory language would mandate issuance of an Order for disclosure of content (stored more than 180 days) under § 2703(b) upon the same minimal showing. Such a mandatory outcome would render the SCA's further requirement of prior notice (under § 2703(b)(1)(B)), in those instances in which the Government did not invoke the delay provisions of § 2705,[57] a

56. *See, e.g., Miller-El v. Cockrell,* 537 U.S. 322, 349, 123 S.Ct. 1029, 154 L.Ed.2d 931 (2003) (where statute provides for issuance of a certificate of appealability "only if" the applicant has made a substantial showing, such showing "*does not entitle* an applicant to a COA; it is a necessary and not a sufficient condition") (emphasis in original); *California v. Hodari D.,* 499 U.S. 621, 628, 111 S.Ct. 1547, 113 L.Ed.2d 690 (1991) (concluding, regarding *Menderhall* test, *i.e.,* that a person has been seized within the meaning of the Fourth Amendment "only if ... a reasonable person would have believed he was not free to leave": "It says that a person has been seized 'only if', not that he has been seized 'whenever'; it states a necessary, but not a sufficient, condition.").

57. The Government may request delayed notice on showing that prior notice would, *e.g.,* endanger life/physical safety, risk criminal flight, evidence destruction, or witness intimidation.

CELL/OTD 008414

CELLSITE-19690

hollow protection of the subscriber's privacy interest in the content of stored email and voice mail.[58] The Court concludes, therefore, that the issuance of an Order under § 2703(d) remains circumscribed by otherwise applicable legal requirements according to the nature of the records or information sought. In the case of movement/location information derived from an electronic device, the traditionally-applied legal standard has been a showing of probable cause; and nothing in the text, structure, purpose or legislative history of the SCA dictates a departure from that background standard as to either historic or prospective CSLI.[59]

2. *The Communications Assistance for Law Enforcement Act of 1994*

As noted above, a significant majority of Courts have rejected the Government's contention that real-time, or prospective, movement/location information may be obtained under a hybrid theory which purports to combine the authorities of the PRS and the SCA by seizing upon the term "solely" in a provision of the CALEA. This Court need not tarry on this widely—and rightly—refuted contention, particularly as the United States Attorney for this District is no longer pursuing this position. *See supra* n. 4.[60]

58. *Cf. Warshak v. United States*, 490 F.3d 455, 473 (6th Cir.2007), *vacated and rehearing en banc granted* (Oct. 9, 2007) (recognizing privacy interest in content of stored emails and calling related provisions of SCA into Constitutional question); *id.* at 469–76 (holding that where there is a reasonable expectation of privacy, probable cause standard controls, including particularity requirement).

59. *See Lee ND Ind.2006 Opinion*, 2006 WL 1876847 (affirming denial of Government's applications for historic and prospective CSLI); *id.* at *1 (concluding that *"[e]ither way* ... an order requiring cellular phone companies to identify the specific cell tower from which a call originates, is maintained, or received" is "unobtainable absent a warrant"). *Cf. Robinson DDC 2005 Order*, 2005 WL 3658531 (denying Government's applications for Orders authorizing the disclosure of cell site information by authority under either § 2703, §§ 3122 and 3123, or both); *id.* (noting that "neither [SCA nor PRS] expressly authorizes the disclosure of cell site information" and concluding, with no distinction as to historical or prospective CSLI, that "[a]bsent new authority which dictates a different exercise of discretion", Magistrates will not grant applications absent a showing of probable cause). *Cf. In re CALEA*, 227 F.3d 450 (D.C.Cir.2000) (noting that "all of CALEA's required capabilities are expressly premised on the condition that any information will be obtained 'pursuant to a court order or other lawful authorization' " and thus CALEA does not authorize modification of either "evidentiary standards or procedural safeguards").

60. *See Orenstein EDNY Aug. 2005 Order*, 384 F.Supp.2d at 565 ("[W]here a carrier's assistance to law enforcement is ordered on the basis of something less than probable cause, such assistance must not include disclosure of ... physical location"); *Feldman WDNY 2006 Opinion*, 415 F.Supp.2d at 219 (accepting government's testimony that CSLI providing more than *general* location information would be governed by a *probable cause* standard, Congress would have "recognized the same concern and intended that the [PRS] be paired with Rule 41"). *Cf. Alexander Mass. 2007 Opinion, rev'd, Stearns Mass.2007 Opinion*, 509 F.Supp.2d at 72 ("Through CALEA, Congress [intended] to close a loophole that would have allowed government agents" to obtain location information "without a showing of probable cause").

The Court also notes that the CALEA expressly exempts communications from a tracking device (defined in § 3117) from its definition of "electronic communications" and, in legislating what information CSPs must compile/retain for disclosure to law enforcement on "Court Order or other lawful authorization", also retains the Fourth Amendment or other requirements implicated by the nature of the information. *See* analysis of similar aspects of the SCA, *supra*.

CELL/OTD 008415

CELLSITE-19691

B. *The Government's Positions are Contrary to Legislative History*

The foregoing textual analysis is strongly bolstered by a clear and consistent thread in the legislative history of various electronic communications statutes reflecting Congress' continuing recognition of a privacy right in certain electronic communications information, including location information, and a corresponding intent to safeguard such information against disclosure under standards that would erode traditional Fourth Amendment protections.[61]

As discussed extensively above, the relevant legislative history indicates that Congress did not intend its electronic communications legislation to be read to require, on its authority, disclosure of an individual's location information; to the contrary in enacting the legislation it relied on express representations by law enforcement that it was not seeking to amend the background standards governing the disclosure of movement/location information.[62] The ECPA and the CALEA were careful to exempt communications from an electronic device capable of tracking our movements from their definitions of "electronic communications"; the history of the CALEA is replete with expressions of concern that it not be understood to alter the evidentiary standards (and testimony allaying those concerns); and the Wireless Communication and Public Safety Act expressly recognized the importance of an individual's expectation of privacy in her physical location. Accordingly, the legislative history has contributed to and reaffirmed this Court's understanding of the Congressional intent reflected in the statutory text.

C. *The Government's Positions Would Render the Statutory Schemes Constitutionally Suspect*

This Court concludes, as a matter of statutory interpretation, that nothing in the provisions of the electronic communications legislation authorizes it to order a CSP's covert disclosure of CSLI absent a showing of probable cause under Rule 41. And this interpretation is abundantly confirmed by consideration of the Constitutional principles at issue. For reading the statutes in the manner advocated by the Government would, as to at least a substantial portion of the information at issue, violate Americans' reasonable expectation of privacy in any cell-phone-derived information/records as to their physical move-

61. *Cf. Smith SD Tex.2006 Opinion,* 441 F.Supp.2d at 826 (summarizing legislative history "reflect[ing] persistent Congressional efforts to assure that communications content retain their protected legal status in the face of changing technology and law enforcement capabilities"); *Reasonable Expectations,* 72 Geo. Wash. L.Rev. at 1559 (providing extensive history to ECPA, enacted at time of "growing consensus [including] among members of Congress ... that advances in telecommunications, such as wireless telephones and e-mail, were outpacing existing privacy protections ...."); *id.* at 1563–1565 (discussing Electronic Surveillance and Civil Liberties Report, prepared by the Office of Technology Assessment at Congress' behest in 1985).

62. *See supra* at Section IV. *Cf. Smith SD Tex.2005 Opinion,* 396 F.Supp.2d at 751–52 ("The ECPA was not intended to affect the legal standards for the issuance of orders authorizing [tracking] devices.") (citing H.R. Rep. 99–647 at 60 (1986)); H.R. Rep. 103–827 at 17, *reprinted* at 1994 U.S.C.C.A.N. 3489, 3497 (Oct. 4, 1994) (noting that "as the potential intrusiveness of technology increases, it is necessary to ensure that government surveillance authority is clearly defined and appropriately limited" and that CALEA "add[ed] protections to the exercise of the government's current surveillance authority"); *Orenstein EDNY Oct. 2005 Opinion,* 396 F.Supp.2d at 306 (noting that "the House Judiciary Committee sought quite emphatically to quell concerns about how the proposed legislation might infringe Americans' privacy rights").

CELLSITE-19692

ments/locations by authorizing *ex parte* disclosure of that information with no judicial review of the probable cause. It appears to this Court, from its review of current Fourth Amendment case law and Constitutional principles, that this information is entitled to the judicial-review protections afforded by a probable cause warrant and historically applied to movement/location information derived from a tracking device.[63] And its understanding informs the Court's interpretation of the statute, just as it believes Congressional understanding of the same principles motivated statutory limitations.

Even if the Government's proffered interpretation did not impermissibly strain both the statutory language and legislative history, the doctrine of Constitutional avoidance counsels the choice of a limiting interpretation that does not require the Courts repeatedly, on an *ex parte ad hoc* basis, to delineate the precise bounds of Fourth Amendment protection.[64]

As discussed earlier, the Fourth Amendment prohibits unreasonable searches and seizures and, accordingly, the Government must generally demonstrate probable cause and obtain a warrant prior thereto. To trigger the Fourth Amendment's protections, the individual must have a subjective expectation of privacy in the object of the Government's search, and it must be one which society accepts as objectively reasonable.[65]

The Court believes, based on common experience within the community:[66] First, that Americans do not generally know that a record of their whereabouts is being created whenever they travel about with their cell phones, or that such record is likely maintained by their cell phone providers and is potentially subject to review by interested Government officials.[67] And second, that most Americans would be appalled by the notion that the Government could obtain such a record without at least a neutral, judicial determination of probable cause.[68]

63. Indeed, some Courts have suggested that in light of the heightened vulnerability of electronic surveillance to abuse for reasons of, *e.g.*, cost and undetectability, together with the heightened concerns following from its breadth and potential over-inclusiveness, CSLI should be afforded additional judicial safeguards, such as those provided under 18 U.S.C. § 2158. *Cf. Orenstein EDNY Oct. 2005 Opinion,* 396 F.Supp.2d at 322 (noting that opinion did not "decide that a showing of probable cause necessarily suffices to permit the installation of ... a [Trap and Trace] and using it to acquire the [CSLI] transmitted over a control channel" and that it may be "that there is in fact a *more* exact showing that the government must make").

64. *See Ashwander v. Tennessee Valley Authority,* 297 U.S. 288, 348, 56 S.Ct. 466, 80 L.Ed. 688 (1936) (Brandeis, J., concurring) ("When the validity of an act of the Congress is drawn in question, and even if a serious doubt of Constitutionality is raised, it is a cardinal principle that this Court will first ascertain whether a construction of the statute is fairly possible by which the question may be avoided."). *Cf. Smith SD Tex.2006 Opinion,* 441 F.Supp.2d at 837 ("Given the presence of a competing interpretation which is not only plausible but more consistent with the statutory text and legislative history, [the] canon of [constitutional avoidance] weighs decisively against the Government's position.").

65. *See Katz,* 389 U.S. 347, 88 S.Ct. 507; *California v. Greenwood,* 486 U.S. 35, 39, 108 S.Ct. 1625, 100 L.Ed.2d 30 (1988).

66. The Magistrate's role as arbiter of reasonableness in a search warrant application inherently acknowledges, and is predicated upon, her representation of community sensibilities.

67. *See Who Knows Where You've Been,* 18 Harv. J. Law & Tech. at 313 (observing that "few customers are likely to appreciate the specificity of the location information available to service providers and the fact that companies can retain it indefinitely").

68. *See* Brief of the Federal Defenders of New York as *Amicus Curiae* in *Gorenstein SDNY*

CELL/OTD 008417

CELLSITE-19693

The Court further finds that the expectation of privacy in movement/location information suggested by these prevalent attitudes is objectively reasonable because historically such information was not observable when someone was within private property and because the newly-emergent technologies create a potential to monitor associational activities in a manner that could have a chilling effect.[69] Finally, the very fact that Congress has taken pains to protect electronically-derived location information from unwarranted disclosure serves independently to make subjectively-held expectations of privacy objectively reasonable.[70]

As discussed above, some Courts have indicated that historic CSLI is routinely obtainable by law enforcement without probable cause and thus have implicitly found no reasonable expectation of privacy therein. In this Court's view, however, the privacy and associational interests implicated are not meaningfully diminished by a delay in disclosure.[71]

The foregoing view of privacy expectations in the context of electronically-derived location information is in keeping with controlling precedent. More particularly, the Supreme Court has effectively recognized, in closely-analogous cases, an individual's reasonable expectation of privacy in information regarding her location when she is on private premises. *Compare United States v. Knotts*, 460 U.S. 276, 103 S.Ct. 1081, 75 L.Ed.2d 55 (1983) (concluding that warrantless installation of electronic tracking beeper/radio transmitter inside drum of chemicals sold to the defendant illegal drug manufacturers, and used to follow their movements on public highways, implicated no Fourth Amend-

2005 Opinion (indicating that "most cell users are quite surprised to learn that [CSPs] can create a virtual map" of movements and "are likely to reject the prospect of turning every cell phone into a tracking device"). *Cf. Companies Caught in the Middle*, 21 U.S.F.L.Rev. at 557 ("[W]ith respect to location information ..., many orders now require disclosure of the location of all of the associates who ... made calls to a target.").

69. *Cf. Karo*, 468 U.S. at 714, 104 S.Ct. 3296 ("At the risk of belaboring the obvious, private residences are places in which the individual normally expects privacy free of governmental intrusion not authorized by a warrant, and that expectation is plainly one that society is prepared to recognize as justifiable."); *State v. Campbell*, 306 Or. 157, 759 P.2d 1040 (1988) (observing, with regard to warrantless location information, that "freedom may be impaired as much, if not more so, by the treat of scrutiny as by the fact of scrutiny").

70. *Cf. United States v. White*, 401 U.S. 745, 786, 91 S.Ct. 1122, 28 L.Ed.2d 453 (Harlan, J., dissenting) ("Since it is the task of the law to form and project, as well as mirror and reflect, we should not, as judges, merely recite the expectations and risks without examining the desirability of saddling them upon society. The critical question, therefore, is whether under our system of government, as reflected in the Constitution, we should impose on our citizens, the risk of the electronic listener or observer without at least the protection of a warrant requirement.").

71. *Cf. State v. Jackson*, 150 Wash.2d 251, 76 P.3d 217, 223–24 (2003) (discussing civil liberties implicated by covert disclosure of "an enormous amount of personal information", and noting, in concluding that GPS device employed by law enforcement was a "particularly intrusive method of surveillance", that the device "provided [Government with] a record of every place the vehicle had been in the past", a feat that no visual surveillance could have accomplished); Matthew M. Werdegar, *Lost? The Government Knows Where You Are: Cellular Telephone Call Location Technology and the Expectation of Privacy*, 10 Stan. L. & Pol'y Rev. 103, 105–107 (Fall 1998); *Alexander Mass.2007 Opinion, rev'd, Stearns Mass.2007 Opinion*, 509 F.Supp.2d at 74–75 (dismissing as nonsensical any assertion that an individual's expectation of privacy in her presence at a location that she wished to keep secret is suddenly lost when the activity—or that particularly iteration of the activity—is over and she has left).

CELL/OTD 008418
CELLSITE-19694

ment concerns, as defendants had no reasonable expectation of privacy while they and their vehicle were in plain view on public highways) *with United States v. Karo*, 468 U.S. 705, 104 S.Ct. 3296, 82 L.Ed.2d 530 (1984) (concluded that where the tracking beeper placed inside chemical drum was then used to ascertain presence in residences, the search was unreasonable absent probable cause).[72]

Taken together, these cases establish that without a warrant based on probable cause the Government may use a tracking device to ascertain an individual's location on a public highway but not in a private home, *i.e.*, the public/private dichotomy is the principle harmonizing *Knotts* and *Karo*, so that a warrant is constitutionally required if and only if the location information extends onto private property.[73]

But even with this principle as a guide, the Court anticipates that routine allowance of location information up to the threshold of the private domain would necessitate increasingly-difficult line-drawing at the margins. Moreover, even if difficulties in Constitutional line-drawing were surmounted, practical limitations on the abilities of CSPs to filter their CSLI would almost certainly result in over-inclusive disclosures, and thus in transgressions of Constitutional boundaries.[74] Accordingly, these considerations counsel adopting a statutory interpretation which, by retaining the probable cause requirement for all CSLI, would avoid repeated Constitutional adjudication and trespass into protected areas.[75]

The Government has contended, and some Courts have opined, that there is no

72. *See also* 468 U.S. at 711, 104 S.Ct. 3296 (" 'All individuals have a legitimate expectation of privacy that objects coming into their rightful ownership do not ... give law enforcement agents the opportunity to monitor [their] location ... inside private residences and other areas where the right to be free from warrantless governmental intrusion is unquestioned.' ").

73. *Cf., e.g., McGiverin PR 2007 Opinion*, 497 F.Supp.2d at 311–12 ("[T]he warrantless monitoring of a tracking device does not offend the Fourth Amendment so long as the situs of the thing being tracked could be determined by visual observation from a public area and ... the surveillance tells authorities nothing about the suspect's location within an area ... where he/she enjoys a reasonable expectation of privacy.").

74. The Court does not believe that these difficulties can be met by reliance on investigative agencies' self-restraint. *See United States v. United States Dist. Ct.*, 407 U.S. 297, 317, 92 S.Ct. 2125, 32 L.Ed.2d 752 (1972) (Powell, J.) (concluding that the "Fourth Amendment contemplates a prior judicial judgment", and not the "risk that executive discretion may be reasonably exercised"). *Feldman WDNY 2006 Opinion*, 415 F.Supp.2d at 217–19 & n. 5 (discussing Government's "shifting" position on what standard applies to CSLI as paying "tribute ... to the slippery constitutional slope [its] position involves"), *id.* at 218 n. 5 (quoting law enforcement agent's testimony that the Government was "back[ing] off" and requesting *limited* CSLI in response to Magistrate Judges' privacy concerns and in interests of avoiding "a hell of a fight" on the "slippery ground" of the applicability "of a probable cause standard"). *See* 407 U.S. at 317, 92 S.Ct. 2125 (Magistrate Judges' role "accords with our basic constitutional doctrine that individual freedoms will be best preserved through a separation of powers and division of functions among the different branches and levels of government").

75. *See Karo*, 468 U.S. at 717, 104 S.Ct. 3296 (assessing Government's argument that, if warrants are required when a location-identifying device is not in public view, then "for all practical purposes [agents] will be forced to obtain warrants in every case in which they seek to use [a tracking device], because they have no way of knowing in advance whether [it] will be transmitting its signals from inside private premises"); *id.* (concluding that "[t]he argument that a warrant requirement would oblige the Government to obtain warrants in a large number of cases is hardly a compelling argument against the requirement").

Cf. Smith SD Tex 2005 Opinion, 396 F.Supp.2d at 757 (concluding, in discussion of Fourth Amendment implications: "For purposes of this decision it is unnecessary to draw the line between permissible and impermissible warrantless monitoring of [CSLI]. As

CELL/OTD 008419

CELLSITE-19695

reasonable expectation of privacy in CSLI because cell-phone-derived movement/location information is analogous to the dialed telephone numbers found unprotected by the Supreme Court in *Smith v. Maryland*.[76] As explained by Magistrate Judge Smith, the Sixth Circuit has expressly (and in this Court's view correctly) rejected this less apt analogy:

> The government contends that probable cause should never be required for cell phone tracking because there is no reasonable expectation of privacy in [CSLI], analogizing such information to the telephone numbers found unprotected in *Smith v. Maryland*, 442 U.S. 735, 99 S.Ct. 2577, 61 L.Ed.2d 220 (1979). The Sixth Circuit rejected that analogy in *United States v. Forest*, 355 F.3d 942, 951–52 (6th Cir.2004). Unlike dialed telephone numbers, [CSLI] is not 'voluntarily conveyed' by the user to the phone company.... [I]t is transmitted automatically during the registration process, entirely independent of the user's input, control, or knowledge. Sometimes, as in *Forest*, [CSLI] is triggered by law enforcement's dialing of the particular number. 355 F.3d at 951. For these reasons the Sixth Circuit was persuaded that *Smith* did not extend to [CSLI], but rejected the defendant's constitutional claim on the narrower ground that the surveillance took place on public highways, where there is no legitimate expectation of privacy. *Id.* at 951–52 (citing *United States v. Knotts*, 460 U.S. 276, 281, 103 S.Ct. 1081, 75 L.Ed.2d 55 (1983)).

Smith SD Tex.2005 Opinion, 396 F.Supp.2d at 756–573.

A panel of the Sixth Circuit more recently further elucidated the bounds of the waiver of expectation doctrine in *Warshak*, 490 F.3d 455,[77] in which it explained that if

in any tracking situation, it is impossible to know in advance whether the requested phone monitoring will invade the target's Fourth Amendment rights. The mere possibility of such an invasion is sufficient to require the prudent prosecutor to seek a Rule 41 search warrant. Because the government cannot demonstrate that cell site tracking could never under any circumstance implicate Fourth Amendment privacy rights, there is no reason to treat cell phone tracking differently from other forms of tracking ..., which routinely require probable cause.")

It also appears that Congress, in expressly excepting tracking device communications and location information from the various provisions of its electronic communications legislation, intended to provide an ample zone of protection for Fourth Amendment rights. *Cf. Clark v. Martinez*, 543 U.S. 371, 381, 125 S.Ct. 716, 160 L.Ed.2d 734 (2005) (canon of constitutional avoidance is grounded on presumption that Congress did not intentionally "raise[ ] serious constitutional doubts").

76. In concluding that there is no reasonable expectation of privacy in the dialed telephone phone numbers obtained through a Trap and Trace, the Court relied on *United States v. Miller*, 425 U.S. 435, 442, 96 S.Ct. 1619, 48 L.Ed.2d 71 (1976) (banking records obtained by subpoena not suppressed; no reasonable expectation of privacy because knowingly and voluntarily conveyed to bank employees for transactional use). *Cf.* Jack X. Dempsey, *Digital Search & Seizure: Updating Privacy Protections to Keep Pace with Technology*, PLI Order No. 11253, 420–21 (June–July 2007) (observing that the *Smith* Court "stressed the narrowness of its ruling" and that the assumption of the risk/business records doctrine "was developed when courts did not foresee" the revealing nature or quantity of information now stored by communications service providers).

77. This decision—affirming with "minor modification" the District Court's entry of a preliminary injunction on grounds of the facial constitutional flaws of a statutory interpretation authorizing seizure of personal e-mails from service provider based only on Government's *ex parte* representations of less than probable cause—was vacated and rehearing *en banc* on this novel question granted by the Sixth Circuit in October, 2007.

CELL/OTD 008420

CELLSITE-19696

an intermediary's mere ability to access information sought by the Government was enough to create an assumption of the risk bar to a reasonable expectation of privacy, vast stores of personal information would lose their Constitutional protections.[78] Because such consequences are clearly unacceptable under the Fourth Amendment, the Sixth Circuit concluded that the "critical question" is "whether a [customer] maintains a reasonable expectation of privacy in [the information sought] *vis-a-vis* the [third-party provider]". 490 F.3d at 469. The Court concluded, largely on its analysis of *Katz*, *Miller* and *Smith*, that a customer forfeits her reasonable expectation of privacy only as to a service provider's records of information voluntarily conveyed and reasonably expected to be accessed by the provider's employees in the ordinary course of its business (*i.e.*, for purposes of the provision of services). *See id.* at 469–76.

As discussed *supra*, CSLI is not "voluntarily and knowingly" conveyed by cell phone users (certainly *not* in the way of transactional bank records or dialed telephone numbers); rather, the information is automatically registered by the cell phone.[79] Nor are CSP employees routinely reviewing and/or utilizing CSLI in the ordinary course of the provision of telephone communications services; rather, the information is processed on separate control channels by electronic equipment.[80] Nor does a CPS's retention of CSLI generally serve any business purpose for the customer or for the provider in serving the customer; rather, such information is retained principally, if not exclusively, in response to Government directive.[81]

Finally, the movement/location information at issue here, unlike the records found unprotected in prior Supreme Court cases, is the subject of express Congressional protection. Indeed, Congress has reiterated throughout the legislative history of its electronic communications legislation, and reflected in the provisions of its enactments, its recognition of an individual expectation of privacy in "location information" and desire to protect this privacy

78. *See* 490 F.3d at 470 (concluding that, if privacy expectations were deemed waived as to information a third-party "has the ability to access", phone conversations, letters, and the contents of third-party storage containers would all be unprotected).

79. *See United States v. Forest*, 355 F.3d 942, 949 (6th Cir.2004) (finding that defendant "persuasively distinguishe[d]" CSLI, which was not "voluntarily convey[ed] ... to anyone", from dialed telephone numbers in *Smith v. Maryland*).

80. *Compare id.* at 949 (noting that CSLI is "simply data sent from a cellular phone tower to the cellular provider's computers") *with Miller*, 425 U.S. at 442, 96 S.Ct. 1619 (because bank customers knowingly permitted bank employees to view records of financial transactions, they had no "legitimate expectation of privacy"). *See Warshak*, 490 F.3d at 473–75 (contrasting "mere accessibility" with service that includes routine "inspection, auditing, or monitoring" and contrasting electronic processing/scanning of information with "manual human review").

81. *Azrack E.D.N.Y.2007 Opinion*, 2007 WL 2729668 at *11 (noting, in distinguish *Miller* and *Smith*, that the information at issue *sub judice* was neither kept in the ordinary course of business nor contained on the user's monthly bill).

The Government cannot, of course, remove an otherwise reasonable expectation of privacy by mandating that it have the ability to intrude. *Cf. Smith*, 442 U.S. at 739 n. 5, 99 S.Ct. 2577 (observing that Fourth Amendment protections cannot be erased by Government's disclosure of its access to particular information). *First Practices*, 2007 Stan. Tech. L.Rev. at 26 (noting in discussing *Katz*: "That law enforcement agents have the technical capability to access [electronic communication information], cannot mean that a user assumes the risk that agents will access whatever ... they choose, independent of any judicial oversight.").

CELL/OTD 008421

CELLSITE-19697

right from unwarranted or unreasonable encroachment.

In sum, this Court concurs with the assessment of Magistrate Judge Smith at the conclusion of his Opinion:

> Denial of the government's request ... in this instance should have no dire consequences for law enforcement [as t]his type of surveillance is unquestionably available upon a traditional probable cause showing under Rule 41. On the other hand, permitting surreptitious conversion of a cell phone into a tracking device without probable cause raises serious Fourth Amendment concerns, especially when the phone is monitored in the home or other places where privacy is reasonably expected.... Absent any sign that Congress has squarely addressed and resolved those concerns in favor of law enforcement, the more prudent course is to avoid an interpretation that risks a constitutional collision.

Smith SD Tex.2005 Opinion, 396 F.Supp.2d at 765 (citation omitted).[82]

VI. CONCLUSION

Because this Court concludes that the Government does not have a statutory entitlement to an electronic communication service provider's covert disclosure of cell-phone-derived movement/location information, the Government's application(s) for such information, absent a showing of probable cause under Fed.R.Civ.P. 41, must be denied. This Opinion is joined, in the interest of judicial efficiency, by Magistrate Judges Caiazza, Hay, Baxter and Mitchell.[83]

82. *See also Almeida–Sanchez v. United States*, 413 U.S. 266, 273, 93 S.Ct. 2535, 37 L.Ed.2d 596 (1973) ("The needs of law enforcement stand in constant tension with the Constitution's protections of the individual against certain exercises of official power. It is precisely the predictability of these pressures that counsels a resolute loyalty to constitutional safeguards.").

ACCORDINGLY, IT IS HEREBY ORDERED THAT

The application of the Assistant United States Attorney be denied, except that the underlying application be sealed as requested by the Government in order not to jeopardize an ongoing criminal investigation.

This Opinion shall not be sealed because it is a matter of first impression in this District and Circuit on issues concerning the statutory and Constitutional regulation of electronic surveillance which do not hinge on the particulars of the underlying investigation.

Hello all,

Attached is the EC for guidance on FBI [redacted] WITT.

I believe I've incorporated all the suggestions from the last meetings we've had - with [redacted] on July 21 and with [redacted] on Aug 3.

If you would, please review one last time before I send up for approval.

Thanks for all your help and advice on this.

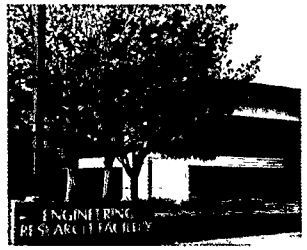
Legal Update

Science & Technology Law Unit, OGC



CELL/OTD 007676

CELLSITE-12673

Agenda

- Geolocating:
  - Cellular "GPS" v. CellSite data
  - [redacted]
  - Role of 3rd Party-provider & 4th Amendment
- Emergency Disclosure
  - Prospective vs. Stored
  - Records vs. Contents
  - Authorities & Immunity
- [redacted]
  - 4th Amendment & Stored Content
  - Role of 3rd Party-Provider
  - Ramifications: e.g. [redacted]

b3
b7E

CELL/OTD 002677

Locating a Cell Phone

1. **Cell Site Data** —tower/sector
2. **Witt ---**Wireless Intercept & Tracking Team; [redacted] b3 b7E
3. **Geolocation** —from provider
   1. Handset-based (GPS)
   2. Network-based (signal strength triangulation)

8/9/2008 CELL/OTD 007678

Access to Historical Location Data

- Past tower/sector records available using 2703(d) order

[redacted] b5

- Historical GPS data typically <u>does not exist</u>
  - some exceptions exist, such as "kiddie-tracking" phones where logging is expressly part of service

CELL/OTD 007687

GEOLocation Data—E911

- FCC "Enhanced 911" mandate requires wireless telephone carriers to be able to deliver certain location data for 911 calls
- Carriers implement this capability in either of 2 ways:
  - **"Handset solution": GPS**
  - FCC requires accuracy:
    - to 50 meters for 67% of calls
    - to 150 meters for 95% of calls
  - **"Network solution": Triangulation**
  - FCC requires accuracy:
    - to 100 meters for 67% of calls
    - to 300 meters for 95% of calls

The below interpretation from our Administrative Law Unit is consistent with what we spoke about this morning

As noted, we could draft a delegation request to DOJ seeking approval for the arguments that you and CID have offered. Since we have a pending request to DOJ to consider we could wait or go back to them with this as an alternative request.

Hello [redacted]

CELL/OTD 007551 CELLSITE-12738

It went well. Overall, we were in agreement. [redacted] had a couple of suggestions for changes, which we will incorporate. They would like to have us come down to your facility for one more meeting that would include [redacted] and you to finalize everything before the EC goes up for approval and out to the field.

Perhaps early next week would work for a meeting.

Let me know when you and [redacted] might be available.

Thanks,

Hello,

We've made several changes to the EC and I forward the amended EC to [redacted] while he was in San Diego. I'm attaching it to this email. I've indicated changes to the previous EC in red.

I do think it would be worthwhile for us to meet on this one more time to get on the same page [redacted]

I'll be out on AL next week, but I'll be back in the office the week of the 13th. Hopefully, we can discuss this further then.

1) "what is the rush", the only reason people at FBIHQ have jobs is to support case agents in the field. This [redacted] I know because I spent most of my career working those cases all day, night and weekend, just like my guys still in the field. I've been fielding daily questions about this [redacted]

[redacted]

2) Good point, dually noted and I have already made the correction by adding AD Thomas to the approval line.

* Just for further reference, I've brought this issue to the attention of four people from OGC and you're the first one that's had any input.

Thanks,

[redacted]

Emergency Authority

[redacted]

Therefore, emergency use of the device is likewise governed by the emergency provisions of that statute, 18 U.S.C. 3125 and/or MIOG Part II, Section 10-10.7.1. The same statutory procedure will apply as outlined above with the following requirements for emergency authorization.

b3
b5
b7E

The statute and FBI policy requires DOJ approval for Federal court orders, with a written application to the courts within 48 hours. Authorization must come from an Assistant Attorney General or higher ranking DOJ official. A DOJ hotline has been established to expedite this process. The DOJ hotline telephone number is [redacted] normal business hours - [redacted]

In the matter of State/Local court orders according to the same statute requires the principal prosecuting attorney of any State or subdivision thereof acting pursuant to a statute of that state approval for State/Local court orders, with a written application to the courts within 48 hours.

With either the Federal or State/local court orders, the proper authorities must reasonably determine that an emergency situation exists that involves -

A) immediate danger of death or serious bodily injury to any person;

Hey [redacted] I'm in the process of updating the attached WITT EC (**DRAFT ONLY**). I would like to include your efforts in this EC i.e. history, purchases, teamwork, training, field offices equipped with WITT gear. However, I don't want to misrepresent your program so please provide the requested information and any additional information you would like to see in this EC.

CELL/OTD 024149

WITT What is Cell site location data

Wireless Intercept and Tracking Team

- Tower/Sector data:
  1. is generated by the network for network purposes regardless of a LE order.
  2. is necessary to Provision of Service & a call cannot be processed without it.
  3. exists in the network as a **RECORD** prior to its being obtained by LE.
  4. has no relationship to the content of a communication.
  5. is delivered to LE under CALEA only at the beginning and end of calls.

CELL/OTD 024156

CELLSITE-18224

1. CALEA prohibits collecting location information "solely pursuant" to a PR/TT
2. 18 USC 2703(d) (stored communication act)
3.
   -

C "OTD 024158
b3
b5
b7E

WITT
Wireless Intercept and Tracking Team

CALEA Delivery of location data

- **Near Real-Time**: CALEA (47 USC 1002) requires carriers to "expeditiously isolates"
  - "call-identifying information": includes cell site information utilized in processing calls
  - for government access "before, during, or immediately after the transmission of a [ ] communication" (i.e., in real-time or near real-time)
- CALEA J-Standard: location information is delivered after generation of data by the carrier's network and use in the provision of service (e.g., call origination, Answer, call release)

CELL/OTD 024159

Protecting Sensitive Techniques

CELL/OTD 024171

- *Qualified* Government Privilege in Non-disclosure based on ***Roviaro v. United States*, 353 U.S. 53 (1957):** disclosure of identity (and testimony) of informant.
  - Generally technique, type of device, location of install, etc. is protected
    - unless Defense can establish disclosure is necessary to defense, I.e., no other/adequate means to cross-examine/test evidence; if so:
    - then Balancing of interests

b5
b7E

[redacted]

- see also Jayme S. Walker "The qualified privilege to protect sensitive investigative techniques from disclosure," LEB Vol 69 NO.5 at 26 (May 2000).

[redacted]

CELLSITE-18239

Qualified Privilege

- **Compare, United States v. Van Horn**, 789 F.2d 1492 (11th Cir.), cert. denied, 479 U.S. 854 (1986) (concealed microphone in office, defendant sought information about location of device claiming necessary to demonstrate that voices on tape could have been distorted by way mic was hidden and the distortion led to misidentification of the voice), recognized a qualified government privilege not to disclose sensitive investigative techniques.
  - [redacted]
  - [redacted]

b5

- **With United States v. Foster**, 986 F.2d 541, 543 (D.C. Cir. 1993) (defendant sought location of observation post: officer's observation of drug transaction was key evidence implicating defendant; surveillance not taped or photographed, so no alternative evidence for jury to examine to determine whether surveillance post provided clear view from which officer could make accurate identification of defendant).

CELLSITE-18240

Qualified Privilege (cont).

CELL/OTD 024173

- U.S. v. Garey, 2004 WL 2663023 (M.D.Ga. Nov. 15, 2004)
  - Defendant sought nature & details of pen register used to determine the geographical location of a cellular phone
  - Court found the information protected by qualified investigative techniques privilege & national security privilege
  - Balanced government's interest in maintaining privilege with Defendant's need for the information
- Defendant had the Product of the Surveillance: the cellphone used in making threatening calls was found in defendant's house during search of residence;
    - Defendant did not need to know how the technology traced the geographic location of the phone.
    - locating the phone in the residence confirmed the accuracy of the geographic surveillance;
  - Moreover,Defendant could challenge the technology used to establish that phone found in residence was the one that actually made the criminal calls.

CELLSITE-18344

16-4.13.4 Loan of Electronic Surveillance Equipment (Formerly 16-7.3.4) (See MIOG, Part 2, 10-9.14 and 10-10.10.) (RCU)

(1) LOAN OF ELECTRONIC SURVEILLANCE EQUIPMENT TO STATE AND LOCAL LAW ENFORCEMENT AGENCIES (RCU)

By Department Order 1945-95, dated January 18, 1995 (replacing Department Order 890-80, dated April 29, 1980), the Attorney General delegated to the Federal Bureau of Investigation the authority to approve loans of electronic surveillance equipment to state and local law enforcement agencies for use in their investigations (i.e., NOT joint FBI investigations). Under this delegation, the loan of such equipment is to be made only in exceptional circumstances and to be consistent with federal and state laws, as well as with state and local law enforcement regulations. (RCU)

Electronic surveillance equipment is defined as any equipment which would be used in Title 18, USC, Section 2510, et seq. (Title III) - or consensual electronic coverages. (RCU)

(a) It is the policy of the Department of Justice that loans of electronic surveillance equipment to state and local law enforcement agencies are generally to be discouraged and are to be permitted only: (RCU)

1. in furtherance of the federal government's interests in the investigation and prosecution of violations of state criminal law that are of federal concern; (RCU)

2. in compliance with all applicable provisions of federal, state and local law; (RCU)

3. without interfering with state and local control of state and local law enforcement; and (RCU)

4. without duplication of other federal programs of assistance to state and local law enforcement. (RCU)

(b) No request may be granted until the head of the state or local law enforcement agency certifies in writing that the agency: (RCU)

1. has authority under state and local law to borrow the equipment on the terms required by this Order; (RCU)

2. has valid legal authority under state and local law to conduct the particular electronic surveillance for which the equipment is requested; and (RCU)

3. cannot obtain the requested equipment from other law enforcement agencies within the state. (RCU)

(c) The Director of the FBI or his designee may, at his discretion, grant a request for the loan of electronic surveillance equipment upon receipt of a written request from a state or local law enforcement agency. The formal request must contain a copy of a written opinion of the chief legal officer of the state or local government relative to compliance with (b) 1. and (b) 2. above. (RCU)

(d) The Director of the FBI or his designee shall not grant a request for the loan of electronic surveillance equipment unless the Director or his designee determines that: (RCU)

1. there is no current need for the equipment within the Bureau; (RCU)

2. it is in the interest of the United States to facilitate the criminal investigation for which the equipment is needed; and, (RCU)

3. the agency has previously not violated the terms of any loan of electronic surveillance equipment by the FBI. (RCU)

(e) Any loan of electronic surveillance equipment shall be made by written agreement between the Director of the Federal Bureau of Investigation or his designee and the state or local law enforcement agency. The agreement shall identify the equipment and state the subject, duration,

location, and purpose of the surveillance to be conducted. It shall also include the following provisions: (RCU)

1. the loan of the equipment is subject to the needs of the Department of Justice, and the equipment must be returned upon request; (RCU)

2. the loan of the equipment is limited to the duration of the validly authorized surveillance for which it is requested, and in any event not to exceed 90 days; (RCU)

3. the equipment may be used only for the validly authorized surveillance for which it was requested; (RCU)

4. the agency will not permit any other person or governmental entity to use the equipment; (RCU)

5. the agency may disclose electronic surveillance equipment, information concerning it, or its installation or use only with the consent of the Director of the FBI or his designee and subject to the nondisclosure provisions set forth in 28 C.F.R. 1622, 1624, and 1626; (RCU)

6. the agency will not use the electronic surveillance equipment outside the United States or under circumstances where there is reason to believe that the equipment may be taken outside of the United States, without the approval of the Director of the FBI or his designee; and, (RCU)

7. the agency will reimburse the United States for all loss or damage to the equipment. Any dispute over the amount of loss or damage will be resolved by the Director of the FBI or his designee, and this resolution will be final. The Director of the FBI or his designee may agree to any other terms consistent with the above stipulations. (RCU)

(f) When the head of the state or local law enforcement agency represents to the Director or his designee that an emergency situation and need for electronic surveillance equipment exist and that the requesting agency is authorized under state law to conduct emergency electronic surveillance in such circumstances and specifies the provision of state law upon which he is proceeding, the Director or his designee may grant the emergency request. The information required to be submitted by the head of the law enforcement agency in (b) and (c) must be submitted to the Director or his designee within three days of the day on which the loan is made. (RCU)

(g) The Director of the FBI, pursuant to Attorney General Department Order 1945-95, dated January 18, 1995, has delegated his authority to permit [redacted] on a case-by-case basis, to assist in the installation and operation of electronic surveillance equipment. Such delegated authority requires the concurrent approval from the Section Chief of the appropriate Criminal Investigative Division section having oversight over the investigative program involved; the Section Chief of the appropriate Operational Technology Division Section having oversight over the electronic surveillance equipment involved; and the Office of the General Counsel. If such technical assistance is approved, the state or local court orders (where required) must specifically include the court's authorization for FBI assistance in the state and local electronic surveillance endeavor. Without such approval, no FBI personnel may install the equipment or participate in the surveillance. This restriction does not prohibit maintenance and repair of the equipment when not installed. (RCU) b7E

(h) The Director of the FBI will retain all requests for electronic surveillance equipment by state and local law enforcement agencies. The Director will report to the Assistant Attorney General, Criminal Division, on October 1 and April 1 of each year on the duration and results of all loans made pursuant to the order. (RCU)

(i) The Director of the FBI, pursuant to Attorney General Department Order 1945-95, dated January 18, 1995, has delegated his authority to approve loans of electronic surveillance equipment upon written request from a state or local law enforcement agency. Such delegated authority requires the concurrent approval of the Section Chief of the appropriate Criminal Investigative Division section having oversight over the investigative program involved and the Section Chief of the appropriate Operational Technology Division Section having oversight over the electronic surveillance equipment involved. Where requests involve installation or operation of

technical equipment by FBI [redacted] approval by the Office of the General Counsel is also required. (RCU)

(j) The FBI field division must advise FBIHQ when requesting approval to loan electronic surveillance equipment (be it either a routine or an emergency request) whether there is a current need for equipment within the division; whether, in the SAC's opinion, it is within the interests of the United States to loan the requested equipment in the specific criminal investigation; and, whether the agency involved has previously violated the terms of any loan of electronic surveillance equipment by the FBI. (RCU)

(k) Routine requests should be by electronic communication (EC) to FBIHQ, directed to the Operational Technology Division and to the appropriate Criminal Investigative Division section having oversight over the investigative program involved. This EC should enclose both a written request from the head of the local or state law enforcement agency and the written opinion of the chief legal officer of the local or state government. Emergency requests should be by telephone, confirmed by EC, and followed by an EC, enclosing the necessary documents. (RCU)

(2) THE USE OF FBI ELECTRONIC SURVEILLANCE EQUIPMENT IN JOINT CASES WHERE STATE AND LOCAL LAW ENFORCEMENT AGENCIES OBTAINED AUTHORITY FOR ITS USE (SEE MIOG, PART 2, 10-10.3 (8).) (RCU)

(a) A JOINT CASE, for purposes of this section, is an investigation in which there exists significant FBI interest in the subject or subjects of a local investigation and substantial FBI investigative resources have been utilized and/or will be utilized in the planned investigation with the local agency. (RCU)

(b) FBIHQ authority MUST be obtained prior to any use of FBI electronic surveillance equipment or personnel in furtherance of any order or authority obtained by state or local law enforcement agencies. Should approval be granted for such use, the pertinent local or state order or authority MUST contain specific language authorizing FBI participation and specifying whether the assistance is for installation, monitoring, or whatever is required. (RCU)

b7E

(c) In requesting FBIHQ authority, the field office is to set forth the following information: (RCU)

1. A synopsis of the investigation conducted to date by FBI and the local agency involved, to include the date the FBI case was opened, as well as when the joint investigation was initiated. (RCU)

2. the specific SAC comments as to the value of the assistance to the FBI investigation and extent of federal control over local electronic surveillance. (RCU)

3. the exact nature of equipment to be utilized and technical assistance required, and whether the equipment is on hand in the requesting division. (RCU)

4. the specific comments of the [redacted] as to the complexity of the equipment and the ability of the local agency to properly utilize technical equipment requested. (RCU)

5. that the local agency has valid legal authority under state or local law to conduct the electronic surveillance for which equipment will be utilized, to include citation of the specific statute; (RCU)

6. that the Chief Division Counsel or the Assistant U.S. Attorney has reviewed the affidavits and orders to be filed and concurs in their sufficiency; and, (RCU)

7. that FBI policy in limiting disclosure as set forth in Part 2, Sections 10-10.13 and 10-10.16, of this manual, will be honored in any subsequent local proceedings. (RCU)

The above information is to be provided by appropriate communication to the attention of the Operational Technology Division, as well as to either the Criminal Investigative Division or the [redacted] as appropriate. (RCU)

(d) Any request for FBI assistance in the execution of a locally obtained court order which [redacted] will be handled separately and will require

significant justification. Emergency requests for such assistance are to be discouraged and likely will NOT be approved. (RCU)

(3) LOAN OF ELECTRONIC SURVEILLANCE EQUIPMENT TO OTHER FEDERAL AGENCIES. (RCU)

(a) The loan of FBI technical electronic surveillance equipment to other federal agencies is permissible on a short- basis. The loan of equipment is subject to availability and must not negatively affect the technical investigative capabilities of the FBI. (RCU)

(b) For agencies of the Department of Justice (DOJ) (e.g., the Drug Enforcement Administration (DEA)), material support and assistance, including the loan of technical equipment, should be handled on a local level, subject to the provisions stated above in (3)(a). (RCU)

(c) For agencies outside the DOJ, requests must be made on a headquarters level, and the requesting agency must have appropriate electronic surveillance authority and capability. (RCU)

(d) All technical equipment provided must be available in existing field office inventory. (RCU)

Civil Liability Protection 18 USC 2707(e)

- "A good faith reliance on
  - Court warrant or order, a grand jury subpoena, a legislative authorization **or a statutory authorization** (including a request of a governmental entity under section 2703(f) of this title)

is a complete defense to any civil or criminal action brought under this chapter or any other law."

CELL/OTD 015742 CELL/OTD 01571

CELLSITE-2591

Civil Liability Protection 18 USC 2703(e)

No cause of action shall lie in any court against any provider of wire or electronic communication service, its officers, employees, agents, or other specified persons for providing information, facilities, or assistance in accordance with the terms of a court order, warrant, subpoena, statutory authorization, or certification under this chapter.

2002 Amendment Subsec. (e). Pub.L. 107-296, § 225(h)(1), inserted ", statutory authorization" following "subpoena".

Provider Immunity

Voluntary disclosure under 2702(c) statutory authority of records or other information in Good Faith reliance based on LE representation that an emergency circumstance required disclosure without delay,

WITT: Wireless Intercept & Tracking Team

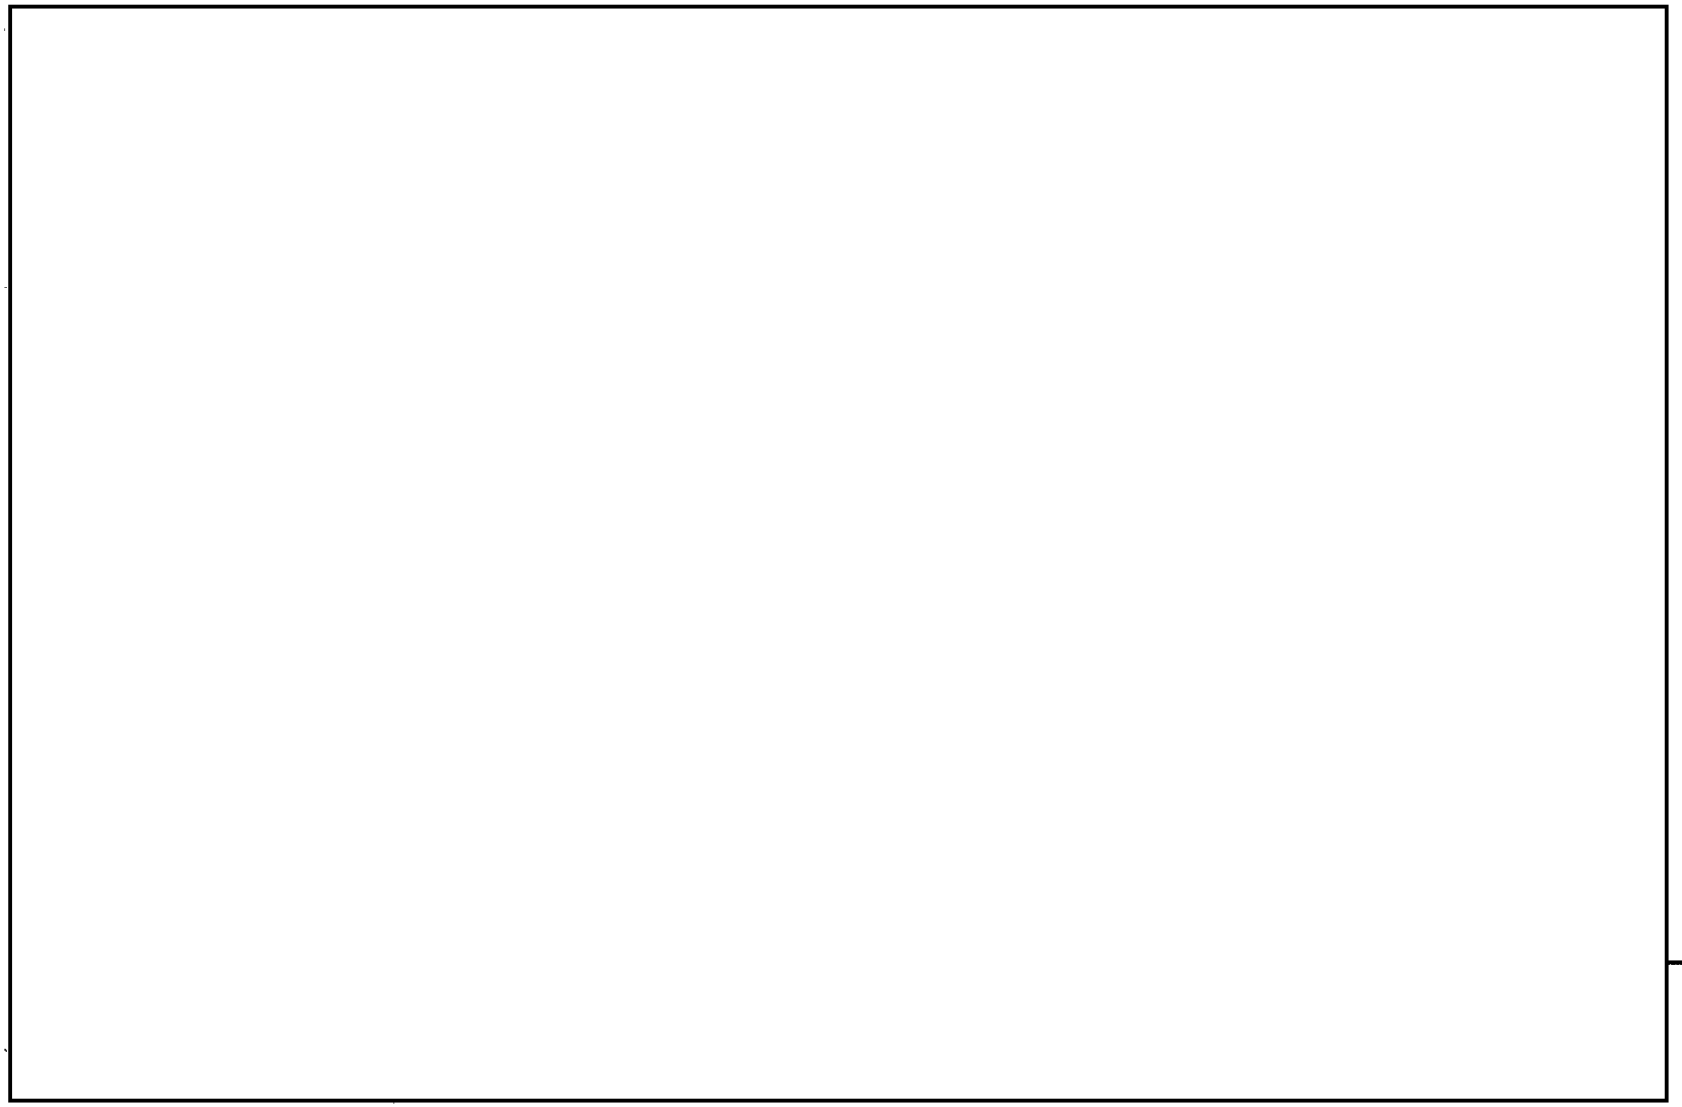
A Cell Site Simulator

CELL/OTD 01500

Wireless Tracking Execution

Wireless tracking will be executed as follows:

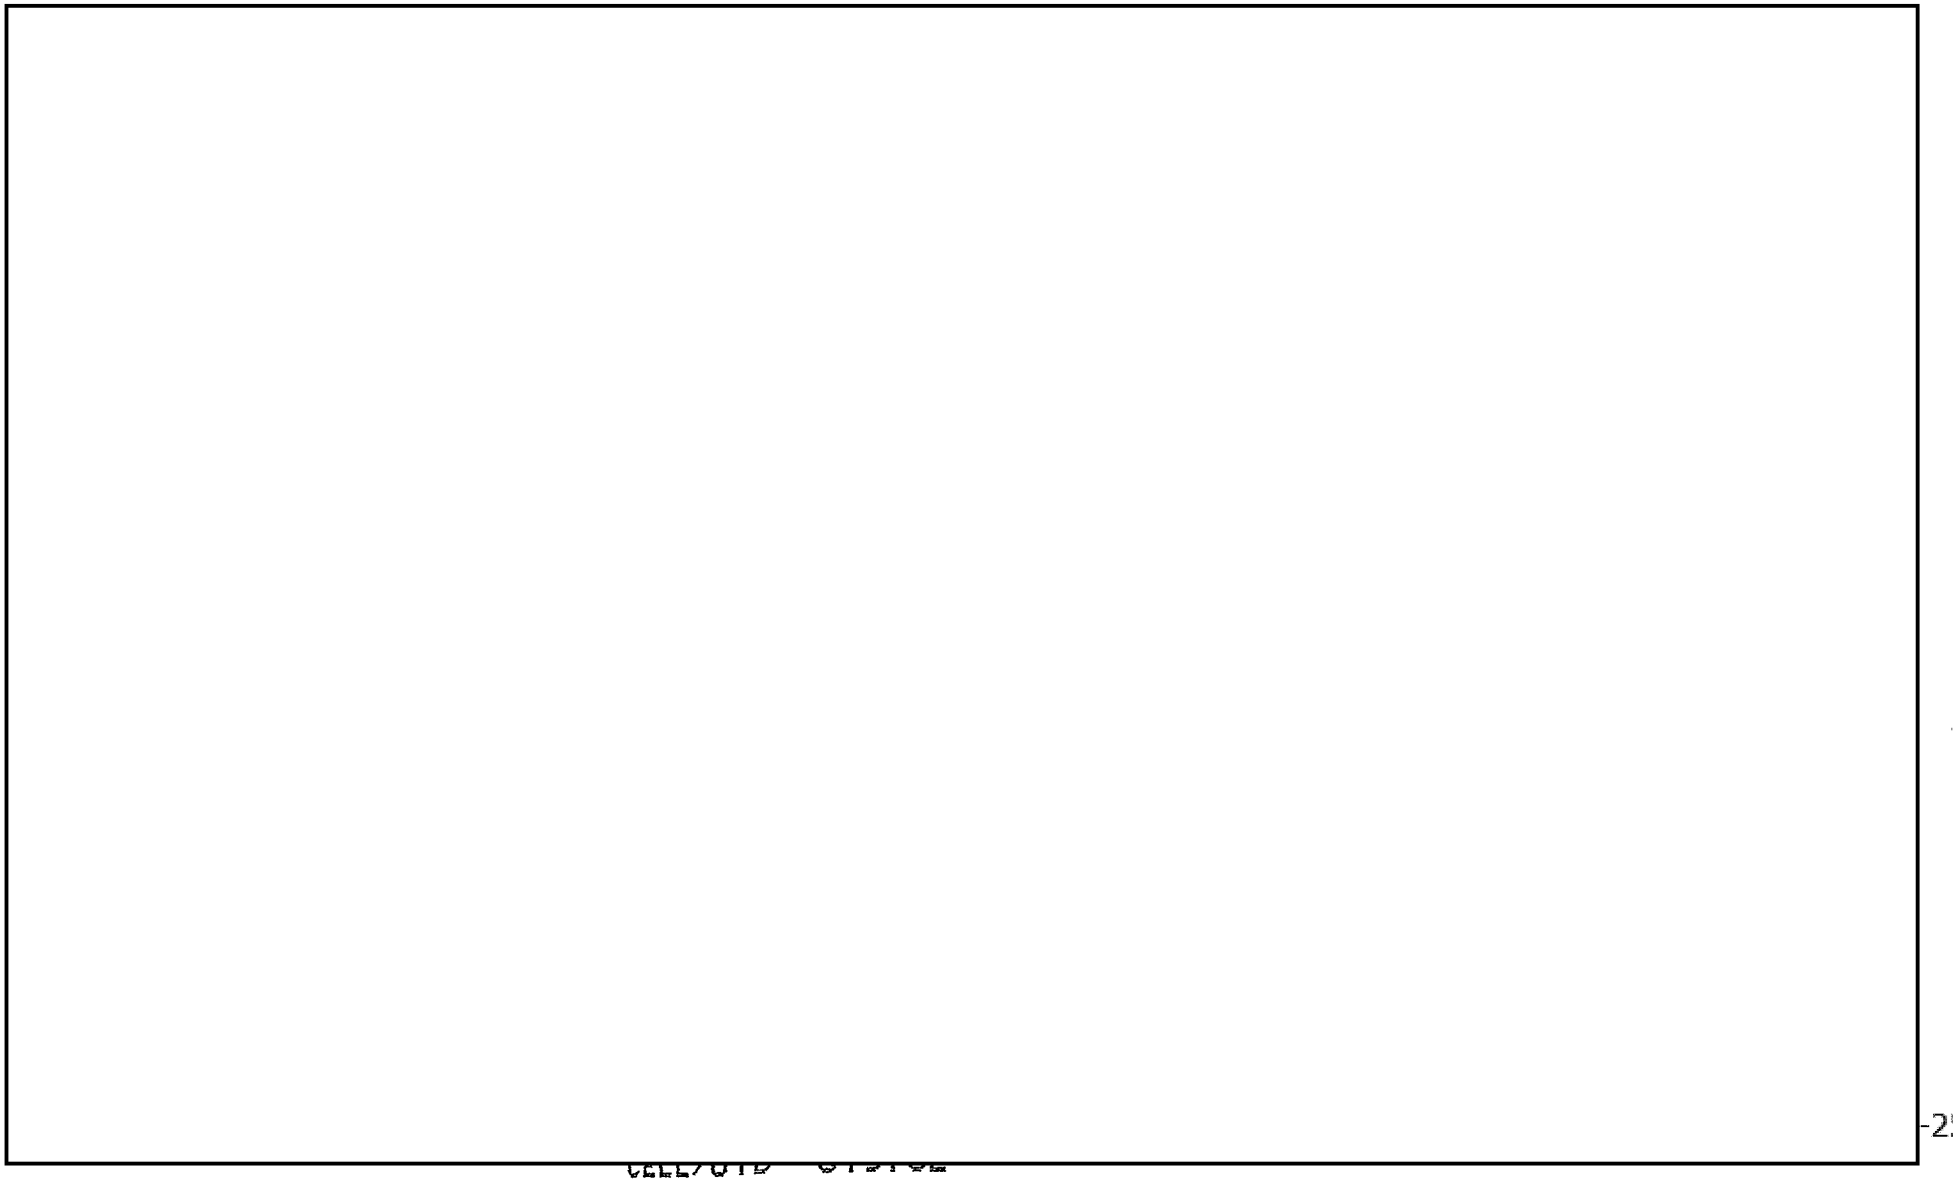
b3
b7E



WITT Missions

b3
b7E

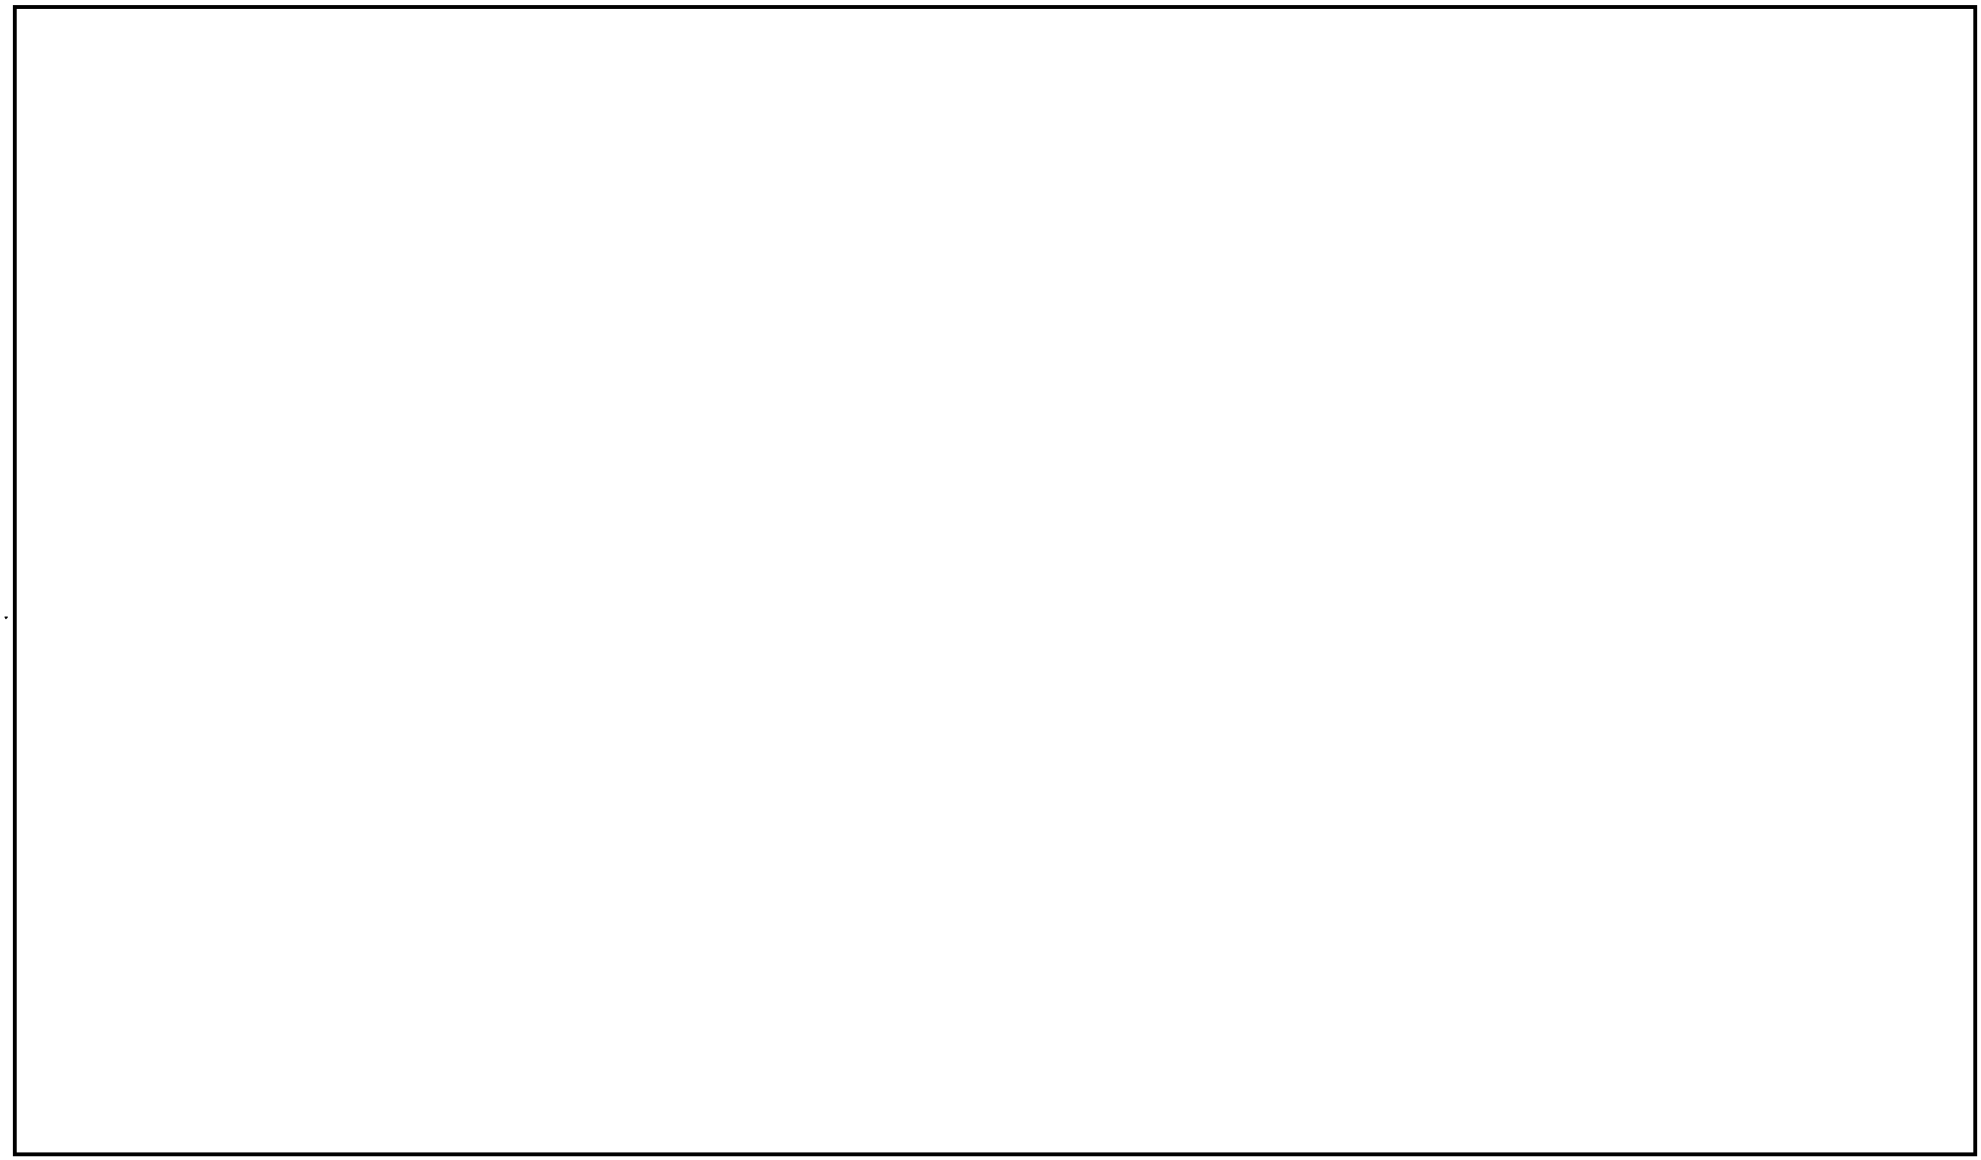
WITT supports two types of missions



-2598

Modes of Operation:

b3
b7E



Pen Register Device: 18 USC 3127(3)

Old Definition

- "pen register" means a device which records or decodes electronic or other impulses which **identify the numbers dialed or otherwise transmitted on the telephone line to which such device is attached....**

New Definition

- "pen register" means a device ***or process*** which records or decodes ***dialing, routing, addressing, or*** **signaling** ***information*** **transmitted by an instrument or facility from which a wire or electronic communication is transmitted,** ***provided, however, that such information shall not include the contents of any communication....***

USA Patriot Act Definition

b7E

DOJ/CCIPS & OEO:

a cellphone is an "**instrument or facility from which a communication is transmitted**"

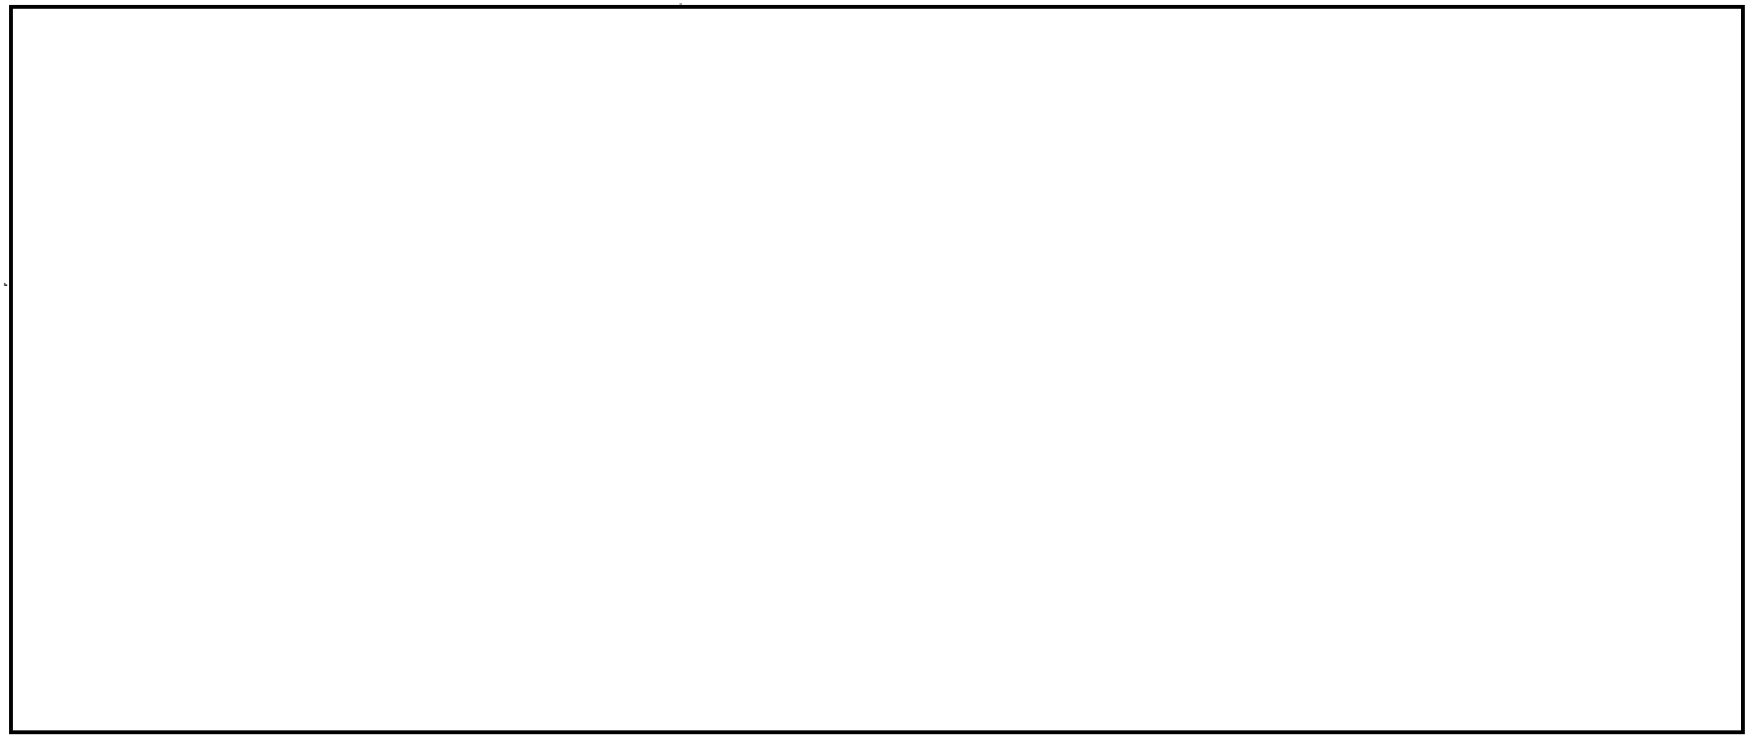
- ✓ A device that captures any "**Signaling information**" transmitted by cellphone" is a "pen register device"
- ✓ **"signaling information":** any non-content information "transmitted by" a telephone instrument

✓ Hence a PenRegister Order is required to use WITT

WITT Pen Register— BEST PRACTICES

BEST PRACTICES:

b3
b5
b7E



Disruption of Service:

b3
b5
b7E

18 USC 3124: requires that a pen register be implemented with "minimum of interference" to those accorded service-

47 U.S.C. § 333 prohibits interference with cellular frequencies

Purge Non-Target Data

Legitimate reasons for purging: [redacted]

b3
b5
b7E

- Avoid retaining data on innocent users: preserve 1st Amendment rights & Minimize non-target data

[redacted]

- U.S. v. Balzano, 687 F.2d 6 (1st Cir 1982) (USSS Nigra recording, re-recorded onto device, but lost "original" removable medium—destruction of original recording on the device was not done in bad faith b/c nature of equipment and agency practice was such that original was erased in the re-recording process)

[redacted]

Alternative authority

Consent (18 USC 3121(b)(3)) "Implied Consent" IF seeking info from **victim's** phone—not e.g., a Fugitive's phone.

Voluntary Disclosure by Provider (18 USC 2702(c)(4)) : if provider in good faith believes that an emergency involving immediate danger of death or serious physical injury to any person requires disclosure without delay of: "a record or other information pertaining to a subscriber or customer of such service." b3 b5 b7E

SITE-2608

4th Amendment Privacy Interest

- **Fourth Amendment: no privacy interest in registration information**
  - like dialed numbers voluntarily conveyed to the phone company and "exposed" to its equipment in the normal course of business. Smith v. Maryland, 442 U.S. 435, 744 (1979).
    - no legitimate expectation of privacy in information knowingly conveyed to a third party
    - In re Digital Analyzer found "[n]o logical distinction between telephone numbers called and a party's own telephone number (or ESN number), all of which are regularly voluntarily exposed and known to others. 885 F. Supp. at 199 (citing Smith v. Maryland, 442 U.S. 735, 742-45 (1979)). b3 b5 b7E
- [redacted]

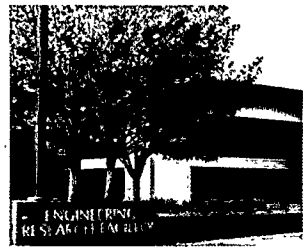
Legal Update

Science & Technology Law Unit, OGC



Agenda

- Geolocating:
  - Cellular "GPS" v. CellSite data
  - WITT & [redacted] b7E
  - Role of 3rd Party-provider & 4th Amendment
- Emergency Disclosure
  - Prospective vs. Stored
  - Records vs. Contents
  - Authorities & Immunity
- *Warshak* (6th Cir)
  - 4th Amendment & Stored Content
  - Role of 3rd Party-Provider
  - Ramifications: e.g., PCTDD-content

Locating a Cell Phone

1. **Cell Site Data** —tower/sector
2. **Witt ---**Wireless Intercept & Tracking Team; i.e., [redacted] b7E
3. **Geolocation** —from provider
   1. Handset-based (GPS)
   2. Network-based (signal strength triangulation)

Cell site Court Decisions

1. CALEA prohibits collecting location information "solely pursuant" to a PR/TT
2. 18 USC 2703(d) (stored communication act) only applies to historical records; can't authorize prospective disclosure of location information for "records" that don't yet exist.
3. [redacted]

b7E

Opinions Since August 2005

[redacted]

b5

- DOJ position since 1994: invoke § 2703(d) in combination with pen/trap ("hybrid theory")
  - [redacted]

Access to Historical Location Data

- Past tower/sector records available using 2703(d) order
  - [redacted] b5
- Historical GPS data typically does not exist
  - some exceptions exist, such as "kiddie-tracking" phones where logging is expressly part of service

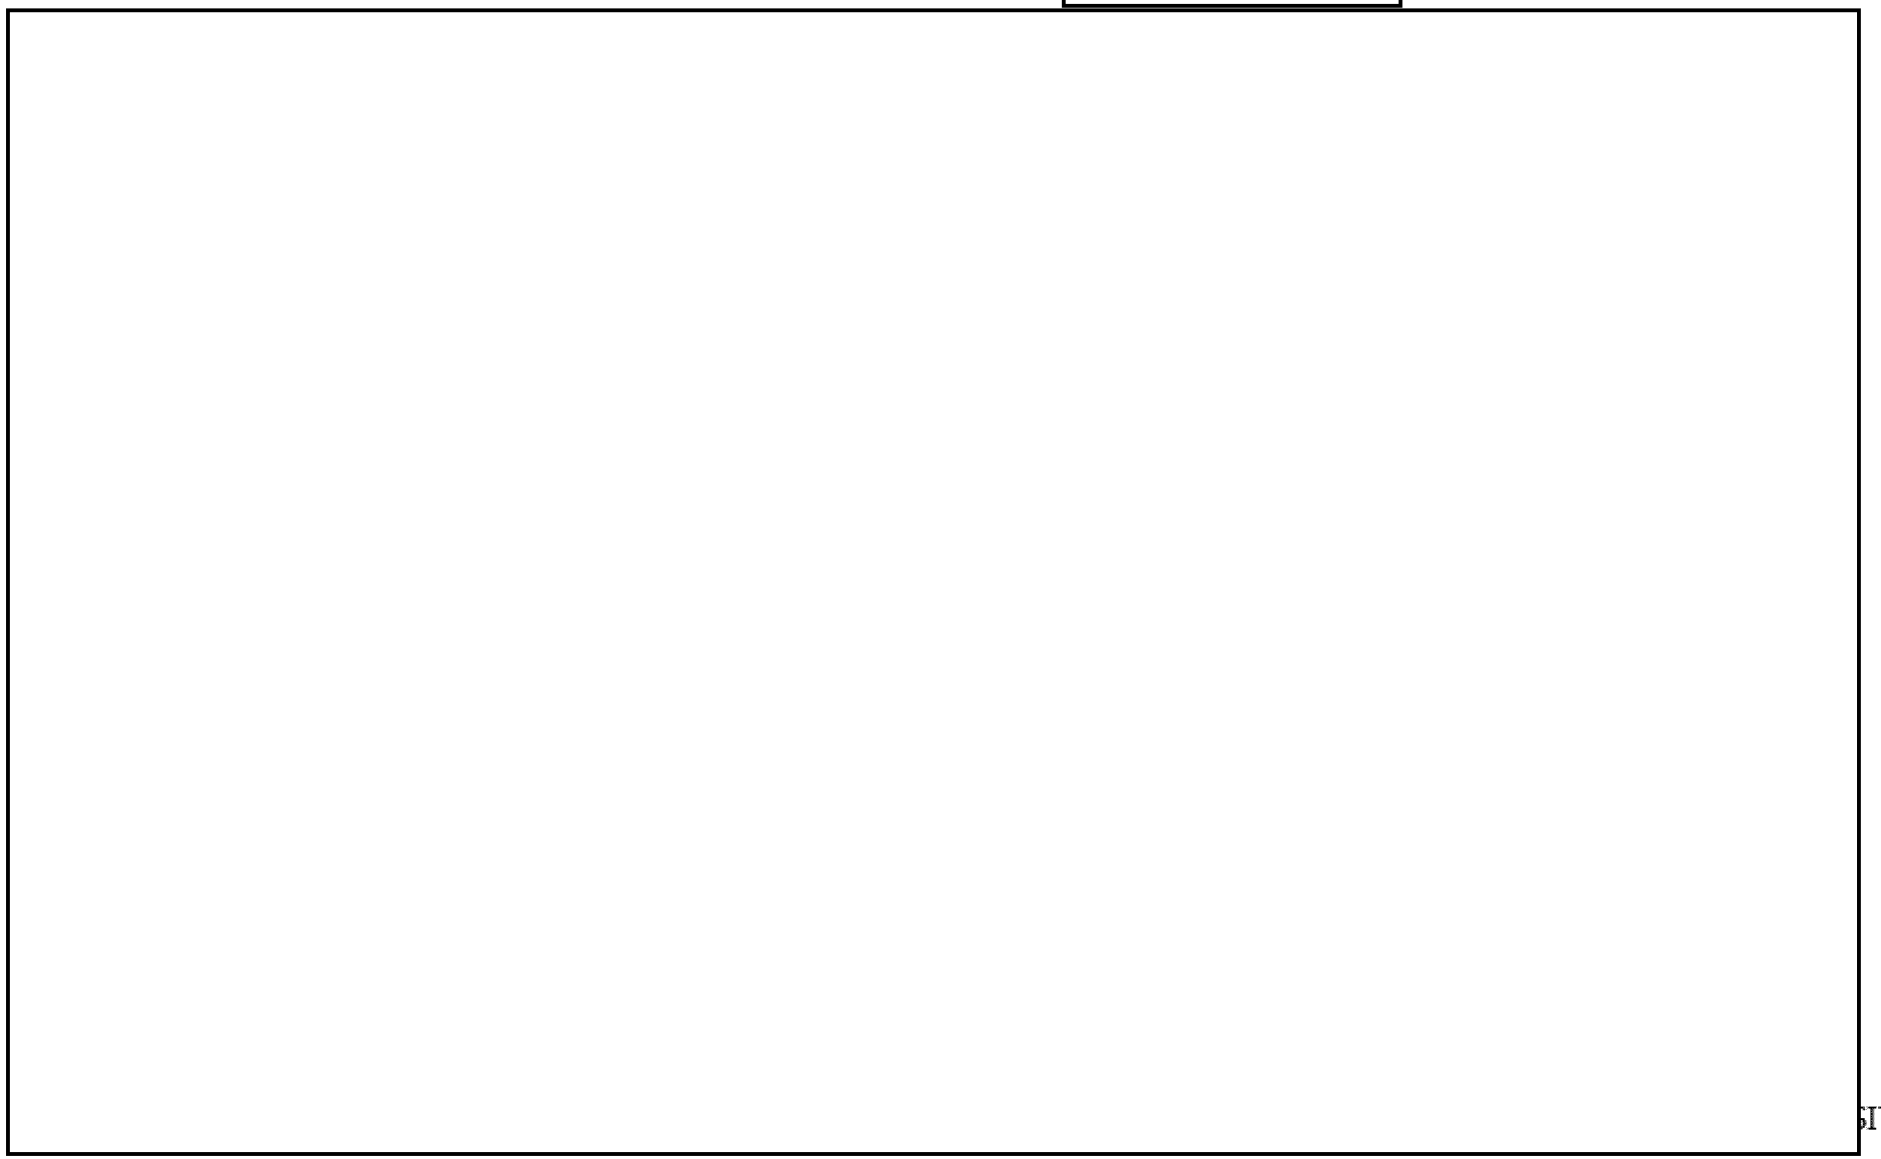
GEOLocation Data—E911

- FCC "Enhanced 911" mandate requires wireless telephone carriers to be able to deliver certain location data for 911 calls
- Carriers implement this capability in either of 2 ways:
  - **"Handset solution": GPS**
  - FCC requires accuracy:
    - to 50 meters for 67% of calls
    - to 150 meters for 95% of calls
  - **"Network solution": Triangulation**
  - FCC requires accuracy:
    - to 100 meters for 67% of calls
    - to 300 meters for 95% of calls

Is GPS Data Protected by the Fourth Amendment?:

b5

Is Geolocation Data Protected by the Fourth Amendment?:



b5

"Tracking Devices": Rule 41 and 18 U.S.C. § 3117

- Rule 41 amended 12/1/06 to add procedures for use of "tracking devices" (R. 41(b)(4))
- Cross-reference to § 3117 definition
  - "an electronic or mechanical device which permits the tracking of the movement of a person or object"

[redacted] b5

- *Warshak* 6th Cir
  1. 4th Amendment & Stored Content
  2. Role of 3rd Party-Provider
  3. PCTDD-content

Stored Contents

Warshak 6th Cir. (June 18, 2007)

- Mail/wire fraud investigation of owner of Berkeley Premium Neutaceuticals, Inc.; compelled stored emails—older than 180 days--w/ 2703(d) order & **delayed notice** under (2703(b)(1)(B)).

4th Amendment requires

1. P/C for warrant;
2. Reasonableness for Subpoenas; why:
   1. b/c there's prior notice w/ Subpoenas and so may be challenged before disclosure made; or
   2. When disclose info to 3rd party, no REP vis-à-vis that 3rd party b/c one disclosing assumes the risk that 3rd party may disclose the "shared information"

- Issue: whether user maintains REP in emails vis-à-vis 3rd party ?

Warshak: stored email (cont.)

Holding: Enjoined gov't from compelling disclosure from provider of stored emails **unless**:

1. P/C based warrant—particularly describing emails subject to search (2703(a));
2. Prior notice to subscriber and ct order under 2703(d); or
3. ISP has: "complete access" & actually relies on & uses this access in the "normal course of business"
    1. Gov't can show Specific & Articulable facts that —e.g.,if in Terms of Service, e.g., ISP notified customer & also utilized its right to "inspect, monitor and audit the content of emails" then NO REP
    2. Mere ability to access is not enough to waive REP.
    3. Scanning/screening all email for viruses, spam, impressible conduct (e.g., pornography) does not diminish REP, b/c automated process--No human review & analogous to post office scanning for drugs or explosives—i.e. like a drug-dog sniff

        Query would this theory permit the Gov't to use keyword screening for pornography or other illegal activity on the ground that it doesn't infringe a REP?

PCTDD -Content

ISSUE: Does 4th Amendment bar collection of PCTDD-Content pursuant to PR/TT & absent P/C–asked the EDNY MJ

1. **Role of 3rd party:** Gov't argued no REP in PCTDD-content b/c providers have ability to access such "dialed number" data in ordinary course of business when required, e.g., to investigate fraud, misuse, etc.; so user assumes the risk that provider can and will access.

b5

2. Gov't also argued the limited nature of communicative value of "numerical communications" reduces REP, so when coupled with knowing disclosure to provider and provider's access/use to process data = no REP so PR/TT standard "reasonable" for 4th amendment purposes.

Geolocation Data

Role of 3rd Party-provider & 4th Amendment

- Warshak STD: "complete access" & actually relies on & uses this access in the "normal course of business"
- CellSite data: yes
- Cellular "GPS" & triangulation:
- WITT &

CELL/OTD 024506

CELLSITE-2808

WITT
Wireless Intercept and Tracking Team

Pen Register Device: 18 USC 3127(3)

CELL/OTD 024507

Old Definition

- "pen register" means a device which records or decodes electronic or other impulses which **identify the numbers dialed or otherwise transmitted on the telephone line to which such device is attached….**

New Definition

- "pen register" means a device ***or process*** which records or decodes ***dialing, routing, addressing, or*** **signaling** ***information*** **transmitted by an instrument or facility from which a wire or electronic communication is transmitted,** ***provided, however, that such information shall not include the contents of any communication****….*

CELLSITE-2809

WITT
Wireless Intercept and Tracking Team

New Law: USA Patriot Act

- **§ 3127 Pen Register device or process:**
  - "records or decodes dialing, routing, addressing, or signaling information
  - transmitted by an instrument or facility from which a wire or electronic communication is transmitted"

DOJ/CCIPS:

USMS Fugitive Authorities

CELL/OTD 024510

STATE LAW FUGITIVES:

- **U.S. Marshals (including FBI agents serving as deputy marshals)** are authorized to investigate fugitive matters "as directed by the Attorney General." 28 USC 566(e)(1)(B)
  - Includes pursuit of fugitives wanted on state warrants when done pursuant to a "special apprehension program" (e.g., Fugitive Investigative strike teams) approved by the Attorney General;
  - IF the investigation of a state fugitive is conducted pursuant to such an authorized "special apprehension program" then the US Marshall is, in effect, executing "federal law" within the State; AND
  - USMS "May exercise the same powers which a sheriff of the State may exercise in executing the laws thereof" (28 USC 564), **INCLUDING the power to arrest a state law fugitive**
    - DOJ, Office of Legal Counsel memo to FBI, General Counsel: "Authority to Pursue Non-Federal Fugitives" (Feb. 21, 1995).

CELLSITE-2812

CELL/OTD 024511

- Agents of the Unites States Marshals Service have sole and inherent authority among federal law enforcement to pursue non-federal fugitives. 28 U.S.C. § 566(e)(1)(B). Pursuant to the Attorney General's National Anti-Violent Crime Initiative, the Presidential Threat Protection Act of 2000 (Pub. L. 106-544), and the Department of Justice Policy on Fugitive Apprehension (Aug. 11, 1988), when participating on a task force duly-sanctioned by a U.S. Attorney's Office, the Service is allocated federal funds and is expressly tasked with investigating and apprehending violent or otherwise significant state fugitives. No federal charge, such as Unlawful Flight to Avoid Prosecution, is necessary.

CELLSITE-2813

WITT
Wireless Intercept and Tracking Team

FBI SAs as Deputy USMS

CELL/OTD 02452/2

An FBI agent serving as **a Deputy US Marshall** could also arrest a state law fugitive under the same lawful authority.

- BUT if **not deputized**, FBI agents have the authority to investigate/arrest state law fugitives ONLY
  - **if there is a reasonable indication that the state law fugitive will violate the Fugitive Felons Act (FFA or UFAP),**

Qualified Privilege

CELL/OTD 024539

- **Compare, United States v. Van Horn**, 789 F.2d 1492 (11th Cir.), cert. denied, 479 U.S. 854 (1986) (concealed microphone in office, defendant sought information about location of device claiming necessary to demonstrate that voices on tape could have been distorted by way mic was hidden and the distortion led to misidentification of the voice), recognized a qualified government privilege not to disclose sensitive investigative techniques.

b5

- **With United States v. Foster**, 986 F.2d 541, 543 (D.C. Cir. 1993) (defendant sought location of observation post: officer's observation of drug transaction was key evidence implicating defendant; surveillance not taped or photographed, so no alternative evidence for jury to examine to determine whether surveillance post provided clear view from which officer could make accurate identification of defendant).

CELLSITE-2841

WITT
Wireless Intercept and Tracking Team

Qualified Privilege (cont).

- U.S. v. Garey, 2004 WL 2663023 (M.D.Ga. Nov. 15, 2004)
  - Defendant sought nature & details of pen register used to determine the geographical location of a cellular phone
  - Court found the information protected by qualified investigative techniques privilege & national security privilege
  - Balanced government's interest in maintaining privilege with Defendant's need for the information
- Defendant had the Product of the Surveillance: the cellphone used in making threatening calls was found in defendant's house during search of residence;

Wireless Glossary of Terms

Last Updated: July 2011

3G / 4G: A general term that refers to new wireless technologies which offer increased capacity and capabilities delivered over digital wireless networks.

Air Interface: The operating system of a wireless network. Technologies include AMPS, TDMA, CDMA, GSM and iDEN.

AMPS: Advanced Mobile Phone Service (AMPS) is the original analog "cellular" service transmission standard first deployed in the United States, still used as a default standard for cellular systems in the U.S., and in some regions around the world.

Analog: The traditional method of adapting radio signals so they can carry information. AM (Amplitude Modulation) and FM (Frequency Modulation) are the two most common analog systems. Analog has largely been replaced by digital technologies, which are more secure, more efficient and provide better quality.

Antenna: A device for transmitting and receiving radiofrequency (RF) signals. Often camouflaged on existing buildings, trees, water towers or other tall structures, the size and shape of antennas are generally determined by the frequency of the signal they manage.

App (Application): Downloadable tools, resources, games, social networks or almost anything that adds a function or feature to a wireless handset which are available for free or a fee.

Base Station: The central radio transmitter/receiver that communicates with mobile telephones within a given range (typically a cell site).

Bluetooth: The name for a technological standard (a communications protocol) that enables mobile devices equipped with a special chip to send and receive information wirelessly. Using Bluetooth, electronic devices such as desktop computers, wireless phones, electronic organizers and printers can communicate over short-ranges using the 2.4 GHz spectrum band.

Bonded copper: Aggregating DSL circuits together to boost throughput.

BREW: Binary Runtime Environment for Wireless is a service application developer's platform. The BREW platform was introduced by QUALCOMM in 2001 to provide developers with the ability to create a wide variety of applications that users can download wirelessly via any BREW-enabled handset. Thanks to common standards, software applications will automatically work on new device models.

Broadband: A transmission facility having a bandwidth (capacity) sufficient to carry multiple voice, video or data channels simultaneously. Broadband is generally equated with the delivery of increased speeds and advanced capabilities, including access to the Internet and related

services and facilities.

BTA (Basic Trading Area): A geographic area designed by Rand McNally to reflect business centers, and adopted by the FCC for the licensing of Personal Communications Services and some other wireless services. BTAs are composed of several neighboring counties associated by business and commuting patterns. The U.S. is divided into 493 BTAs.

Carrier: Also known as a service provider or network operator, a carrier is the communications company that provides service to end user customers or other carriers. Wireless carriers provide their customers with service (including air time) for their wireless phones.

Cache (or Cookie): Many websites store the initial visit so that when the mobile device user visits again, the data from the same website can appear faster.

CDMA (Code Division Multiple Access): A technology used to transmit wireless calls by assigning them codes. Calls are spread out over the widest range of available channels. Then codes allow many calls to travel on the same frequency and also guide those calls to the correct receiving phone. In the U.S., CDMA carriers include: Alaska Communications System, Carolina West, CellCom/nSight, Bluegrass Cellular, Leap Wireless, Sprint, U.S. Cellular and Verizon Wireless.

CDMA2000 1XRTT: The first step in the evolution to 3G is cdma2000 1X, which improves packet data transmission capabilities and speeds in the network, and also boosts voice capacity. (Speed of up to 307 kbps.)

CDMA2000 1XEV-DO (Evolution Data-Only): CDMA2000 1XEV represents the second step in the evolution of CDMA2000. Commercially launched in 2001, offers data speeds of up to 2.4 Mbps.

CDMA2000 1XEV-DV (Evolution Data-Voice): CDMA2000 1XEV represents the next step in the evolution of CDMA2000. Approved by the International Telecommunications Union (ITU), a standards body based in Geneva, as a 3G technology to provide data and voice services together, with data rates of up to 3.09 Mbps.

Cell: The basic geographic unit of wireless coverage. Also, shorthand for generic industry term "cellular." A region is divided into smaller "cells," each equipped with a low-powered radio transmitter/receiver. The radio frequencies assigned to one cell can be limited to the boundaries of that cell. As a wireless call moves from one cell to another, a computer at the Mobile Telephone Switching Office (MTSO) monitors the call and at the proper time, transfers the phone call to the new cell and new radio frequency. The handoff is performed so quickly that it's not noticeable to the callers.

Cell Site: The location where a wireless antenna and network communications equipment is placed in order to provide wireless service in a geographic area.

Cell Splitting: A means of increasing the capacity of a wireless system by subdividing one cell into two or more smaller cells.

Channel/Circuit: A communications pathway that may take the form of a connection established over wireless, wired, or fiber optic facilities.

CSD (Circuit Switched Data): One technological approach used for the exchange of data. A circuit connection is made that is exclusively reserved for the individual's use. This can be inefficient, as many communications do not require a dedicated communications channel, and offers only brief connectivity primarily used for the transmission of short messages.

CMRS (Commercial Mobile Radio Service) Provider: An FCC designation for any wireless carrier or license owner whose wireless service is connected to the public switched telephone network and/or is operated for profit. Wireless services that are offered to the public are classified as CMRS, unlike private systems which are classified as "Private Mobile Services."

Co-Location: Placement of multiple antennas at a common site. Some companies act as brokers or cell site managers, arranging cell sites and coordinating many carriers' antennas at a single cell site.

Common Short Codes (CSC): Five– or six–digit numbers which allow wireless devices to send text messages for value-added services such as tele-voting campaigns, mobile coupons, charitable donations and other programs.

Contract Plan (Post-Paid): The most popular cell phone plan in which a subscriber agrees to a contract for certain period of time, usually a year or two and in exchange, the carrier provides the customer with a lower monthly rate and subsidized handset. There may be a fee if you want to cancel the contract before it expires, also known as an "early termination fee." CTIA developed a voluntary Consumer Code to help consumers make informed choices when selecting their wireless service.

Digital: Technological approach that converts signals (including voice) into the binary digits '0' and '1'. This data is compressed, and then transformed into electronic pulses for a wired network, optical light waves for fiber optic networks or radio waves for wireless networks. Digital wireless technology has largely superseded analog technology, because digital delivers more capacity and supports more applications, as well as offers better sound quality, and more secure signals.

DSL (Digital Subscriber Line): A digital line connecting the subscriber's terminal to the serving company's central office, providing multiple communications channels able to carry both voice and data communications simultaneously.

Dual Band: A wireless handset that works on more than one spectrum frequency, e.g., in the 800 MHz frequency and 1900 MHz frequency bands.

EDGE: Enhanced Data Rate for Global Evolution is an evolutionary step in the GSM-development path for faster delivery of data, delivered at rates up to 384 Kbps. The standard is based on the GSM technology platform and uses the TDMA approach (see TDMA, below).

ESN (Electronic Serial Number): The unique serial identification number programmed into a wireless phone by the manufacturer. Each time a call is placed, the ESN is transmitted to a nearby base station so the wireless carrier can validate the call. The ESN differs from the Mobile Identification Number, which identifies a customer's wireless phone number. MINs and ESNs are electronically monitored to help prevent fraud.

Evolution-Data Optimized (EVDO): The third generation CDMA technology. The U.S. had 74.6 million subscribers in 4Q 2009 out of 124.6 million (or 23 percent of all subscribers). This means the U.S. had 60 percent of all EVDO subscribers in the world.

Federal Communications Commission (FCC): An independent U.S. government agency responsible with regulating interstate and international communications by radio, television, wire, satellite and cable. This includes all aspects of the wireless industry such as devices, policies, programs and outreach initiatives.

Facility-based Wireless Carrier: A provider of wireless services that owns the physical network used to deliver those services. *See contra* MVNO, a provider that leases capacity on a facilities-based provider network.

Federal Regulatory Fee: Annual communications regulatory fees as mandated by Congress. The fees require the FCC to recover the regulatory costs associated with its enforcement, policy and rulemaking, user information, and international initiatives.

Federal Trade Commission (FTC): The only federal U.S. agency with both consumer protection and competition jurisdiction in broad sectors of the economy. The FTC pursues vigorous and effective law enforcement; advances consumers' interests by sharing its expertise with federal and state legislatures and U.S. and international government agencies; develops policy and research tools through hearings, workshops, and conferences; and creates practical and plain-language educational programs for consumers and businesses in a global marketplace with constantly changing technologies.

Femtocell: A small cellular base station or access point that is used in homes or offices to deliver wireless traffic to service providers via pre-existing broadband connections. This allows for improvement of coverage in small (typically indoor) areas without requiring the addition of new full-sized cellular sites.

FDD (Frequency Division Multiplexing): Frequency-division multiplexing is a method in which numerous signals are combined for transmission on a single communications channel. Each signal is assigned a different frequency (subchannel) within the main channel.

Filters: Most wireless carriers provide parents with the ability to filter Internet content accessed on a wireless phone on their network.

GPRS (General Packet Radio Service): A packet technology approach that enables high-speed wireless Internet and other GSM-based data communications. It makes very efficient use of available radio spectrum for transmission of data.

GPS (Global Positioning System): A worldwide satellite navigational system, made up of a constellation of satellites orbiting the earth and their receivers on the earth's surface. The GPS satellites continuously transmit digital radio signals, with information used in location tracking, navigation and other location or mapping technologies.

GSM (Global System for Mobile Communications): A technological approach also based on dividing wireless calls into time slots. GSM is most common in Europe, Australia and much of Asia and Africa. Generally, GSM phones from the United States are not compatible with international GSM networks because the U.S. and many other nations use different frequencies for mobile communications. However, some phones are equipped with a multi-band capability to operate on such other frequencies. In the U.S., GSM carriers include: AT&T, DoCoMo Pacific, GCI Communications, TerreStar, Westlink and T-Mobile.

Handoff: The process when a wireless network automatically switches a mobile call to an adjacent cell site.

HSCSD (High Speed Circuit Switched Data): In using HSCSD a permanent connection is established between the called and calling parties for the exchange of data. As it is circuit switched, HSCSD is more suited to applications such as videoconferencing and multimedia than 'bursty' type applications such as email, which are more suited to packet switched data.

HSPA (High Speed Packet Access): The third generation of GSMA technology. The U.S. had 24 million subscribers out of the 200 million total which means the U.S. had 24 percent of all HSPA subscribers in the world for 2Q 2009.

iDEN (Integrated Digital Enhanced Network): A specialized mobile technology that combines two-way radio, telephone, text messaging and data transmission into one digital network. iDEN is designed to give users quick access to information on a single device. Introduced by Motorola and used by AirTel Montana, Nextel Communications, Nextel Partners, and Southern LINC Wireless, among others.

Interconnection: Connecting one network to another, such as a wireless network to a local telephone company's wireline network.

Interoperability: The ability of a network to coordinate and communicate with other networks, such as two systems based on different protocols or technologies.

LAN (Local Area Network): Is a small data network covering a limited area, such as a building or group of buildings. Most LANs connect workstations or personal computers. This allows many users to share devices, such as laser printers, as well as data. The LAN also allows easy communication, by facilitating e-mail or supporting chat sessions.

Location Based Services (LBS): An information, advertising or entertainment service that uses the geographical position of a cell phone. CTIA developed voluntary Best Practices and Guidelines for Location-Based Services to promote and protect user privacy.

LTE (Long Term Evolution): The next-generation network beyond 3G. In addition to enabling fixed to mobile migrations of Internet applications such as Voice over IP (VoIP), video streaming, music downloading, mobile TV and many others, LTE networks will also provide the capacity to support an explosion in demand for connectivity from a new generation of consumer

devices tailored to those new mobile applications.

Machine-to-Machine (M2M): Applications or mobile units that use wireless networks to communicate with other machines. These applications may include telemetry and telematic devices, remote monitoring systems (e.g. smart grid, healthcare, transportation, etc) and other devices that provide status reports to businesses' centers (e.g. operations, traffic management, data management, etc).

Megahertz (MHz): Is a unit of frequency equal to one million hertz or cycles per second. Wireless mobile communications within the United States generally occur in the 800 MHz, 900MHz and 1900MHz spectrum frequency bands.

mHealth (Mobile Health): The use of mobile devices and technology in health care. This includes text message reminders to prompt them to take medication, follow a certain diet, engage in physical activity, check glucose levels, monitor blood pressure and more. It can also be used to monitor patients' health and track and guide self-care beyond the doctors' offices.

mLearning (Mobile Learning): Education that takes advantage of the opportunities mobile devices provides, including not being prohibited by location. This includes sending text messages for in-class participation or voting, accessing the mobile Internet for information or conducting homework assignments.

MIN (Mobile Identification Number): The MIN, more commonly known as a wireless phone number, uniquely identifies a wireless device within a wireless carrier's network. The MIN is dialed from other wireless or wireline networks to direct a signal to a specific wireless device. The number differs from the electronic serial number, which is the unit number assigned by a phone manufacturer. MINs and ESNs can be electronically checked to help prevent fraud.

MSA (Metropolitan Statistical Area): One of the 306 urban-centered cellular service areas based on the largest urban markets as designated by the U.S. government in 1980. Two "cellular" service operators are licensed in each MSA.

MTA (Major Trading Area): A geographic area designed by Rand McNally to reflect business centers, and adopted by the FCC for the licensing of Personal Communications Services and some other wireless services. MTAs are composed of neighboring basic trading areas (BTAs) associated with major business centers. The U.S. is divided into 51 MTAs, which do not reflect state boundaries.

MTSO (Mobile Telephone Switching Office): The central computer that connects wireless phone calls to the public telephone network. The MTSO controls the series of operations required to complete wireless calls, including verifying calls, billing and antenna handoffs.

MVNO (Mobile Virtual Network Operator): A company that buys network capacity from a network operator in order to offer its own branded mobile subscriptions and value-added services to customers. **NAM (Number Assignment Module):** The NAM is the electronic memory bank in the wireless phone that stores its specific telephone number and electronic serial number.

Number Pooling: A means by which phone numbers are conserved, and the need to create new area codes is reduced. Unused phone numbers are returned to a central authority which then makes them available to other carriers based on need. Carriers receive numbers in blocks

of 1,000, not 10,000 as was originally the case. Smaller blocks of numbers reduce the carriers' cost and maximize the availability of new numbers to meet public demand.

Number Portability: The ability of a customer to retain their telephone number when changing service providers in a specific area, whether changing from one wireless company to another, one wireline company to another, or between wirelesss and wireline companies.

Operating System (OS): As of August 2010, there are 10 wireless operating system platforms. They are: Android (Open Handset Alliance); BlackBerry OS (Research in Motion); BREW (Qualcomm); Java (Sun Microsystems); LiMo (Open Source Linux for Mobile); iOS (Apple); Palm OS (Palm); WebOS (Palm); Windows Mobile (Microsoft); and bada (Samsung).

OFDM (Orthogonal Frequency Division Multiplexing): A system for the transmission of digital message elements spread over multiple channels within a frequency band, in order to achieve greater throughput while minimizing interference and signal degradation through the use of multiple antennas.

Packet: A piece of data sent over a packet-switching network, such as the Internet. A packet includes not just the data comprising the message but also address information about its origination and destination.

Packet Data: Information that is reduced into digital pieces or 'packets', so it can travel more efficiently across networks, including radio airwaves and wireless networks.

Parental Control Tools: Services offered by wireless carriers or third parties or built-in to a wireless device that allow parents to limit or monitor their child's cell phone use. CTIA developed voluntary Guidelines for Carrier Content Classification and Internet Access.

PCS (Personal Communications Services): Defined by the FCC as a broad family of wireless services, commonly viewed as including two-way digital voice, messaging and data services. One set of "PCS" licenses established by the FCC operates in the 1900 MHz band.

PDA (Personal Digital Assistant): A portable computing device capable of transmitting data. These devices offer services such as paging, data messaging, e-mail, computing, faxes, date books and other information management capabilities.

PIN (Personal Identification Number): An additional security feature for wireless phones, much like a password. Programming a PIN into the Subscriber Information Module (SIM) on a wireless phone requires the user to enter that access code each time the phone is turned on.

POPs: For wireless, POPs generally refers to the number of people in a specific area where wireless services are available (the population). For traditional 'landline' communications, a "Point of Presence" defines the interconnection point between the two networks.

Prepaid Plan: This plan allows customers to purchase a pre-determined amount of minutes for a set price and then "re-fill" the minutes at the customer's choice. Some prepaid plans include text messaging and other wireless data services. CTIA developed the voluntary Consumer Code to help consumers make informed choices when selecting wireless service.

Premium Text: Text to or from a commercial entity that delivers news, information, images, ringtones or entertainment for a fee above standard messaging rates.

Privacy Settings: Ability to determine how much personally identifiable information (PII) is shared digitally. Many wireless services and apps allow users to determine the PII available to third parties including friends, advertisers and the general public.

Protocol: A standard set of definitions governing how communications are formatted in order to permit their transmission across networks and between devices.

PSD (Packet Switched Data): A technological approach in which the communication "pipe" is shared by several users, thus making it very efficient. The data is sent to a specific address with a short delay. This delay depends on how many users are using the pipe at any one time as well as the level of priority requested for your information. PSD is the technology used for data communication across the Internet and makes more efficient use of the network.

Public Service/Utility Commission (PSC/PUC): A state government's agency responsible for regulating intrastate communications. Although many states preempt a PSC/PUC's authority to regulate wireless, federal law permits non-preempted states to regulate a wireless carriers' terms and conditions but not rates.

Rating System: A system for classifying and providing information about specific content such as games, music, TV, movies and apps. Wireless carriers and manufacturers may rate content or utilize existing rating system to help parents filter content available to children. (*See* CTIA Wireless Content Guidelines Classification Criteria).

Repeater: Devices that receive a radio signal, amplify it and re-transmit it in a new direction. Used in wireless networks to extend the range of base station signals and to expand coverage. Repeaters are typically used in buildings, tunnels or difficult terrain.

Roaming: When traveling outside their carrier's local service area, roaming allows users to continue to make and receive calls when operating in another carrier's service coverage area.

RSA (Rural Service Area): One of the 428 rural markets across the United States, as designated by the FCC for the delivery of cellular service outside of the initial 306 MSAs.

Smart Antenna: A wireless antenna with technology that focuses its signal in a specific direction. Wireless networks use smart antennas to reduce the number of dropped calls, and to improve call quality and channel capacity.

Smart Phone: Wireless phones with advanced data features and often keyboards. What makes the phone "smart" is its ability to better manage data and Internet access.

SMS: Short Messaging Service enables users to send and receive short text messages (usually about 140-160 characters) on wireless handsets. Usually referred to as "text messaging" or "texting."

SPAM: Unsolicited and unwanted emails or text messages sent to wireless devices. While carriers are constantly filtering their networks to stop SPAM text messages, spammers are

evolving and changing their methods to try to get through. If you receive a SPAM email on your mobile device, file a complaint with the FCC . The FCC's CAN-SPAM ban only applies to "messages sent to cell phones and pagers, if the message uses an Internet address that includes an Internet domain name (usually the part of the address after the individual or electronic mailbox name and the "@" symbol)". The FCC's ban does not cover "short messages," typically sent from one mobile phone to another, that do not use an Internet address.

Spectrum: The radio frequencies that are designated for specific uses, such as personal communications services and public safety.

Spectrum Allocation: Process whereby the federal government designates frequencies for specific uses, such as personal communications services and public safety. Allocation is typically accomplished through lengthy FCC proceedings, which attempt to adapt allocations to accommodate changes in spectrum demand and usage.

Spectrum Assignment: Federal government authorization for the use of specific frequencies within a given spectrum allocation, usually in a specific geographic location. Mobile communications assignments are granted to both private users such as businesses, and commercial providers such as wireless and paging operators. Spectrum auctions and/or frequency coordination processes, which consider potential interference to existing users, may apply.

Spread Spectrum: A method of transmitting a radio signal by spreading it over a wide range of frequencies. This reduces interference and can increase the number of simultaneous users on one radio frequency band.

SIM (Subscriber Identity Module) Card: A small card that fits inside some cell phones and communicates with a wireless network using a unique code. A SIM card can be removed and transferred to another wireless device.

TCP/IP (Transmission Control Protocol/Internet Protocol): A protocol permitting communications over and between networks, the TCP/IP protocol is the basis for the Internet communications.

TDMA (Time Division Multiple Access): A technological standard that permits the transmission of information by dividing calls into time slots, each one lasting only a fraction of a second. Each call is assigned a specific portion of time on a designated channel. By dividing each call into timed 'packets,' a single channel can carry many calls at once.

Telecommunications Relay Service (TRS): A telephone service that allows persons with hearing or speech disabilities to place and receive telephone calls.

Tower Siting: To expand their service offerings and meet consumer demand for "always-on"

broadband, wireless carriers need to be able to build out their networks, which involves constructing new towers or adding new equipment to already existing structures. It enables mobile services, including voice and broadband, for consumers, businesses and public safety. In November 2009, the FCC provided much-needed certainty to the tower siting process by adopting a declaratory ruling which set a definitive time frame for local zoning authorities to act on tower siting requests. The time limit to address requests for collocation is 90 days and the time for addressing requests for new tower construction is 150 days. Local zoning authorities who do not meet the time frames will have "failed to act," giving tower applicants the right to appeal to the courts for action on their requests. Also, a zoning authority may not deny an application filed by one provider based on the presence of another wireless provider in a given area.

Tri-Band Handset: Phones that work on multiple frequencies, typically in the 1900 MHz, 800 MHz, and 900 MHz frequencies used in the U.S. and elsewhere.

Universal Charger Solution (UCS): Developed by the Open Mobile Terminal Platform industry standards group and adopted by GSMA, the UCS (also known as the "one-charger-fits-all") will provide an estimated 50 percent reduction in standby energy consumption. The UCS will use the Micro-USB format as the common universal charging interface and use energy efficient chargers in compliance with the U.S. "Energy Star" requirements for external power adapters. As of January 1, 2012, most of the new smartphones in the U.S. will have UCS.

UMTS (Universal Mobile Telecommunications Systems): This is third generation technology generally based on W-CDMA (Wideband Code Division Multiple Access). UMTS promises a communications speed between 384 kbps and up to about 2 Mbps.

VoIP (Voice over Internet Protocol): VoIP is a two-way communication service that can allow users to communicate via voice or video. Based on IP technology, VoIP is used to transfer a wide range of different type traffic.

Voice Recognition: The capability for wireless phones, computers and other devices to be activated and controlled by voice commands.

WAN (Wide Area Network): A general term referring to a large network spanning a country or around the world. The Internet is a WAN. A public mobile communication system such as a cellular or PCS network is a WAN.

WAP (Wireless Application Protocol): Wireless Application Protocol is a set of standards that enables wireless devices, such as phones, pagers and palm devices, to browse content from specially-coded Web pages.

W-CDMA: Wideband Code Division Multiple Access, one of two 3G standards that makes use of a wider spectrum than CDMA and therefore can transmit and receive information faster and more efficiently.

Wi-Fi® (Wireless Fidelity): Wi-Fi provides wireless connectivity over unlicensed spectrum (using the IEEE 802.11a or 802.11b standards), generally in the 2.4 and 5 GHz radio bands. Wi-Fi provides wireless Internet access to the immediate local area and is used in homes, businesses and other similar settings to allow people to go online without using a cord or wire. Wi-Fi offers local area connectivity to Wi-Fi enabled computers and devices, typically smart phones.

Wi-Max (Worldwide Interoperability for Microwave Access): A wireless technology based on the IEEE 802.16 standard providing metropolitan area network connectivity for fixed and mobile wireless access at broadband speeds.

Wireless Internet: A general term for using wireless services to access the Internet, e-mail and/or the World Wide Web.

Wireless Local Area Network (WLAN): Using radio frequency (RF) technology, WLANs transmit and receive data wirelessly in a certain area. This allows users in a small zone to transmit data and share resources, such as printers, without physically connecting each computer with cords or wires.

Wireless Private Branch Exchange (PBX): Equipment that allows employees or customers within a building or limited area to use wireless devices in place of traditional landline phones.

WLL (Wireless Local Loop): WLL is a system that connects wireless users to the public switched telephone network (PSTN) using wireless technology and other circuitry to complete the "last mile" between the wireless user and the exchange equipment. Wireless systems can often be installed faster and cheaper than traditional wired systems.

WITT

Wireless Intercept and Tracking Team

Cellular Tracking Legal Issues

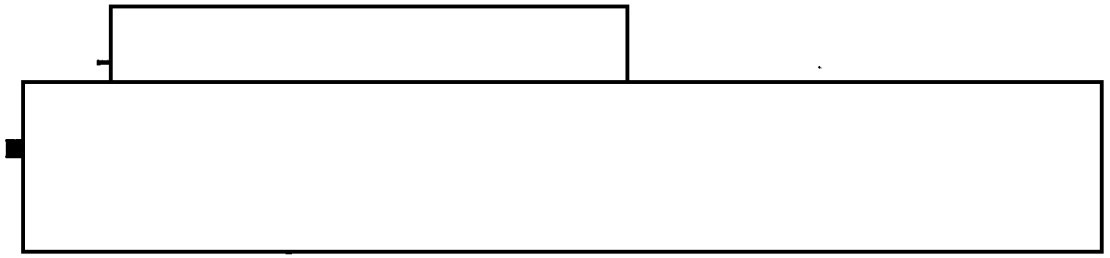
June 7, 2006

WITT
Wireless Intercept and Tracking Team

Overview

- DOJ's Policy on Cellsite Simulators: **Pen Register Device** (18 U.S.C. § 3127(3))
  - **LIABILITY RISKs & Best Practices**

b3
b7E



- Emergency Pen Register Authority
  - Federal v. State Orders
  - Voluntary Disclosures
- Loan of ELSUR Policy
  - **Liability**
- Protecting Sensitive Techniques
  - Use as evidence

CELL/OTD 008203

CELLSITE-11672

WITT
Wireless Intercept and Tracking Team

New DOJ Opinion:

b3
b5
b7E

DOJ/CCIPS: Pen/Trap **order** [redacted] a Pen Register Device) to obtain any "signaling information" transmitted from a cellular telephone to:

1) Identify a target phone **or**
2) Locate a phone

DOJ: **"signaling information"** is any non-content information "transmitted by" a telephone instrument

CELL/OTD 008206

CELLSITE-11675

WITT Pen Register— BEST PRACTICES

BEST PRACTICES:

Use PR/TT order to authorize use of WITT gear

- authorize installation & use
- Advise of potential
- Not retain records beyond use to locate target phone?

b3
b7E
b5

CELL/OTD 002209

WITT
Wireless Intercept and Tracking Team

What is Cell site location data

- is generated by the network for network purposes regardless of a LE order.
- is necessary to Provision of Service & a call cannot be processed without it.
- exists in the network as a **RECORD** prior to its being obtained by LE.
- has no relationship to the content of a communication.
- is delivered to LE under CALEA only at the beginning and end of calls.

CELL/OTD 000214

CELLSITE-11683

WITT
Wireless Intercept and Tracking Team

Cellsite Court Decisions

b3
b5
b7E

- CALEA prohibits collecting location information "solely pursuant" to a PR/TT
- 18 USC 2703(d) (stored communication act)

CELL/OTD 008218

CELLSITE-11687

WITT
Wireless Intercept and Tracking Team

CALEA Delivery of location data

- **Near Real-Time**: CALEA requires carriers to "expeditiously isolates"
  - "call-identifying information": includes cell site information utilized in processing calls
  - for government access "before, during, or immediately after the transmission of a [ ] communication" (i.e., in real-time or near real-time)
- CALEA Standard: location information is delivered after generation of data by the carrier's network and use in the provision of service (e.g., call origination, Answer, call release)

CELL/OTD 008219

CELLSITE-11688

WITT
Wireless Intercept and Tracking Team

Guidance

- [redacted]

b3
b5
b7E

- **AND Use a PR/TT order for WITT gear**
  - [redacted]
    - Advise of [redacted]
    - Not retain records

222000 010/7133

WITT
Wireless Intercept and Tracking Team

Alternative authority

b3
b5
b7E

Consent (18 USC 3121(b)(3))

Voluntary Disclosure by Provider under 18 USC 2702(c)(4) : if provider "reasonably believes that an emergency involving immediate danger of death or serious physical injury to any person justifies the disclosure of" "a record or other information pertaining to a subscriber or customer of such service."

CELL/OTD 008223

4th Amendment Privacy Interest

- [redacted] Smith v. Maryland, 442 U.S. 435, 744 (1979).
  - no legitimate expectation of privacy in information knowingly conveyed to a third party
  - In re Digital Analyzer found "[n]o logical distinction between telephone numbers called and a party's own telephone number (or ESN number), all of which are regularly voluntarily exposed and known to others. 885 F. Supp. at 199 (citing Smith v. Maryland, 442 U.S. 735, 742-45 (1979)).

- *Qualified* Government Privilege in Non-disclosure based on ***Roviaro v. United States*, 353 U.S. 53 (1957):** disclosure of identity (and testimony) of informant.
  - Generally technique, type of device, location of install, etc. is protected b3 b5 b7E
    - unless Defense can establish disclosure is necessary to defense, I.e., no other/adequate means to cross-examine/test evidence; if so:
    - then Balancing of interests
  -
  - see also Jayme S. Walker "The qualified privilege to protect sensitive investigative techniques from disclosure," LEB Vol 69 NO.5 at 26 (May 2000).

Qualified Privilege

- **Compare, United States v. Van Horn**, 789 F.2d 1492 (11th Cir.), cert. denied, 479 U.S. 854 (1986) (concealed microphone in office, defendant sought information about location of device claiming necessary to demonstrate that voices on tape could have been distorted by way mic was hidden and the distortion led to misidentification of the voice), recognized a qualified government privilege not to disclose sensitive investigative techniques. b3 b5 b7E

  -
  -

- **With United States v. Foster**, 986 F.2d 541, 543 (D.C. Cir. 1993) (defendant sought location of observation post: officer's observation of drug transaction was key evidence implicating defendant; surveillance not taped or photographed, so no alternative evidence for jury to examine to determine whether surveillance post provided clear view from which officer could make accurate identification of defendant).

CELLSITE-11703

WITT
Wireless Intercept and Tracking Team

Qualified Privilege (cont).

- U.S. v. Garey, 2004 WL 2663023 (M.D.Ga. Nov. 15, 2004)
  - Defendant sought nature & details of pen register used to determine the geographical location of a cellular phone
  - Court found the information protected by qualified investigative techniques privilege & national security privilege
  - Balanced government's interest in maintaining privilege with Defendant's need for the information
- Defendant had the Product of the Surveillance: the cellphone used in making threatening calls was found in defendant's house during search of residence;
  - Defendant did not need to know how the technology traced the geographic location of the phone.
  - locating the phone in the residence confirmed the accuracy of the geographic surveillance;
  - Moreover,Defendant could challenge the technology used to establish that phone found in residence was the one that actually made the criminal calls.

Court ISSUES:

1. CALEA prohibits collecting location information "solely pursuant" to a PR/TT
2. 18 USC 2703(d) (stored communications act)
3

b3
b5
b7E

CELL/OTD 008244

What is Cell site location data

- is generated by the network for network purposes regardless of a LE order.
- is necessary to Provision of Service & a call cannot be processed without it.
- exists in the network as a RECORD prior to its being obtained by LE.
- has no relationship to the content of a communication.
- is delivered to LE under CALEA only at the beginning and end of calls.

FBI

b3
b7E

CELL/OTD 000245

Carrier's use Location Data in Provision of Service

2 primary forms of location information are supported by wireless networks for various reasons:

1. Serving System: Information regarding the serving system/provider.
2. Tower/Sector information associated with the cell site tower supporting service to the user

CELL/OTD 000246

b3
b7E

Cell Site Data from Provider Pursuant to CALEA STD

- CALEA: technical standard for location parameters (J-STD-025) (http://www.tiaonline.org/standards/search_results2.cfm?document_no=J-STD-025-A www.tiaonline.org)
  - **Origination** (of an outgoing call from target phone)
  - **Answer** (at answer of a call terminating to the target phone)
  - **Release** (at the end of the call for both incoming and outgoing calls)

CELL/OTD 008249

FBI

b3
b7E

CALEA Delivery of location data

- **Near Real-Time**: CALEA requires carriers to "expeditiously isolates"
  - "call-identifying information": includes cell site information utilized in processing calls
  - for government access "before, during, or immediately after the transmission of a [ ] communication" (i.e., in real-time or near real-time)
- CALEA Standard: location information is delivered after generation of data by the carrier's network and use in the provision of service (e.g., call origination, Answer, call release)

AFFIDAVIT OF SUPERVISORY SPECIAL AGENT BRADLEY S. MORRISON

1. I, Bradley S. Morrison, am a Supervisory Special Agent with the Federal Bureau of Investigation. I am assigned as the Unit Chief of the Tracking Technology Unit (TTU), Traditional Technology Section, Operational Technology Division in Quantico, Virginia. I have been an FBI Special Agent since 1996. As the Unit Chief of the TTU, I am responsible for the development, procurement and deployment of technical assets and capabilities to covertly locate, tag and track targets of interest in support of all FBI investigative, intelligence collection and operational programs. As part of these duties, I am responsible for overseeing deployment and monitoring policy compliance governing the FBI's use of equipment to locate cellular devices.

2. On July 16, 2008, FBI technical personnel used equipment to locate an aircard believed to be used by the defendant in this matter, and that equipment falls within the statutory definition of a pen register/trap and trace device. The actual make and model of the equipment used in any particular operation by the FBI is law enforcement sensitive, and pursuant to FBI policy, cannot be released to the general public.

3. As a pen register/trap and trace device, as defined in 18 U.S.C. §§ 3127(3) and (4), the equipment used in this case can only record, decode or capture electronic impulses which identify the originating number of a source of electronic communications, or other

CELLSITE-13634

dialing, routing, signaling and addressing information utilized in the processing and transmitting of electronic communications. To comply with the legal definition of a pen register/trap and trace device, the equipment used in this case is unable to upload, encode or write any information to a target device. If the equipment were capable of these functions, it would no longer be in compliance with the statutory definition of a pen register/trap and trace device. Therefore, the equipment used in this case is technologically unable to take any action to reprogram the hardware or software in the aircard or the defendant's laptop.

4. Further, 18 U.S.C. §§ 3127(3) and (4) specifically prohibit pen register or trap and trace devices from recording, decoding or capturing the substantive content of any communication. Were the equipment to do this, by statute, it would no longer be a pen register/trap and trace device. Instead, it would be an electronic intercept device regulated by Title III. To ensure that the content of communications is not intercepted, in accordance with 18 U.S.C. §3121(c), all pen register/trap and trace devices used by government agencies must be restricted from recording or decoding any data or impulses not strictly related to the dialing, routing, signaling or addressing information utilized in the processing or transmitting of wire or electronic communications. The equipment used in this case was in compliance with the requirements of the statutes cited above. Therefore, the pen register/trap and trace equipment used to locate the defendant's aircard did not capture, collect, decode, view, or otherwise obtain any content transmitted from

CELLSITE-13635

the aircard, and therefore was unable to pass any of this information from the aircard to Verizon Wireless.

5. FBI policy requires that at the conclusion of a location operation, FBI technical personnel are to purge all data stored in the pen register/trap and trace equipment. During a location operation, the electronic serial numbers (ESNs) (or their equivalent) from all wireless devices in the immediate area of the FBI device that subscribe to a particular provider may be incidentally recorded, including those of innocent, non-target devices. Purging is done by the FBI as an additional, internal procedural safeguard to ensure (1) that the privacy rights of those innocent third parties are maintained, (2) that the FBI does not store or maintain pen register/trap and trace data beyond the scope of its legal authorization, or (3) that the FBI does not collect information about individuals who are not the subject of criminal or national security investigations.

6. I declare under penalty of perjury that the foregoing facts are true and correct.

[redacted]

Should we schedule a meeting with [redacted] (I think [redacted] has dealt with [redacted] in the past) to talk about this? It would be a good opportunity for a meet and greet.

Thanks,

[redacted]

I am inquiring as to how you would like me to proceed. I have a request from the [redacted] OTD has worked for several years to [redacted] upon acceptance of the attached NDA. Before [redacted] can be made by [redacted] an NDA must be signed. We can pursue this in two ways: 1. You or your SAC can submit the NDA to [redacted] have them sign the enclosed NDA, one per individual, or I can travel and perform same. Wanted to run this by each of you. [redacted] The attached documents are the requesting letter from [redacted] and the actual [redacted]/FBI approved NDA.. The requestors are required to each sign an NDA and are specifically identified in the attached pdf file. [redacted]

SSA [redacted]

First, to answer your original question, I will let you communicate directly with [redacted] re: the Non-Disclosure Agreement.

Second, I spoke to [redacted] this morning re: [redacted] He advised that they already have a [redacted] and they are very familiar with the non-disclosure issues. They are looking at [redacted] He advised that signing a new non-disclosure agreement form will not be a problem; he recalled that being part of the process the first time.

Even though we have a great relationship with [redacted] et al, I still prefer your unit deal directly with [redacted] re: the NDA.

Thank you very much for bringing this to our attention.

Yes, they are having difficulty. I have requested a contact at several times and they say they are working on it, but then I never hear from Last I heard was:

"...We are waiting to get the attorneys to see what they are going to work out. Thanks for your assistance. Hopefully once the attorneys talk and agree on language we will get this through."

It appears to me, that is interested in getting the NDA taken care of so they can , but the are not as anxious.

I am inquiring as to how you would like me to proceed. I have a request from the [redacted] OTD has worked for several years to [redacted] upon acceptance of the attached NDA. Before [redacted] an NDA must be signed. We can pursue this in two ways: 1. You or your SAC can submit the NDA to [redacted] have them sign the enclosed NDA, one per individual, or I can travel and perform same. Wanted to run this by each of you. [redacted] The attached documents are the requesting letter from [redacted] and the actual [redacted] FBI approved NDA.. The requestors are required to each sign an NDA and are specifically identified in the attached pdf file. [redacted]

Subject: FW: NDA

I am inquiring as to how you would like me to proceed. I have a request from the [redacted] OTD has worked for several years to [redacted] upon acceptance of the attached NDA. Before [redacted] an NDA must be signed. We can pursue this in two ways: 1. You or your SAC can submit the NDA to [redacted] have them sign the enclosed NDA, one per individual, or I can travel and perform same. Wanted to run this by each of you. [redacted] The attached documents are the requesting letter from [redacted] and the actual [redacted]/FBI approved NDA.. The requestors are required to each sign an NDA and are specifically identified in the attached pdf file. [redacted]

If I can answer any question feel free to contact me directly @ [redacted]

==========

(U//FOUO//LES) Good day. I was notified by [redacted] that the [redacted] WITT [redacted], my unit manages the [redacted] sign a nondisclosure agreement with the FBI. I can coordinate this requirement directly with [redacted] I can provide you with the NDA and background information should your division want to lead the task.

(U//FOUO//LES) [redacted] but is the result of several years effort [redacted] The underlying point of the NDA is that the [redacted] are Law Enforcement Sensitive, and we don't want such information released [redacted] absent specific approval by the AD OTD. [redacted] I've attached a copy of the NDA for your review, but it is not for dissemination outside the FBI.

<< File: NDA_[redacted] WITT 08282011.pdf >>

(U) As I said above, we can pursue this in one of two ways: 1) you or your SAC can submit the NDA, which my unit will prepare, to [redacted] and have them sign the NDA, or 2) I can communicate directly with [redacted] and perform same.

(U) Please advise how you would like me to proceed or, if I can answer any questions, please contact me.

Best regards,

[redacted]

Hello, [redacted] I recently succeeded [redacted] at the TTU and, dare I say, am just beginning to get a handle on this NDA process. As we did with [redacted] may I directly contact [redacted] to begin their agreement?

I noted your invitation for a visit to discuss WITT. If you'll permit me a few months to settle into this role, I would be pleased to make the trip out your way.

Best regards,
[redacted]

Re: Purchase of Wireless Collection Equipment/Technology and Non-Disclosure Obligations

LAW ENFORCEMENT SENSITIVE (LES): The information in this document is the property of the Federal Bureau of Investigation (FBI) and may be distributed within the Federal Government (and its contractors), U.S. intelligence, law enforcement, public safety or protection officials and individuals with a need to know. Distribution beyond these entities without FBI Operational Technology Division authorization is prohibited. Precautions should be taken to ensure this information is stored and/or destroyed in a manner that precludes unauthorized access. Information bearing the LES caveat may not be used in legal proceedings without first receiving authorization from the originating agency. Recipients are prohibited from subsequently posting the information marked LES on a website on an unclassified network.

CELL/OTD 017122

(1) I would like to know what the FBI's guidelines are regarding what orders are required for the use of a stingray, particularly as it pertains to location information. Do they require a search warrant or a different type of order? Are agents instructed to try to get a warrant if possible but a lesser order if not? What is the legal analysis that supports this policy?

The specific equipment used by law enforcement agencies to obtain location information and the capabilities of that equipment are considered Law Enforcement Sensitive, since its public release could harm law enforcement efforts by compromising future use of the equipment. As a general matter, the type of information obtained with location identifying techniques is dialing, routing, addressing or signaling information that has historically been obtained pursuant to the Pen Register Statute (18 USC section 2131 et seq). That being said, Federal Courts are split on what legal authority is required to obtain location information on a prospective basis. Because of a prohibition against obtaining this information solely pursuant to a Pen Register/Trap and Trace order set forth in the Communications Assistance to Law Enforcement Act (CALEA, see 47 USC 1002), some District Courts require what has come to be known as a "hybrid" approach whereby a court order issued pursuant to the Pen Register Statute (18 USC section 3121 et seq) is combined with what is known as a "2703(d) order" (reference to 18 USC 2703(d), part of the Stored Communications Act). Other District Courts have held a search warrant based upon probable cause is necessary to obtain location information on a prospective basis.

In utilizing this equipment and data, the FBI conducts all investigations in accordance with the Attorney General Guidelines and the FBI's Domestic Investigations and Operations Guide.

(2) Do the instructions vary by region?

Generally speaking, the FBI advises our field offices to work closely with the relevant U.S. Attorney's Office to adhere to the legal requirements of their respective District as set forth in case law or court decisions/precedent. If the FBI believes the use of any technology or technique may provide information on an individual while that person is in a location where he or she would have a reasonable expectation of privacy, it is FBI policy to obtain a search warrant.

(3) I would like to know what the FBI policy is regarding data from stingrays being expunged. In the case I'm covering, the Agent, in the application for the use of device, requested that data obtained by the court order be expunged at the end of the mission to locate the cellular device. This request was granted, and that data was expunged.

With regard to the expungement of location information obtained through use of this type of equipment by the FBI, our policy since the 1990's has been to purge or "expunge" all information obtained during a location operation.

(4) USAGE INFORMATION -- I would like any information that the FBI might be able to provide on how helpful these "stingray" type devices are, how frequently they are used and whether their use has increased or decreased in the past couple of years.

Location information continues to be a vital component in law enforcement investigations at the federal, state and local levels. All levels of law enforcement need to maintain the ability to utilize location information pursuant to lawful authority.

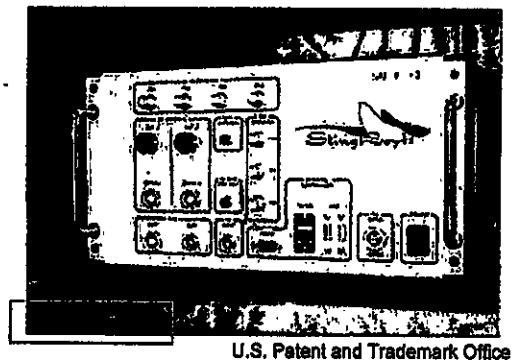
'Stingray' Phone Tracker Fuels Constitutional Clash

SUBSCRIBER CONTENT PREVIEW

FOR FULL ACCESS LOG IN OR SUBSCRIBE NOW - GET 2 WEEKS FREE

By JENNIFER VALENTINO-DEVRIES

For more than a year, federal authorities pursued a man they called simply "the Hacker." Only after using a little known cellphone-tracking device—a stingray—were they able to zero in on a California home and make the arrest.



U.S. Patent and Trademark Office

A Harris StingRay II, one of several devices dubbed 'stingrays.'

Stingrays are designed to locate a mobile phone even when it's not being used to make a call. The Federal Bureau of Investigation considers the devices to be so critical that it has a policy of deleting the data gathered in their use, mainly to keep suspects in the dark about their capabilities, an FBI official told The Wall Street Journal in response to inquiries.

A stingray's role in nabbing the alleged "Hacker"—Daniel David Rigmaiden—is shaping up as a possible test of the legal standards for using these devices in investigations. The FBI says it obtains appropriate court approval to use the device.

CELLSITE-13145
9/26/2011

Stingrays are one of several new technologies used by law enforcement to track people's locations, often without a search warrant. These techniques are driving a constitutional debate about whether the Fourth Amendment, which prohibits unreasonable searches and seizures, but which was written before the digital age, is keeping pace with the times.

On Nov. 8, the Supreme Court will hear arguments over whether or not police need a warrant before secretly installing a GPS device on a suspect's car and tracking him for an extended period. In both the Senate and House, new bills would require a warrant before tracking a cellphone's location.

Digits: How 'Stingray' Devices Work

Digits: How Technology Is Testing the Fourth Amendment

And on Thursday in U.S. District Court of Arizona, Judge David G. Campbell is set to hear a request by Mr. Rigmaiden, who is facing fraud charges, to have information about the government's secret techniques disclosed to him so he can use it in his defense. Mr. Rigmaiden maintains his innocence and says that using stingrays to locate devices in homes without a valid warrant "disregards the United States Constitution" and is illegal.

His argument has caught the judge's attention. In a February hearing, according to a transcript, Judge Campbell asked the prosecutor, "Were there warrants obtained in connection with the use of this device?"

The prosecutor, Frederick A. Battista, said the government obtained a "court order that satisfied [the] language" in the federal law on warrants. The judge then asked how an order or warrant could have been obtained without telling the judge what technology was being used. Mr. Battista said: "It was a standard practice, your honor."

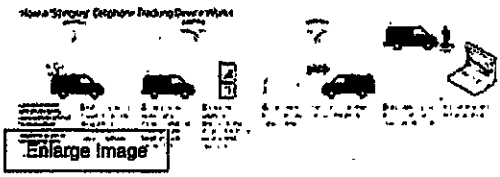
Judge Campbell responded that it "can be litigated whether those orders were appropriate."

On Thursday the government will argue it should be able to withhold details about the tool used to locate Mr. Rigmaiden, according to documents filed by the prosecution. In a statement to the Journal, Sherry Sabol, Chief of the Science & Technology Office for the FBI's Office of General Counsel, says that information about stingrays and related technology is "considered Law Enforcement Sensitive, since its public release could harm law enforcement efforts by compromising future use of the equipment."

Availabl

Invest
Faith in

CELLSITE-13146



The prosecutor, Mr. Battista, told the judge that the government worries that disclosure would make the gear "subject to being defeated or avoided or detected."

A stingray works by mimicking a cellphone tower, getting a phone to connect to it and measuring signals from the phone. It lets the stingray operator "ping," or send a signal to, a phone and locate it as long as it is powered on, according to documents reviewed by the Journal. The device has various uses, including helping police locate suspects and aiding search-and-rescue teams in finding people lost in remote areas or buried in rubble after an accident.

The government says "stingray" is a generic term. In Mr. Rigmaiden's case it remains unclear which device or devices were actually used.

The best known stingray maker is Florida-based defense contractor Harris Corp. A spokesman for Harris declined to comment.

Harris holds trademarks registered between 2002 and 2008 on several devices, including the StingRay, StingRay II, AmberJack, KingFish, TriggerFish and LoggerHead. Similar devices are available from other manufacturers. According to a Harris document, its devices are sold only to law-enforcement and government agencies.

Some of the gadgets look surprisingly old-fashioned, with a smattering of switches and lights scattered across a panel roughly the size of a shoebox, according to photos of a Harris-made StingRay reviewed by the Journal. The devices can be carried by hand or mounted in cars, allowing investigators to move around quickly.

A rare public reference to this type of technology appeared this summer in the television crime drama "The Closer." In the episode, law-enforcement officers use a gadget they called a "catfish" to track cellphones without a court order.

The U.S. armed forces also use stingrays or similar devices, according to public contract notices. Local law enforcement in Minnesota, Arizona, Miami and Durham, N.C., also either possess the devices or have considered buying them, according to interviews and published requests for funding.

The sheriff's department in Maricopa County, Ariz., uses the equipment "about on a monthly basis," says Sgt. Jesse Spurgin. "This is for location only. We can't listen in on conversations," he says.

Sgt. Spurgin says officers often obtain court orders, but not necessarily search warrants, when using the device. To obtain a search warrant from a court, officers as a rule need to show "probable cause," which is generally defined as a reasonable belief, based on factual evidence, that a crime was committed. Lesser standards apply to other court orders.

A spokeswoman with the Bureau of Criminal Apprehension in Minnesota says officers don't need to seek search warrants in that state to use a mobile tracking device because it "does not intercept communication, so no wiretap laws would apply."

CELLSITE-13147

FBI and Department of Justice officials have also said that investigators don't need search warrants. Associate Deputy Attorney General James A. Baker and FBI General Counsel Valerie E. Caproni both said at a panel at the Brookings Institution in May that devices like these fall into a category of tools called "pen registers," which require a lesser order than a warrant. Pen registers gather signals from phones, such as phone numbers dialed, but don't receive the content of the communications.

To get a pen-register order, investigators don't have to show probable cause. The Supreme Court has ruled that use of a pen register doesn't require a search warrant because it doesn't involve interception of conversations.

But with cellphones, data sent includes location information, making the situation more complicated because some judges have found that location information is more intrusive than details about phone numbers dialed. Some courts have required a slightly higher standard for location information, but not a warrant, while others have held that a search warrant is necessary.

The prosecution in the Rigmaiden case says in court documents that the "decisions are made on a case-by-case basis" by magistrate and district judges. Court records in other cases indicate that decisions are mixed, and cases are only now moving through appellate courts.

The FBI advises agents to work with federal prosecutors locally to meet the requirements of their particular district or judge, the FBI's Ms. Sabol says. She also says it is FBI policy to obtain a search warrant if the FBI believes the technology "may provide information on an individual while that person is in a location where he or she would have a reasonable expectation of privacy."

Experts say lawmakers and the courts haven't yet settled under what circumstances locating a person or device constitutes a search requiring a warrant. Tracking people when they are home is particularly sensitive because the Fourth Amendment specifies that people have a right to be secure against unreasonable searches in their "houses."

"The law is uncertain," says Orin Kerr, a professor at George Washington University Law School and former computer-crime attorney at the Department of Justice. Mr. Kerr, who has argued that warrants should be required for some, but not all, types of location data, says that the legality "should depend on the technology."

In the case of Mr. Rigmaiden, the government alleges that as early as 2005, he began filing fraudulent tax returns online. Overall, investigators say, Mr. Rigmaiden electronically filed more than 1,900 fraudulent tax returns as part of a $4 million plot.

Federal investigators say they pursued Mr. Rigmaiden "through a virtual labyrinth of twists and turns." Eventually, they say they linked Mr. Rigmaiden to use of a mobile-broadband card, a device that lets a computer connect to the Internet through a cellphone network.

Investigators obtained court orders to track the broadband card. Both orders remain sealed, but portions of them have been quoted by the defense and the prosecution.

These two documents are central to the clash in the Arizona courtroom. One authorizes a "pen register" and clearly isn't a search warrant. The other document is more complex. The prosecution says it is a type of search warrant and that a finding of probable cause was made.

But the defense argues that it can't be a proper search warrant, because among other things it allowed investigators to delete all the tracking data collected, rather than reporting back to the judge.

Legal experts who spoke with the Journal say it is difficult to evaluate the order, since it remains sealed. In general, for purposes of the Fourth Amendment, the finding of probable cause is most important in determining whether a search is reasonable because that requirement is specified in the Constitution itself, rather than in legal statutes, says Mr. Kerr.

But it is "odd" for a search warrant to allow deletion of evidence before a case goes to trial, says Paul Ohm, a professor at the University of Colorado Law School and a former computer-crime attorney at the Department of Justice. The law governing search warrants specifies how the warrants are to be executed and generally requires information to be returned to the judge.

Even if the court finds the government's actions acceptable under the Fourth Amendment, deleting the data is "still something we might not want the FBI doing," Mr. Ohm says.

The government says the data from the use of the stingray has been deleted and isn't available to the defendant. In a statement, the FBI told the Journal that "our policy since the 1990s has been to purge or 'expunge' all information obtained during a location operation" when using stingray-type gear.

As a general matter, Ms. Sabol says, court orders related to stingray technology "will include a directive to expunge information at the end of the location operation."

Ms. Sabol says the FBI follows this policy because its intent isn't to use the data as evidence in court, but rather to simply find the "general location of their subject" in order to start collecting other information that can be used to justify a physical search of the premises.

In the Rigmaiden example, investigators used the stingray to narrow down the location of the broadband card. Then they went to the apartment complex's office and learned that one resident had used a false ID and a fake tax return on the renter's application, according to court documents.

Based on that evidence, they obtained a search warrant for the apartment. They found the broadband card connected to a computer.

Mr. Rigmaiden, who doesn't confirm or deny ownership of the broadband card, is arguing he should be given information about the device and about other aspects of the mission that located him.

In the February hearing, Judge Campbell said he might need to weigh the government's claim of privilege against the defendant's Fourth Amendment rights, and asked the prosecution, "How can we litigate in this case whether this technology that was used in this case violates the Fourth Amendment without knowing precisely what it can do?"

Subject: Wall Street Journal request -- legal status of "stingray" technology

Hi.

b6 -1, -2
b7C -1, -2

Thanks so much for helping me out.

I'm [redacted] and am writing about the use of "stingray" type devices, which are used generally to locate or otherwise get data on cellular devices. As an example of the use of this technology, I'm writing about a case in U.S. District Court in the District of Arizona in which the FBI used one of these devices. (It's unclear whether what was used was a stingray, a triggerfish, or something else. The prosecution explains that "stingray" is the generic term used.)

Currently, the judge in the case is set to hear the defendant's motion for disclosure of more information on the device and techniques used; the prosecution says that these matters are law enforcement sensitive.

CELLSITE-13059

I understand this technology is very sensitive for the FBI; however, I would very much like to get the FBI's views on this technology. I do not want to only quote the ACLU in this matter and would appreciate your help.

Here's what I'm looking for:

LEGAL INFORMATION
(1) I would like to know what the FBI's guidelines are regarding what orders are required for the use of a stingray, particularly as it pertains to location information. Do they require a search warrant or a different type of order? Are agents instructed to try to get a warrant if possible but a lesser order if not? What is the legal analysis that supports this policy? Do the instructions vary by region? Things like that.

(2) I would like to know what the FBI policy is regarding data from stingrays being expunged. In the case I'm covering, the Agent, in the application for the use of device, requested that data obtained by the court order be expunged at the end of the mission to locate the cellular device. This request was granted, and that data was expunged.

USAGE INFORMATION
I would like any information that the FBI might be able to provide on how helpful these "stingray" type devices are, how frequently they are used and whether their use has increased or decreased in the past couple of years.

I'm not on a daily deadline for this story, but I am on a deadline. The story needs to be sent to my editors in the next few days, so I would hope to talk with someone as soon as possible.

Thank you.

Best Regards,

[redacted]

Subject: FW: Wall Street Journal request -- legal status of "stingray" technology

Good morning Ms. Caproni. I wonder if you may be able to look at one more media inquiry? For old times' sake perhaps? Or else maybe point me in the right direction? Specific questions are listed below.

Many thanks,

Subject: Wall Street Journal request -- legal status of "stingray" technology

Hi.

b6 -2
b7C -2

Thanks so much for helping me out.

I'm [redacted] and am writing about the use of "stingray" type devices, which are used generally to locate or otherwise get data on cellular devices. As an example of the use of this technology, I'm writing about a case in U.S. District Court in the District of Arizona in which the FBI used one of these devices. (It's unclear whether what was used was a stingray, a triggerfish, or something else. The prosecution explains that "stingray" is the generic term used.)

Currently, the judge in the case is set to hear the defendant's motion for disclosure of more information on the device and techniques used; the prosecution says that these matters are law enforcement sensitive.

I understand this technology is very sensitive for the FBI; however, I would very much like to get the FBI's views on this technology. I do not want to only quote the ACLU in this matter and would appreciate your help.

Here's what I'm looking for:

LEGAL INFORMATION
(1) I would like to know what the FBI's guidelines are regarding what orders are required for the use of a stingray, particularly as it pertains to location information. Do they require a search warrant or a different type of order? Are agents instructed to try to get a warrant if possible but a lesser order if not? What is the legal analysis that supports this policy? Do the instructions vary by region? Things like that.

(2) I would like to know what the FBI policy is regarding data from stingrays being expunged. In the case I'm covering, the Agent, in the application for the use of device, requested that data obtained by the court order be expunged at the end of the mission to locate the cellular device. This request was granted, and that data was expunged.

USAGE INFORMATION
I would like any information that the FBI might be able to provide on how helpful these "stingray" type devices are, how frequently they are used and whether their use has increased or decreased in the past couple of years.

I'm not on a daily deadline for this story, but I am on a deadline. The story needs to be sent to my editors in the next few days, so I would hope to talk with someone as soon as possible.

Thank you.

Best Regards,

[redacted]

Hi Chris and Sherry.

Below are sentences and paragraphs from the story, which is set to run in Thursday's paper. Please let me know if you are aware of any factual errors in any of them. I'll **need a response for my editors by midday** although we will have a bit of time after that to go back and forth. Sometimes the best thing to do is let me know early on which statements have problems so we can work it out, but it's up to you.

b6 -1, -2
b7C -1, -2

(Some items you may not have adequate information on, like very general statements, or statements about the specifics of the Arizona case. These are included mainly to provide you with context. We don't like subjects of stories to be surprised by anything when the story runs. If you feel you don't have enough information to evaluate a statement, just say so. Not a problem.)

Thanks so much for your help, again. I realize this is very sensitive and an important tool for you; I also feel like people have a lot of questions about this general topic and I want to make sure I present everything as accurately as possible.

I would appreciate it if you could tell me that you received this email.

Best,

[redacted]

* Stingrays are designed to locate a mobile phone even when it's not being used to make a call.

* A stingray works by mimicking a cellphone tower, getting a phone to connect to it and measuring signals from the phone. It allows the stingray operator to ping a phone and find it if it is powered on, according to documents reviewed by the Journal. The device has various uses, including helping police locate suspects and aiding search-and-rescue teams in finding people lost in remote areas or buried in rubble after an accident.

* Stingrays are one of several new technologies used by law enforcement to track people's locations, often without a warrant. The technologies are driving a broad Constitutional debate about whether the Fourth Amendment, which prohibits unreasonable searches and seizures, but which was written before the digital age, is keeping pace with the times.

FBI is concerned the first sentence (bullet above) is misleading. While the equipment may be used without a warrant, it is used only pursuant to lawful authority – court order issued pursuant to the Pen Register Statute and section 2703(d) of the Stored Communications Act.

* A stingray's role in nabbing the alleged "Hacker"—Daniel David Rigmaiden—is shaping up as a possible test of the legal standards for using these devices in investigations. The FBI says no warrant is required and that standards vary depending on the state and district.

The FBI believes the second sentence is misleading. The FBI uses this equipment pursuant to lawful authority – whether it be a search warrant or a court order issued pursuant to the Pen Register Statute and Stored Communications Act.

* The devices are so secret that the Federal Bureau of Investigation has a policy of deleting the data they gather out of a desire to keep the technology under wraps, an FBI official told The Wall Street Journal in response to inquiries about the device.

The FBI disagrees with the characterization of the technology being "so secret" – as noted previously, the FBI considers the equipment Law Enforcement Sensitive and our policy is intended to protect law enforcement capabilities so that subjects of law enforcement investigations do not learn how to evade or defeat lawfully authorized investigative activity.

* In Thursday's hearing, the government will argue that it should be able to withhold information on precisely what tool was used to locate Mr. Rigmaiden, according to documents filed by the prosecution.

* The FBI says information on stingrays and related technology is "considered Law Enforcement Sensitive, since its public release could harm law enforcement efforts by compromising future use of the equipment."

* The prosecutor, Mr. Battista, told the judge that the government's concern is that "if the actual information regarding ... this equipment is disclosed, it can be subject to being defeated or avoided or detected."

* In the case of the alleged hacker, Mr. Rigmaiden, the government faces the task of prosecuting him without disclosing details about the device it used to locate him.

* The government says "stingray" is a generic term, and in Mr. Rigmaiden's case it remains unclear which device or devices were actually used.

* "Location information continues to be a vital component in law enforcement investigations at the federal, state and local levels," an FBI official told the Journal.

* FBI and Department of Justice officials have said that investigators don't need to get search warrants to use stingray devices. Associate Deputy Attorney General James A. Baker and FBI General Counsel Valerie E. Caproni both said at a panel discussion at the Brookings Institution in May that devices like these fall into a category of tools called "pen registers" that require a lesser order than a warrant. Pen registers gather signals from phones, such as phone numbers dialed, but don't receive the content of the communications.

* To get a pen-register order, investigators must show only that the information likely to be obtained is "relevant to an ongoing criminal investigation." The Supreme Court has ruled that use of a pen register doesn't require a search warrant, because it doesn't involve interception of conversations.

Where the hybrid order is required, the standard cited is accurate for the Pen Register. Section 2703(d), however, requires that the information sought is "relevant and material" to an ongoing investigation. Also, from legal perspective, a pen register may be used because the subject does not have a "reasonable expectation of privacy" in the information sought. Pen register information is provided by the subject to a third party in order for the equipment to work, ie, the phone company.

* But with cellphones, data sent in real time includes location information, making the situation more complicated, because some judges have found that location information is more intrusive than data on the numbers dialed by a phone. Some courts have required a slightly higher standard for location information, but not a warrant, while others have held that a search warrant is necessary.

* The FBI advises agents to work with the local federal prosecutors to conform to the legal requirements of their particular district, an FBI official said. He added that it is FBI policy to obtain a search warrant if the FBI believes technology "may provide information on an individual while that person is in a location where he or she would have a reasonable expectation of privacy."

* Experts say lawmakers and the courts haven't yet settled whether locating a person or device in a home constitutes a "search" that requires a warrant.

* The FBI told the Journal that "with regard to the expungement of location information obtained through use of this type of equipment by the FBI, our policy since the 1990s has been to purge or 'expunge' all information obtained during a location operation."

* The FBI allows this policy because information gathered in these operations "is intended to be used only as lead information to assist investigators in identifying the general location of their subject and is not intended to be used as substantive evidence in a case," the official said.

* In the Rigmaiden case, the investigators used the stingray to narrow down the location of the broadband card. One of the Phoenix federal agents then said in a July 2008 email that the team needed "to develop independent probable cause" and that the "FBI does not want to disclose the [redacted] (understandably so)."

OK, here's what we worked out. I think it addresses your concerns, albeit not in legal language.

We have a "no surprises" policy toward subjects in our articles, so I'm mainly sending this to make sure we are all on the same page in terms of what is going to be in the paper tomorrow.

Thank you for being so incredibly helpful. I think your comments have really made the article more balanced.

Best Regards,

[redacted]

*** The Federal Bureau of Investigation considers the devices to be so critical that it has a policy of deleting the data gathered in their use, mainly to keep suspects in the dark about their capabilities, an FBI official told The Wall Street Journal in response to inquiries.**

*** A stingray's role in nabbing the alleged "Hacker"—Daniel David Rigmaiden—is shaping up as a possible test of the legal standards for using these devices in investigations. The FBI says it obtains appropriate court approval to use the device.**

*** Stingrays are one of several new technologies used by law enforcement to track people's locations, often without a search warrant. (Those two paragraphs come one right after the other, so we are not going to repeat the same phrase.)**

*** To get a pen-register order, investigators don't have to show probable cause. The Supreme Court has ruled that use of a pen register doesn't require a search warrant because it doesn't involve interception of conversations. (Just took out all the technical legal requirements because it was going to get so confusing for our readers with the 2703(d) stuff and so forth.)**

Yes. Thank you.

Also! We have changed at least one of the sentences that I know of to try to make it clearer that it's law enforcement techniques you are trying to protect, not the specific device.

Stingrays are designed to locate a mobile phone even when it's not being used to make a call. The devices are so secret that the Federal Bureau of Investigation has a policy of deleting the data they gather, out of a desire to keep its tactics under wraps, an FBI official told The Wall Street Journal in response to inquiries.

Caproni both said at a panel discussion at the Brookings Institution in May that devices like these fall into a category of tools called "pen registers" that require a lesser order than a warrant. Pen registers gather signals from phones, such as phone numbers dialed, but don't receive the content of the communications.

* To get a pen-register order, investigators must show only that the information likely to be obtained is "relevant to an ongoing criminal investigation." The Supreme Court has ruled that use of a pen register doesn't require a search warrant, because it doesn't involve interception of conversations.

* But with cellphones, data sent in real time includes location information, making the situation more complicated, because some judges have found that location information is more intrusive than data on the numbers dialed by a phone. Some courts have required a slightly higher standard for location information, but not a warrant, while others have held that a search warrant is necessary.

CELLSITE-13076

* The FBI advises agents to work with the local federal prosecutors to conform to the legal requirements of their particular district, an FBI official said. He added that it is FBI policy to obtain a search warrant if the FBI believes technology "may provide information on an individual while that person is in a location where he or she would have a reasonable expectation of privacy."

* Experts say lawmakers and the courts haven't yet settled whether locating a person or device in a home constitutes a "search" that requires a warrant.

* The FBI told the Journal that "with regard to the expungement of location information obtained through use of this type of equipment by the FBI, our policy since the 1990s has been to purge or 'expunge' all information obtained during a location operation."

* The FBI allows this policy because information gathered in these operations "is intended to be used only as lead information to assist investigators in identifying the general location of their subject and is not intended to be used as substantive evidence in a case," the official said.

* In the Rigmaiden case, the investigators used the stingray to narrow down the location of the broadband card. One of the Phoenix federal agents then said in a July 2008 email that the team needed "to develop independent probable cause" and that the "FBI does not want to disclose the [redacted] (understandably so)."

H[redacted]and Sherry.

Below are sentences and paragraphs from the story, which is set to run in Thursday's paper. Please let me know if you are aware of any factual errors in any of them. I'll **need a response for my editors by midday**, although we will have a bit of time after that to go back and forth. Sometimes the best thing to do is let me know early on which statements have problems so we can work it out, but it's up to you.

b6 -1, -2
b7C -1, -2

(Some items you may not have adequate information on, like very general statements, or statements about the specifics of the Arizona case. These are included mainly to provide you with context. We don't like subjects of stories to be surprised by anything when the story runs. If you feel you don't have enough information to evaluate a statement, just say so. Not a problem.)

Thanks so much for your help, again. I realize this is very sensitive and an important tool for you; I also feel like people have a lot of questions about this general topic and I want to make sure I present everything as accurately as possible.

I would appreciate it if you could tell me that you received this email.

Best,

[redacted]

* Stingrays are designed to locate a mobile phone even when it's not being used to make a call.

CELLSITE-13078

* A stingray works by mimicking a cellphone tower, getting a phone to connect to it and measuring signals from the phone. It allows the stingray operator to ping a phone and find it if it is powered on, according to documents reviewed by the Journal. The device has various uses, including helping police locate suspects and aiding search-and-rescue teams in finding people lost in remote areas or buried in rubble after an accident.

* Stingrays are one of several new technologies used by law enforcement to track people's locations, often without a warrant. The technologies are driving a broad Constitutional debate about whether the Fourth Amendment, which prohibits unreasonable searches and seizures, but which was written before the digital age, is keeping pace with the times.

* A stingray's role in nabbing the alleged "Hacker"—Daniel David Rigmaiden—is shaping up as a possible test of the legal standards for using these devices in investigations. The FBI says no warrant is required and that standards vary depending on the state and district.

* The devices are so secret that the Federal Bureau of Investigation has a policy of deleting the data they gather out of a desire to keep the technology under wraps, an FBI official told The Wall Street Journal in response to inquiries about the device.

* In Thursday's hearing, the government will argue that it should be able to withhold information on precisely what tool was used to locate Mr. Rigmaiden, according to documents filed by the prosecution.

* The FBI says information on stingrays and related technology is "considered Law Enforcement Sensitive, since its public release could harm law enforcement efforts by compromising future use of the equipment."

* The prosecutor, Mr. Battista, told the judge that the government's concern is that "if the actual information regarding ... this equipment is disclosed, it can be subject to being defeated or avoided or detected."

* In the case of the alleged hacker, Mr. Rigmaiden, the government faces the task of prosecuting him without disclosing details about the device it used to locate him.

* The government says "stingray" is a generic term, and in Mr. Rigmaiden's case it remains unclear which device or devices were actually used.

* "Location information continues to be a vital component in law enforcement investigations at the federal, state and local levels," an FBI official told the Journal.

* FBI and Department of Justice officials have said that investigators don't need to get search warrants to use stingray devices. Associate Deputy Attorney General James A. Baker and FBI General Counsel Valerie E. Caproni both said at a panel discussion at the Brookings Institution in May that devices like these fall into a category of tools called "pen registers" that require a lesser order than a warrant. Pen registers gather signals from phones, such as phone numbers dialed, but don't receive the content of the communications.

* To get a pen-register order, investigators must show only that the information likely to be obtained is "relevant to an ongoing criminal investigation." The Supreme Court has ruled that use of a pen register doesn't require a search warrant, because it doesn't involve interception of conversations.

* Stingrays are designed to locate a mobile phone even when it's not being used to make a call.

* A stingray works by mimicking a cellphone tower, getting a phone to connect to it and measuring signals from the phone. It allows the stingray operator to ping a phone and find it if it is powered on, according to documents reviewed by the Journal. The device has various uses, including helping police locate suspects and aiding search-and-rescue teams in finding people lost in remote areas or buried in rubble after an accident.

* Stingrays are one of several new technologies used by law enforcement to track people's locations, often without a warrant. The technologies are driving a broad Constitutional debate about whether the Fourth Amendment, which prohibits unreasonable searches and seizures, but which was written before the digital age, is keeping pace with the times.

* A stingray's role in nabbing the alleged "Hacker"—Daniel David Rigmaiden—is shaping up as a possible test of the legal standards for using these devices in investigations. The FBI says no warrant is required and that standards vary depending on the state and district.

* The devices are so secret that the Federal Bureau of Investigation has a policy of deleting the data they gather out of a desire to keep the technology under wraps, an FBI official told The Wall Street Journal in response to inquiries about the device.

* In Thursday's hearing, the government will argue that it should be able to withhold information on precisely what tool was used to locate Mr. Rigmaiden, according to documents filed by the prosecution.

* The FBI says information on stingrays and related technology is "considered Law Enforcement Sensitive, since its public release could harm law enforcement efforts by compromising future use of the equipment."

* The prosecutor, Mr. Battista, told the judge that the government's concern is that "if the actual information regarding ... this equipment is disclosed, it can be subject to being defeated or avoided or detected."

* In the case of the alleged hacker, Mr. Rigmaiden, the government faces the task of prosecuting him without disclosing details about the device it used to locate him.

* The government says "stingray" is a generic term, and in Mr. Rigmaiden's case it remains unclear which device or devices were actually used.

* "Location information continues to be a vital component in law enforcement investigations at the federal, state and local levels," an FBI official told the Journal.

* FBI and Department of Justice officials have said that investigators don't need to get search warrants to use stingray devices. Associate Deputy Attorney General James A. Baker and FBI General Counsel Valerie E. Caproni both said at a panel discussion at the Brookings Institution in May that devices like these fall into a category of tools called "pen registers" that require a lesser order than a warrant. Pen registers gather signals from phones, such as phone numbers dialed, but don't receive the content of the communications.

* To get a pen-register order, investigators must show only that the information likely to be obtained is "relevant to an ongoing criminal investigation." The Supreme Court has ruled that use of a pen register doesn't require a search warrant, because it doesn't involve interception of conversations.

* But with cellphones, data sent in real time includes location information, making the situation more complicated, because some judges have found that location information is more intrusive than data on the numbers dialed by a phone. Some courts have required a slightly higher standard for location information, but not a warrant, while others have held that a search warrant is necessary.

* The FBI advises agents to work with the local federal prosecutors to conform to the legal requirements of their particular district, an FBI official said. He added that it is FBI policy to obtain a search warrant if the FBI believes technology "may provide information on an individual while that person is in a location where he or she would have a reasonable expectation of privacy."

* Experts say lawmakers and the courts haven't yet settled whether locating a person or device in a home constitutes a "search" that requires a warrant.

* The FBI told the Journal that "with regard to the expungement of location information obtained through use of this type of equipment by the FBI, our policy since the 1990s has been to purge or 'expunge' all information obtained during a location operation."

* The FBI allows this policy because information gathered in these operations "is intended to be used only as lead information to assist investigators in identifying the general location of their subject and is not intended to be used as substantive evidence in a case," the official said.

* In the Rigmaiden case, the investigators used the stingray to narrow down the location of the broadband card. One of the Phoenix federal agents then said in a July 2008 email that the team needed "to develop independent probable cause" and that the "FBI does not want to disclose the [redacted] (understandably so)."

H[redacted] and Sherry.

Below are sentences and paragraphs from the story, which is set to run in Thursday's paper. Please let me know if you are aware of any factual errors in any of them. I'll **need a response for my editors by midday** although we will have a bit of time after that to go back and forth. Sometimes the best thing to do is let me know early on which statements have problems so we can work it out, but it's up to you.

(Some items you may not have adequate information on, like very general statements, or statements about the specifics of the Arizona case. These are included mainly to provide you with context. We don't like subjects of stories to be surprised by anything when the story runs. If you feel you don't have enough information to evaluate a statement, just say so. Not a problem.)

Thanks so much for your help, again. I realize this is very sensitive and an important tool for you; I also feel like people have a lot of questions about this general topic and I want to make sure I present everything as accurately as possible.

I would appreciate it if you could tell me that you received this email.

Best,

[redacted]

CELLSITE-13117

* Stingrays are designed to locate a mobile phone even when it's not being used to make a call.

* A stingray works by mimicking a cellphone tower, getting a phone to connect to it and measuring signals from the phone. It allows the stingray operator to ping a phone and find it if it is powered on, according to documents reviewed by the Journal. The device has various uses, including helping police locate suspects and aiding search-and-rescue teams in finding people lost in remote areas or buried in rubble after an accident.

* Stingrays are one of several new technologies used by law enforcement to track people's locations, often without a warrant. The technologies are driving a broad Constitutional debate about whether the Fourth Amendment, which prohibits unreasonable searches and seizures, but which was written before the digital age, is keeping pace with the times.

* A stingray's role in nabbing the alleged "Hacker"—Daniel David Rigmaiden—is shaping up as a possible test of the legal standards for using these devices in investigations. The FBI says no warrant is required and that standards vary depending on the state and district.

* The devices are so secret that the Federal Bureau of Investigation has a policy of deleting the data they gather out of a desire to keep the technology under wraps, an FBI official told The Wall Street Journal in response to inquiries about the device.

* In Thursday's hearing, the government will argue that it should be able to withhold information on precisely what tool was used to locate Mr. Rigmaiden, according to documents filed by the prosecution.

* The FBI says information on stingrays and related technology is "considered Law Enforcement Sensitive, since its public release could harm law enforcement efforts by compromising future use of the equipment."

* The prosecutor, Mr. Battista, told the judge that the government's concern is that "if the actual information regarding ... this equipment is disclosed, it can be subject to being defeated or avoided or detected."

* In the case of the alleged hacker, Mr. Rigmaiden, the government faces the task of prosecuting him without disclosing details about the device it used to locate him.

* The government says "stingray" is a generic term, and in Mr. Rigmaiden's case it remains unclear which device or devices were actually used.

* "Location information continues to be a vital component in law enforcement investigations at the federal, state and local levels," an FBI official told the Journal.

* FBI and Department of Justice officials have said that investigators don't need to get search warrants to use stingray devices. Associate Deputy Attorney General James A. Baker and FBI General Counsel Valerie E. Caproni both said at a panel discussion at the Brookings Institution in May that devices like these fall into a category of tools called "pen registers" that require a lesser order than a warrant. Pen registers gather signals from phones, such as phone numbers dialed, but don't receive the content of the communications.

* To get a pen-register order, investigators must show only that the information likely to be obtained is "relevant to an ongoing criminal investigation." The Supreme Court has ruled that use of a pen register doesn't require a search warrant, because it doesn't involve interception of conversations.

* But with cellphones, data sent in real time includes location information, making the situation more complicated, because some judges have found that location information is more intrusive than data on the numbers dialed by a phone. Some courts have required a slightly higher standard for location information, but not a warrant, while others have held that a search warrant is necessary.

* The FBI advises agents to work with the local federal prosecutors to conform to the legal requirements of their particular district, an FBI official said. He added that it is FBI policy to obtain a search warrant if the FBI believes

technology "may provide information on an individual while that person is in a location where he or she would have a reasonable expectation of privacy."

* Experts say lawmakers and the courts haven't yet settled whether locating a person or device in a home constitutes a "search" that requires a warrant.

* The FBI told the Journal that "with regard to the expungement of location information obtained through use of this type of equipment by the FBI, our policy since the 1990s has been to purge or 'expunge' all information obtained during a location operation."

* The FBI allows this policy because information gathered in these operations "is intended to be used only as lead information to assist investigators in identifying the general location of their subject and is not intended to be used as substantive evidence in a case," the official said.

* In the Rigmaiden case, the investigators used the stingray to narrow down the location of the broadband card. Hi.

Thanks so much for helping me out.

I'm [redacted] and am writing about the use of "stingray" type devices, which are used generally to locate or otherwise get data on cellular devices. As an example of the use of this technology, I'm writing about a case in U.S. District Court in the District of Arizona in which the FBI used one of these devices. (It's unclear whether what was used was a stingray, a triggerfish, or something else. The prosecution explains that "stingray" is the generic term used.)

Currently, the judge in the case is set to hear the defendant's motion for disclosure of more information on the device and techniques used; the prosecution says that these matters are law enforcement sensitive.

I understand this technology is very sensitive for the FBI; however, I would very much like to get the FBI's views on this technology. I do not want to only quote the ACLU in this matter and would appreciate your help.

Here's what I'm looking for:

LEGAL INFORMATION
(1) I would like to know what the FBI's guidelines are regarding what orders are required for the use of a stingray, particularly as it pertains to location information. Do they require a search warrant or a different type of order? Are agents instructed to try to get a warrant if possible but a lesser order if not? What is the legal analysis that supports this policy? Do the instructions vary by region? Things like that.

(2) I would like to know what the FBI policy is regarding data from stingrays being expunged. In the case I'm covering, the Agent, in the application for the use of device, requested that data obtained by the court order be expunged at the end of the mission to locate the cellular device. This request was granted, and that data was expunged.

USAGE INFORMATION

I would like any information that the FBI might be able to provide on how helpful these "stingray" type devices are, how frequently they are used and whether their use has increased or decreased in the past couple of years.

I'm not on a daily deadline for this story, but I am on a deadline. The story needs to be sent to my editors in the next few days, so I would hope to talk with someone as soon as possible.

Thank you.

Best Regards,

[redacted]

Thanks for keeping me up to date.

I do have some information so far on the legal theories and policies involved here, from the documents that already exist in the example case and from some online research. I'll lay them out for you here just so you have them, in case it is helpful.

(1) General Counsel Valerie E. Caproni and Associate Deputy Attorney General James A. Baker, at a Brookings panel in May, said they thought these types of devices are pen registers and that somebody would need a pen register order to use them.

(2) The prosecution in the example case I'm looking at says the device is a pen register device, because it's not getting content like a wiretap would.

(3) The prosecution also says "U.S. magistrate judges and district judges across the country have debated whether cell phone tracking requires a hybrid order, a tracking warrant, or both." They say "these decisions are made on a case-by-case basis when the application is presented."

(4) I have not seen a full explanation in terms of policy for the deletion of the data from the device, except that the application for the order that involved deleting data has been described by the prosecution as "standard procedure" and "not a unique scenario." Additionally, investigators involved say in documents filed in the case that they developed "independent probable cause" after using the device because the "FBI does not want to disclose the [tracking device]" -- indicating the extreme sensitivity of the device and data from it.

I hope this is helpful in expediting the request. I know the topic is extremely sensitive, but it does seem like my questions have been broached before in a number of places. I would prefer to get a more comprehensive answer, but I can use the other info if I need to.

The gist of my story as it stands currently (subject to change by editors, as always) is that this is a very hotly debated area of the law right now, and it shows how tough it is to use cutting-edge technology without disclosing it in a way that will help offenders, all while trying to use laws that just don't keep up with this kind of innovation.

Do you have any sense of how long the process might take on your end? I'd just like to know what to tell my editors.

(It's unclear whether what was used was a stingray, a triggerfish, or something else. The prosecution explains that "stingray" is the generic term used.)

Currently, the judge in the case is set to hear the defendant's motion for disclosure of more information on the device and techniques used; the prosecution says that these matters are law enforcement sensitive.

I understand this technology is very sensitive for the FBI; however, I would very much like to get the FBI's views on this technology. I do not want to only quote the ACLU in this matter and would appreciate your help.

Here's what I'm looking for:

LEGAL INFORMATION
(1) I would like to know what the FBI's guidelines are regarding what orders are required for the use of a stingray, particularly as it pertains to location information. Do they require a search warrant or a different type of order? Are agents instructed to try to get a warrant if possible but a lesser order if not? What is the legal analysis that supports this policy? Do the instructions vary by region? Things like that.

(2) I would like to know what the FBI policy is regarding data from stingrays being expunged. In the case I'm covering, the Agent, in the application for the use of device, requested that data obtained by the court order be expunged at the end of the mission to locate the cellular device. This request was granted, and that data was expunged.

USAGE INFORMATION
I would like any information that the FBI might be able to provide on how helpful these "stingray" type devices are, how frequently they are used and whether their use has increased or decreased in the past couple of years.

I'm not on a daily deadline for this story, but I am on a deadline. The story needs to be sent to my editors in the next few days, so I would hope to talk with someone as soon as possible.

Thank you.

Best Regards,
